Pursuant to § 430.27(g), the Assistant Secretary shall publish in the **Federal Register** notice of each waiver granted, and any limiting conditions of each waiver.

On October 23, 1985, White Consolidated Industries, Inc. (WCI), filed a "Petition for Waiver" with the Office of Conservation and Renewable Energy of DOE in accordance with 10 CFR 430.27. At the same time WCI filed an "Application for Temporary Exception" with the Office of Hearings and Appeals (OHA) of DOE in accordance with 10 CFR § 205.125. On December 20, 1985, OHA issued a Decision and Order granting WCI partial temporary exception from the DOE refrigerator and refrigerator-freezer test procedure for its model refrigerator-freezer which uses an electronic defrost control system and which is manufactured by the firm. OHA's granting of partial temporary exception reflects WCI's request that it be allowed to use the test procedure prescribed by DOE in a waiver issued last year to another manufacturer. OHA determined that WCI, for temporary relief should use a test procedure similar, but not identical to the one requested for the WCI refrigerator-freezer, for temporary relief. OHA directed that WCI should use the long-time automatic defrost test procedures in Appendix A1 of 10 CFR Part 430 with a defrost timer run time (CT) of 12 hours. WCI had not submitted data in its petition for termporary exception to support a value of CT; therefore, OHA selected 12 hours as a reasonable appropoximation. OHA stipulated in its Decision and Order that the temporary exception relief granted shall remain in effect until the Office of Conservation and Renewable Energy of DOE issues a final Decision and Order with respect to WCI's Petition for Waiver under the authority of 10 CFR 430.27 or until the close of business on September 30, 1986, whichever occurs first.

With regard to WCI's Petition for Waiver, the Office of Conservation and Renewable Energy published the petition in the **Federal Register** and solicited comments, data, and information respecting the petition in conformance with the requirements of 10 CFR 430.27. 50 FR 51284 (December 16, 1985). Comments were received from one party, a manufacturer of refrigerators and refrigerator-freezers. These comments are discussed later in this notice.

The Office of Conservation and Renewable Energy consulted with the Federal Trade Commission on March 6, 1986, concerning the WCI petition.

Assertions and Determinations

WCI is a manufacturer of home appliances, including refrigerator-freezers. WCI has developed what it terms an "electronic defrost control system" (herein "EDC") for a model of refrigerator-freezer, Frigidaire Model FPCI18TDWO, that initiates defrost cycles in response to operating conditions and usage patters. WCI's petition requested DOE to grant WCI relief from the DOE test procedure for refrigerator and refrigerator-freezers for its EDC-equipped refrigerator-freezer model on the basis that the existing test procedure yields materially inaccurate estimates of the energy consumption of such units.

WCI stated that the EDC-equipped refrigerator-freezers initiates defrost cycles on the basis of compressor run times and the length of the preceding defrost period.

The petition states that under the conditions and procedures of the current DOE test procedure for refrigerator-freezers, the energy consumption of an EDC-equipped refrigerator will appear to be lower than a comparable timed-defrost unit. The petition explains that because the unit will defrost less frequently, less energy will be consumed during the test period, leading to test procedure results that do not represent accurately the unit's performance on a comparable basis with timed-defrost units.

Further, the petition seeks to use the alternate test procedure prescribed in DOE's Decision and Order granting Whirlpool Corporation (Whirlpool) waiver from DOE refrigerator-freezer test procedure for Whirlpool's refrigerator-freezer models equipped with electronic adaptive defrost controls. 50 FR 34186 (August 23, 1985).

UMI

VOL 51 ISS 80 AP 25 1986 UMI

Comments were received from one manufacturer of refrigerators and refrigerator-freezers, Whirlpool, in response to the publication of WCI's waiver request in the **Federal Register**. WCI submitted a rebuttal statement to DOE responding to Whirlpool's comments as provided by DOE's test procedure waiver regulations. The comments received and WCI's rebuttal to the comments are summarized below.

Whirlpool commented that it supports WCI's request for waiver on the basis that the existing DOE test procedure will not adequately test the EDC-equipped model for energy consumption, and that granting the waiver would be consistent with DOE's determination on the Whirlpool petition.

However, Whirlpool disagreed with the petition's request to use the alternate test procedure prescribed in the Whirlpool case. Whirlpool states that for its models equipped with the company's automatic defrost controls ("ADC"), the control may initiate a defrost after as little as 6 hours of compressor run time or as much as 144 hours of compressor run time, whereas, the WCI control initiates a defrost anytime between 8 and 48 hours of compressor run time. Thus, Whirlpool argues that under some conditions the WCI control would defrost as much as three times as frequently as the Whirlpool control. Whirlpool maintains that this is a strong indication that different factors than those used by Whirlpool should be used to represent the frequency of defrost in the equation used to calculate energy consumption for each basic model or each basic defrost controller. Whirlpool points out that its case for an alternate test procedure used an equation to calculate energy consumption in which the factor .33 represented the approximate frequency of defrosts for the ADC system in units of defrosts/day. Whirlpool states that while this factor was relatively accurate for its ADC system since it was based on company filed test data of the models in question, the factor .33 may not be appropriate for other adaptive defrost control systems.

In its rebuttal comments, WCI maintains that while Whirlpool implies that the factor .33 was derived from field tests of its ADC models in question, the factor was determined by DOE upon the recommendation of the National Bureau of Standards. 50 FR 34186 (August 23, 1985).

WCI states that the factor chosen by DOE to represent the defrost interval of an electronic adaptive control system should be used for all such systems regardless of manufacturer unless test data or detailed analyses clearly show differences in performance. Moreover, WCI contends that there is no basis for treating the two cases differently since neither firm has comparable field test data or any other valid basis for asserting that differences in performance exist.

Furthermore, WCI maintains that Whirlpool's petition indeed was granted without meaningful test data since DOE's August 23, 1985, Decision and Order on Whirlpool's petition stated, "Absent meaningful test data upon which to base a more refined solution, the approximation of CT at 36 hours was found to allow Whirlpool to report reasonable and comparable energy data." 50 FR 34186 (August 23, 1985).

DOE agrees with WCI that the existing DOE test procedure for refrigerators and refrigerator-freezers (Appendix A1) is not appropriate for testing its EDC-equipped refrigerator-freezer since it would not yield results reflective of the expected energy consumption of such units in actual usage and would be burdensome to conduct because of the extremely long length of each test period. DOE considers that WCI has provided sufficient evidence that it is deserving of relief from the DOE test procedure for refrigerators and refrigerator-freezers for its EDC-equipped refrigerator-freezer Frigidaire Model FPCI18TDWO.

DOE previously agreed in the case of Whirlpool's petition (Case No. RF-001) that the provisions for testing "long-time" automatic defrost refrigerator-freezers found in the existing DOE test procedure can be adapted for testing automatic or electronic defrost control-equipped refrigerator-freezer models. The primary issue in any such case is the determination of a representative time between defrost cycles.

As noted by WCI in its rebuttal comments, DOE consulted the National Bureau of Standards (NBS) regarding Whirlpool's waiver request since NBS performed all of the laboratory work associated with the development of the DOE test procedure for refrigerators and refrigerator-freezers. Based on its review of the information included in Whirlpool's petition, the comments received on the petition, and Whirlpool's rebuttal to these comments, NBS recommended that, should DOE act to order an alternate test procedure for Whirlpool's ADC-equipped refrigerator-freezer models, the alternate test should be the "long-time" automatic defrost test and the value for the typical time between defrost cycles for use in the alternate test should be three days (72 hours, 36 hours compressor run time) which equates to 0.33 cycles per day. NBS arrived at its recommended value on the basis that it credits the ADC-equipped units with 80 to 90 percent of the maximum energy reduction possible. (For this estimate the maximum energy reduction possible, i.e., 100 percent energy reduction, is defined to be the condition where a defrost operation never occurs.) DOE accepted the NBS recommendation.

With regard to WCI's comments on the use of Whirlpool's field test data, DOE did review these data, but only to determine whether they disputed the NBS recommended value for the typical time between defrost cycles. They did not. Therefore, WCI is correct in asserting that DOE's determination was not derived from Whirlpool's field test data.

With regard to WCI's EDC-equipped refrigerator-freezer, WCI has not provided any data to support a value for the time between defrost cycles. Based upon WCI's description of the EDC-equipped unit, DOE believes that it will likely defrost more frequently than an ADC model since the unit will defrost based on the "heater-on" time in the previous defrost period, whereas, the ADC considers not only "heater-on" time but other factors including door openings. DOE can only infer that this is the case without more data, including test data. Furthermore, without these data no determination can be made of typical time between defrost cycles. Conservation and Renewable Energy agrees with OHA, that without these data an approximation of this time is 24 hours. Therefore, today's Decision and Order specifies that WCI is to use an alternate test for its EDC-equipped refrigerator-freezer, Frigidaire Model FPCI18TDWO, and that the alternate test should be the "long-time" automatic defrost test and shall use a value of 12 hours for CT.

It is DOE's policy to require use of alternate test procedures in response to Petitions for Waiver for new product designs if such alternate test procedures will yield results which reasonably reflect the energy consumption and energy efficiency of such new product designs compared to the energy consumption and energy efficiency of comparable conventional products as tested under the existing test procedures. This long-standing policy was developed on the premise that it serves in the best interest of manufacturers and consumers alike: manufactures because it tends to promote competition on equal grounds and consumers because it promotes meaningful comparisons between products on the basis of their energy efficiency. In the case of WCI's EDC-equipped refrigerator-freezer model, DOE believes the alternate test procedure provided in this Decision and Order to reasonably reflect the energy consumption and energy efficiency of this product design as described in WCI's petition. If WCI submits data indicating that a value for CT other than 12 would be more appropriate, DOE will consider revising today's Decision and Order. However, in the absence of meaningful data upon which to base a more refined solution, an approximation of CT will allow WCI to report comparable energy data for its EDC-equipped refrigerator-freezer.

It is therefore ordered that:

(1) The "Petition for Waiver," filed by White Consolidated Industries, Inc. (Case No. RF-002), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3) and (4).

(2) Notwithstanding any contrary provisions of Appendix A1 of 10 CFR, Part 430, Subpart B, White Consolidated Industries, Inc., shall be permitted to test its Frigidaire Model FPCI18TDWO refrigerator-freezer equipped with an electronic defrost control system on the basis of the test procedure specified in 10 CFR, Part 430, with the modifications set forth below:

(i) Section 4.1.2 is modified by adding the following sentence at the end of the section:

"If the model being tested has an electronic defrost control, the provisions of section 4.1.2.2 shall apply."

(ii) Section 4.1.2.2 is added to read:

"4.1.2.2 Electronic Defrost Control. If the model being tested has an electronic defrost control system, the test time period shall consist of two parts. The first part shall be the same as the test for a unit having no defrost provisions (section 4.1.1). The second part shall start when a defrost period is deliberately initiated during a compressor "on" cycle and shall terminate at the third turn "on" of the compressor motor after initiating the defrost period or after four hours, whichever comes first."

(iii) Section 5.1.2 is modified by adding the following sentence at the end of the section:

"For models equipped with electronic defrost controls, compartment temperatatures shall be those measured in the first part of the test period specified in section 4.1.2.2."

(iv) Section 5.2.1.3 is added to read:

"5.2.1.3 Electronic Defrost Control. The energy consumption in kilowatt-hour per day shall be calculated equivalent to:

$$ET = (1440 \times EP1/T1) + [EP2 - (EP1 \times T2/T1)] \times 12/CT$$

where:

ET and 1440 are defined in 5.2.1.1

EP1 = energy expended in kilowatt-hours during the first part of the test

EP2 = energy expended in kilowatt-hours during the second part of the test

T1 = length of time in minutes of the first part of the test

T2 = length of time in minutes of the second part of the test

CT = 12 hours per day, the length of compressor run time between defrost cycles

(3) The waiver shall remain in effect from the date of issuance of this roder until the Department of Energy prescribes final test procedures appropriate to Frigidaire model FPCI18TDWO refrigerator-freezer models equipped with an electronic defrost control manufactured by White Consolidated Industries, Inc.

(4) This waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the applicant. This waiver may be revoked or modified at any time upon a determination that the factual basis underlying the application is incorrect.

Issued in Washington, DC, April 8, 1986.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-51619; (FRL-3006-1)]

Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protective Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of fifty-one PMNs and provides a summary of each.

DATES: Close of Review Period:

Importer. Dow Corning Corporation.
Chemical. (S) Siloxanes and silicones, di-me, me hydrogen, reaction products with allyl glycidyl ether and polyethylene polypropylene glycol allyl methyl ether.
Use/Import. (G) Plastic additive. Prod. range: 1,500–2,500 kg/yr.
Toxicity Data. Acute oral: 5,000 mg/kg; Acute dermal: 2,000 mg/kg; Irritation: Skin—Slight, Eye—Non-irritant; Ames test: Negative.
Exposure. No data submitted.
Environmental Release/Disposal. No data submitted.

P 86-868

Importer. Confidential.
Chemical. (G) Dicyclohexyl alkane.
Use/Import. (G) Lubricating oil (contained use). Import range: Confidential.
Toxicity Data. Acute oral: 5 g/kg; Ames test: Not mutagenic; LC_{50} (Orange-red killifish) 48 hr: >500 mg/1.
Exposure. No data submitted.
Environmental Release/Disposal. Disposal by applicable local, state and federal regulations.

P 86-869

Importer. Confidential.
Chemical. (G) Dicyclohexyl alkane.
Use/Import. (G) Lubricating oil (contained use). Import range: Confidential.
Toxicity Data. Acute oral: 5 g/kg; Ames test: Not mutagenic; LC_{50} (Orange-red killifish) 48 hr: >500 mg/1..
Exposure. No data submitted.
Environmental Release/Disposal. Disposal by applicable local, state and federal regulations.

P 86-870

Importer. Confidential.
Chemical. (G) Alkyl—substituted decaline.
Use/Import. (G) Lubricating oil (contained use). Import range: Confidential.
Toxicity Data. Acute oral: 5 g/kg; Ames test: Not mutagenic; LC_{50} (Orange-red killifish) 48 hr: >500 mg/1.
Exposure. No data submitted.
Environmental Release/Disposal. Disposal by applicable local, state and federal regulations.

P 86-871

Importer. Confidential.
Chemical. (G) Dicyclohexyl alkane.
Use/Import. (G) Lubricating oil (contained use). Import range: Confidential.
Toxicity Data. Acute oral: 5 g/kg; Ames Test: Not mutagenic; LC_{50} (orange-red Killifish) 48 hr: >500 mg/1.
Exposure. No data submitted.
Environmental Release/Disposal. Disposal by applicable local, state and federal regulations.

P 86-872

Manufacturer. Confidential.
Chemical. (G) Perfluoroalkyl epoxide.
Use/Production. (S) Chemical intermediate. Prod. range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >5 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Manufacture: dermal, a total of 16 workers..
Environmental Release/Disposal. Release to air and water. Disposal by waste treatment plant.

P 86-873

Manufacturer. Confidential.
Chemical. (G) Perfluoroalkyl epoxide.
Use/Production. (S) Chemical intermediate. Prod. range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >2 g/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Manufacture: dermal, a total of 16 workers..
Environmental Release/Disposal. Release to air and water. Disposal by waste treatment plant.

P 86-874

Manufacturer. Confidential.
Chemical. (G) Organosulfur modified EPDM.
Use/Production. (S) Polymeric age resister for polymers for industrial, commercial and consumer use. Prod. range: Confidential.
Toxicity Data. Irritation: Skin—Non-irritant.
Exposure. Manufacture: dermal, a total of 8 workers, up to 8 hrs/da, up to 250 da/yr..
Environmental Release/Disposal. Incidental to no release to land. Disposal by mechanical clean-up.

P 86-875

Manufacturer. NL Industries, Inc.
Chemical. (G) High solids oxirane/anhydride polyester resin.
Use/Production. (G) A polyester resin to be used in an open, non-dispersive manner. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. No data submitted.

P 86-876

Manufacturer. NL Industries, Inc.
Chemical. (G) Polyester resin.
Use/Production. (G) a polyester resin to be use in an open, non-dispersive manner. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. No data submitted.

P 86-877

Importer. Tioxide America Incorporated.
Chemical. (s) Titanium complex of ethanol, isopropanol, monobutyl phosphate, and dibutyl phosphate.
Use/Import. (S) Industrial adhesion promoter and heat stabilizer for printing inks. Import range: Confidential.
Toxicity Data. Acute oral: >5.0 g/kg; Acute dermal: >2.0 g/kg; Irritation: Skin—Non-irritant, Eye—Irritant; Ames test: Non-mutagenic; Delayed contact hypersensitivity test: Negative; Cytogenetic test (invitro): Negative.
Exposure. Processing: dermal and inhalation, a total of 2 persons/shift, ½ hr/shift.
Environmental Release/Disposal. No data submitted.

P 86-878

Manufacturer. Confidential.
Chemical. (G) Polymethylene polyphenyl isocyanate polyol.
Use/Production. (S) Industrial crosslinking agent for polymethylene polyphenyl isocyanate used for potting and encapsulation application. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 6 workers, up to 4 hrs/da, up 12 da/yr.
Environmental Release/Disposal. Trace release to air with 2 kg/batch to land.

P 86-879

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant intermediate.
Use/Production. (S) Site-limited chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-880

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant intermediate.
Use/Production. (S) Site-limited chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-881

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant intermediate.
Use/Production. (S) Site-limited chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-882

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant intermediate.
Use/Production. (S) Site-limited chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-883

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant.
Use/Production. (S) Semi-contained. Prod. range: Confidential.
Toxicity Data. Acute oral: 5 ml/kg; Acute dermal: 2 ml/kg; Irritation: Skin—Slight, Eye—Mild; Ames test; Non-mutagenic; Skin sensitization: Non-sensitizer.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-884

Manufacturer. Shell Oil Company.
Chemical. (G) Sulfonate surfactant.
Use/Production. (S) Semi-contained. Prod. range: Confidential.
Toxicity Data. Acute oral: 5 ml/kg; Acute dermal: 2 ml/kg; Irritation: Skin—Slight, Eye—Mild; Ames test; Non-mutagenic; Skin sensitization: Non-sensitizer.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-885

Manufacturer. Confidential.
Chemical. (G) Functionalized styrenated acrylic polymer.
Use/Production. (G) Industrial resin for products having an open use. Prod. range: 300,000–531,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: dermal and inhalation, a total of 60 workers, up to 8 hrs/da, up to 73 da/yr.
Environmental Release/Disposal. 1 to 100 kg/batch released to land. Disposal by incineration and approved landfill.

P 86-886

Manufacturer. Colloids/North Chemical Company.
Chemical. (G) Polymer of acrylic and acrylate.
Use/Production. (S) Industrial size coating for textile. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal, a total of 22 workers. up to 2 hrs/da, up to 10 da/yr.
Environmental Release/Disposal. 10 kg released to water. Disposal by POTW and chemical and biological treatment.

P 86-887

Manufacturer. Confidential.
Chemical. (G) Fluorinated telomer.
Use/Import. (G) Surfactant in chemical specialties, highly dispersive use. Import range: Confidential.
Toxicity Data. Acute oral: >5 ml/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant.
Exposure. Unknown.
Environmental Release/Disposal. No data submitted.

P 86-888

Manufacturer. Confidential.
Chemical. (G) Ester copolymer.
Use/Production. (G) Contained use. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Manufacture: dermal, a total of 30 workers, up to 4 hrs/da, up to 27 da/yr.
Environmental Release/Disposal. Disposal by POTW, approved landfill, RCRA, heat recovery and in-plant treatment.

P 86-889

Manufacturer. Dow Corning Corporation.
Chemical. (S) Reaction product of trimethylsiloxy silica copolymer and 1,1,2,2-tetrahydroperfluoro-1-decanol.
Use/Production. (S) Industrial to promote foaming in material for use in insulation, cushioning, sound, and energy absorption. Prod. range: 1,000–2,500 kg/yr.
Toxicity Data. Acute oral: >5,000 mg/kg; Acute dermal: >2,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Slight; Spot plate test: Negative.
Exposure. Manufacture: dermal, a total of 4 workers, up to 4 hrs/da, up to 18 da/yr.
Environmental Release/Disposal. 0.07 kg/batch released to land. Disposal by approved landfill.

Dated: April 11, 1986.

Certain Chemicals Test Marketing Exemption Applications; Coates Circuit Products/USA et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the Federal Register of May 13, 1983 (48 FR 21722. This notice, issued under section 5(h)(6) of TSCA, announces receipt of three applications for exemption, provides a summary, and requests comments on the appropriateness of granting each exemption.

DATE: Written comments by: May 12, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-59218]" and the specific TME number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E-201, 401 M Street, SW, Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TMEs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m.,

Polyester/Polyamine Copolymer; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of one such PMN and provides a summary of it.

DATE: Close of Review Period:

Y 86-117, April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission by the manufacturer on the exemption received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Science Advisory Board; Environmental Health Committee, Halogenated Organics Subcommittee; Open Meeting

Under Pub. L. 92-463, notice is hereby given that a one-day meeting of the Halogenated Organics Subcommittee of the Environmental Health Committee of the Science Advisory Board will be held on Thursday, May 15, 1986, in Room H6/215 of the Clinical Science Center of University Hospital at the University of Wisconsin; 500 Highland Avenue; Madison, WI 53792. The meeting will start at 8:30 a.m. and adjourn no later than 4:00 p.m. on the same day.

The purpose of the meeting will be to discuss a draft Addendum to the Health Assessment Document for Tetrachloroethylene (Perchloroethylene; EPA-600/8-82/005FA; External Review Draft; Updated Carcinogenicity Assessment; March, 1986). To obtain a copy of the draft document, contact the ORD Publications Center by phone at (513) 569-7562 or by mail to CERI-FRN; U.S. Environmental Protection Agency; 26 W. St. Clair Street; Cincinnati, Ohio 45268. The draft document also is available for public inspection and copying at the EPA Library; Waterside Mall; 401 M Street SW.; Washington, DC 20460. Comments on the draft document can be sent to the Project Manager for Tetrachloroethylene, Carcinogen Assessment Group (RD-689); Office of Health and Environmental Assessment; U.S. Environmental Protection Agency; 401 M Street SW., Washington, DC 20460.

The meeting will be open to the public. Any member of the public desiring to attend or to comment to the Subcommittee should contact either Dr. Daniel Byrd, Executive Secretary to the Committee, or Mrs. Brenda Johnson, by telephone at (202) 382-2552 or by mail to Science Advisory Board (A-10 1F); 401 M Street SW., Washington, DC 20460; no later than c.o.b. on May 12, 1986.

Dated: April 14, 1986.

Terry F. Yosie,

Director, Science Advisory Board.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared April 7, 1986 through April 11, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EIS's

ERP No. D-CDB-K89059-CA, Rating LO, San Bernardino Enterprise Zone Application, Designation and CDB Grant, CA. **SUMMARY:** EPA made no formal comments.

ERP No. D-COE-K36087-CA, Rating EC2, Santa Barbara County Streams, Flood Control Plan, Mission Creek, CA. **SUMMARY:** EPA's comments expressed the need for additional "in-kind" mitigation for riparian habitat loss and information on impacts to the possible reestablishment of steelhead runs in the Mission Creek drainage.

ERP No. D-FHW-D40217-MD, Rating EC2, MD-36 Construction, Seldom Seen Rd. to Buskirk Hollow Rd., 404 Permit, MD. **SUMMARY:** EPA expressed concern about possible ground water contamination and potential impacts on drinking water quality and quantity. EPA recommended increased monitoring and expanded discussion of alternatives and mitigation.

ERP No. D-FHW-K40152-AZ, Rating LO, Arizona Forest Highway, AZ-67 Reconstruction, Jacob Lake to Grand Canyon Nat'l Park, N. River, AZ. **SUMMARY:** EPA had no comments to offer on the draft EIS.

ERP No. D-FHW-L40150-OR, Rating EO2, Cornell Rd. Improvements, 185th Ave. to NW 242nd Ave., Right-of-Way Acquisition, 404 Permit, OR. **SUMMARY:** EPA stated that it had environmental objections to the lead agency's preferred alternative as proposed. EPA is particularly concerned with the potential for growth associated with the proposal to cause water quality degradation, loss of fish habitat, and loss of wetlands. EPA recommended that the final EIS fully disclose these potential impacts, as well as other potential impacts of concern, and evaluate possible means of avoiding or mitigating them.

ERP No. D-IBR-J35008-CO, Rating EO2, Stagecoach Reservoir Project, Construction, Upper Yampa River Valley, Yampa River, Loan, CO. **SUMMARY:** EPA's concerns primarily addressed wetland, water quality, fisheries, and aquatic life concerns. EPA expressed concerns regarding plans to create wetlands on irrigated agricultural land, and also the creation of 78 acres of waterfowl habitat should be evaluated more completely. EPA requested the final EIS address more thoroughly the eutrophication potential, its effects, and project management to achieve in-reservoir and downstream water quality objectives.

ERP No. D-SCS-G36133-LA, Rating LO, Acadia Parish Fifth Ward Watershed Protection and Flood Prevention Plan, 404 Permit, LA. **SUMMARY:** EPA has no objections to the proposed action if implemented as described, and with proper implementation of mitigation measures. EPA requested early coordination with the Corps of Engineers to clarify applicability of 404 jurisdiction.

Final EIS's

ERP No. F-COE-E36158-00, Tuscumbia River Flood Control Plan, MS and TN. **SUMMARY:** EPA's review concluded that there is no substantive difference in the level of flood protection between clearing and snagging, and the major cleanout option. To prevent channel instability, EPA recommends the cleaning and snagging alternative.

ERP No. F-COE-F32190-00, Lower Ohio River Navigation Improvements, Cumberland R. to Mississippi R., KY and IL. **SUMMARY:** EPA reviewed the final EIS and had no objections to the proposed project.

ERP No. FS-DOE-J08013-CO, Blue River-Gore Pass Substation, Portion of Hayden-Blue River, 345 kV Transmission Line, Construction, Operation, and Maintenance, Additional Transmission Capacity, CO. **SUMMARY:** EPA reviewed the final supplement EIS and has no objections to the project, assuming the mitigation measures included in the final are adopted.

Amended Notices

The following reviews should have appeared in the FR Notice published on April 18, 1986.

ERP No. D-FHW-D40216-VA, Rating EC2, VA-199 Construction, VA-5 to I-64, Section 10 and 404 Permits, Right-of-Way Acquisition, VA. **SUMMARY:** EPA identified project impacts on the areal aquifers and in increased noise levels. Further requests were made for mitigation efforts and selection of alignment A-1.

ERP No. D-FHW-F40285-MN, Rating EC2, MN Forest Highway 11 Construction, St. Louis CSAH-10 and St. Louis CR-565 in Hoyt Lakes to TH-61 in Silver Bay, 404 Permit, MN. **SUMMARY:** EPA is concerned that the wetland impacts are not adequately mitigated

VOL 51 ISS 80 AP 25 1986 UMI

and requested that documentation of wetland mitigation plans be sent to EPA as soon as they are available. EPA also requested that the final EIS include a more detailed analysis of the noise impacts to sensitive wildlife species.

ERP No. F-FHW-D40135-PA, Beyfront-Port Access Road Construction, I-79/West 12th Street to East 6th Street/East Lake Rd., 404 Permit, PA. SUMMARY: EPA has no objection to the project and its implementation.

ERP No. F-SFW-K64013-CA, Coachella Valley Fringe-Toed Lizard Habitat Conservation Plan, Sect. 10(A) Permit, CA. SUMMARY: The final EIS adequately addressed the concerns EPA made on the draft EIS.

Dated: April 22, 1986.

Allan Hirsch,

Director, Office of Federal Activities.

[ER-FRL-3007-6]

Intent To Prepare a Joint Supplemental Environmental Impact Statement on the Hudson River PCB Reclamation Demonstration Project

AGENCY: U.S. Environmental Protection Agency—Region II, and New York State Department of Environmental Conservation (Joint Lead Agencies).

ACTION: Notice of Intent to Prepare a Supplemental Environmental Impact Statement.

Purpose: In accordance with section 102(2)(c) of the National Environmental Policy Act (NEPA), the U.S. Environmental Protection Agency has identified a need to prepare a Supplemental Environmental Impact Statement on the Hudson River PCB Reclamation Demonstration Project and therefore publishes this Notice of Intent pursuant to 40 CFR 1501.7.

FOR FURTHER INFORMATION CONTACT:

Ms. Barbara Pastalove, Chief, Environmental Impacts Branch, U.S. Environmental Protection Agency, 26 Federal Plaza, Room 702, New York, New York 10278, Telephone: Commercial (212) 264-8556, FTS 8-264-8556

Mr. Bruce Bentley, Citizen Participation Specialist, New York State Department of Environmental Conservation, 50 Wolf Road, Room 507, Albany, New York 12233, Telephone: (518) 457-0849.

Summary

I. Background

The proposed Hudson River PCB Reclamation Demonstration Project would remove PCB-contaminated sediments from the upper Hudson River and dispose of those sediments in an upland containment site, utilizing federal funds authorized by Section 118 of the Clean Water Act.

A final environmental impact statement (FEIS) was published by EPA in October 1982, which evaluated various alternatives for management of PCB-contaminated sediments in the upper Hudson River. The FEIS found the dredging and upland containment project proposed by the New York State Department of Environmental Conservation (NYSDEC) to be an environmentally preferable alternative. The EPA's December 1982 Record of Decision deferred release of funding for the project pending review of project eligibility under the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA).

In September 1983, EPA made a preliminary determination that the project, with certain limited exceptions, was not eligible for funding under CERCLA. Subsequently, on May 10, 1984, EPA entered into an Order on Consent with the State of New York and a number of private plaintiffs as part of a settlement of two lawsuits that had been brought to compel EPA to fund the project. Under the terms of the Consent Order, EPA agreed to approve a grant application from New York State if the State met certain requirements, including obtaining a suitable disposal site. NYSDEC then undertook a resurvey of contaminated river bottom sediments, and re-selection of a PCB disposal site.

II. Proposed Action

The EPA and the NYSDEC have entered into a Memorandum of Agreement as joint lead agencies to prepare a supplemental environmental impact statement (SEIS) to the October 1982 FEIS on the Hudson River PCB Reclamation Demonstration Project. This will avoid duplication of effort while enabling the EPA and the NYSDEC to fulfill their respective responsibilities under the National Environmental Policy Act (NEPA) and the State Environmental Quality Review Act (SEQRA).

III. Scope of the SEIS

The alternatives to be evaluated in the SEIS are limited by the Consent Order to changes to the alternative containment sites and disposal methods considered in the 1982 FEIS. Accordingly, the SEIS will include a thorough assessment of the proposed containment sites and associated environmental impacts, as well as an evaluation of the no-action alternative, general comparative analysis of alternative dredging and disposal methodologies, and a summary of the containment site screening process, including the proposed site.

IV. Public Participation in the SEIS Process

Full participation by interested Federal, State, and local agencies, as well as interested private organizations and citizens is invited. A full-scale public participation program will be implemented. A citizens advisory committee is in existence as part of the project review process, and public meetings and hearings and hearings will be held for the SEIS.

The next meeting to be held will be a public information meeting in the Ft. Edward/Hudson Falls Area, New York, on June 4, 1986, to discuss the issues to be addressed by the SEIS. Advance notice of the meeting location will be provided; copies of a preliminary environmental information document will be make available for public review prior to the meeting. Participation of interested parties at this meeting is invited. If you are unable to attend this meeting, you are encouraged to submit your question or comments, in writing, to the above contact(s).

V. Timing

The joint draft SEIS in scheduled to be published in July 1986, and will be available for a 60-day public review and comment period.

VI. Requests for copies of the SEIS

Interested parties are requested to submit their names and address to the contact person(s) indicated above for inclusion on the distribution list for the draft SEIS and related public notices. The draft SEIS will be available for public review at the following locations:

U.S. Environmental Protection Agency, Region II, 26 Federal Plaza, Room 702, New York, NY 10278

New York State Department of Environmental Protection, Hudson Street Extension, Warrensburg, NY 12885

New York State Department of Environmental Conservation, 50 Wolf Road, Albany, NY 12233

New York State Department of Environmental Conservation, 21 South Putt Corners Road, New Paltz, NY 12561.

Dated: April 22, 1986.

Allan Hirsch,

Director, Office of Federal Activities.

BILLING CODE 6560-50-M

[OPP-00226; FRL-3009-8]

FIFRA Scientific Advisory Panel; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: There will be a 2-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel (SAP) to review: (1) The Agency's proposed testing battery for inert ingredients used in pesticide formulation; (2) a set of scientific issues being considered in connection with the Special Review on diazinon; (3) a set of scientific issues in connection with the Registration Standards for benomyl, thiophanate methyl, and pronamide; (4) a paper defining Maximum Tolerated Dose; (5) a paper on "Chemicals Inducing Thyroid Neoplasia"; (6) an information briefing by the Office of Drinking Water on Health Advisories for 15 pesticides; and (7) the Agency's proposed draft reporting guidelines. The meeting will be open to the public.

DATES: Wednesday and Thursday, May 21 and 22, 1986, from 8:30 a.m. to 5 p.m. each day.

ADDRESS: The meeting will be held at: Environmental Protection Agency, Rm. No. 3, North Conference Area, Waterside Mall Level, 401 M St. SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: Stephen L. Johnson, Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-768C), 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 1121, Crystal Mall, Building No. 2, Arlington, VA, (703-557-7695).

SUPPLEMENTARY INFORMATION: The agenda for the meeting is:

1. Review of the Agency's proposed testing battery for inert ingredients used in pesticide formulations.

2. A set of scientific issues being considered in connection with the Special Review on diazinon.

3. A set of scientific issues being considered by the Agency in connection with the Registration Standard for benomyl.

4. A set of scientific issues being considered by the Agency in connection with the Registration Standard for thiophanate methyl.

5. A set of scientific issues being considered by the Agency in connection with the Registration Standard for pronamide.

6. Certain scientific issues dealing with defining a Maximum Tolerated Dose.

7. Review of a paper entitled "Chemicals Inducing Thyroid Neoplasia."

8. An informational briefing by the Office of Drinking Water on Health Advisories for 15 pesticides.

9. Review of 12 draft Reporting Guidelines.

10. Completion of any unfinished business from previous Panel meetings.

11. In addition, the Agency may present status reports on other ongoing programs of the Office of Pesticide Programs.

Copies of documents relating to item 1 above may be obtained by contacting:

By mail: Gary Burin, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 1124, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-0307).

Copies of documents relating to item 2 above may be obtained by contacting:

By mail: Ingrid Sunzenauer, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office Location and telephone number: Rm. 711B, Crystal Mall No. 2, Arlington, VA, (703-557-1529).

Copies of documents relating to items 3 and 4 above may be obtained by contacting:

By mail: Henry Jacoby, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 227, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1900).

Copies of documents relating to item 5 above may be obtained by contacting:

By mail: Robert Taylor, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 245, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-1800).

Copies of documents relating to item 6 above may be obtained by contacting:

By mail: Jane Harris, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 714, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-0303).

Copies of documents relating to item 7 above may be obtained by contacting:

By mail: Orville Paynter, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 714, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-7695).

Copies of documents relating to item 8 above may be obtained by contacting:

Penelope Fenner-Crisp, Office of Drinking Water (WH-550D), Environmental Protection Agency, Rm. E-1101C, 401 M St. SW., Washington, DC 20460, (202-382-7589).

Copies of documents relating to item 9 above may be obtained by contacting:

By mail: Elizabeth Leovey, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Office location and telephone number: Rm. 809, Crystal Mall No. 2, Arlington, VA, (703-557-1354).

Any member of the public wishing to submit written comments should contact Stephen L. Johnson at the address or telephone listed above to be sure that the meeting is still scheduled and to confirm the Panel's agenda. Interested persons are permitted to file such statements before the meeting. To the extent that time permits and upon advance notice to the Executive Secretary, interested persons may be permitted by the chairman of the Scientific Advisory Panel to present oral statements at the meeting. There is no limit on written comments for consideration by the Panel, but oral statements before the Panel are limited to approximately 5 minutes. Since oral statements will be permitted only as time permits, the Agency urges the public to submit written comments in lieu of oral presentations. All statements will be made part of the record and will be taken into consideration by the Panel. Persons wishing to make oral/written statements should notify the Executive Secretary and submit 10 copies of written comments and oral written testimony no later than May 7,

VOL 51 ISS 80 AP 25 1986 UMI

1986, in order to ensure appropriate consideration by the Panel.

Dated: April 21, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

EXPORT-IMPORT BANK OF THE UNITED STATES

[Public Notice 5]

Agency Forms Submitted for OMB Review

AGENCY: Export-Import Bank of the United States.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, Eximbank has submitted a proposed collection of information to the Office of Management and Budget for Review.

Purpose: The proposed form is to be used by commercial banks participating in Eximbank's guarantee program. The collection will provide Eximbank with the information necessary to evaluate the transaction and to assure that relevant statutory programs are met.

SUMMARY: The following summarizes information collection proposal submitted to OMB:

(1) Type of request—renewal.

(2) Number of forms submitted—one, with related documents.

(3) Form number—EIB No. 73-1, with related documents.

(4) Title of information collection—Application and Supplementary Agreement to the Export-Import Bank of the United States.

(5) Frequency of Use—Upon request by a commercial bank for a guarantee of loan.

(6) Respondents—Commercial banks throughout the United States.

(7) Estimated number of responses—150.

(8) Estimated total number of hours needed to fill out form—40. Section 3504(h) of Pub. L. 96-511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed format and supporting documents may be obtained from Helene H. Wall, Agency Clearance Officer, (202) 566-8111, Attention: Analysis. Comments and questions should be directed to (OMB) Francine Picoult, (202) 395-7231.

Dated: April 8, 1986.

Helene H. Wall,

Administrative Officer.

BILLING CODE 6690-01-M

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket 85-166, Phase II, Part 1]

Common Carrier Services; Investigation of Special Access Tariffs of Local Exchange Carriers

AGENCY: Federal Communications Commission.

ACTION: Final Order.

SUMMARY: Based upon data accumulated in the Commission's ongoing investigation of local exchange carrier (LEC) special access tariffs, the Common Carrier Bureau has (1) ordered a limited extension of a Commission-prescribed transition plan in the special access category which provides certain interexchange carriers with a discount on special access rates; (2) ordered certain LECs to either justify currently effective special access rate levels or reduce such levels; (3) directed two LECs to show cause as to why they should not immediately refund excessive earnings accumulated during the period from April through September of 1985; and (4) terminated the rate level portion of the special access investigation with regard to certain LECs.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael Wack, Tariff Division, Common Carrier Bureau, (202) 632-6917.

SUPPLEMENTARY INFORMATION: This is a summary of the Common Carrier Bureau's Memorandum Opinion and Order, CC Docket 85-166, Phase II, Part 1, Mimeo No. 3436, adopted March 26, 1986, and released March 27, 1986.

The full texts of Commission decisions are available for public inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW, Washington, DC. The complete text of these decisions may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW, Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

In March 1985, the Commission prescribed a one-year transition plan in order to moderate proposed increases in rates for special access lines provided by the Bell Operating Companies (BOCs) to certain other common carriers (OCCs).[1] Pursuant to this plan, which covers lines in place as of November 8, 1984, the OCCs received a 50 percent discount on the tariffed rate during the first six months special access rates were in effect (generally, from April through September of 1985) and a 25 percent discount on the tariffed rate during the next six months. The OCCs were scheduled to begin paying full rates for these lines as of April 1, 1986. During the period in which the transition plan has been in effect, the Commission has also been examining a variety of issues related to local exchange carrier special access tariffs, including the reasonableness of rate levels,[2] as part of the instant investigation (*Docket 85-166*). Congress has urged the Commission to complete the investigation before the April 1 rate equalization step occurred.[3]

Based upon its analysis of rate of return data submitted by the BOCs in the *Docket 85-166* investigation, the Bureau concluded that, averaged industry-wide, BOC special access rates would not become unreasonable if the April 1 rate equalization step occurred as scheduled. In certain states, however, the Bureau concluded that implementation of rate equalization appeared likely to result in unreasonably high rates for all customers. Therefore, the Bureau temporarily extended the transition plan until June 1, 1986 in such states.[4] During this period, BOCs providing special access service in these states will have an opportunity to justify the apparently excessive rates or to file tariff revisions reducing such rates.[5] Upon the effective date of the revisions, the transition discount will be eliminated and the revised rates will apply to all special access customers.

The Bureau also directed Northwestern Bell and Pacific Northwest Bell to refund special access

[1] *See* Investigation of Access and Divestiture Related Tariffs, CC Docket No. 83-1145, Phase I and Phase II, Part 1, FCC 85-100, 50 FR 11440 (Mar. 21, 1985) (*March 8 Order*).

[2] *See* Investigation of Special Access Tariffs of Local Exchange Carriers, CC Docket 85-166, Phase II, Part 1, released Jan. 17, 1986 (*Data Request Order*) (Common Carrier Bureau requested information and established a procedural schedule for the investigation of BOC special access rate levels). The BOCs responded to the requirements of the *Data Request Order* by filing information with the Commission on February 14, 1986.

[3] H.R. Rep. No. 99-414, 99th Cong., 1st Sess., at 38 (Dec. 4, 1985).

[4] The states in question are: Michigan, Ohio, Indiana, Virginia, Delaware, New Jersey, Iowa, Minnesota, Nebraska, North Dakota, Idaho, New Mexico, Kansas, Oklahoma and Texas.

[5] The carriers in question are: Michigan Bell, Ohio Bell, Indiana Bell, Northwestern Bell, Pacific Northwest Bell, Mountain Bell, Southwestern Bell, and the Chesapeake and Potomac Telephone Companies of Virginia, Delaware and New Jersey.

rates in four states or show cause why they should not be ordered to do so. The refunds are to correct excessive rates in Idaho, Nebraska, South Dakota and Washington during the period from April through September 1985.

Finally, the Bureau terminated the rate level portion of the *Docket 85-166* investigation with regard to certain BOCs whose special access rates of return indicate that their underlying rate levels are not unreasonable.[6]

Ordering Clauses

Therefore, it is ordered that the transition plan described by the Commission in the *March 8 Order* is modified by extending it until June 1, 1986 in the states listed in footnote 4 of this summary. Tariff revisions reflecting this extension should be filed by such carriers on not less than one day's notice to be effective April 1, 1986. For this purpose, we waive §§ 61.58 and 61.58 of the Commission's rules, 47 CFR 61.58, 61.58, and assign Special Permission No. 86-208.

It Is Further Ordered, that carriers identified in footnote 5 of this summary are directed to file with this Commission no later than May 1, 1986 either (1) justification for their currently effective special access rates including, but not limited to, information as to actual rates of return in the special access category for the period between October 1, 1985 and the present; or (2) tariff revisions reducing their special access rates in a manner calculated to lower their rates of return to authorized levels.

It Is Further Ordered, that the Northwestern Bell Telephone Company and the Pacific Northwest Bell Telephone Company are hereby ordered to refund excessive earnings on special access services provided during the period from April through September of 1985, and to report to this Commission no later than May 1, 1986 as to the method and schedule by which such refund is being implemented, or to show why such refund is not being implemented.

It is Further Ordered, that the portion of the instant investigation directed at the special access rate levels of local exchange carriers, and no other portion, is hereby terminated as to the carriers listed in footnote 6 of this summary.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 86-9130 Filed 4-24-86; 8:45 am]

BILLING CODE 6712-01-M

[6] The affected BOCs are (where appropriate, this list indicates that the investigation is terminated only as to a carrier's operations in certain of its operating territories): the Chesapeake and Potomac Telephone Companies of West Virginia and the District of Columbia; Pennsylvania Bell; Northwestern Bell (South Dakota); Pacific Northwest Bell (Oregon, Washington); Mountain Bell (Arizona, Idaho, Montana, Utah); Southern Bell (Florida, Georgia, North Carolina, South Carolina); the New York Telephone and Telegraph Company; the New England Telephone and Telegraph Company, the Southern New England Telephone Company and Southwestern Bell (Arkansas).

[CC Docket No. 85-166, Phase I; FCC 86-52]

Common Carrier Services; Investigation of Special Access Tariffs of Local Exchange Carriers.

AGENCY: Federal Communications Commission.

ACTION: Final order.

SUMMARY: The Commission has resolved a number of rate structure and cost allocation issues related to the special access tariffs of local exchange carriers.

EFFECTIVE DATE: January 24, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael Wack, Tariff Division, Common Carrier Bureau, (202) 632-6917.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order, CC Docket 85-166, Phase I, adopted January 21, 1986, and released January 24, 1986.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW, Suite 140, Washington, DC 20037.

A. Rate Structure Issues

1. Multipoint Service vs. Point-to-Point Service.

The Commission concluded that the special access rate structure adopted by the National Exchange Carrier Association (NECA) and most major local exchange carriers (LECs) including the Bell Operating Companies (BOCs), as it is applied to multipoint and point-to-point services, is reasonable. The Commission determined that pricing difference between comparable network configurations are rationally related to the cost of providing each service, and that the structure leaves to the customer the decision as to when it is economically reasonable to select one type of service or the other. The Commission rejected a request to require LECs to install multipoint service bridging capability in every serving wire center because such action would result in overcapacity and higher rates for all users. Finally, the Commission rescinded its requirement [1] that multipoint service bridging rates be calculated on a per port basis.

2. Video Services

The Commission concluded that the actual routing and cost characteristics of video and voice services are so similar that the application of the special access rate structure to both services is just and reasonable. The Commission further determined that the LECs' video rates reflect investment in certain amounts of polyethylene shielded video (PSV) cable and related plant that currently is not used to provide video service. Therefore, it disallowed 50 percent of the unassigned PSV then allocated by the LECs to the video service category.

3. Shared Network Facility Agreements (SNFAs)

SNFAs are a collection of contracts implementing provisions of a consent decree between the United States Department of Justice and the American Telephone and Telegraph Company (AT&T) pursuant to which AT&T was required, *inter alia*, to divest certain BOCs.[2] The District Court with jurisdiction over the decree concluded that it was necessary for AT&T and the divested BOCs temporarily to continue sharing certain facilities: *i.e.*, although ownership of the facilities would be assigned either to AT&T or to the individual BOC according to whose use predominated, the other party would retain a contractual right to their use.[3] The terms and conditions of such use are contained in SNFAs. The Commission concluded that the contemporaneous existence of SNFAs and special access does not constitute unreasonable discrimination under the Communications Act because the temporary sharing of multifunctioning facilities pursuant to SNFAs furthers the public interest. This conclusion, the Commission noted, mooted requests that it order AT&T and the BOCs to file copies of all SNFAs with the Commission.

VOL 51 ISS 80 AP 25 1986 UMI

B. Cost Allocation Issues

The Order designating issues for investigation in the present proceeding noted that the LECs' allocation of certain costs among various special access rate elements warranted close examination.[4] In general, two types of costs allocation questions arose: (1) Whether certain special access costs should be allocated to the channel mileage or the channel termination rate element (the former generally is associated with trunk costs and the latter with loop costs); and (2) whether certain costs should be unbundled and recovered either in a separate rate element or on a customer-specific basis.

1. Station Apparatus and Large Private Branch Exchanges (PBXs)

In accordance with §§ 31.231 and 31.234 of the Commission's rules, 47 CFR 31.231, 31.234, LECs have established separate accounts which reflect the original cost of station apparatus (Account 231) and large PBXs (Account 234) in their inventories. The Commission concluded that (1) certain equipment associated with Accounts 231 and 234, although located on customers' premises, is properly subject to tariffing procedures; (2) the equipment in these accounts is used to provide a particular kind of service to customers and, therefore, the LECs' investment in such equipment should be recovered from all customers to whom the service is provided, even though not every type of equipment in the collection is used to provide service to every customer; and (3) the investment in question is properly allocated to the channel terminated rate element because the equipment is used to establish a transmission path between the customer and the wire center serving that customer.

2. Digital Interexchange Facilities

The Commission determined that a portion of the cost associated with digital interexchange facilities is allocated properly to the channel termination rate element because the service, which is provided on an end-to-end basis, includes loop facilities.

3. Private Line Switching Services Costs

The Commission determined that the investment at issue here represents capacity in BOC-owned multifunctioning equipment which is available for lease by AT&T but which is not currently under lease. Against this background, the Commission concluded that such investment was not available to the public at large for the provision of special access services and should not be included in any special access rate element. Therefore, the Commission ordered the BOCs in question to remove such investment from their special access revenue requirement.

4. Voice Grade Performance

The Commission determined that voice grade performance equipment is used to provide continuity on loop circuits and, therefore, is properly associated with the channel termination rate element. Moreover, the Commission noted, it would be unwarranted to unbundle such equipment costs from channel termination rates because the equipment itself is not useful to customers on a stand-alone basis.

5. Hybrid Option

The Commission rejected requests that the costs associated with equipment used to connect a four-wire special access line to a two-wire termination be unbundled from channel termination rates. The Commission noted that the decision to use such equipment depends more upon conditions in a carrier's inventory than upon a specific customer's facilities. The Commission concluded, therefore, that the option of using such facilities should remain with carriers in order to allow them to apply their facilities in the most efficient manner.

6. Facility Interface (FACIF) Grade Performance

The Commission determined that the allocation of FACIF costs in LEC special access tariffs is reasonable. The Commission noted that the LECs have bundled such costs into channel termination rates on a service-by-service basis, an allocation methodology calculated to ensure that customers who are provided with a particular service are charged a rate reflecting the average cost of such service, no more and no less.

7. 2-Wire vs. 4-Wire Channel Termination Rates

The Commission determined that relationship between 2-wire and 4-wire channel termination rates unduly prejudiced 2-wire users and ran counter to common understanding of proper rate relationships. The Commission concluded that a 1-to-1.6 ratio represents a reasonable rate relationship between 2-wire and 4-wire channel termination rates and it directed carriers to adjust their rates accordingly.

C. Information Request

The Commission directed local exchange carriers whose special access tariffs include non-recurring charges (NRCs) to file with the Commission certain information on the costs underlying such charges. The Commission also directed these carriers to file pleadings addressing certain NRC issues, including (1) the potential market effects of changing the allocation of costs between recurring and non-recurring charges, (2) whether the Commission should require a phase-in transition to higher NRC rates; and (3) the relationship, if any, between actual costs for the period from April 1, 1985 through September 1985 and the rate increases proposed by the LECs in the July 2, 1985 filings, which took effect on October 1, 1985.

Ordering Clauses

Accordingly, It Is Ordered, pursuant to section 205(a) of the Communications Act, 47 U.S.C. 205(a), that the requirement that local exchange carriers charge for bridging services on a "per port" basis is hereby rescinded.

It Is Further Ordered, pursuant to sections 201(b) and 204 of the Communications Act 47 U.S.C. 201(b), 204, that 50 percent of the revenue requirement associated with unassigned PSV cable allocated by local exchange carriers to the video service category is hereby disallowed.

It Is Further Ordered, pursuant to sections 201(b) and 204 of the Communications Act 47 U.S.C. 201(b), 204, that local exchange carriers are directed to remove from the special access revenue requirement the investment discussed *supra* relating to private line switching services.

It Is Further Ordered, pursuant to sections 201(b), 204 and 205 of the Communications Act 47 U.S.C. 201(b), 204–205, that a relationship of 1.6-to-1 between 4-wire and 2-wire channel termination rates for major voice and sub-voice grade special access categories is hereby prescribed.

It Is Further Ordered, pursuant to sections 4(i), 4(j) and 203(a)–(b) of the Communications Act 47 U.S.C. 154(i)–(j), 203(a)–(b), that carriers shall file revised tariff material in compliance with this Order no later than 30 days from the date of its release, to become effective upon one day's notice.

It Is Further Ordered, pursuant to sections 201, 204, 218 and 403 of the Communications Act 47 U.S.C. 201, 204, 218 and 403 that carriers are directed to file with this Commission information relating to non-recurring charges according to the terms of this Order.

Federal Communications Commission.

FEDERAL MARITIME COMMISSION

Item Submitted for OMB Review

The Federal Maritime Commission hereby gives notice that the following item has been submitted to OMB for review pursuant to the Paperwork Reduction Act of 1980 (44 U.S. 3501, et. seq.). Requests for information, including copies of the collection of information and supporting documentation, may be obtained from Wm. Jarrel Smith, Jr., Director, Bureau of Administration, Federal Maritime Commission, 1100 L Street, NW., Room 12211, Washington, D.C. 20573, telephone number (202) 523–5866. Comments may be submitted to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attention: Desk Officer for the Federal Maritime Commission, within 15 days after the date of the **Federal Register** in which this notice appears.

Summary of Item Submitted for OMB Review

46 CFR 566—Shippers' Requests and Complaints Under the Shipping Act, 1916

FMC requests extension of clearance for regulations which require conferences and other ratemaking bodies in the domestic offshore trades to file annual reports detailing shippers' requests and complaints received during the preceding calendar year and the disposition of such. Resident representatives must maintain records for two years. Total estimated annual burden for 2 conferences and ratemaking bodies is 24 man-hours. Total estimated annual cost to the Federal Government is approximately $100; total estimated annual cost to respondents is approximately $450.

FEDERAL RESERVE SYSTEM

Coastal Commerce Bankshares, Inc. et al.; Formations of ; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 19, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Coastal Commerce Bankshares, Inc.*, Kaplan, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Kaplan State Bank, Kaplan, Louisiana.

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *DG Bancorp, Inc.*, Downers Grove, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of Downers Grove National Bank, Downers Grove, Illinois.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Crown Park Bancshares, Inc.*, Lubbock, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Western National Bank, Lubbock, Texas. Comments on this application must be received not later than May 16, 1986.

Board of Governors of the Federal Reserve System, April 21, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Southern National Corp., et al.; Applications To Engage de Novo in, Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 15, 1986.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Southern National Corporation*, Lumberton, North Carolina; to engage de novo through its subsidiary Unified Investors Life Insurance Company.

VOL 51 ISS 80 AP 25 1986 UMI

Phoenix, Arizona, in underwriting, as reinsurer, credit life and credit disability insurance directly related to extensions of credit in South Carolina by its affiliate, Southern National Bank of South Carolina, Loris, South Carolina, pursuant to § 225.25(b)(9) of the Board's Regulation Y.

B. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *PSB Financial Corporation*, Many, Louisiana; to engage directly in the activity of originating, acquiring, selling, and servicing mortgage loans pursuant to § 225.25(b)(1)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 21, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Zions Utah Bancorporation; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice have applied under § 225.23 (a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23 (a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 6, 1986.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Zions Utah Bancorporation*, Salt Lake City, Utah; to acquire Century Mortgage Company, Salt Lake City, Utah, and thereby engage in mortgage banking activities, pursuant to § 225.25(b)(1)(iii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 21, 1986.

FEDERAL TRADE COMMISSION

Line of Business Reports Program; Revision of Confidentiality Rules and Procedures

Correction

In FR Doc. 86-8349 beginning on page 12743 in the issue of Tuesday, April 15, 1986, make the following corrections:

1. On page 12743, second column, first and second lines, "("LB" data)" should read "("LB data")". In the first complete paragraph, eighth line, "custodial certificates" should read "custodian certifies".

2. On the same page, third column, first complete paragraph, sixth line, insert "with" between "work" and "LB".

3. On page 12744, second column, third complete paragraph, sixth line, "authorized by the" should read "with any".

4. On the same page, third column, last paragraph, second line, "Economic" should read "Economics".

BILLING CODE 1505-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on April 18, 1986.

Social Security Administration

(Call Reports Clearance Officer on 301-594-5706 for copies of packages)

Subject: Disability Hearing Officer's Report of Disability Hearing—Existing Collection.

Respondents: State or local governments.

OMB Desk Officer: Judy A. McIntosh.

Subject: July 1986 Grantee Survey of Low-Income Home Energy Assistance Program—Revision—(0960-0330).

Respondents: State or local governments; Non-profit institutions.

OMB Desk Officer: Fay S. Iudicello.

Public Health Service

(Call Reports Clearance Officer on 202-245-2100 for copies of packages)

Food and Drug Administration

Subject: Food Standards; Application for Temporary Marketing Permits—Existing Collection—(0910-0133).

Respondents: Businesses or other for-profit institutions.

National Institutes of Health

Subject: NIH Medical Staff Fellowship Program Application—Extension—(0925-0006).

Respondents: Individuals or households.

OMB Desk Officer: Bruce Artim.

Health Care Financing Administration

(Call Reports Clearance Officer on 301-594-8650 for copies of packages)

Subject: Evaluation of Intermediary-at-Risk Demonstration—Preclearance—NEW.

Respondents: Individuals, providers.

Subject: Information Collection Requirements in Part 11, Chapter VI of the State Medicaid Manual on the Claims Processing Assessment System—Revision—HCFA-R-91, RCFA-331, and HCFA-503—(0938-0438).

Subject: Information Collection Requirements in BERC-240-F, Recognition of State Reimbursement Control System—HCFA-R-49—NEW.

Respondents: State or local governments; Small businesses or organizations.

OMB Desk Officer: Fay S. Iudicello.

Office of Human Development Services

Subject: Head Start Cost Analysis Instrument—NEW.

Respondents: State or local governments; non-profit institutions.

Subject: State Grants for Dependent Care Planning and Development—NEW.

Respondents: States.

OMB Desk Officer: Fay S. Iudicello.

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503. ATTN: (name of OMB Desk Officer)

Agency Forms Withdrawn from the Office of Management and Budget Clearance Process.

The Department of Health and Human Services has withdrawn the following information collection package previously submitted to OMB for approval under the Paperwork Reduction Act.

Public Health Service

Subject: Inventory of Union Records Systems—NEW.

Reference: Federal Register/Volume 51/Page 13291, Friday, April 18, 1986.

Dated: April 21, 1986

K. Jacqueline Holz,

Deputy Assistant Secretary for Management Analysis and Systems.

BILLING CODE 4150-04-M

Food and Drug Administration

[Docket No. 86E-0073]

Determination of Regulatory Review Period for Purposes of Patent Extension; Femstat

AGENCY: Food and Drug Administration HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Femstat and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: James C. Shehan, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Femstat, available in cream and vaginal suppository forms for use against fungal and bacterial vaginal infections. Following FDA's approval, Syntex (U.S.A.) Inc. filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 13, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Femstat represented the first commercial marketing or use of its active ingredient, butoconazole nitrate. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Femstat is 2,548 days. Of this time, 1,875 days occurred during the testing phase of the regulatory review period, while 673 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* December 6, 1978. FDA has verified that the investigational new drug application became effective on December 6, 1978 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)).

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* January 23, 1984. FDA has verified that the first of two new drug applications (one for each dosage form) was initially submitted on January 23, 1984.

3. *The date the application was approved:* November 25, 1985. FDA has verified that NDA 19-215 and NDA 19-359 were both approved on November 25, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 24, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 22, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

In the first column, in **FOR FURTHER INFORMATION CONTACT,** second line, the information in the parenthesis should read "(HFF-312)".

BILLING CODE 1505-01-M

Public Health Service

Announcement of Availability of Grants for General Family Planning Training Projects

AGENCY: Office of Family Planning, PHS.

ACTION: Notice.

SUMMARY: This is to announce the availability of grant funds for the General Family Planning Training Grants Program for the following regions: II, VI, and X. Applications for public and private nonprofit entities are now being accepted for grant awards under section 1003(a) of the Public Health Service (PHS) Act [42 U.S.C. 300a-1(a)] as implemented by regulations at 42 CFR Part 59 to provide training for personnel to carry out family planning service programs described in section 1001 of the PHS Act (42 U.S.C. 300).

The Office of Family Planning (OFP) which administers Title X of the Public Health Service Act, a major source of Federal funding for voluntary family planning services in this country, provides funds for a general training center in each of the ten HHS regions oriented toward the provision of skill-based knowledge for personnel that will enable the Title X program to improve its delivery of family planning services to low-income women and other clients in need of such services but otherwise unable to afford them.

ADDRESS: Application kits may be obtained from and applications must be submitted to: Grants Management Office, Office of Population Affairs, Room 736E, H.H.H. Building, 200 Independence Avenue, SW., Washington, DC 20201.

DATE: Applications must be postmarked or received at the above address no later than close of business June 24, 1986. Applications not meeting this requirement will not be accepted for review.

FOR FURTHER INFORMATION CONTACT: Grants Management Office at area code 202/245-0146 or Program Office at area code 202/245-0151. Staff are available to answer questions and provide limited technical assistance in the preparation of grant applications.

SUPPLEMENTARY INFORMATION: Title X of the Public Health Service Act, 42 U.S.C. 300, *et seq.*, authorizes the Secretary of Health and Human Services to award grants for projects to provide training for all family planning personnel. (Catalog of Federal Assistance Number 13.260). This notice announces the availability of approximately $600,000 in funding for three general training projects described below. Grants will be made to public and/or private nonprofit organizations to assist in the establishment and operation of projects which will promote the purposes of section 1003 of the PHS Act, taking into account the degree to which the project meets the requirements of the regulations (42 CFR 59.205 and 59.206). Applications are invited for the following three grants:

One general training grant for Department of Health and Human Services (DHHS) Region II (New Jersey, New York, Puerto Rico and Virgin Islands). A funding range of $230,000-$280,000 is under consideration for this grant.

One general training grant for DHHS Region VI (Arkansas, Louisiana, New Mexico, Oklahoma, and Texas). A funding range of $220,000-$250,000 is under consideration for this grant.

One general training grant for DHHS Region X (Alaska, Idaho, Oregon, and Washington). A funding range of $125,000-$140,000 is under consideration for this grant.

Proposals must focus at least fifty percent of the training effort in the national training priority areas: (1) Family involvement, (2) program management, (3) clinic management, (4) infertility, (5) counseling and client education, and (6) natural family planning. [Natural Family Planning includes various methods and techniques which teach fertility awareness. Natural family planning does not include methods which combine fertility awareness with the use of another contraceptive method as a backup.]

Grants may be approved for project periods of up to five years. Priority will be given to those which do not exceed three years and to those projects that focus on training needs of personnel in rural and underserved areas. Grants are funded in annual increments (budget periods). Funding for all approved budget periods beyond the first year of the grant is contingent upon satisfactory progress of the project, and adequate stewardship of Federal funds, and availability of funds. We summarize below the statutory and regulatory background of the grant program and describe the procedures for applying for grants pursuant to this notice.

Statutory and Regulatory Background

Title X of the Public Health Service Act, enacted by Pub. L. 91-572, authorizes grants for projects to provide family planning services to low-income persons and others. Section 1001 of the Act (as amended by Pub. L. 94-63 and 95-613) authorizes grants "to assist in the establishment and operation of family planning projects which offer a broad range of acceptable and effective family planning methods, including natural family planning methods, infertility services, and services to adolescents". Section 1003 of the Act, as amended, authorizes the Secretary to make grants to "entities and individuals to provide the training for personnel to carry out the family planning serices programs described in section 1001 . . .".

Prospective applicants and grantees should refer to the regulations in their entirety. The regulations set out at 42 CFR, Part 59, Subpart C, govern grants for family planning service training.

Under the regulations, "training" means job-specific skill development, the purpose of which is to promote and improve the delivery of family planning services. See 42 CFR 59.202(e). The training does not have to be structured or always provided in formal classroom settings. In-service education, staff development, and continuing education activities that are innovative or non-traditional are encouraged, as well as the development of self-paced, self-instructional or mediated training materials which utilize technological advancements in the learning field.

Training grants may be made to eligible applicants for the purpose of providing programs, not to exceed three months in duration, for training family planning or other health service delivery personnel in skills, knowledge, and attitudes necessary for the effective delivery of family planning services. The Secretary may in particular cases approve support of a program where duration is longer than three months when the Secretary determines (1) that such program is consistent with the purposes of this subpart and (2) that the program's objectives cannot be accomplished within three months because of the unusually complex or specialized nature of the training to be undertaken.

Application Requirements

Applications must be submitted on the forms supplied (SF-424) and in the manner prescribed in the application kits available from the Office of Grants Management. Applicants are required to submit an application signed by an individual authorized to act for the applicant agency or organization and to assume for the organization the obligations imposed by the terms and conditions of the grant award. Applicants are required to submit an original application and two copies.

Applications which are judged to be late or which do not conform to the requirements of this program announcement will not be accepted for review. Applicants will be so notified, and the applications will be returned. All accepted applications will be subjected to a competitive review and assessment by a committee composed of qualified persons. The results of this review will assist the Deputy Assistant Secretary for Population Affairs in considering competing applications and in making the final funding decisions.

Any public or private nonprofit organization or agency is eligible to apply for a grant. However, as specified in the above Summary, only entities proposing to serve Regions II, VI and X will be eligible to apply under this announcement.

A copy of the legislation and regulations governing this program will be sent to applicants as part of the application kit package. Applicants should use the legislation to guide them in developing their applications. Awards will be made only to those applicants who have met all applicable requirements.

Grant Award

In determining which applications will best promote the statutory purposes, eligible competing grant applications will be reviewed and assessed against the following criteria:

1. The applicant's provision for the requirements set forth in regulation at 42 CFR Part 59.205 (10 points).

2. The capacity of the proposed applicant organization and staff to provide the appropriate services and to evaluate the results (15 points).

3. The applicant's presentation of the project's objectives, the methods for achieving project objectives, and the results or benefits expected (25 points).

4. The applicant's documentation of the innovativeness of the program approach, its worth for testing and replication (25 points).

5. The reasonableness of the estimated cost of the project to the government considering the anticipated results. (5 points).

6. The degree which the applicant's evaluation methodology indicates an understanding of program evaluation methods and of a practical, technically sound approach to assessing the project's achievement of program objectives. The extent and nature of the involvement of Title X service providers and the regional office in the evaluation effort should be made clear (20 points).

In making grant award decisions the Deputy Assistant Secretary for Population Affairs (DASPA) will take into consideration such factors as the following:

1. The national training priority areas.

2. The service providers' commitment to and involvement in the planning and implementation of the training project.

3. The type of organization applying.

4. The organizational models for delivery of training.

5. The usefulness to policy makers and service providers of the proposed training project and its potential for complementing existing training needs.

6. The extent to which the applicant has displayed an appreciation for the special needs of clinics which serve rural and underserved areas.

7. Where competing projects are of approximately equal quality and only one grant can be funded, priority will be given to grantees not previously funded by OPA.

Applicants may provide training services directly or indirectly through subcontractors or consultants.

Review Under Executive Order 12372

Applications under this announcement are subject to the review requirements of Executive Order 12372, State Review of Applications for Federal Financial Assistance, as implemented by 45 CFR Part 100. As soon as possible, the applicant should discuss the project with the State Single Point of Contact (SPOC) for each State in the area to be served. The application kit contains the currently available listing of the SPOCs which have elected to be informed of the submission of applications. For those States not represented on the listing, further inquiries should be made by the applicant regarding the submission to the relevant SPOC. The SPOCs comment(s) should be forwarded to the Grants Management Office, Office of Population Affairs, Room 736E, H.H.H. Building, 200 Independence Avenue, SW., Washington, DC 20201. Such comments must be received by the Office of Population Affairs by July 20, 1986 to be considered.

When final funding decisions have been made, all applicants will be notified by letter of the outcome of their applications. The official document notifying an applicant that a project application has been approved for funding is the Notice of Grant Award, which specifies to the grantee the amount of money awarded, the purposes of the grant, and the terms and conditions of the grant award.

Dated: March 21, 1986.

Jo Ann Gasper,

Deputy Assistant Secretary for Population Affairs.

BILLING CODE 4160-17-M

Coordination and Maintenance Committee; Meeting

Notice is hereby given that the ICD-9-CM Coordination and Maintenance Committee will convene on Wednesday, May 21, 1986 and Thursday, May 22, 1986 from 9:30 a.m. to 4:00 p.m. both days in Room 703A of the Hubert Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20021.

AGENCY: National Center for Health Statistics (NCHS). Public Health Service.

SUMMARY: This second notice announces the third meeting of the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) Coordination and Maintenance Committee.

SUPPLEMENTARY INFORMATION: The ICD-9-CM is the clinical modification of the World Health Organization's International Classification of Diseases, Ninth Revision. It is the coding system required for use by hospitals and other health care facilities in reporting both diagnoses and surgical procedures for Medicare, Medicaid and all other health-related HHS programs. The work of the ICD-9-CM Coordination and Maintenance Committee will allow this coding system to continue to be an appropriate reporting tool for use by Federal programs.

The Committee is composed entirely of representatives from various Federal agencies interested in the International Classification of Diseases (ICD) and its modification, updating, and use for Federal programs. It is Co-Chaired by the National Center for Health Statistics

VOL 51 ISS 80 AP 25 1986 UMI

and the Health Care Financing Administration.

At the third meeting of the ICD–9–CM Committee, members will continue the previous discussions for updating ICD–9–CM, Volume 3 procedures. These discussions include proposals for developing additional ICD–9–CM codes for new technologies such as lasers in medicine and surgery and parenteral and enteral nutrition. Additional items for discussion include a proposed new classification for HTLV–3/LAV infections and revisions for urethroscopy and pyeloscopy procedure codes. The meeting is open to the public and attendance, proposal submittals and participation by interested parties are encouraged.

FOR FURTHER INFORMATION, CONTACT: Ms. Sue Meads, Co-Chairperson, National Center for Health Statistics, Room 2–19, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782, telephone (301) 436–7019 or Ms. Lisa Levine, telephone (301) 597–0610.

Dated: April 11, 1986.

Manning Feinleib,

Director, National Center for Health Statistics.

[FR Doc. 86–9283 Filed 4–24–86; 8:45 am]

BILLING CODE 4160–17–M

Statement of Organization, Functions and Delegations of Authority

Part H, Chapter HB (Health Resources and Services Administration) of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services (47 FR 38409–24, August 31, 1982, as amended most recently at 50 FR 29767, July 22, 1985) is amended to reflect a realignment of the Headquarters components of the Indian Health Service, Health Resources and Services Administration.

Under HB–10, Organization and Functions, delete all of the statement for the *Indian Health Service (HBN)* through *Division of Indian Resources Liaison (HBNG3)* and substitute the following:

Indian Health Service (HBN). The Indian Health Service (IHS) assures a comprehensive health services delivery system for American Indians and Alaska Natives with sufficient options to provide for maximum tribal involvement in meeting their health needs. The goal of IHS is to raise the health level of the Indian and Alaska Native people to the highest possible level.

To carry out its mission and to attain its goal, IHS: (1) Assists Indian Tribes in developing their capacity to man and manage their health programs through activities including health management training, technical assistance and human resource development; (2) facilitates and assists Indian Tribes in coordinating health planning, in obtaining and utilizing health resources available through Federal, State and local programs, in operating comprehensive health programs, and in health program evaluation; (3) provides comprehensive health care services, including hospital and ambulatory medical care, preventive and rehabilitative services, and development of community sanitation facilities; and (4) serves as the principal Federal advocate for Indians in the health field to assure comprehensive health services for American Indians and Alaska Natives.

Office of the Director (HBN 1). Provides overall direction and leadership for IHS by: (1) Establishing goals, objectives, policies and priorities in pursuit of the IHS mission; (2) providing leadership to ensure the delivery of high quality, comprehensive health services; (3) coordinating IHS activities and resources internally and externally with those of other governmental and non-governmental programs, promoting optimum utilization of all available health resources; (4) developing and demonstrating alternative methods and techniques of health services management and delivery with a view to provide Indian Tribes and other Indian community groups with optional ways of participating in the Indian health program; (5) developing individual and tribal capacities to participate in Indian health programs through means and modalities which they deem appropriate to their needs and circumstances; (6) affording Indian people an opportunity to enter a career in the IHS by applying Indian preference; (7) keeping the public fully informed on the activities of the IHS; and (8) encouraging full application of the principles of EEO.

Office of Administration and Management (HBN13). Under the direction of the Associate Director for Administration and Management: (1) Provides IHS-wide leadership, program direction, and coordination of all phases of management; (2) provides management expertise and staff advice and support to the Director in program and policy formulation and execution; and (3) plans, directs, and coordinates IHS activities in the area of management policy, internal control reviews, records management, financial management, personnel management, debt management, third-party reimbursement, manpower management, grants and contracts management, procurement, personal property accountability and management, and administrative services.

Office of Planning, Evaluation and Legislation (HBN15). Under the direction of the Associate Director for Planning, Evaluation and Legislation: (1) Serves as the IHS's primary staff element and principal source of advice on program planning, program evaluation, and legislative affairs; (2) develops, in collaboration with financial management staff, the long-range program and financial plan for the IHS; (3) oversees, in coordination with the Office of the Administrator, HRSA, communications between IHS and higher levels of the Department on all matters that involve long-range plans, evaluations of program performance, or legislative affairs; (4) develops long-range goals, objectives, and priorities for the IHS; (5) directs all activities within the IHS which compare the costs of the Agency's programs with their benefits, including the preparation and implementation of comprehensive program evaluation plans; (6) directs all the legislative affairs of IHS, including the development of legislative proposals and a legislative program; (7) plans, develops, directs and coordinates an analytical statistical reporting system providing data for measuring health status and appraising program activities; (8) conducts policy analyses and develops policy positions in programmatic areas for IHS; (9) acts as the focal point for the preparation, development, and monitoring of IHS regulations; (10) assures the development and implementation of IHS program appeals processes within the Service; (11) provides leadership, guidance, and coordination of the health data systems support activities; and (12) administers the implementation of the Privacy Act and the Freedom of Information Act within the IHS.

Office of Tribal Activities (HBNG). Under the direction of the Associate Director for Tribal Activities: (1) Serves as the focal point to provide policy guidance to Tribes and tribal organizations; (2) identifies the needs for and characteristics of optional methods and techniques for Indian program participation; (3) implements new methods and techniques for Indian community participation in and management of their health programs; (4) assists Tribes, as appropriate, that do not want to manage their own health programs to gain greater influence over their community's health programs by providing the Tribes with technical assistance, training, and guidance; (5) advises on the Indian community development implications of the Service's plans, programs and operations; (6) develops standards and policy for all tribal contracts; and (7) provides broad guidance on the conduct of tribal contract reviews by the Area Offices.

Office of Health Programs (HBNH). Under the direction of the Associate Director for Health Programs: (1) Provides consultation and technical assistance to all operating and management levels of the IHS and Indian Tribes in the design and implementation of health management and health delivery systems; (2) provides guidance and support to all field activities related to the day-to-day delivery of health care; (3) provides Service-wide leadership in health programs in relation to IHS goals, objectives, policies, and priorities; (4) directs the development and implementation of health care administration and direct and contract health services, standards, quality control and quality assurance, operational planning activities and program reviews of health programs; and (5) provides leadership, guidance, and coordination of the health manpower and training programs.

Office of Environmental Health and Engineering (HBNJ). Under the direction of the Associate Director for Environmental Health and Engineering: (1) Provides leadership, guidance and coordination to the overall IHS environmental health, Indian sanitation facilities construction and health care facilities engineering programs; (2) serves as the principal advisor in policy development for IHS environmental health and facilities engineering programs; (3) develops and coordinates program requirements for the planning, design, construction and evaluation of IHS health care and sanitation facilities and personnel quarters; (4) administers the management, maintenance and repair of IHS real property incuding existing IHS health care facilities and IHS personnel quarters; and the design, construction, operation and maintenance of sanitation facilities; (5) administers nationwide IHS facilities engineering and construction programs for IHS health care facilities with the support of the Office of Engineering Services; (6) develops, coordinates, and evaluates technical standards, guides, plans and requirements for IHS environmental health and facilities engineering programs; (7) administers IHS environmental health programs including occupational safety and health, accident prevention and injury control; as well as biomedical engineering and energy conservation activities; (8) provides consultation and technical assistance to and monitors as appropriate, IHS Area Offices, tribal governments and Alaska Native corporations on facilities planning and construction programs; (9) coordinates IHS requirements for shared or cooperative projects with Federal Agencies such as DOE, DOD, VA, HUD, State and regional planning bodies, etc; and (10) provides consultation to professional standards organizations and related groups such as the Joint Commission for the Accreditation of Hospitals and National Research Council.

Office of Health Program Development (HBNK). Under the direction of the Associate Director for Health Program Development: (1) Develops and demonstrates methods and techniques for the improved operations and management of the health program; (2) provides consultation and technical assistance to all operating and management levels of the Indian Health Service and Indian tribes in the design and implementation of health management and service delivery systems; (3) coordinates health research and development activities within the Service directed toward improving the health of Indian people; (4) provides or develops appropriate training courses, methods and plans for human resource development; and (5) provides direct or indirect health services for the Indian people in the IHS Service Units under the jurisdiction of the Office.

This realignment is effective upon date of signature.

Dated: April 14, 1986.

Donald Ian Macdonald,

Acting Assistant Secretary for Health.

BILLING CODE 4160–16–M

Statement of Organization, Functions and Delegations of Authority

Part H, Public Health Service (PHS), of the Statement of Organization, Functions and Delegations of Authority of the Department of Health and Human Services is amended to reflect revisions in Chapter HB (Health Resources and Services Administration) and Chapter HN (National Institutes of Health). These changes will implement the requirements of Pub. L. 99–158 (Part E, Subpart 3) pertaining to nursing research and research training activities. Specifically:

(1) The statement for the Health Resources and Services Administration (47 FR 38409–24, August 31, 1982, as amended most recently at 51 FR 9694–95, March 21, 1986), is amended to revise the functional statement for the Division of Nursing (HBP4), Bureau of Health Professions, to delete references to nursing research and research training activities. These activities are transferred to the National Institutes of Health. The Center for Nursing Research, within the Division, is abolished.

(2) The statement for the National Institutes of Health (40 FR 22859, May 27, 1975, as amended most recently at 51 FR 12928–30, April 16, 1986), is amended to reflect the establishment of the National Center for Nursing Research. The Center will provide a focal point for the conduct and support of, and dissemination of information pertaining to, basic and clinical nursing research, research training, and other programs in patient care research.

Health Resources and Services Administration

Under Part H, Chapter HB, Health Resources and Services Administration, Section HB–20, Functions, delete the statement for the *Division of Nursing (HBP4),* Bureau of Health Professions, and insert a new statement as follows:

Division of Nursing (HBP4). Serves as principal focus for nursing education and practice. Specifically: (1) Provides the professional nursing expertise and leadership required by the Bureau in planning, coordinating, evaluating, and supporting development and utilization of the Nation's health personnel resources; (2) supports and conducts programs with respect to the development utilization, and quality of nursing personnel, including registered nurses, practical or vocational nurses, and nursing aides; (3) assists State and local areas in planning, developing, and improving nursing services and educational programs; (4) conducts and supports programs related to the provision of nursing care to advance the health status of individuals, families, and communities; (5) conducts and supports studies and evaluations of nursing personnel requirements, distribution and availability, and cooperates with other components of the Bureau and Agency in such studies; (6) analyzes and interprets nursing programmatic data collected from a variety of sources; (7) engages with other Bureau programs in cooperative

VOL 51 ISS 80 APR 25 1986 UMI

efforts of development and demonstration on the interrelationships between individual members of the health care team, their tasks, education requirements, and related training modalities; (8) maintains liaison with health professional groups and others, including consumers, having common interest in the Nation's capacity to deliver nursing services: (9) fosters, supports and conducts projects to expand the scientific base of nursing practice and role reformulation and to develop and incorporate new knowledge into practice and education; and (10 provides consultation and technical assistance to public and private organizations, agencies, institutions, the PHS Regional Offices, program units of the Federal Government, and international agencies and ministries of health on all aspects of nursing.

Section HB–30, Delegations of Authority. All of the authorities delegated to the Administrator, HRSA, under Title IV of the PHS Act, as amended, are hereby, revoked. All other delegations and redelegations of authority made to HRSA officials which were in effect immediately prior to this reorganization shall continue in effect.

National Institutes of Health

Under Part H, Chapter HN, National Institutes of Health, *Section HN–B, Organization and Functions,* after the statement for the *John E. Fogarty International Center (HN–5),* add the following statement:

National Center for Nursing Research (HN–7), Foster, conducts, supports, and administers research and research training programs directed at promoting the growth and quality of research related to nursing and patient care and expanding the pool of experienced nurse researchers through: (1) Research grants, contracts, and cooperative agreements to institutions and individuals; (2) individual and institutional research training awards; (3) promotion of closer interaction with other bases of health care research; and (4) collection and dissemination of research findings in these areas.

Section HN–D, Delegations of Authority. No delegation of authority is needed because all authorities under Title IV of the PHS Act have previously been delegated to the Director, NIH.

Effective Date: April 16, 1986.

Donald Ian Macdonald,

Acting Assistant Secretary, for Health.

BILLING CODE 4160–17–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[I–15247]

Idaho; Proposed Continuation of Withdrawal

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that a portion of the withdrawal for the Minidoka Reclamation Project continue for an additional 100 years, which is the estimated time the lands will continue to be used for the purpose for which withdrawn. The lands would remain closed to surface entry and mining but have been and would remain open to the mineral leasing laws.

DATE: Comments should be received within 90 days of the date of publication of this notice.

ADDRESS: Comments should be sent to: Idaho State Director, Bureau of Land Management, 3380 Americana Terrace, Boise, ID 83706.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, Idaho State Office, 208–334–1597.

The Bureau of Reclamation proposes that a portion of the land withdrawal made by the Secretarial Order of July 12, 1921, be continued for a period of 100 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714. The land is described as follows:

Boise Meridian, Idaho

T. 7 S., R. 30 E.,
- Sec. 12, lots 4 and 6;
- Sec. 13, lots 2, 3, 5 and 6.

T. 7 S., R. 31 E.,
- Sec. 2, lot 7;
- Sec. 3, lots 3, 4, 7 and 12;
- Sec. 4, lots 3, 4, 6 and 8;
- Sec. 5, lots 1 and 8;
- Sec. 17, lot 2;
- Sec. 18, lots 9 and 14;
- Sec. 20, lot 3;

T. 4 S., R. 33 E.,
- Sec. 31, lots 2, 8, 9, 10, 11 and 12;
- Sec. 32, lots 8, 9 and 10.

The area described contains 687.42 acres in Power and Bingham Counties.

The purpose of the withdrawal is to protect the lands for use as an irrigation storage facility (American Falls Reservoir). The withdrawal presently segregates the land from surface entry and mining. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in correction with the proposed withdrawal continuations may present their views in writing to the Idaho State Director at the address indicated above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination of the withdrawals will be published in the **Federal Register.** The existing withdrawals will continue until such final determination is made.

Dated: April 18, 1986.

William E. Ireland,

Chief, Realty Operations Section.

BILLING CODE 4310–GG–M

Phoenix District Advisory Council, Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: The Phoenix District Advisory Council of the Bureau of Land Management meets May 28, 1986, in Phoenix, Arizona. The meeting will start at 9:30 a.m. in the Phoenix District Office, 2015 W. Deer Valley Road.

The Council has been established by and will be managed according to the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The Agenda for the meeting includes:

Phoenix Resource Area Resources Management Plan
Upper Sonoran Wilderness Environmental Impact Statement
BLM Land Exchange Program
BLM Management Updates
Business from the floor
Public comments and statements
Future meetings and agenda topics

SUPPLEMENTARY INFORMATION: This is a public meeting and BLM welcomes the presentation of oral statements or the submission of written statements that address the issues on the meeting agenda or related matters.

Dated: April 17, 1986.

Deane H. Zeller,

Acting District Manager.

Public Land Sale in Woodward County, OK

AGENCY: Bureau of Land Management, Interior.

ACTION: Partial cancellation of land sale.

SUMMARY: The following described land in Woodward (WW) County, Oklahoma as published in the **Federal Register,** Volume 51, No. 40, on February 28, 1986, at page 7134 is hereby removed from sale in its entirety.

Legal Description

Tract: WW–1.
T. 21 N., R. 17 W., IM.
Sec. 30: NE¼SW¼
Acreage: 40.00 acres.

The reason for the removal of this tract from the sale is that a protest has been lodged by an adjacent land owner who is contesting the method of sale. The land will be reoffered for sale upon the resolution of the subject protest.

FOR FURTHER INFORMATION CONTACT: Hans Sallani, 405–231–5491.

Jim Sims,

District Manager.

[OR–37150]

Conveyance of Public Lands and Order Providing for Opening of Lands; OR

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the conveyance of 720 acres of public lands out of Federal ownership. This action will also open 3,247.78 acres of reconveyed lands to surface entry. A total of 709.36 acres will be opened to mining and mineral leasing. Of the balance, 1,363.21 acres have been and remain open to mining and mineral leasing and the mineral estate in 1,175.21 acres was not conveyed to the United States.

EFFECTIVE DATE: May 27, 1986.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, (Telephone 503–231–6905).

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that in an exchange of lands made pursuant to section 206 of the Act of October 21, 1976, 90 Stat. 2756, 43 U.S.C. 1716, a patent has been issued transferring 720 acres of lands in Wheeler County, Oregon, from Federal to private ownership.

2. In the exchange, the following described lands have been reconveyed to the United States:

Willamette Meridian

T. 1 S., R. 18 E.,
- sec. 36, SE¼SE¼.

T. 2 S., R. 18 E.,
- sec. 1, SE¼NE¼.

T. 1 S., R. 19 E.,
- sec. 30, lot 11;
- sec. 31, lots 2, 5, 6, 7, 8, 10, 11, and 12, and W½SE¼.

T. 2 S., R. 19 E.,
- sec. 6, lots 3 and 5, SW¼NE¼, SE¼NW¼, and N½NE¼SE¼.

T. 6 S., R. 19 E.,
- sec. 28, S½NW¼, N½SW¼, and SW¼SW¼;
- sec. 29, E½, NE¼NW¼, SE¼SW¼, and that portion of the W½W½ lying east of the John Day River;
- sec. 31, that portion of the E½E½ lying east of the John Day River;
- sec. 32, E½ and all of W½ lying east of the John Day River;
- sec. 33, NW¼NE¼, N½NW¼, SW¼NW¼, SW¼, and W½SE¼.

T. 7 S., R. 19 E.,
- sec. 4, lots 2, 3, and 4, S½NW¼, and SW¼;
- sec. 5, lots 1 and 2, S½NE¼, SE¼, and that portion of the N½SW¼ lying east of the John Day River.

The areas described aggregate approximately 3,247.78 acres in Gilliam, Sherman, and Wheeler Counties.

3. The mineral estate in the following described lands is already in Federal ownership and has been and will remain open to operation of the mining laws and mineral leasing laws:

Willamette Meridian

T. 6 S., R. 19 E.,
- sec. 29, E½, NE¼NW¼, and SE¼SW¼;
- sec. 32, NE¼, E½NW¼, NE¼SW¼, and NE¼SE¼;
- sec. 33, NW¼NE¼, NE¼NW¼, E½SW¼, SW¼SW¼, and W½SE¼.

T. 7 S., R. 19 E.,
- sec. 4, SE¼NW¼;
- sec. 5, lots 1 and 2, S½NE¼, and SE¼.

The areas described aggregate 1,363.21 acres in Wasco and Wheeler Counties.

4. The mineral estate in the following described lands was not reconveyed to the United States and will not be opened to operation of the mining laws and mineral leasing laws:

Willamette Meridian

T. 6 S., R. 19 E.,
- sec. 28, S½NW¼, N½SW¼, and SW¼SW¼;
- sec. 29, that portion of the W½W½ lying east of the John Day River;
- sec. 31, that portion of the E½E½ lying east of the John Day River;
- sec. 32, SE¼SW¼, NW¼SE¼, and S½SE¼;
- sec. 33, W½NW¼, and NW¼SW¼.

T. 7 S., R. 19 E.,
- sec. 4, lots 2, 3, and 4, S½NW¼, and SW¼;
- sec. 5, that portion of the N½SW¼ lying east of the John Day River.

The areas described aggregate approximately 1,175.21 acres in Wasco and Wheeler Counties.

5. At 8:30 a.m., on May 30, 1986, the lands described in paragraph 2 will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 8:30 a.m., on May 30, 1986, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

6. At 8:30 a.m., on May 30, 1986, the lands described in paragraph 2, except as provided in paragraphs 3 and 4, will be open to location and entry under the United States mining laws. Appropriation of land under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

7. At 8:30 a.m., on May 30, 1986, the lands described in paragraph 2, except as provided in paragraphs 3 and 4 will be open to applications and offers under the mineral leasing laws.

Dated: April 15, 1986.

B. LaVelle Black,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-33-M

DEPARTMENT OF INTERIOR

Fish and Wildlife Service

Record of Decision for Issuance of Endangered Species Permit To Allow Incidental Take of the Coachella Valley Fringe-Toed Lizard

AGENCY: Fish and Wildlife Service (FWS), Interior (DOI).

ACTION: Notice of record of decision.

SUMMARY: Notice is hereby given that the Fish and Wildlife Service has decided to issue a permit to allow incidental taking of the Coachella Valley fringe-toed lizard (CVFTL) (*Uma inornata*) a threatened species, in certain areas of the Coachella Valley of California. This Record of Decision (ROD) was prepared in accordance with the Council on Environmental. Quality Regulations, 40 CFR 1505.2. This decision is based upon: information contained in the Final Environmental Impact Statement (EIS) (FES 86–1) which was filed with the Environmental Protection Agency on January 26, 1986 and became available to the public on February 5, 1986; provisions of the Coachella Valley Fringe-toed Lizard Habitat Conservation Plan (HCP); two Implementing Agreements for the HCP; comments from the public regarding the EIS and HCP; and compliance with the terms and conditions for the issuance of a permit for incidental taking under Section 10(a) of the Endangered Species Act as amended, and revised implementing regulations for Section 10(a), (50 CFR Parts 13 and 17).

The HCP provides the framework for minimizing and mitigating the impacts from incidental taking. Its conservation program has two major features:

Direct conservation—setting aside land in three reserves and controlling land use on other lands through management and regulations (zoning) compatible with CVFTL habitat.

Mitigation fee—collecting mitigation fees for development of private lands within the occupiable habitat of the CVFTL habitat.

The HCP is supported by two Implementing Agreements which make the HCP explicit and enforceable. The first Implementing Agreement between the FWS, the Nature Conservancy (TNC) (a non-profit corporation), and the local land use authorities commits the permit applicant to exert land use controls and to collect mitigation fees for development and sets forth the responsibilities of the FWS, TNC, the permit applicants, and the local land use authorities. The second Cooperative Management Agreements commits the FWS, Bureau of Land Management, California Department of Fish and Game, and TNC to the management and maintenance of the three habitat reserves. The Section 10(a) Permit has a 30-year term and may be renewed at the end of that period.

SUPPLEMENTARY INFORMATION:

I. Background

A. Endangered Species Act Requirements

Section 9 of the Endangered Species Act of 1973, as amended, (ESA or the Act) and regulations implementing the Act prohibit the taking of species listed as "threatened" pursuant to the Act. Section 10(a) of the Act, however, authorizes the Service to Permit the taking of threatened species if such taking is "incidental to, and not the purpose of, the carrying out of an otherswise lawful activity." (16 U.S.C. 1539). In order to qualify for this provision, the permit applicant must submit a conservation plan to the Service that specifies:

(1) The impact which will likely result from the taking;

(2) What steps the applicant will take to minimize and mitigate such impacts, and the funding that will be available to implement the mitigation;

(3) What alternative actions to the taking the applicant considered and the reasons why the alternatives are not being utilized; and

(4) Such other measures that the Secretary may require.

In order to issue a permit pursuant to a submitted conservation plan, the Secretary is required to find that:

(1) The taking will be incidental;

(2) The applicant will, to the maximum extent practicable, minimize and mitigate the impacts of the taking;

(3) The applicant will ensure that adequate funding for the plan will be provided;

(4) The taking will not appreciably reduce the likelihood of the survival and recovery of the species in the wild; and

(5) The other measures specified by the Secretary will be met.

The Conference Report on the Endangered Species Act Amendments of 1982 indicates that this provision was modeled after the San Bruno Mountain Area Habitat Conservation Plan. (H.R. Rep. No. 97–835, 97th Cong. 2d Sess. 30 (1982).)

B. The Coachella Valley Fringe-Toed Lizard Habitat Conservation Plan

The U.S. Fish and Wildlife Service (FWS) has been requested to issue a permit to allow incidental taking of the CVFTL a threatened species, under Section 10(a) of the Act and promulgated in 50 CFR Part 17 (50 FR 39681). The applicants for the permit consist of the following California local governments: County of Riverside and Cities of Desert Hot Springs, Plam Springs, Cathedral City, Rancho Mirage, Palm Desert, Indian Wells, La Quinta, Indio, and Coachella. Since settlement began in the Coachella Valley, CVFTL habitat which consists of flat valley lands covered with wind blown sand deposits, has been undergoing conversion to urban and agricultural uses. In 1984 only 70 square miles of the historic 200 square miles of CVFTL habitat remained. By the year 2000 the predicted increase of year-round residents in the Valley will result in the conversion of an additional 40 square miles of the remaining viable habitat. The Section 10(a) Permit for incidental taking based on a reasonable conservation plan would promote the long-term survival and recovery of the CVFTL while authorizing regulated development in the Coachella Valley.

Regulations implementing the Endangered Species Act prohibit "taking" of the CVFTL (50 CFR 17.31), and "taking" is defined as killing, capturing, harming, or collecting individual specimens. Because the CVFTL is intrinsically confined to its habitat, virtually any land use which disturbs or converts habitat could result in "taking", which would be in violation of the Act. The local land use governments (the applicants) are mandated to approve/disapprove land use plans within their respective jurisdictions. When approval of land use plans result in habitat conversion, their processes for making decisions on land use plans may be in conflict with provisions of the Act to protect the CVFTL. Although the proposed action in the EIS, application for a Section 10(a) Permit, was initiated by the local land use governments and not the Federal governments, the FWS must act upon the application and decide whether to issue the requested Section 10(a) Permit.

Alternative Considered

In making a decision regarding the issuance of the requested Section 10(a) Permit, the FWS evaluated three main alternatives including the proposed action.

Alternative 1—Proposed Action: The proposed action is the issuance of a permit under section 10(a) of the Act, which would authorize incidental taking of fringe-toed lizards during the course of otherwise lawful activities carried out in the Coachella Valley which are outside of lizard preserve areas and lands owned or administered by the Federal Government including lands owned or held for the benefit of Native Americans. County and municipal zoning restrictions, mitigation fee requirements, and grading and building permit requirements would determine what activities in the Valley would be "otherwise lawful." The permit is conditioned on a Habitat Conservation Plan (HCP) for the CVFTL which is supported by two Implementing Agreements. They establish the roles and responsibilities of the applicants to collect fees and administer the permit, and define the goals and responsibilities of the four principal land administrators of the three habitat reserves.

Alternative 2—No action. This alternative proposed that no 10(a) Permit would be issued and that other means would be used to accomplish conservation of the CVFTL. Three means for accomplishing this no action alternative were considered: (1) Status quo—variable enforcement of the ESA; (2) enforcement of ESA without any exceptions; and (3) a preserve funded entirely by the Federal government.

Alternative 3—Different configuration of reserves. This alternative proposes the issuance of a permit for incidental taking based on different scenarios of reserve configurations and conditioned by a different or amended HCP. These include: (1) Fewer reserves; (2) a greater number or reserves; and (3) multiple small, individual reserves as mitigation for "taking" on adjacent lands under the same ownership.

II. Findings Supporting Approval of the Section 10(a) Permit

A. Analysis of Public Comments

The Service received two letters of comment on the final EIS. No opposition was voiced in either letter. No substantive comments were received on the permit application notice published in the **Federal Register** on March 6, 1986.

B. Summary of Environmental Documentation

The findings referenced below are based on the information contained within the administrative record on this matter which includes but is not limited to, the following major documents:

(1) Coachella Valley Fringe-toed Lizard Habitat Conservation Plan Steering Committee, "Coachella Valley Fringe-toed Lizard Habitat Conservation Plan" (June 1985).

(2) Two Implementing Agreements with respect to the Coachella Valley Fringe-toed Lizard Habitat Conservation Plan.

(3) U.S. Fish and Wildlife Service, "Final Environmental Impact Statement Regarding Adoption and Implementation of Coachella Valley Fringe-toed Lizard Habitat Conservation Plan and Endangered Species Act Section 10(a) Permit" (April 1986).

C. Statement of Facts in Support of Findings

In accordance with the requirements of the Act, the Service hereby makes the following statements of fact in support of the findings described below.

(1) The area of consideration in the HCP consists of approximately 240,000 acres in the Coachella Valley. The area is within the jurisdiction and/or planning jurisdiction of the County of Riverside and nine Cities (Desert Hot Springs, Palm Springs, Cathedral City, Rancho Mirage, Palm Desert, Indian Wells, La Quinta, Indio, and Coachella).

(2) The 10(a) permit will authorize incidental taking of fringe-toed lizards during the course of otherwise lawful activities carried out in the Coachella Valley which are outside of lizard preserve areas and lands owned or administered by the Federal Government including lands owned or held for the benefit of Native Americans. County and municipal zoning restrictions, mitigation fee requirements, and grading and building permit requirements would determine what activities in the Valley would be "otherwise lawful."

(3) The HCP establishes three major reserves (Coachella Valley preserve, Willow Hill-Edom Hill Reserve and Whitewater Floodplain Reserve) each with an unobstructed sand source. A total of 12,382 acres of CVFTL habitat, (of which 11,757 are still subject to sand transport) are to be conserved by a combination of acquisition and management. Of this, 7,058 acres represent the occupiable CVFTL habitat to be acquired. The acreages in these three reserves total 15.2 percent of the historic habitat of the CVFTL and 26.8 percent of the remaining habitat not yet subject to sand stabilization.

(4) Mitigation fees on land which is developed would fund management of the reserves and part of the acquisition of the reserves. Land converted to agriculture would not be subject to the fee; however, land which was not in agriculture prior to August 1983 would be subject to mitigation fees when developed. The fee assessment area would encompass about 70,000 acres within the historic range of the CVFTL. 51,000 of which would be developable without any restriction. Mitigation fees would be assessed on all parcels

VOL 51 ISS 80 AP 25 1986 UMI

regardless of size and would be based on the acreage disturbed. A fee of $600/acre disturbed would be assessed until a total of $7 million has been collected, after which the fee would drop to $100/acre for the remainder of the 30-year life of the permit. Growth projections indicate that an estimated total of $10 million from mitigation fees will be collected over the 30 year period.

(5) The CVFTL is closely adapted to living in the specialized, extreme environment of windblown sand, and is dependent upon this habitat for its survival. While several distinct types of sand deposits afford habitat to the lizard, the species shows a preference for fine sand, and for the lee side of dunes and hummocks. The sand transport process which creates the blowsand ecosystem is a fundamental consideration in conservation planning.

(6) Based on current evidence and the opinion of the Recovery Team and other scientists, the proposed size and configuration of the reserves will promote the survival and recovery of the species in the wild.

III. Findings

On the basis of the statement of facts described above and the other information contained within the administrative record on this permit application, the Service hereby makes the following findings:

(1) The HCP, including the Implementing Agreements and the EIS, specifies:

(a) The impact which will likely result from the taking of the Coachella Valley fringe-toed lizard;

(b) What steps the applicants will take to minimize and mitigate such impacts, and funding that will be available to implement such steps;

(c) What alternative actions to such taking were considered and reasons why such alternatives are not being utilized; and

(d) Such other measures as are necessary or appropriate for the purposes of the plan.

(2) The taking of Coachella Valley fringe-toed lizard will be incidental to, and not the purpose of, the implementation of the HCP. The purpose of the HCP and the Implementing Agreements is to provide for the protection and enhancement of the CVFTL while at the same time allowing otherwise lawful development on certain designated parts of the Coachella Valley.

(3) The County, the Cities, and other parties to the HCP and its Implementing Agreements will, to the maximum extent practicable, minimize and mitigate the impact of the taking of the CVFTL. The mitigation required by the HCP and Implementing Agreements as conditions of the Section 10(a) Permit includes, but is not limited to: (a) Specifying lands which are to be conserved by acquisition, management or land use regulation, and lands which are to serve as the mitigation fee area; (b) establishing three reserves; and (c) providing adequate permanent funding for reserve habitat acquisition and management.

(4) The applicants have ensured that adequate funding for the HCP will be provided. These assurances are described in detail in the Implementing Agreements.

(5) Any incidental takings of CVFTL which may occur will not appreciably reduce the likelihood of the survival and recovery of the species in the wild nor result in the adverse modification or destruction of its critical habitat as noted in the ESA Section 7(b) Biological Opinion.

Having considered the surrounding facts and circumstances of the case and possible positive and negative effects discussed above, the Service has concluded that issuance of the 10(a) permit is the environmentally preferable alternative.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30604]

Southern Railway Co. Acquisition Exemption; Birmingham Terminal Co.

Southern Railway Company (SRC) and Birmingham Terminal Company (BTC) filed a notice of exemption for SRC to acquire certain real estate, track and other road properties of BTC.

All of the capital stock of BTC is owned by SRC, The Alabama Great Southern Railroad Company (AGS), and Central of Georgia Railroad Company (CGRC). Both AGS and CGRC are wholly-owned subsidiaries of SRC. The shareholders propose to dissolve BTC and distribute its assets to the shareholders. As pertinent here, SRC will acquire BTC's operating assets consisting of less than two acres of real estate and one side track less than 1,500 feet long, together with any appurtenant operating property or fixtures and real estate. No reductions in service are contemplated.

This is a transaction within a corporate family of the type specifically exempted from the necessity of prior review and approval under 49 CFR 1180.2(d)(3). It will not result in adverse changes in service levels, significant operational changes, or a change in the competitive balance with carriers outside the corporate family.

As a condition to use of this exemption, any employees affected by the acquisition will be protected under *New York Dock Ry.—Control—Brooklyn Eastern Dist.* 360 I.C.C. 60 (1979).

Decided: April 3, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out is responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting and recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Office will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Who will be required to or asked to report or keep records.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202 523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N-1301, Washington, DC 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone 202 395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, Washington, DC 20503.

Any member of the public who wants to comment on a recordkeeping/reporting requirement which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

New

BILLING CODE 4510-27-M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of pervailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

New General Wage Determination Decisions

The numbers of the decisions being added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume, State, and page number(s).

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 80 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from:

Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 16th day of April 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Mine Safety and Health Administration

[Docket No. M-86-53-C]

Ranger Fuel Corp.; Petition for Modification of Application of Mandatory Safety Standard

Ranger Fuel Corporation, P.O. Box 966, Beckley, West Virginia 25801 has filed a petition to modify the application of 30 CFR 75.1719 (illumination) to its Beckley No. 1 Mine (I.D. No. 46-02166) located in Raleigh County, West Virginia. Th petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that lighting be provided in the mine while self-propelled mining equipment is operated in the working place.

2. Petitioner states that application of the standard would result in a diminution of safety to the miners affected and that technology is not available to safely maintain the lighting system at coal heights of 36 inches or less.

3. Miners have difficulty maintaining the lighting due to low coal, wants, and faults in the coal seam. The necessary drilling and shooting of wants and faults to advance the face damages the light fixtures, wiring, and ballast boxes; miners are then exposed to injuries between chocks to make repairs. Wiring to maintain the lighting system is exposed in the crawl space of the chocks and interferes with the miners performing their duties.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 22, 1986. Copies of the petition are available for inspection at that address.

Dated: April 17, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86-9346 Filed 4-24-86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M-86-29-C]

Western Energy Co.; Petition for Modification of Application of Mandatory Safety Standard

Western Energy Company, P.O. Box 99, Colstrip, Montana 59323 has filed a petition to modify the application of 30 CFR 77.802 (protection of high-voltage circuits; neutral grouding resistors; disconnecting devices) to its Rosebud No. 6 Mine (I.D. No. 24-01747) located in Rosebud County, Montana. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that high-voltage circuits supplying portable or mobile equipment contain either a direct or derived neutral which is grounded through a suitable resistor at the source transformers.

2. Petitioner states that application of the standard would result in a diminution of safety to the miners required to inspect, maintain, test and repair the grounding resistor and associated devices mounted in the utility switchyard. Miners working on portable equipment in the mine could be exposed to a hazard because positive 15 KV isolation cannot be maintained between the utility ground system and the mine safety ground system during a utility line-to-ground fault in the switchyard.

3. As an alternate method, petitioner proposes to move the grounding resistor 6000 to 8000 feet out of the utility switchard to an enclosed stationary switchgear house located on mine property. The neutral would be derived at this stationary switchgear house by a neutral grouding transformer, and grounded through a neutral grounding resistor mounted nearby.

4. For these reasons petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Admininstration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before May 27, 1986. Copies of the petition are available for inspection at that address.

Dated: April 17, 1986.

NATIONAL SCIENCE FOUNDATION

Charter Extension of the Advisory Committee on Merit Review

The Advisory Committee on Merit Review was scheduled to expire on April 24, 1986. The life of the Committee has now been extended until August 29, 1986 to allow time for the Committee to complete its final report. The Director of the National Science Foundation has determined that the extension is necessary and in the public interest. This determination follows consultation with the Committee Management Secretariat, GSA.

April 22, 1986.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Connecticut Yankee Atomic Power Company; Environmental Assessment and Finding of No Significant Impact

[Docket No. 50-213]

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of a temporary exemption from the regulatory requirements of General Design Criterion No. 35 (GDC 35) of 10 CFR 50, Appendix A, and the Interim Acceptance Criteria for Emergency Core Cooling Systems for Light Water Reactors 10 CFR, Appendix A, Part 3 (36 FR 12249), concerning the consideration of single failures in emergency core cooling system evaluations to the Connecticut Yankee Atomic Power Company (CYAPCO or the licensee) for the Haddam Neck Plant, located at the licensee's site in Middlesex County, Connecticut.

Environmental Assessment

Identification of Proposed Action

The proposed action would grant a temporary exemption from the regulatory requirements of GDC 35 and the Interim Acceptance Criteria (IAC) concerning the consideration of single failures in emergency core cooling systems (ECCS) evaluations for the period of one operating cycle.

On March 25, 1986, CYAPCO reported the identification of a small range of break sizes in one loop of the reactor coolant system (RCS) for which safety injection flow, during only the high pressure recirculation mode may be insufficient to provide adequate core cooling. By letter dated April 10, 1986, CYAPCO identified measures to provide adequate core cooling in the event of a small-break loss-of-coolant accident (LOCA). CYAPCO's proposed interim measures included the use of the high pressure safety injection (HPSI) system, the residual heat removal (RHR) system and certain operator actions. However, CYAPCO noted that two valves, which are used during the HPSI recirculation mode, did not meet the prescribed single failure requirements of GDC 35. CYAPCO committed to impose monthly surveillance and cycling requirements for these valves to provide added assurance of valve operability.

By letter dated April 22, 1986, CYAPCO requested a temporary exemption from the regulatory requirements of GDC 35 and the IAC concerning the consideration of single failures in ECCS evaluations. The granting of the exemption from single failure considerations for the two valves outside containment is the proposed action being considered by the staff.

The Need for the Proposed Action

Provisions requiring consideration of single failure in this context are set forth both in GDC and the Interim Acceptance Criteria. GDC 35 provides in applicable part as follows:

"A system to provide abundant emergency core cooling shall be provided . . . suitable redundancy in components and features . . . shall be provided to assure that for onsite electric power system operation (assuming offsite power is not available) and for offsite electric power system operation (assuming onsite power is not available) the system safety function can be accomplished, assuming a single failure."

Further, the Interim Acceptance (IAC), to which Haddam Neck was originally evaluated, provide as follows:

The combination of systems used for analyses should be derived from a failure mode and effects analyses, using the single failure criterion.

Thus, for either GDC 35 or the IAC, a single requirement is imposed on ECCS evaluations of light water power reactors, including the Haddam Neck Plant.

The exemption is requested specifically with respect to two valves, both outside containment, which would be used under procedurally defined conditions to respond to a small break LOCA. CYAPCO he implemented measures to assure valve operability of these valves, and by procedure has established another alternative flow path in the event those valves are inoperable despite best efforts to assure operability.

Environmental Impacts of the Proposed Action

The proposed exemption affects the consideration of single failures for two valves which are used in the HPSI recirculation mode. One measure of environmental impact is whether the proposed exemption results in an overall reduction in the probability of adverse consequences from reactor operation that could affect the public health and safety. In this instance, the original high pressure recirculation mode using the charging pumps has been found to be deficient for a narrow spectrum of breaks, whereas the safety benefits derived from using the HPSI pumps represent a credit for a much broader range of postulated breaks. CYAPCO has estimated that the implementation of the proposed interim response measure (use of HPSI pumps during recirculation) decreases the overall core

melt frequency associated with small and medium break LOCA's at Haddam Neck by a minimum of 27 percent over the original design.

CYAPCO has stated that the HPSI recirculation option involves the recirculation of primary fluids outside containment in systems not previously analyzed for those conditions. If gross fuel failure were assumed, there would be a potential for offsite radiological consequences in excess of the guideline values of 10 CFR Part 100. As a result, leakage tests were performed on the HPSI recirculation system pumps and valve and no leakage was apparent. CYAPCO concludes that operation of the recirculation mode will preclude gross fuel failures following the small break LOCA. Even if fuel failures were assumed, it is very unlikely that core damage would be so substantial as to cause offsite releases to approach those assessed in hypothetical accidents calculations carried out for Part 100 purposes. Further, given the very low probability of any such release, the effect on overall plant risk would not be significant. The proposed exemption does not otherwise affect facility radiological impacts, does not affect plant non-radiological effluents and has no other environmental impact.

Therefore, the Commission concludes there are no measurable radiological or nonradiological environmental impacts associated with the proposed exemption.

Alternatives to the Proposed Action

Since the Commission has concluded there is no measurable environmental impact associated with the proposed exemption, any alternatives with equal or greater environmental impacts need not be evaluated. One alternative to the exemption would be to require repairs be made to the subject ECCS to satisfy the prescribed regulatory requirements. Such an action would not significantly enhance the protection of the environment, may not be the best long-term solution and would result in a diversion of utility engineering resources from determining a safe and reliable long-term solution.

Alternative Use of Resources

This action does not involve the use of resources not considered previously in the Final Environmental Statement for the Haddam Neck Plant.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption. Based upon the environmental assessment, the NRC staff concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this proposed action, see the licensee's letter dated April 1, April 10 and April 22, 1986. These letters are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Russell Library, 123 Broad Street, Middletown, Connecticut 06547.

Dated at Bethesda, Maryland, this 23rd day of April 1986.

For The Nuclear Regulatory Commission.

Christopher I. Grimes,

Director, Integrated Safety Assessment, Project Directorate, Division of PWR Licensing—B.

BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a proposed revision to a guide in its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft, temporarily identified by its task number, ES 928-4 (which should be mentioned in all correspondence concerning this draft guide), is the second proposed Revision 1 to Regulatory Guide 1.23 and is entitled "Meteorological Measurement Program for Nuclear Power Plants." The guide is being revised to consolidate into a single document existing regulatory guidance on meteorological measurement programs. The guide endorses, with certain exceptions, ANSI/ANS-2.5-1984, "Standard for Determining Meterological Information at Nuclear Power Sites."

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555. Comments will be most helpful if received by June 23, 1986.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Silver Spring, Maryland this 21st day of April 1986.

For the Nuclear Regulatory Commission.

Karl R. Goller,

Director, Division of Radiotion Programs and Earth Sciences, Office of Nuclear Regulatory Research.

VOL 51 ISS 80 AP 25 1986 UMI

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Performance Review Board; Membership

Notice is hereby given in accordance with 5 U.S.C. 4314 of a revision in the membership of the Performance Review Board of the Office of the United States Trade Representative (USTR). The revision consists of the following appointments:

Chair—S. Bruce Wilson, Assistant United States Trade Representative for Industry and Service.

Alternate—W. Douglas Newkirk, Assistant United States Trade Representative for GATT Affairs.

Members—Alan F. Holmer, General Counsel, James W. Frierson, Chief of Stafff, Peter F. Allgeier, Assistant United States Trade Representative for Asia and the Pacific.

Executive Secretary—John P. Giacomini, Director, Office of Management.

This will be effective as of February 3, 1986.

John P. Giacomini,

Director, Office of Management.

SMALL BUSINESS ADMINISTRATION

Region VIII Advisory Council; Public Meeting

The U.S. Small Business Administration, Region VIII, located in the geographical area of Sioux Falls, South Dakota, will hold a public meeting on Friday, May 16, 1986, from 9:00 a.m. to 3:00 p.m., at the Community Room, First National Bank in Sioux Falls, 100 South Phillips, Sioux Falls, South Dakota 57102, to discuss such matters as may be presented by members, staff of the Small Business Administration and others attending.

For further information, write or call Chester B. Leedom, District Director, U.S. Small Business Administration, Suite 101, Security Building, 101 South Main, Sioux Falls, South Dakota 57102, 605/336-2980, Ext. 231.

Jean M. Nowak,

Director, Office of Advisory Councils.

DEPARTMENT OF STATE

[Public Notice CM-8/964]

Advisory Committee on South Africa; Open Meetings

The Advisory Committee on South Africa will hold open meetings on June 2 and 3, 1986 from 9 a.m. to 4 p.m. The meetings will be held in Room 1105, Department of State, 2201 C Street NW., Washington, DC.

The purpose of the meetings will be to discuss how the United States can be most effective in encouraging the elimination of apartheid and its effects in South Africa. Persons interested in addressing the Committee on June 2 or 3 should write directly to C. William Kontos at 1730 K Street, Suite 209, Washington, DC 20006 before May 15, 1986, and give the following information: name, address, phone number (during normal working hours), capacity in which presentation will be made, and nature of presentation.

Individual presentations will be limited to a maximum of 10 minutes. Written copies of presentations will be helpful, but not required. Additional written presentations by interested persons who may not be able to address the Committee may be submitted to C. William Kontos at the above address before June 2, 1986.

Due to time constraints, it may not be possible to accommodate all persons interested in addressing the Committee. Efforts will be made to ensure that persons addressing the Committee represent the broadest range of opinions on the subject of South Africa.

Members of the public will be admitted to the meetings up to the seating capacity of room. Access to the State Department is controlled. All persons wishing to attend one or both meetings should make arrangements in advance by contacting Ann Miller at (202) 632-0075. All attendees should use the C Street entrance to the building.

Requests for further information should be directed to Ann Miller at (202) 632-0075.

Dated: April 22, 1986.

C. William Kontos,

Executive Director.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in March 1986. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1-Motor vehicle, 2-Rail freight, 3-Cargo vessel, 4-Cargo-only aircraft, 5-Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1479-X	DOT-E 1479	Allied Chemical, Morristown, NJ	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification cargo tanks, for transportation of liquefied fluorine and mixture of liquefied fluorine and liquefied oxygen. (Mode 1)
1479-X	DOT-E 1479	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification cargo tanks, for transportation of liquefied fluorine and mixture of liquefied fluorine and liquefied oxygen. (Mode 1)
2587-X	DOT-E 2587	Denison, Inc., Fredonia, KA	49 CFR 173.315(a)(1)	To authorize shipment of liquid oxygen in non-DOT specification cargo tanks. (Mode 1)
2787-X	DOT-E 2787	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.315(a)(1), 175.3	To authorize shipment of certain nonflammable compressed gases, in non-DOT specification pressure vessels equipped with a regulating valve, a pressure relief valve, and a squibb actuated valve. (Modes 1, 2, 3, 4)
3330-P	DOT-E 3330	Howmet Turbine Components Corp., Whitehall, MI.	49 CFR 173.214(b), 173.214(d)	To become a party to Exemption 3330. (Modes 1, 2)
3563-X	DOT-E 3563	U.S. Department of Energy, Washington, DC.	49 CFR 172.101, 173.302(a), 173.415, 175.3.	To authorize transport of a nonflammable, nonliquefied compressed gas, in an inerde steel sphere. (Modes 1, 2, 3, 4, 5)
3667-X	DOT-E 3667	Groendyke Transport, Inc., Enid, OK	49 CFR 173.315(a)	To authorize transport of a flammable compressed gas in aluminum cargo tanks otherwise built in compliance with Specification MC-330. (Mode 1)
3941-X	DOT-E 3941	Kerr-McGee Chamcial Corp., Oklahoma City, OK.	49 CFR 173.239a(a)(2)	To authorize transport of ammonium perchlorate in non-DOT specification portable tanks. (Modes 1, 2)
4052-X	DOT-E 4052	The Boeing Co., Seattle, WA	49 CFR 173.305, 173.34(d), 175.3	To authorize shipment of an aerosol formulation pressurized with nitrogen in a DOT specification 39 seamless aluminum cylinder. (Modes 1, 2, 4, 5)
4453-X	DOT-E 4453	Ren-Loi, Inc., Bridgeville, PA	49 CFR 172.101, 173.114a(h) (3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3)
4453-P	DOT-E 4453	PACCO, Inc., Tenino, WA	49 CFR 172.101, 173.114a(h) (3), 176.415, 176.83.	To become a party to Exempton 4453. (Modes 1, 3)
4453-P	DOT-E 4453	Sierra Chemical Co., Reno, NV	49 CFR 172.101, 173.114a(h) (3), 176.415, 176.83.	To become a party to Exemption 4453. (Modes 1, 3)
4453-X	DOT-E 4453	H.L. & A.G. Belsinger, Inc., Bridgeville, PA.	49 CFR 172.101, 172.114a(h) (3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3)
4453-X	DOT-E 4453	Mountaineer Explosives, Inc., Bridgeville, PA.	49 CFR 172.101, 173.114a(h) (3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3)
4453-X	DOT-E 4453	PACCO, Inc., Tenino, WA	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3)
4453-X	DOT-E 4453	Pacific Powder Co., Tenino, WA	49 CFR 172.101, 173.114a(h)(3), 176.415, 176.83.	To authorize use of a non-DOT specification bulk, hopper-type tank, for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixtures. (Modes 1, 3)

[1] The parties shall conform their evidence requests to the organization and numbering system of the proposed evidence request attached to the instituting order.

To authorize shipment of small quantities of hazardous materials in inside glass bottles overpacked in metal cans further overpacked in DOT Specification 12B fiberboard boxes. (Mode 1)
4612-X	DOT-E 4612	Eld Science, Cladbwell, GH	49 CFR 173.135, 173.122, 173.136, 173.138, 173.154, 173.208, 173.230, 173.245, 173.247, 173.252, 173.253, 173.271, 173.276, 173.281, 173.293, 173.346, 173.382.	To authorize shipment of small quantities of hazardous materials in inside glass bottles overpacked in DOT Specification 12B fiberboard boxes. (Mode 1)
4650-X	DOT-E 4650	Halliburton Service, Inc., Duncan, OK	49 CFR 173.100 (cc), 175.3	To authorize shipment of flexible linear shaped charges, metal clad, in 100' lengths, containing not more than 50 grains per lineal foot of high explosive, as a class C explosive. (Modes 1, 2, 4)
5861-X	DOT-E 5861	HTL Industries, Inc., Duarte, CA	49 CFR 173.304(a)(1), 175.3, 178.47	To authorize use of a stainless steel other than prescribed in the regulations, in the construction of a cylinder patterned after the DOT Specification 4DS cylinders, for transportation of a nonflammable compressed gas. (Modes 1, 2, 4, 5)
5891-X	DOT-E 5891	U.S. Department of Energy Washington, DC.	49 CFR 173.64(a)(4)	To authorize transport of high explosives in quantities greater than those authorized in 49 CFR, in DOT Specification 15A wooden boxes. (Mode 1)
5951-X	DOT-E 5951	Dixie Petro-Chem, Inc., Dallas, TX	49 CFR 173.314(c)	To authorize transport of chlorine or sulfur dioxide, in DOT Specification 106A500 type tank. (Modes 1, 2)
5951-X	DOT-E 5951	Hill Brothers Chemical Co., Tucson, AZ	49 CFR 173.314(c)	To authorize transport of chlorine or sulfur dioxide, in DOT Specification 106A500 type tank. (Modes 1, 2)
6016-X	DOT-E 6016	Huber Supply Co., Mason City, IA	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1)
6016-X	DOT-E 6016	Guttmen Welding Supply Co., Belle Vernon, PA.	49 CFR 173.315(a)	To authorize shipment of liquid oxygen, nitrogen, and argon in non-DOT specification portable tanks. (Mode 1)
6308-P	DOT-E 6308	Foam Supplies Inc., Olivette, Mo	49 CFR 173.315(a)(1), 174.63(b)	To become a party to Exemption 6308. (Modes 1, 2)
6309-X	DOT-E 6309	Freeman Chemical Corp., Port Washington, WI.	49 CFR 173.315(a)(1), 174.63(b)	To authorize use of non-DOT specification steel portable tanks, for transportation of certain nonpoisonous, nonflammable compressed gases. (Modes 1, 2)
6309-X	DOT-E 6309	General Latex and Chemical Corp. of Georgia, Dalton, GA.	49 CFR 173.315(a)(1), 174.63(b)	To authorize use of non-DOT specification steel portable tanks, for transportation of certain nonpoisonous, nonflammable compressed gases. (Modes 1, 2)
6309-X	DOT-E 6309	Olin Corp., Stamford, CT	49 CFR 173.315(a)(1), 174.63(b)	To authorize use of non-DOT specification steel portable tanks, for transportation of certain nonpoisonous, nonflammable compressed gases. (Modes 1, 2)
6333-X	DOT-E 6333	Allied Corp., Morristown, NJ	49 CFR 173.49 CFR 173.245(a)(31), 173.263(a)(10), 173.269(b)(3), 173.272(i)(25), 178.343-1(f).	To authorize shipment of certain nonflammable gases in non-DOT specification steel cylinders, made in compliance with DOT Specification 3E with certain exceptions. (Modes 1, 2, 3, 4, 5)
6563-X	DOT-E 6563	S.L.O. Health Products, Inc., Baywood Park, CA.	49 CFR 173.302(a)(1), 175.3	To authorize transport of certain corrosive liquids, in non-DOT specification type MC-312 glass lined cargo tanks. (Mode 1)
6602-X	DOT-E 6602	Ethyl Corp., Baton Rouge, LA	49 CFR 173.245(a), 173.314(c)	To authorize use of 105A500W or 108A500X multi-unit tank car tanks, for shipment of certain corrosive liquids and nonflammable compressed gases. (Modes 1, 2)
6602-X	DOT-E 6602	Jones Chemicals, Inc., Caledonia, NY	49 CFR 173.245(a), 173.314(c)	To authorize use of 105A500W or 108A500X multi-unit tank car tanks, for shipment of certain corrosive liquids and nonflammable compressed gases. (Modes 1, 2)
6602-X	DOT-E 6602	Great Lakes Chemical Corp., El Dorado, AR.	49 CFR 173.245(a), 173.314(c)	To authorize use of 105A500W or 108A500X multi-unit tank car tanks, for shipment of certain corrosive liquids and nonflammable compressed gases. (Modes 1, 2)
6637-X	DOT-E 6637	Russell-Stanley Corp., city of Industry, CA.	49 CFR 173.119(a), 173.119(b), 173.119(m), 173.221, 173.245(a)(26), 173.249(a)(1), 173.250(a)(1), 173.257(a)(1), 173.263(a)(26), 173.265(d)(6), 173.265(b)(8), 173.272(i)(9), 173.276(a)(10), 173.277(a)(6), 173.287(c)(1), 173.289(a)(1), 173.292(a)(1), 173.346(a), 173.357(b), 173.358(a), 173.359(a), 178.359(b), 178.19.	To authorize manufacture, marking and sale of non-DOT Specification polyethylene drums, for shipment of organic peroxides, oxidizers, flammable, corrosive and Class B poisonous liquids. (Modes 1, 2, 3)
6767-X	DOT-E 6767	Russell-Stanley Corp., city of Industry, CA.	49 CFR 173.119(a), 173.119(b), 173.119.(m), 173.221, 173.245, 173.346(a), 173.357(b), 173.358(a), 173.359(a), 173.359(b).	To authorize manufacture, marking and sale of DOT Specification 34 polyethylene drums, for shipment of Class B poisonous liquids, flammable liquids, organic peroxides and corrosive liquids. (Modes 1, 2, 3)
6805-X	DOT-E 6805	Union Carbide Corp., Danbury, CT	49 CFR 173.301(d), 173.302(a)(3)	To authorize use of DOT Specification 3AAX steel cylinders, for transportation of a flammable compressed gas mixture. (Mode 1)
6824-X	DOT-E 6824	Bio/Lab, Inc., Conyers, GA	49 CFR 173.154, 173.217(a)	To authorize bromo-chloro-dimethylhydantoin, classed as an oxidizer, as a additional commodity. (Modes 1, 2, 3)
6904-X	DOT-E 6904	Aldrich Chemical Co., Inc., Milwaukee, WI.	49 CFR173.240(a), 175.3	To authorize transport of certain corrosive materials in DOT specification 12A fiberboard boxes having inside glass acid resistant bottles not exceeding 1 pint capacity. (Modes 1, 3, 4)
6985-X	DOT-E 6985	U.S. Department of Energy, Washington, DC.	49 CFR 173.154(a)(9), 173.86(a)	To authorize shipment of diallyl phthalate-pyrotechnic materials in a aluminum case packed in a DOT specification wooden box. (Mode 1)
7011-X	DOT-E 7011	Russell-Stanley Corp., city of Industry, CA.	49 CFR 173.238a, 173.245b(a)(6)	To authorize manufacture, marking and sale of non-DOT specification blow-molded high molecular weight polyethylene container, for transportation of corrosive materials and oxidizer. (Modes 1, 2, 3)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7024-X	DOT-E 7024	Avondale Mills, Sylacauga, Al	49 CFR 173.246(a)(7)	To authorize transport of an alkaline corrosive liquid in non-DOT specification collapsible rubber containers identified as sealdtanks. (Mode 1)
7024-X	DOT-E 7024	B.I. Transportation, Inc., Burlington, NC	49 CFR 249(a)(7)	To authorize transport of an alkaline corrosive liquid in non-DOT specification collapsible rubber containers identified as sealdtanks. (Mode 1)
7454-X	DOT-E 7454	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 176.410(e)(2), 176.83	To authorize blastings agent to be stowed in proximity to certain explosives without a bulkhead separating these materials. (Mode 3)
7455-X	DOT-E 7455	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 176.177(g), 176.177(h), 176.177(h), 176.177(q), 176.177(r), 176.177(e).	To authorize handling and stowage of explosive material in an anchored and unmanned barge. (Mode 3)
7477-X	DOT-E 7477	Systron Donner Corp., Concord, CA	49 CFR 173.302(a)(1), 173.304(a)(1), 175.3.	To authorize use of non-DOT specification seamless aluminum cylinders, for transportation of certain nonflammable compressed gases. (Modes 1, 2, 3, 4)
7548-X	DOT-E 7548	U.S. Department of Defense, Falls Church, VA.	49 CFR, 46 CFR 146.29-100	To authorize stowage of explosives on deck of vessel, over the square of the hatch. (Mode 3)
7621-X	DOT-E 7621	Great Lakes Chemical Corp., El Dorado, AR.	49 CFR 173.357, 174.63(b)	To authorize use of DOT Specification 51/ISO portable tanks, for shipment of poison B liquid. (Modes 1, 2, 3)
7651-X	DOT-E 7651	Austin Powder Co., Cleveland, OH	49 CFR 173.93(e), 177.834(L)(1)	To authorize shipment of a class B liquid propellent explosive, in non-DOD specification seealdtanks. (Mode 1)
7654-X	DOT-E 7654	Mallinckrodt, Inc., Paris, KY	49 CFR 173.119(f)	To authorize use of a glass bottle not exceeding 500 milliliter capacity inside a metal container overpacked in a DOT specification 12B fiberboard box, for transportation of a flammable liquid. (Modes 1, 2)
7674-X	DOT-E 7674	U.S. Department of Defense, Falls Church, VA.	49 CFR 174.104(a)	To authorize shipment of certain class A explosives on flat-care and open-top rail cars. (Mode 2)
7731-X	DOT-E 7731	Minnesota Valley Engineering, Inc., New Prague, MN.	49 CFR 172.101, 173.315(a)(1)	To authorize manufacture, marking and sale of non-DOT specification super-insulated portable tanks, for shipment of pressurized liquid helium and liquefied hydrogen. (Modes 1, 3)
7770-X	DOT-E 7770	ARBEL FAUVET RAIL, Paris, France	49 CFR 173.143, 173.264(b)(4), 174.63(b).	To authorize transport of anhydrous hydrogen fluoride or anhydrous methylchloromethyl ether in certain non-DOT specification portable tanks. (Modes 1, 2, 3)
7770-X	DOT-E 7770	Eurotainer, S.A., Paris, France	49 CFR 173.143, 173.264(b)(4), 174.63(b).	To authorize transport of anhydrous hydrogen fluoride or anhydrous methylchloromethyl ether in certain non-DOT specification portable tanks. (Modes 1, 2, 3)
7868-X	DOT-E 7868	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.145, 173.31(a)(4), 179.200-7(d).	To authorize tranport of methylhydrazine in DOT specification 103A-ALW or 103CW tank cars. (Mode 2)
7915-X	DOT-E 7915	Olin Corp., East Alton, IL	49 CFR 173.93(b)	To authorize transport of certain propellent explosives in water in DOT specification MC-307 or MC-312 cargo tanks. (Mode 1)
7929-X	DOT-E 7929	C-I-L Inc., North York, Ont. Canada	49 CFR 173.65	To authorize transport of flaked or pelletized TNT in woven polyethylene or polypropylene cloth outer bags, with plastic film liners. (Modes 1, 2
7943-X	DOT-E 7943	Geogia-Pacific Corp., Montebello, CA	49 CFR 173.263(a)(15), 173.272(c), 173.272(i)(12), 173.277(a)(1).	To authorize shipment of corrosive liquids in fiberboard boxes complying with DOT specification 12B except for handholes in top flaps. (Mode 1)
7972-X	DOT-E 7972	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 172.504	To authorize transport of limited quantities of explosive in a special shipping container without placarding the vehicle. (Mode 1)
8006-X	DOT-E 8006	Kilgore Corp., Toone, TN	49 CFR 172.400(a), 172.504 Table 2	To authorize transport of unlabeled packages of toy paper or plastic caps complying with the requirements of 173.100(p) and 173.100, in motor vehicles with placards, when the gross weight of the cage is 1,000 pounds or more. (Mode 1)
8215-X	DOT-E 8215	Olin Corp., East Alton, IL	49 CFR 173.101, 173.107, 173.60, 173.74, 173.78, 173.93.	To authorize use of 3 gallon porcelain buckets for in plant shipment of rejected small arms ammunition. (Modes 1, 2)
8244-P	DOT-E 8244	Vann Systems, A Division of Halliburton Co., Houston, TX.	49 CFR 173.119, 173.125, 173.245, 173.263, 173.264, 173.280, 46 CFR 64.9.	To become a party to Exemption 8244. (Modes 1, 3)
8298-X	DOT-E 8298	Olin Corp., East Alton, IL	49 CFR 173.93	To authorize shipment of certain identified solid propellent explosive, class B, in non-DOT specification cylindrical metal cans overpacked in fiberboard boxes. (Modes 1, 3)
8298-X	DOT-E 8298	HTL Industries, Inc., Duarte, CA	49 CFR 173.304(a)(1), 175.3, 178.44	To authorize manufacture, marking and sale of a non-DOT specification pressure vessel comperable to a DOT specification 3HT cylinder with certain exceptions, for transportation of a compressed gas. (Modes 1, 2, 4, 5)
8309-X	DOT-E 8309	Sandoz Chemicals Corporation, Sodyeco Plant, Charlotte, NC.	49 CFR 172.101, 173.154, 173.328	To renew and to allow transportation to an additional site. (Mode 1)
8352-X	DOT-E 8352	Degussa Corp., Teterboro, NJ	49 CFR 173.154	To authorize shipment of ammonium persulfate and sodium persulfate in non-DOT specification plastic bags simiier to DOT specification 44P bags. (Modes 1, 2, 3)
8363-X	DOT-E 8363	E.I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.93(a)	To authorize shipment of certain solid propellent explosives in metal canisters overpacked in DOT specification 12H65 fiberboard boxes. (Modes 1,3)
8380-X	DOT-E 8380	Allied Corp., Morristown, NJ	49 CFR 173.272, 178.210, 178.24a	To authorize shipment of 95%-96% sulfuric acid in DOT specification 2E polyethylene bottles overpacked in DOT specification 12A80 fiberboard boxes. (Mode 1)
8380-X	DOT-E 8380	Texas Instruments, Inc., Dallas, TX	49 CFR 173.272, 178.210, 178.24a	To authorize shipment of 95%-96% sulfuric acid in DOT Specification 2E polyethylene bottles overpacked in DOT specification 12A80 fiberboard boxes. (Mode 1)
8380-X	DOT-E 8380	Mallinckrodt, Inc., Paris, KY	49 CFR 173.272, 178.210, 178.24a	To authorize shipment of 95%-96% sulfuric acid in DOT specification 2E polyethylene bottles overpacked in DOT specification 12A80 fiberboard boxes. (Mode 1)
8394-X	DOT-E 8394	Whirlpool Corp., La Porte, IN	49 CFR Parts 100-177	To authorize transport of certain thermostatic elements containing small quantities of sodium potassium alloy, liquid packed in a strong fiberboard box. (Modes 1, 2, 3, 4, 5)
8427-X	DOT-E 8427	U.S. Department of Defense, Falls Church, VA.	49 CFR 173.276	To authorize use of a stainless steel DOT specification seamless 3A or 3E cylinder, for shipment of a flammable liquid. (Mode 4)
8445-P	DOT-E 8445	Merrell Dow Pharmaceuticals Inc., Cincinnati, OH.	49 CFR Part 173, Subpart D, E, F, & H	To become a party to Exemption 8445. (Mode 1)

VOL 51 ISS 80 AP 25 1986 UMI

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8445-X	DOT-E 8445	Kerr-McGee Chemical Corp., Oklahoma City, OK.	49 CFR Part 173, Subpart D, E, F, & H	To authorize shipment of various hazardous substances and wastes packed in inside plastic, glass, earthenware or metal containers, overpacked in a DOT specification removable head steel, fiber or polyethylene drum, only for the purposes of disposal, repackaging or reprocessing. (Mode 1)
8627-X	DOT-E 8627	Exxon Chemical Co., Houston, TX	49 CFR 173.119, 173.245, 178.253	To authorize use of six non-DOT specification portable tanks manifolded together within a frame and securely mounted on a truck chassis, for transportation of flammable and corrosive liquids. (Mode 1)
8627-X	DOT-E 8627	Champion Chemicals, Inc., Houston, TX	49 CFR 173.119, 173.245, 178.253	To authorize use of six non-DOT specification portable tanks manifolded together within a frame and securely mounted on a truck chassis, for transportation of flammable and corrosive liquids. (Mode 1)
8697-X	DOT-E 8697	ERA Helicopters, Inc., Anchorage, AK	49 CFR 172.101, Column (9)b, 175.30(a)(1).	To authorize carriage of propane in DOT specification 4B240, 4BA240, 4BW240 cylinders via helicopter utilizing sling loads. (Mode 4)
8747-X	DOT-E 8747	Coppe Industries, Inc., Menomonee Falls, WI.	49 CFR 173.245, 173.249, 178.3	To authorize shipment of certain alkaline corrosive liquids, n.o.s., in an unlined 28/26 gauge DOT specification 37C80 steel drum of five gallon capacity. (Modes 1, 2, 3, 4)
8811-X	DOT-E 8811	American Hoechst Corp., Somerville, NJ	49 CFR 173.284, 178.340-3, 178.343-2	To authorize use of modified DOT specification MC-312 cargo tanks made of titanium, for shipment of certain corrosive materials. (Mode 1)
8870-X	DOT-E 8870	Hach Co., Ames, IA	49 CFR 172.101, 173.286, 175.3	To comingle compatible hazardous materials of various classifications packed in separate inside receptacles not exceeding 8 fluid ounces or ½ lb. packed inside a strong outside container, labeled according to the highest order of hazard, and described as chemical kit. (Modes 1, 2, 3, 4, 5)
8870-X	DOT-E 8870	Culligan International Co., Northbrook, IL.	49 CFR 172.101, 173.286, 175.3	To comingle compatible hazardous materials of various classifications packed in separate inside receptacles not exceeding 8 fluid ounces or ½ lb. packed inside a strong outside container, labeled according to the highest order of hazard, and described as chemical kit. (Modes 1, 2, 3, 4, 5)
8870-X	DOT-E 8870	Exerpure, Inc., Westmont, IL	49 CFR 172.101, 173.286, 175.3	To comingle compatible hazardous materials of various classifications packed in separate inside receptacles not exceeding 8 fluid ounces or ½ lb. packed inside a strong outside container, labeled according to the highest order of hazard, and described as chemical kit. (Modes 1, 2, 3, 4, 5)
8871-X	DOT-E 8871	Chase Bag Co., Oak Brook, IL	49 CFR 173.182, 173.217, 173.245(b), 173.288.	To authorize manufacture, marking and sale of large, collapsible polyethylene-lined woven polypropylene bulk bags, having a capacity of approximately 2000 pounds each, and top and bottom outlets, for shipment of corrosive solids, nitrates and poisons. (Modes 1, 2, 3)
8885-X	DOT-E 8885	Coppe Industries, Inc., Menomonee Falls, WI.	49 CFR 173.245, 173.249, 178.3	To authorize shipment of certain alkaline corrosive liquids, n.o.s., in an unlined tin can, overpacked in a non-DOT specification removable head molded polyethylene pail of five or six-gallon capacity, also containing a nonhazardous resin mix. (Modes 1, 2, 3, 4)
8923-X	DOT-E 8923	Union Carbide Corp., Danbury, CT	49 CFR 173.119(m)	To authorize shipment of a 5 to 10 percent mixture of dichlorotetrafluoroethane with the balance being trichlorotrifluoroethane. (Mode 1)
8988-P	DOT-E 8988	Marathon Oil Co., Lafayette, LA	49 CFR 172.101, 173.110, 173.60, 175.30.	To become a party to Exemption 8988. (Modes 1, 3, 4)
8995-P	DOT-E 8995	Foam Supplies Inc., Olivette, MO	49 CFR 173.315(a)(1), 173.345, 174.63(b).	To become a party to Exemption 8995. (Modes 1, 2)
9005-X	DOT-E 9005	Emerald Air, Austin, TX	49 CFR 172.101, 172.204(d)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of certain class A, B and C explosives that are not permitted for air shipment or are in quantities greater than those prescribed for shipment by air. (Mode 4)
9094-X	DOT-E 9094	CTL Distribution, Inc., Mulberry, FL	49 CFR 173.265	To authorize use of a DOT specification MC-312 stainless steel cargo tank, for transportation of a corrosive liquid. (Mode 1)
9117-X	DOT-E 9117	Flexbin Corp., Houston, TX	49 CFR 173.183, 173.184	To authorize manufacture, marking and sale of non-DOT specification semi-bulk bags of 22 cubic feet capacity, for transportation of an oxidizer. (Mode 1)
9117-X	DOT-E 9117	Flexbin Corp., Houston, TX	49 CFR 173.183, 173.184	To authorize manufacture, marking and sale of non-DOT specification semi-bulk bags of 22 cubic feet capacity, for transportation of an oxidizer. (Mode 1)
9130-P	DOT-E 9130	Aquarius Pool & Spa Supply, Inc., Elk Grove Village, IL	49 CFR 173.154	To become a party to Exemption 9130. (Modes 1, 2)
9157-X	DOT-E 9157	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.314(c), 178.300-7	To authorize use of a non-DOT specification multi-unit tank car tank, for transportation of a flammable gas. (Mode 1)
9168-X	DOT-E 9168	Ati-Pak, Inc., Pittsburgh, PA	49 CFR 172.400, 172.504, 173.118, 173.244, 173.345, 173.346, 173.350, 173.370, 173.377, 175.3, 175.35.	To authorize an alternate specially designed packaging for shipment of limited quantities of flammable, corrosive and poison B materials without labeling. (Modes 1, 2, 4)
9181-X	DOT-E 9181	GTE Products Corp., Waltham, MA	49 CFR 173.206, 173.21, 173.247	To authorize transport of lithium metal and a thionyl chloride solution in the same non-DOT specification stainless steel vessel. (Mode 1)
9194-X	DOT-E 9194	Cyanamid Canada, Inc., Willowdale, Ont., Canada.	49 CFR 173.370	To authorize shipment of calcium cyanide, solid, in collapsible, water-tight, polyethylene-lined, woven polypropylene bags having a capacity of no more than 4,400 pounds. (Modes 1, 2)
9201-X	DOT-E 9201	Cyanamid Canada, Inc., East Willowdale, Canada.	49 CFR 173.370	To authorize of calcium cyanide, solid, in collapsible, water-tight, polyethylene-lined, woven polypropylene bags having capacity not exceeding 4,400 pounds, overpacked in wax-impregnated 500-pound test, double-wall (BC flute) corrugated fiberboard boxes, in full freight loads. (Modes 1, 2, 3)
9208-P	DOT-E 9208	U.S. Department of Energy, Washington, DC.	49 CFR 172.101, 173.114a	To become a party to Exemption 9208. (Modes 1, 2, 3)
9208-X	DOT-E 9208	U.S. Department of Defense, Falls Church, VA.	49 CFR 172.101, 173.114a	To authorize transport of an insensitive high explosive and munitions containing explosive classed as a blasting agent. (Modes 1, 2, 3)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9209-X	DOT-E 9209	Allied Chemical, Morristown, NJ	49 CFR 173.266(c)	To authorize shipment of hydrogen peroxide solution in water containing 25%–32% hydrogen peroxide by weight, in a DOT–12P fiber board box containing one inside DOT–2U polyethylene container of not over 5 gallons or two inside DOT–2U polyethylene containers of not over 2½ gallon capacity each. (Modes 1, 2, 3)
9211-X	DOT-E 9211	American Overseas Marine Corp., Quincy, MA.	49 CFR 146.29–35(f)	To authorize installation and operation of electrically-powered lighting, air conditioning, alarm, fire detection, and cargo-handling systems in cargo holds containing class A, B and C explosives in a Maritime Prepositioning Ship (TAKX). (Mode 3)
9213-X	DOT-E 9213	Bulk-Pack, Inc., West Monroe, LA	49 CFR 173.182, 173.217, 173.245b	To authorize manufacture, marking and sale of large, collapsible polyethylene-lined woven polypropylene bulk bags having a capacity of approximately 2,600 pounds each, and top and bottom outlets, for shipment of corrosive solids and nitrates. (Modes 1, 2, 3)
9230-X	DOT-E 9230	Nuclear Metals Inc., Concord, MA	49 CFR 173.206, 175.30	To authorize transport of titanium metal powder, dry, in a spun aluminum inner packaging, placed in a DOT specification 17H or 17C steel drum. (Modes 1, 2, 3, 4)
9244-X	DOT-E 9244	Stoneco, Inc., Decorra, CO	49 CFR 172.166, 175.30	To authorize transport of explosive pest repellant devices, in fiberboard boxes packed in DOT specification 12B fiberboard boxes. (Modes 1, 2, 3, 4)
9426-X	DOT-E 9426	CGTX, Inc., Montreal, PA Canada	49 CFR 179.102–3(a)(7)	To authorize an additional 13 chlorine tank cars having modified insulation systems. (Mode 2)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9436-N	DOT-E 9436	Union Carbide Corp. Danbury, CT	49 CFR 172.203, 173.318, 173.320, 178.30, 178.76(h).	To authorize manufacture, marking and sale of non-DOT specification portable tanks for transportation of liquid helium. (Modes 1, 3)
9496-N	DOT-E 9496	GPS Industries, city of Industry, CA	49 CFR 173.263(a)(28), 173.277(a)(6), 178.19.	To authorize non-DOT specification polyethylene bottles conforming with DOT specification 34 with certain exeptions, packed inside a high density polyethylene box having a corrugated fiberboard cover. (Mode 1)
9497-N	DOT-E 9497	Pressure Pak, East Hampton, CT	49 CFR 173.302(a)(4), 175.3	To authorize manufacture, marking and sale of welded, nonrefillable, non-DOT specification steel cylinders made in compliance with DOT specification 39 with exceptions, for transportation of carbon dioxide. (Modes 1, 2, 4)
9525-N	DOT-E 9525	American Cyanamid Co., Wayne, NJ	49 CFR 178.42, Part 173, Subpart D, E, H.	To authorize use of a welded stainless steel cylinder equivalent to DOT specification 3E with exceptions, for transportation of certain pyroforic liquids, flammable liquids, poison B liquids and flammable solids. (Modes 1, 3, 4)
9534-N	DOT-E 9534	Hardigg Industries, Inc., South Deerfield, MA.	49 CFR 173.199, 173.125, 178.19, 178.253, Part 173, Subpart F.	To authorize manufacture, marking and sale of non-DOT specification rotationally-molded, cross-linked, polyethylene portable tanks for transportation of corrosive liquids, flammable liquids or an oxidizer. (Modes 1, 2, 3)
9547-N	DOT-E 9547	National Institutes of Health, Bethesda, MD.	49 CFR 173.179	To authorize transport of 100 grams of methyl nitro nitrosoguanidine in inside polyethylene bottles, polyethylene bags, metal cans and DOT specification 12B fiberboard box; packed in a DOT Specification 17H metal drum. (Mode 1)
9560-N	DOT-E 9560	Union Carbide Corp. St. Petersburg, FL	49 CFR 172.504, 172.508, 177.823	To authorize transport of oxygen, compressed, and oxygen, liquefied on the same motor vehicle to bear only the OXYGEN placard. (Mode 1)
9561-N	DOT-E 9561	Atlmet-Indusea, Inc., New York, NY	49 CFR 173.366	To authorize transport of arsenic trioxide in non-DOT specification steel drums. (Modes 1, 2, 3)
9568-N	DOT-E 9568	AZTRON Chemical Services, Inc., South Houston, TX.	49 CFR 173.249	To authorize use of a DOT specification MC-306 tank motor vehicle for transportation of sodium hydroxide, liquid. (Mode 1)

DEPARTMENT OF THE TREASURY

Public Information Collection Requirement Submitted to OMB for Review

Dated: April 21, 1986.

The Department of Treasury has submitted the following public information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511. Copies of this submission may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Room 7221, 1201 Constitution Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0134.
Form Number: IRS Form 1128.
Type of Review: Revision.
Title: Application for Change in Accounting Period.

OMB Number: 1545–0760.
Form Number: None.
Type of Review: Extension.
Title: EE–178–78 Final—Employers' Qualified Educational Assistance Programs

Clearance Officer: Garrick Shear (202) 566–6150, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Robert Neal (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Comptroller of the Currency

OMB Number: 1557–0147.
Form Number: None.
Type of Review: Extension.
Title: National Bank Lending Limits.

Clearance Officer: Eric Thompson, Comptroller of the Currency, 5th Floor, L'Enfant Plaza, Washington, DC 20219.

OMB Reviewer: Robert Neal (202) 395–6880, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 6:45 p.m. on Friday, April 18, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and assumption of the liability to pay deposits made in Florida Center Bank, Orlando, Florida, which was closed by the State Comptroller for the State of Florida, on Friday, April 18, 1986; (2) accept the bid for the transaction submitted by American National Bank of Florida, Jacksonville, Florida; and (3) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Mr. John F. Downey, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii) and (c)(9)(B)).

Dated: April 22, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, April 21, 1986, the Corporation's Board of Directors determined, on motion of Chairman L. Williams Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration of the meeting, on less than seven days' notice to the public, of the following matters:

Memorandum regarding the Corporation's assistance agreement with an insured bank pursuant to section 13 of the Federal Deposit Insurance Act.

Application of Maryland National Bank, Baltimore, Maryland, for consent to assume the liabililty to pay certain deposits made in Old Court Savings & Loan, Inc., Baltimore, Maryland, a noninsured institution.

The Board determined, by the same majority vote, that no earlier notice of these changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections, and (c)(9)(A)(ii), of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(8), (c)(8), and (c)(9)(A)(ii)).

Dated: April 22, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,
Executive Secretary.

Part II

Environmental Protection Agency

40 CFR Part 763

Toxic Substances; Asbestos Abatement Projects; Final Rule

VOL 51 ISS 80 AP 25 1986 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 763

[OPTS-62044A; FRL 2965-7]

Toxic Substances; Asbestos Abatement Projects

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is issuing a rule under section 6(a) of the Toxic Substances Control Act (TSCA). The rule will apply to asbestos abatement projects using employees not protected by regulations of the Occupational Safety and Health Administration (OSHA), by regulations of State plans adopted under the Occupational Safety and Health Act (OSHAct), or by State regulations in Idaho, Kansas, Oklahoma, and Wisconsin that EPA has determined are comparable to or more stringent than this rule.

DATE: This rule will be promulgated for purposes of judicial review at 1 p.m. eastern time on May 9, 1986. This rule is effective June 9, 1986.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, Office of TSCA Assistance (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065). In Washington, D.C.: (554-1404). Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION:

I. Authority

Section 6(a) of TSCA authorizes EPA to impose a number of regulatory requirements concerning a chemical substance or mixture if EPA finds that there is a reasonable basis to conclude that the manufacture, processing, distribution in commerce, use, or disposal of the chemical substance, or any combination of such activities, presents or will present an unreasonable risk of injury to health or the environment. Among the requirements that EPA may impose are those listed in sections 6(a)(5) and 6(a)(6). Section 6(a)(5) of TSCA authorizes EPA to prohibit or otherwise regulate any manner or method of commercial use of a chemical substance or mixture. Section 6(a)(6) of TSCA authorizes EPA to prohibit or otherwise regulate any manner or method of disposal of a chemical substance or mixture or any article containing that substance or mixture, by any person who uses or disposes of it for commercial purposes.

These sections provide authority for EPA to issue this rule, which establishes requirements to protect State and local public employees conducting asbestos abatement activities. The asbestos in buildings where State and local public employees may be involved in abatement has been sold as a commercial product. Therefore, regulation of abatement activities affecting asbestos use in these buildings, such as encapsulation or enclosure, is considered regulation of commercial use. The removal of asbestos, a disposal activity, will affect a number of commercial activities that take place in the public buildings and, therefore, is considered disposal for commercial purposes.

II. Background

EPA proposed a rule under section 6(a) of TSCA to protect State and local public employees who take part in asbestos abatement projects, but who are not covered by the OSHA Asbestos Standard or by regulations of State plans adopted under the OSHAct, as published in the Federal Register of July 12, 1985 (50 FR 28530). The proposed rule was effective immediately under section 6(d) of TSCA and will remain in effect until this final rule becomes effective on June 9, 1986.

EPA received over 20 comments from the public on the proposed rule and the final rule that EPA is issuing today includes changes in response to the public comments. Those changes are discussed in Unit IV below.

This rule is part of an EPA program to address the risks associated with asbestos in schools. As part of that program, EPA has established regional information centers to provide information concerning the identification and abatement of asbestos hazards and to train people in proper abatement techniques. To ensure that asbestos abatement is performed safely and correctly, EPA is helping States establish certification programs for asbestos abatement contractors. EPA is giving grants to several States to help them set up contractor certification programs and is advising States on ways to implement such programs. Through its technical assistance program, EPA provides guidance on asbestos matters to school officials and local health and education departments. Finally, EPA has updated existing guidance material and prepared new material.

III. Provisions of the Rule

This rule applies to asbestos abatement projects using State and local government employees not covered by either (1) the OSHA Asbestos Standard, 29 CFR 1910.1001, (2) an Asbestos Standard adopted by a State as part of a State plan approved by OSHA under section 18 of the OSHAct, or (3) a State asbestos regulation in Idaho, Kansas, Oklahoma, or Wisconsin. EPA has determined that these four State regulations are comparable to or more stringent than this rule. The rule defines asbestos abatement project as "any activity involving the removal, enclosure, or encapsulation of friable asbestos material, except removal, enclosure, or encapsulation during sampling or routine repair of less than either 3 linear feet or 3 square feet of friable asbestos material." The rule defines friable asbestos material as "any material containing more than 1 percent asbestos by weight which, when dry, may be crumbled, pulverized, or reduced to powder by hand pressure." Thus, the sampling of friable asbestos material and the routing repair or less than either 3 linear feet or 3 square feet of friable asbestos material are not covered by this rule at all.

The rule with certain exceptions, requires employers to report to EPA at least 10 days before they begin an asbestos abatement project covered by this rule. The first exception is for asbestos abatement projects involving the removal, enclosure, or encapsulation of less than either 3 linear feet or 3 square feet of friable asbestos material. These projects do not have to be reported at all. The second exception is for emergency projects, which EPA defines as "a project involving the removal, enclosure, or encapsulation of friable asbestos material that was not planned but results from a sudden unexpected event." Examples of emergency projects are repairs necessitated by serious vandalism, flooding, fire, boiler failure, and ruptured water pipes. Emergency projects do not have to be reported to EPA 10 days in advance. Instead, they must be reported "as soon as possible, but in no case more than 48 hours after the project begins." The third exception is for employers who submit a notice to EPA under the National Emission Standard for Asbestos, 40 CFR 61.146, at least 10 days before they begin the asbestos abatement project and the notice clearly indicates that employees covered by this rule will perform some or all of the asbestos abatement work.

Reports under this rule must include the employer's name and address; the location, including street address, of the project; and the scheduled starting and completion dates for the project.

The regulatory requirements of the rule are very close to the current OSHA Asbestos Standard, with the same PEL and work practice requirements.

This rule, like the proposal, does not include the part of the current OSHA Asbestos Standard which states that personnel rotation is preferred over use of respirators to meet the permissible exposure requirements. OSHA has announced its intention to revoke that provision (Ref. 12). EPA agrees with OSHA's statement that personnel rotation merely increases the population at risk and would not reduce the absolute number of excess deaths attributable to asbestos according to mathematical models.

This rule, like the proposal and the current OSHA Asbestos Standard, requires that employers initially monitor each workplace to determine whether employees' exposure to asbestos is below the limits set in the rule. After the initial determination, employers must collect samples of air levels "of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of employees." EPA encourages persons to monitor asbestos levels daily during abatement projects.

Because of OSHA's extensive experience in administering and enforcing its Asbestos Standard, EPA generally intends to follow OSHA's administrative interpretations of identical provisions in the Asbestos Standard. This includes the OSHA interpretation that the medical surveillance requirements are triggered by an action level of 0.1 fiber per cubic centimeter (f/cc) as a 7- or 8-hour time weighted average. Employers must conduct personal and environmental monitoring as required by the rule to see if that level is exceeded.

EPA will also follow OSHA's administrative interpretation concerning respirator requirements during demolition or removal of asbestos. As stated by OSHA, employees about to engage in the removal of demolition of pipes, structures, or equipment covered or insulated with asbestos, or in the removal or demolition of asbestos insulation or coverings, must use a type "C" continuous flow or pressure-demand, supplied-air respirator regardless of the concentrations of asbestos to which they may be exposed. However, if the employer has conclusively established the upper concentration of airborne asbestos that employees could be exposed to during demolition or removal, and the concentration does not exceed 100 times either the 8-hour time-weight average or ceiling limits, then any of the respirators permitted by the rule that affords adequate protection at such upper concentrations of airborne asbestos may be used. The establishment of the upper concentrations of airborne asbestos fibers may require considerable effort if there are variations from operation to operation. Proof that the average airborne concentrations of asbestos fibers that an employee may be exposed to will not exceed 100 times the 8-hour, time-weighted average or ceiling concentrations must be determined by the employer applying sound scientific or engineering principles.

EPA also wishes to clarify two provisons of the rule, which are identical to provisions of the current OSHA rule. First, the rule states that "insofar as practicable, asbestos shall be . . . removed . . . in a wet state sufficient to prevent the emission of airborne fibers in excess of the exposure limits . . ." EPA believes that it is practical to wet asbestos before removal in almost every situation.

Second, the rule states that "all external surfaces in any place of employment shall be maintained free of accumulations of asbestos fibers if, with their dispersion, there would be an excessive concentration." EPA believes that visible accumulations of asbestos-containing debris could lead to excessive concentrations and should not be left after the conclusion of an asbestos abatement project.

IV. Future Revisions to This Rule

As noted above, EPA is adopting most provisions of the current OSHA Asbestos Standard in this final rule. As pointed out by comments, OSHA has recognized that employees exposed to asbestos at levels permitted by its current standard face a significant risk to health (Ref. 12). As also noted in comments, OSHA has proposed amending the current Asbestos Standard to lower the PEL to either 0.2 f/cc or 0.5 f/cc and to adopt an Asbestos Standard for the Construction Sector. EPA will amend this rule to be consistent with OSHA proposal after OSHA isues a final standard. This will ensure that all public and private sector employees who participate in asbestos abatement projects enjoy similar levels of protection. When EPA amends this rule to be consistent with the final OSHA standard, EPA will give the States of Idaho, Kansas, Oklahoma, and Wisconsin an appropriate amount of time (at least 6 months) to make conforming changes to their regulations.

Because of the extensive comment already received on the OSHA Standard, EPA will issue this amendment without further solicitation of public comment. Therefore, EPA suggests that any additional comments on this approach be submitted to EPA at this time. Comments should be submitted to the address provided above.

In its proposed rule, OSHA included a provision requiring the employer to institute a training program for employees exposed to airborne concentrations of asbestos in excess of either 0.2 or 0.5 f/cc without regard to the use of respirators. EPA is considering a related provision requiring State and local governments covered by this rule to have any employees who participate in asbestos abatement trained in an asbestos abatement course. Such a provision could involve setting training course criteria. Persons who wish to comment on this possible provision should submit their comments at this time. Whether or not EPA adopts a training requirement through rulemaking, EPA would like to point out that the FY 1986 Asbestos School Hazard Abatement Act (ASHAA) appropriation requires schools who receive ASHAA funds to select contractors for their abatement projects who are either State-certified or have attended an EPA approved training course.

V. Response to Comments

EPA received and has analyzed over 20 comments from the public on the proposed rule. The following summarizes the major comments and discusses the changes in the final rule in response to those comments. A more extensive response to comments document appears in the rulemaking record.

There were comments that coverage of the rule was unclear. In response to these comments, EPA clarified the rule to indicate clearly that the rule applies to project performed to abate asbestos hazards and to other asbestos abatement projects performed as part of a renovation or repair project.

There were also comments concerning the persons intended to be protected by the rule. In response to those comments, EPA revised the rule to make clear that the rule applies to persons who take part in asbestos abatement projects and not to other persons who may incidentally come into contact with asbestos. Asbestos abatement workers face a greater likelihood of significant exposure to asbestos than other persons who only incidentally come into contact with asbestos.

The proposed rule applied to all asbestos abatement projects, with no exclusion for small projects. There were comments that the rule as applied to

VOL 51 ISS 80 APR 25 1986 UMI

small projects was unduly burdensome and would discourage necessary repair operations. In response to these comments, EPA decided to exclude routine repair of less than 3 linear or 3 square feet of friable asbestos material from the final rule. Thus minor, routine repairs of pipe insulation by sealing or taping would not be covered by the rule.

This change will allow persons to make these minor, routine repairs without using type "C" respirators or conducting air sampling. Applying these requirements would unnecessarily discourage needed repairs of damaged asbestos materials. As noted above, this exclusion applies only to repair of less than 3 linear or 3 square feet of friable asbestos material. EPA considered the alternative of excluding "small" repair projects without setting a numerical limit. However, EPA decided that this approach would create enforcement difficulties since "small" is a very subjective term.

One comment noted that the proposed rule could be interpreted as covering the removal of friable asbestos material during sampling. This could discourage persons from sampling to identify potential asbestos hazards, thus delaying the abatement of some hazards. In response to this comment, EPA decided to clarify the rule to exclude any removal, enclosure, or encapsulation during sampling from coverage.

In the proposal, EPA requested comment on whether this rule should apply in States that do not have an OSHA-approved State plan but have comparable or more stringent regulations protection public employees who perform asbestos abatement work. EPA encouraged States with such regulations to inform EPA about the regulations during the comment period. Idaho, Kansas, Oklahoma, and Wisconsin brought their regulations to EPA's attention. EPA has decided that these regulations are comparable or more stringent that this rule and decided to exclude those States from coverage under this rule. A document which summarizes how EPA determined that these State regulations are comparable or more stringent appears in the record for this rule.

If any other State has a comparable or more stringent regulation now or adopts one in the future and wishes to be excluded from this rule, that State should send a copy of the regulation to EPA's Office of Toxic Substances (TS-792), 401 M Street St., SW., Washington, D.C. 20460 and request to be excluded from the rule. EPA will review the regulation and tentatively determine whether the regulation is comparable or more stringent that this rule. If EPA makes this tentative determination, EPA will propose an amendment to this rule, excluding that State from coverage. Interested persons could comment on the proposed exclusion during a period for public comment. After considering any comments, EPA could promulgate the final rule amendment.

In the proposal, EPA requested comment on the appropriate definition of asbestos. The definition in the proposal differs from OSHA's in that the EPA definition excludes non-asbestiform tremolite. EPA received one comment that it should adopt the OSHA definition and other comments that the EPA definition should be modified somewhat to make it more mineralogically correct. EPA has decided to retain the proposed definition in the final rule. This definition has been used by EPA in the past and is understood by the regulated community.

EPA also received comment on the definition of asbestos fibers. In the proposal, EPA defined the term as "asbestos fibers longer than 5 micrometers. EPA is adopting the same definition in this rule to be consistent with OSHA. OSHA adopted the definition because of practical difficulties in measuring concentrations of smaller fibers. EPA believes that smaller fibers present a health risk but agrees with OSHA that it is difficult to monitor for smaller fibers.

EPA received four comments questioning the proposed requirement of annual chest roentgenograms (X-rays) for persons exposed to asbestos at a level greater than 0.1 f/cc for a 7- or 8-hour TWA. Some comments stated that the diagnostic value of annual chest roentgenograms are outweighted by the risk associated with X-ray exposure. In response to these comments, EPA has modified the rule to make clear that chest roentgenograms are required only at the discretion of the physician.

EPA received comments concerning the reference in the proposed rule to respirators approved by the Bureau of Mines (BOM). The comment pointed out that while there may be respirators still in use which were originally approved by BOM, the Mine Safety and Health Administration (MSHA) has replaced BOM in this task. The final rule has been changed to make clear that respirators approved by the National Institute for Occupational Safety and Health, BOM, or MSHA may be worn.

EPA received one comment concerning a typographical error in the rule. The proposal incorrectly stated that "the employee shall provide two separate lockers. . . ." The final rule corrects this error and provides that "the employer shall provide two separate lockers. . . ."

EPA received comments that a PEL of 2.0 f/cc does not provide sufficient protection. As explained above, EPA is adopting the PEL in this rule to be consistent with OSHA, but expects to amend this rule to adopt a lower PEL in accordance with OSHA in the future. To ensure greater protection of abatement workers and building occupants during asbestos abatement than that now required by this rule, EPA strongly encourages all persons to follow EPA guidance materials and take additional steps to control exposure to asbestos. EPA encourages persons to contact a Regional Asbestos Coordinator or the TSCA Assistance Office to obtain EPA guidance documents and other technical assistance information. EPA also notes that many asbestos abatement projects subject to this rule are subject to the requirements of the National Emission Standard for Asbestos, 40 CFR 61.146, issued by EPA under the Clean Air Act.

VI. Regulatory Assessment

Under section 6(c)(1) of TSCA, EPA must consider the following factors when determining whether a chemical substance or mixture presents an unreasonable risk:

1. The effects of such substance or mixture on health and the magnitude of the exposure of human beings to such a substance or mixture.
2. The effects of such substance or mixture on the environment and the magnitude of the exposure of the environment to such substance or mixture.
3. The benefits of such substance or mixture for various uses and the availability of substitutes for such uses.
4. The reasonably ascertainable economic consequences of the rule, after consideration of the effect on the national economy, small business, technological innovation, the environment, and public health.

After considering the above factors, EPA makes the following findings concerning the unregulated removal, enclosure, or encapsulation of friable asbestos material.

A. Health Effects and Magnitude of Exposure to Asbestos

1. *Health effects.* The following summarizes the health effects of asbestos. They are similar to those in the preamble to the proposed rule. EPA received no comments disagreeing with EPA's assessment of the health effects of asbestos. Detailed discussion and assessment of the health effects of asbestos may be found in the "Report to the United States Consumer Product Safety Commission (CPSC), by the Chronic Hazard Advisory Panel on Asbestos" (CHAP) (Ref. 1), "Health Effects and Magnitude of Exposure" in EPA's "Support Document for Final Rule of Friable Asbestos-Containing Materials in School Buildings," (Ref. 4) and the "Report of the (National Research Council) Committee on Nonoccupational Health Risks of Asbestiform Fibers" (Ref. 6).

EPA finds that the adverse human health effects from exposure to asbestos are extremely serious. Asbestos is a known human carcinogen that also causes other lung diseases.

Asbestos has been thoroughly examined in numerous epidemiology studies. The life-threatening diseases that have been repeatedly identified are asbestosis, lung cancer, and mesothelioma. Also associated with asbestos exposure in some studies are cancers of the larynx, pharynx, gastrointestinal tract, kidney, and ovary and respiratory diseases such as pneumonia. Major health effects are discussed below.

Asbestosis, which involves fibrosis of lung and pleural tissue, is a serious chronic disease associated with exposure to asbestos. There is no effective treatment for asbestosis and it is often disabling or fatal. Asbestosis is diagnosed from findings which may include radiographic changes, breathlessness, and abnormal lung function. Since some clinical symptoms of asbestosis are similar to those of other fibrosing lung diseases, a history of occupational exposure to asbestos is often a key feature of its diagnosis. Asbestosis can appear and progress decades after exposure to asbestos fibers. This is partly true because some inhaled asbestos fibers remain in the body for the lifetime of a victim. Under working conditions where average fiber concentrations in the air were high (more than 10 fibers per cubic centimeter) asbestosis has accounted for more than 17 percent of observed deaths (Ref. 11). It is apparently less common than lung cancer or mesothelioma at exposures lower than the current OSHA workplace standard of 2.0 f/cc. Some recent data on the incidence of asbestosis appear compatible with a linear exposure-response relationship with no threshold (Ref. 12).

Lung cancer is currently responsible for the largest number of deaths from exposure to asbestos. It has been associated with exposure to all the principal commercial asbestos fiber types. Excess lung cancer has been documented in groups involved with the mining and milling of asbestos and the manufacture and use of asbestos products. Studies in which the extent of exposure can be approximated provide evidence that lung cancer increases linearly with both level and duration of exposure. Cigarette smoking and asbestos have a strong synergistic interaction in development of lung cancer. Asbestos exposure appears to multiply the underlying risk of lung cancer. Consequently, when exposed to asbestos, the risk of lung cancer for smokers (for whom the risk of lung cancer is already high) is much higher than that for nonsmokers exposed to asbestos.

Many human studies have also shown that exposures to asbestos produce mesotheliomas, which are cancers that occur as thick diffuse masses in the serous membranes (mesothelia) that line body cavities. Mesotheliomas occur in the pleura (the membrane that surrounds the lungs and lines the lung cavity) and the peritoneum (which surrounds the abdominal organs and lines the abdominal cavity). Both forms of mesothelioma are nearly always fatal within the first 2 years after diagnosis. Epidemiology studies suggest that the incidence of mesothelioma is related to dose and time from first exposure. Association of mesothelioma with smoking is weak or nonexistent. Asbestos fibers appear, by far, to be the most common cause of mesotheliomas.

In occupational studies where the primary route of exposure is through inhalation, lung cancer and mesotheliomas usually account for about 90 percent of the excess cancers seen among workers. However, as noted in the CHAP report (Ref. 1), a number of other cancers, principally of the gastrointestinal tract, have been associated with asbestos exposure. These are cancers of the larynx, pharynx, oral cavity, esophagus, stomach, colon, and rectum. Statistically significant excesses of cancers of the kidney and ovary have also been shown in some studies. In addition, the excess of cancers at all other sites combined is statistically significant in some studies.

The conclusions from epidemiology studies concerning the health effects of asbestos are also supported by results of laboratory studies. Animals treated with asbestos have shown increased incidence of fibrosis, lung cancer, and mesotheliomas. All commercial forms and several other types of asbestos are implicated from a variety of modes of exposure. Animal studies, however, have not shown an increased incidence of gastrointestinal or other cancers.

Most occupational studies have been conducted on populations exposed to high airborne concentrations of asbestos for long periods of time. However, short-term occupational exposures, have also been shown to increase the risk of lung cancer and mesothelioma (Ref. 9). In addition, there are many documented cases of mesothelioma linked to extremely brief exposure to high concentrations of asbestos or long-term exposure to low concentrations (Ref. 4).

Direct evidence of adverse health effects from nonoccupational asbestos exposure also exists. Persons who lived in the household of asbestos workers have developed pleural mesothelioma and signs of asbestosis (Ref. 10). A number of mesotheliomas have also been documented among populations whose only identified exposure was from living near asbestos mining areas, asbestos product factories, or shipyards where asbestos use had been very heavy (Ref. 4).

In addition to exposure to asbestos fibers in the air, the general population is also exposed through various oral sources, including drinking water containing asbestos. Because of the potential for oral exposure as well as the excess of gastrointestinal tract cancers that has frequently been found in occupational groups exposed to asbestos in the air, there has been much study of the possible health effects of ingestion of asbestos fibers. Despite those efforts, evidence showing health effects from ingestion is still ambiguous (Ref. 5).

2. *Cancer risk extrapolation.* As discussed above, numerous human studies have demonstrated that exposure to asbestos has increased the risk of cancer and asbestosis. This unit presents EPA's approach in estimating the cancer risk attributable to exposures during the removal, enclosure, or encapsulation of friable asbestos.

Since a number of epidemiology studies indicate a positive relationship between asbestos exposure and the risk of lung cancer, several models may be used to extrapolate from risk at high exposure to risk at lower exposure. The model that EPA believes is most consistent with available human and animal data is the linear nonthreshold dose/response model. This model assumes that: (1) Any exposure increases risk, and (2) the increase in risk is proportional to the background risk in the nonexposed population and to the level of exposure, defined as duration of exposure times concentration of asbestos fibers to which populations may be exposed.

The choice of the linear model appears reasonable since there is no evidence for a threshold level of asbestos exposure below which there is

VOL 51 ISS 80 AP 25 1986 UMI

no increased risk. It is further supported by evidence of cancers among populations whose asbestos exposure is believed to have been lower than levels reported in the epidemiology studies of asbestos workers mentioned above.

The model adopted by EPA to estimate excess mesothelioma incidence due to asbestos exposure relates disease incidence to dose and the time from first exposure (minus 10 years) raised to the third power. This model reflects a delay (or minimum latency period) of 10 years between first exposure and the likely earliest possible appearance of the disease. Both the lung cancer and mesothelioma models have also been adopted by OSHA (Ref. 12). The National Research Council Committee on Nonoccupational Health Risks of Asbestiform Fibers also adopted a similar linear nonthreshold model to estimate risk to nonoccupational populations from exposure to asbestos (Ref. 6). The derivation and validation of the models is discussed in detail in the CHAP report (Ref. 1) and in EPA's "Regulatory Impact Analysis of Controls on Asbestos and Asbestos Products" (Ref. 3).

Although EPA believes that excess mortality from asbestosis and cancers other than lung cancer and mesothelioma could occur from exposure to asbestos released during asbestos abatement operations, EPA has not attempted to quantify that excess mortality since lung cancer and mesothelioma appear to present the greatest threats to human health at current exposure levels. Thus, the model could understate the risk to humans from asbestos exposure.

The risk of asbestos-induced disease may be modified by several factors. As mentioned in the earlier discussion on lung cancer, smoking drastically increases the risk of developing lung cancer from exposure to asbestos. Because of their lower underlying risk, the absolute increase of incidence of lung cancer in nonsmokers is about one-tenth of that in smokers. However, complete control of the smoking factor (if possible) would leave a substantial health risk since the risk of mesothelioma (which is apparently unaffected by smoking) and the risk of lung cancer to nonsmokers would still remain.

Another factor that may affect the risk of asbestos-induced disease is the possible differences in biological potency among the different fiber types. The National Research Council (Ref. 6) studied this issue and concluded:

> Results of studies of various groups of workers indicate that it is extremely difficult to assess the role of fiber type (e.g., chrysotile or crocidolite) in determining the risk for developing either lung cancer or mesothelioma. Analysis of the epidemiological studies is complicated because of variations in type of industry, the diverse fiber characteristics within an industry, and the usual inadequacy of exposure data. Some scientists have interpreted the available epidemiological data to indicate that chrysotile asbestos, the asbestos type most commonly used in the United States, is less hazardous than the other types of asbestos, especially crocidolite. Such arguments have been used in the United Kingdom and other countries to rationalize different regulatory controls for crocidolite and chrysotile. However, in view of the laboratory evidence and great uncertainty about the nature of the fibers of asbestos to be found in nonoccupational exposure situations, the committee decided not to differentiate among them in the quantitative risk assessment. Furthermore, some of the apparent discrepancies may be explained by differences in physical properties of the fibers, their concentrations, and their characteristics in the different environments. These possibilities need further testing.

In view of this uncertainty about the relative potency of the various asbestos types and in view of the well-documented health hazard of the most common commercial form of asbestos, EPA has concluded that it is prudent to treat all asbestos fiber types as having equivalent biological activity.

Fiber morphology has also been suggested as a factor that may affect incidence of asbestos-induced disease. Animal studies in which asbestos fibers were applied by injection or implantation suggest that longer and finer fibers are more carcinogenic than shorter and coarser fibers. This has not, however, been confirmed by inhalation studies. EPA has not differentiated among fiber sizes in its assessment of the potential risk of asbestos. First, asbestos fibers released during asbestos abatement projects consist of a great range of dimensions, including those suggested as most dangerous. Second, it has not been clearly shown that short fibers pose a significantly smaller risk. No dimensional threshold for potency has been established.

3. *Magnitude of human exposure.* Persons can be exposed to high levels of airborne asbestos in or near the work area during asbestos abatement projects. Peak exposure during the removal of asbestos insulation have been measured at levels ranging from 4.5 f/cc to 82.2 f/cc. Mean exposure levels during the dry removal of an asbestos-containing ceiling have been measured at 42.2 f/cc. Mean exposure levels during the wet removal of an asbestos-containing ceiling have been measured at 23.1 f/cc. Mean exposure levels during removal of an asbestos-containing ceiling using water and a surfactant have been measured at 6.1 f/cc (Refs. 2 and 13). OSHA has estimated that average airborne concentrations in the dry wall removal, renovation, and demolition industry are 20 f/cc (Ref. 12).

There may also be much exposure to asbestos during the encapsulation and enclosure of friable asbestos material. Using an electron microscope, levels of 40, 380, 390, and 8,740 nanograms per cubic meter were found in samples taken in the work area with a mobile pump during painting with an encapsulant. Samples taken by personal pumps worn by two painters during encapsulation showed very low levels in one case and levels of 1,000, 1,700, 2,300, and 13,000 nanograms per cubic meter in the other case (Ref. 14). EPA has received anecdotal evidence that there may be much exposure to asbestos during enclosure of friable asbestos material.

Based on available exposure information, EPA estimated in the proposal that unregulated dry removal of asbestos results in exposure levels of 24.0 f/cc in the work area during abatement, 1.6 f/cc outside the work area during abatement and 0.8 f/cc outside the work area post abatement. EPA estimated that unregulated wet removal of asbestos results in exposure levels of 18.0 f/cc in the work area during abatement, 0.9 f/cc outside the work area during abatement, and 0.5 f/cc in the building post abatement (Ref. 13). Many of the estimates were based on data reported in studies, while others were essentially assumed due to a lack of data (Ref. 13). EPA received no comments on these estimates.

EPA estimated in the proposal that this rule would reduce the concentrations of airborne asbestos to 11.9 f/cc in the work area during abatement, 0.3 f/cc outside the work area during abatement, and 0.5 f/cc in the building post abatement (Ref. 13). These figures are estimated averages for all abatement projects. Individual projects are likely to have different concentrations. EPA received no comments on these estimates.

EPA estimated in the proposal that about 450 abatement workers per year would be covered by this rule. This was based on an estimate of the number of abatement projects each year and an estimate of the percentage of those projects in which State and local employees are used. The number of employees covered by the rule during repair and maintenance work involving the removal, enclosure or encapsulation of friable asbestos material was not estimated. One comment asserted that as many as 75,000 State and local workers could be covered during these activities. EPA believes that this estimate is high.

In the proposal, EPA estimated that asbestos abatement workers would be exposed to asbestos during abatement for 3 to 6 days a year. In addition, other persons would be exposed to asbestos as a result of asbestos abatement activities. EPA estimated that about 1,250 other State and local public employees, such as public school teachers, other public school personnel, public hospital staff, and State and local government office workers, would be exposed during abatement and about 3,700 employees would be exposed post abatement. EPA also estimated that about 400 other building occupants such as school children and hospital patients and visitors would be exposed during abatement and about 38,600 other occupants and visitors would be exposed post abatement (Ref. 13). EPA received comments that it underestimated the number of asbestos abatement projects covered by this rule. If these comments are accurate, then this rule will potentially protect even more persons.

B. Environmental Effects

Section 6(c) of TSCA requires that EPA state the relevant environmental factors and key considerations which form the basis for regulatory action under section 6(a). The unreasonable risk finding of this rule is based solely on risks to human health since these risks are by far the most serious consequence of unregulated removal, enclosure, or encapsulation of friable asbestos material and are sufficient to support this rule. EPA received no comments on this point.

C. Benefits of Asbestos Products and Availability of Substitutes

EPA finds that the benefits of the asbestos-containing products affected by this rule are minimal. This rule applies only when persons have already decided to remove, enclose, or encapsulate friable asbestos material. These people presumably will have already determined that there are no benefits in using the asbestos-containing material in its present condition. In addition, there are adequate substitutes for the asbestos products that are being removed from buildings. EPA received no comments on this point.

D. Economic Effects of the Rule

This portion of the preamble presents EPA's determination of the "reasonably ascertainable economic consequences of the rule, after consideration of the effect on the national economy, small business, technological innovation, the environment, and public health" as required by section 6(c)(1)(D) of TSCA.

EPA estimates that this rule will increase the cost of asbestos abatement to some extent. In the proposal, EPA estimated that the rule would increase the cost of typical abatements as follows:

Project	Without rule	With rule	Increase	Percent increase
School	$12,900	$15,300	$2,400	18
Office building	18,800	22,000	3,200	17
Hospital	58,500	65,800	7,300	12
Boiler room	3,700	4,900	1,200	32
Boiler pipes	1,700	2,600	900	54

In the proposal, EPA estimated that the rule would increase the costs of asbestos abatement a total of about $730,000. This figure represents the present value of costs incurred over the next 15 years, assuming that all friable asbestos is abated. EPA also estimated that this rule would avoid about 200 cancer cases. This is about $3,650 per cancer case avoided.

EPA received comments indicating that the total costs of the rule were understated because EPA underestimated the number of asbestos abatement projects covered by this rule. EPA acknowledges that the estimate of asbestos abatement projects may have been low because it did not take into account many maintenance and repair operations. However, EPA has excluded some of these small projects from coverage in the final rule. In addition, even if the number of asbestos abatement projects is higher than estimated by EPA, both the costs of the rule and the number of cancer cases avoided would have been underestimated in roughly the same proportion in the proposal. Thus, this possible underestimate would not change the cost per cancer case avoided by the rule.

This rule will not have a direct impact on small business since it applies only to those public employees not covered by the OSHA Asbestos Standard. However, by establishing regulatory requirements for public employees similar to those of private employees under OSHA jurisdiction, the rule will eliminate cost advantages that may encourage the use of public employees rather than private contractors for asbestos abatement. This rule may, therefore, bring about increased use of private contractors, some of which are small businesses. This rule could have an impact on small government entities because it would increase the cost of performing asbestos abatement activities using public employees. However, the rule will not increase the cost of using contractors to perform asbestos abatement and would not require any government entity to undertake asbestos abatement activities.

EPA does not believe that this rule will restrict technological innovation. The rule allows sufficient flexibility for the development of new technology concerning asbestos abatement.

E. Other EPA Statutes

Section 6(c) of TSCA requires that if EPA determines that a risk of injury to health or the environment could be eliminated or reduced to a sufficient extent by actions taken under another statute administered by EPA, EPA may not promulgate a rule under section 6(a) of TSCA unless EPA finds it is in the public interest to protect against the risk by action under TSCA. EPA finds that no other law administered by EPA will eliminate or reduce the risks to the workers associated with the removal, renovation, or encapsulation of asbestos to a sufficient extent.

Several EPA statutes have been used to limit asbestos exposure. In 1973, EPA used the authority of the Clean Air Act (CAA) to list asbestos as a hazardous air pollutant, establish a "no visible" emission standard for manufacturers, and ban the use of spray-applied asbestos-containing material as insulation in buildings. The regulation was published in the **Federal Register** of April 6, 1973 (38 FR 8826). EPA amended this regulation in 1975 to ban asbestos-containing pipe lagging, by a rule published in the **Federal Register** of October 12, 1975 (40 FR 48292); and in 1978 extended the ban to all uses of sprayed-on asbestos by a rule published in the **Federal Register** of June 19, 1978 (43 FR 26372). The CAA rule also regulates operations involving the demolition or renovation of buildings containing friable asbestos and the disposal of wastes generated by such operations.

However, the CAA has limitations. The CAA does not apply directly to the protection of workers exposed to indoor air. Consequently, any possible additional use of that statute could leave many workers exposed to indoor situations of inadequate protection.

An additional EPA statute that could be used to limit asbestos exposure is the Resource Conservation and Recovery Act (RCRA). Under RCRA, EPA could list asbestos as a hazardous waste and

VOL 51 ISS 80 AP 25 1986 UMI

subject asbestos waste to general RCRA requirements designed to reduce exposure. However, such action under RCRA would reduce exposure only when the wastes from asbestos removal are ultimately placed in disposal facilities. It would not reduce exposure during the actual removal, enclosure, or encapsulation of asbestos products. Therefore, EPA finds that the risk from asbestos abatement projects cannot be eliminated or reduced to a sufficient extent by actions taken under another statute administered by EPA.

F. Other Options Considered

Section 6 of TSCA requires that EPA apply the least burdensome requirements to reduce an unreasonable risk. EPA considered the following options for reducing the risks associated with the removal, enclosure, or encapsulation of asbestos without any regulatory controls beyond those required by the National Emission Standard for Asbestos.

1. *Take no regulatory action under TSCA; instead provide the public with information and technical assistance.* Under this option, EPA would take no regulatory action, beyond that already taken as part of the National Emission Standard for Asbestos; but would instead provide the public with information and technical assistance. EPA is already increasing the information and technical assistance it provides the public. Persons could use that information to reduce the risk to public employees who perform asbestos abatement work during the removal, enclosure, or encapsulation of asbestos.

This approach would minimize the burden caused by regulatory action. However, this option is an inadequate response given the high risk to abatement workers associated with the removal, enclosure, or encapsulation of asbestos following only the requirements of the National Emission Standard for Asbestos. The National Emission Standard for Asbestos was designed to limit the release of asbestos to the ambient air and only incidentally protects abatement workers inside a building.

2. *Take no regulatory action under TSCA; instead defer to the States.* Under this option, EPA would take no regulatory action beyond that already taken as part of the National Emission Standard for Asbestos but would instead provide the States with information and technical assistance so that States can adopt regulations to protect public employees who perform asbestos abatement work.

This approach would minimize the burden caused by Federal regulatory action. However, this option is an inadequate response since a number of States have not taken action in this area in the past and may not take action in the future. Still, EPA encourages States to take action to protect such public employees with requirements more stringent than those in this rule. As stated earlier, employees exposed to asbestos at the level permitted by this rule still face a risk to health.

3. *Propose a rule which provides greater protection than the current OSHA Asbestos Standard.* OSHA has recognized that its current Asbestos Standard is inadequate and has begun rulemaking to adopt a new standard. EPA could issue a rule closer to the proposed OSHA standard or closer to the recommendations for worker protection in EPA's technical guidance documents. As stated earlier, EPA decided to follow the current OSHA Asbestos Standard closely to maintain consistency among Federal agencies. However, EPA expects to adopt a rule very similar to the final OSHA Asbestos Standard after OSHA issues that rule. This will ensure that all public and private sector employees who take part in asbestos abatement work enjoy similar levels of protection.

G. Analysis Under Section 9(a) of TSCA

Section 9(a) of TSCA requires EPA to review other Federal authorities not administered by EPA to determine whether action under those authorities may prevent or reduce to a sufficient extent such risks. EPA has reviewed other Federal authorities. The only statute not administered by EPA that could reduce such risks is the OSH Act. However, this rule covers only persons not covered by the OSHA Asbestos Standard. OSHA currently has no statutory authority to cover public employees in a State without an OSHA-approved State plan and 27 States do not have an approved plan. Thus, EPA cannot determine that there is a statute administered by another Federal agency that can prevent or reduce the risk presented to persons not covered by the OSHA Asbestos Standard during the removal, enclosure, or encapsulation of friable asbestos.

VII. Finding of Unreasonable Risk

EPA has weighed the health risks from unregulated asbestos abatement against the costs attributable to the proposed regulation. EPA estimates that this rule would avoid about 200 cancer cases, among abatement workers, other employees in buildings where abatement occurs, and visitors to such buildings while costing about $730,000 over 15 years. This is about $3,650 per cancer case avoided. Even if EPA underestimated the number of asbestos abatement projects covered by this rule, the cost per cancer case avoided would be about the same. EPA has concluded that the avoidance of these premature deaths substantially outweighs the costs of the control measures required.

Therefore, EPA finds that unregulated removal, enclosure, or encapsulation of friable asbestos material presents an unreasonable risk to human health and proposes to require that certain measures be taken to reduce the risk faced by asbestos abatement workers and persons using and visiting buildings during and after asbestos abatement activities. The finding is based on the following points:

1. The health effects from asbestos exposure are very serious. Asbestos is a demonstrated human carcinogen. The cancers caused by asbestos are usually fatal and cause much pain and suffering.

2. Available evidence supports the conclusion that there is no safe level of exposure to asbestos. This conclusion is consistent with present theory of cancer etiology and is further supported by the many documented cases where low or short-term exposure has been shown to cause asbestos-related disease.

3. Models developed to estimate the relative risk of developing cancer from exposure to asbestos show a linear dose-response relationship. Based on data from epidemiology studies, these models predict that humans exposed to even very low levels of asbestos incur some risk.

4. Many persons are involved in asbestos abatement activities, but are not protected by the OSHA Asbestos Standard.

5. Persons can be exposed to high levels of airborne asbestos if they conduct asbestos abatement without any exposure controls.

6. If persons attempt to abate asbestos hazards, but do so incorrectly, there may be very high levels of exposure to asbestos on the part of abatement workers, other employees who work in the building, and visitors to the building. These levels may far exceed the levels of exposure permitted by the current OSHA Asbestos Standard. For example, in schools that incorrectly abate asbestos hazards, school teachers and other school employees and school children could be exposed as well as abatement workers. State and local public employees could potentially take part in asbestos abatement activities in all State and local public buildings in the States not covered by OSHA State plans.

7. The estimated incremental economic costs of this rule are minimal in view of the number of cancers that may be avoided by the rule.

VIII. Enforcement

Section 15 of TSCA makes it unlawful to fail or refuse to comply with any provision of a rule promulgated section 6 of TSCA. Therefore, faulure to comply with this rule would be a violation of section 15 of TSCA. In addition, section 15 of TSCA makes it unlawful for any person to: (1) Fail or refuse to establish and maintain records as required by this rule; (2) fail or refuse to permit access to or copying or records, as required by TSCA; or (3) fail or refuse to permit entry or inspection as required by section 11 of TSCA.

Violators may be subject to both civil and criminal liability. Under the penalty provision of section 16 of TSCA, any person who violates section 15 could be subject to a civil penalty of up to $25,000 for each violation. Each day of operation in violation of this rule could constitute a separate violation. Knowing or willful violations of this rule could lead to the imposition or criminal penalties of up to $25,000 for each day of violation and imprisonment for up to 1 year. In additional, other remedies are available to EPA under sections 7 and 17 of TSCA, such as seeking an injunction to restrain violations of this rule.

IX. Confidentiality

A person may assert a claim of confidentiality for any information, including public comments, submitted to EPA in connection with this rule. Any person who submits a confidential public comments must also submit a nonconfidential version. Any claim of confidentiality must accompany the information when it is submitted to EPA. Persons would claim information confidential by circling, bracketing, or underlining it and marking it with "CONFIDENTIAL" or some other appropriate designation. EPA will disclose information subject to a claim of confidentiality only to the extent permitted by section 14 of TSCA and 40 CFR Part 2, Subpart B. If a person does not assert a claim of confidentiality for information at the time it is submitted to EPA, EPA may make the information public without further notice to that person.

X. Rulemaking Record

EPA has established a record for this rulemaking (docket control number OPTS-62044). A public version of the record, without any confidential business information, is available to the public in the Office of Toxic Substances Public Information Office, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, The Public Information Office is located in Rm. E-107, 401 M St., SW., Washington, D.C.

The record includes information considered by EPA in developing this rule. The record now includes the following categories of information:

1. Federal Register notices.
2. Support documents.
3. Reports.
4. Memoranda and letters.

The record also includes by reference the rulemaking record compiled by OSHA as part of the revision of the OSHA Asbestos Standard. Persons may point out any errors or omissions in the record by May 9, 1986.

XII. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA prepared a Cost-Effectiveness Analysis. The Analysis estimated that this rule would cost about $730,000 over 15 years, while avoiding about 200 fatal cancer cases. This is a cost of about $3,650 per cancer case avoided. As shown in Unit V above, EPA believes that these costs are reasonable. Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this rule is not a "Major Rule" because it will not have an effect on the economy of $100 million or more and it will not have a significant effect on competition, costs, or prices.

This rule was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

EPA has analyzed the economic impact of this proposed rule on small businesses. A summary of EPA's analysis appears in Unit VI.D.

C. Paperwork Reduction Act

The information collection requirements in this rule were submitted to the Office of Management and Budget (OMB) for approval under the Paperwork and Reduction Act of 1980, 44 U.S.C. 3501 et seq. (Control No. 2070–0072). EPA received comments that 10-day advance notice of asbestos abatement projects is burdensome in particular instances such as emergency repairs. EPA has responded to those comments by not requiring 10-day advance notice of emergency projects. Instead, those projects must be reported to EPA as soon as possible. In addition, EPA has excluded small asbestos abatement projects from the reporting requirements of this rule.

List of Subjects in 40 CFR Part 763

Environmental protection, Hazardous substances, Recordkeeping and reporting requirements, Asbestos.

VOL 51 ISS 80 APR 25 1986 UMI

Dated: April 17, 1986.
Lee M. Thomas,
Administrator.

PART 763—[AMENDED]

Therefore, 40 CFR Part 763 is amended as follows:

1. The authority citation for Part 763 continues to read as follows:

Authority: 15 U.S.C. 2605 and 2607(c).

2. Subpart G is revised to read as follows:

Subpart G—Asbestos Abatement Projects

Sec.
763.120 Scope.
763.121 Regulatory requirements.
763.124 Reporting.
763.125 Enforcement.
763.126 Inspections.

Subpart G—Asbestos Abatement Projects

§ 763.120 Scope.

(a) This Part establishes requirements which must be followed during asbestos abatement projects by employers of State and local government employees not covered by the Asbestos Standard of the Occupational Safety and Health Administration (OSHA), 29 CFR 1910.1001, an Asbestos Standard adopted by a State as part of a State plan approved by OSHA under section 18 of the Occupational Safety and Health Act, or a State asbestos regulation in Idaho, Kansas, Oklahoma, and Wisconsin. The rule covers those employees who take part in asbestos abatement work.

(b) [Reserved]

§ 763.121 Regulatory requirements.

(a) *Definitions.* For the purpose of this section:

(1) "Asbestos" means the asbestiform varieties of chrysotile (serpentine); crocidolite (riebeckite); amosite (cummingtonite-grunerite); tremolite; anthophyllite, and actinolite.

(2) "Asbestos abatement project" means any activity involving the removal, enclosure, or encapsulation of friable asbestos material, except removal, enclosure, or encapsulation during sampling or routine repair of less than either 3 linear feet or 3 square feet of friable asbestos material.

(3) "Asbestos fibers" means asbestos fibers longer than 5 micrometers.

(4) "Emergency project" means a project involving the removal, enclosure, or encapsulation of friable asbestos-containing material that was not planned but results from a sudden unexpected event.

(5) "Employer" means the public department, agency, or entity which hires an employee. The term includes, but is not limited to, any State, County, City, or other local governmental entity which operates or administers schools, a department of health or human services, a library, a police department, a fire department, or similar public service agencies or offices.

(6) "Friable asbestos material" means any material containing more than 1 percent asbestos by weight which, when dry, may be crumbled, pulverized or reduced to powder by hand pressure.

(b) *Permissible exposure to airborne concentrations of asbestos fibers.*

(1) [Reserved]

(2) *Standard effective on June 9 1986.* The 8-hour time-weighted average airborne concentrations of asbestos fibers to which any employee may be exposed shall not exceed two fibers, longer than 5 micrometers, per cubic centimeter of air, as determined by the method prescribed in paragraph (3) of this section.

(3) *Ceiling concentration.* No employee shall be exposed at any time to airborne concentrations of asbestos fibers in excess of 10 fibers, longer than 5 micrometers, per cubic centimeter of air, as determined by the method prescribed in paragraph (e) of this section.

(c) *Methods of compliance*—(1) *Engineering methods*—(i) *Engineering controls.* Engineering controls, such as, but not limited to, isolation, enclosure, exhaust ventilation, and dust collection, shall be used to meet the exposure limits prescribed in paragraph (b) of this section.

(ii) *Local exhaust ventilation.* (A) Local exhaust ventilation and dust collection systems shall be designed, constructed, installed, and maintained in accordance with the American National Standard Fundamentals Governing the Design and Operation of Local Exhaust Systems, ANSI Z9.2–1979 (Revision of ANSI Z9.2–1971), which is incorporated by reference herein.

(B) ANSI Z9.2–1979 is available for inspection at the Office of the Federal Register Information Center, Rm. 8301, 1100 L St., NW., Washington, DC 20408. This incorporation by reference was approved by the Director of the Office of the Federal Register. This material is incorporated as it exists on the date of approval and a notice of any change in this material will be published in the Federal Register. Copies of the incorporated material may be obtained from the Document Control Officer (TS–793), Office of Toxic Substances, EPA, Rm. 107, 401 M St., SW., Washington, DC 20460, and from the American National Standards Institute, 1430 Broadway, New York, NY 10018 (212–354–3473).

(iii) *Particular tools.* All hand-operated and power-operated tools which may produce or release asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section, such as, but not limited to, saws, scorers, abrasive wheels, and drills, shall be provided with local exhaust ventilation systems in accordance with paragraph (c)(1)(ii) of this section.

(2) *Work practices*—(i) *Wet methods.* Insofar as practicable, asbestos shall be handled, mixed, applied, removed, cut, scored, or otherwise worked in a wet state sufficient to prevent the emission of airborne fibers in excess of the exposure limits prescribed in paragraph (b) of this section, unless the usefulness of the product would be diminished thereby.

(ii) *Particular products and operations.* No asbestos cement, mortar, coating, grout, plaster, or similar material containing asbestos shall be removed from bags, cartons, or other containers in which they are shipped, without being either wetted, or enclosed, or ventilated so as to prevent effectively the release of airborne asbestos fibers in excess of the limits prescribed in paragraph (b) of this section.

(iii) *Demolition or removal.* Employees engaged in removal or demolition of pipes, structures, or equipment covered or insulated with asbestos, and in the removal or demolition of asbestos insulation or coverings shall be provided with respiratory equipment in accordance with paragraph (d)(2)(iii) of this section and with special clothing in accordance with paragraph (d)(3) of this section.

(d) *Personal protection equipment.* (1) Compliance with the exposure limits prescribed by paragraph (b) of this section may not be achieved by the respirators except:

(i) During the time period necessary to install the engineering controls and to institute the work practices required by paragraph (c) of this section;

(ii) In work situations in which the methods prescribed in paragraph (c) of this section are either technically not feasible or feasible to an extent insufficient to reduce the airborne concentrations of asbestos fibers below the limits prescribed by paragraph (b) of this section; or

(iii) In emergencies.

(2) Where a respirator is permitted by paragraph (d)(1) of this section, it shall be selected from among those approved by the Mine Safety and Health Administration, Department of Labor, the Bureau of Mines, Department of the Interior, or the National Institute for Occupational Safety and Health, Department of Health and Human Services, under the provisions of 30 CFR Part 11 and shall be used in accordance with paragraphs (d)(2) (i), (ii), (iii), and (iv) of this section.

(i) *Air purifying respirators.* A reusable or single use air purifying respirator, or a respirator described in paragraph (d)(2) (ii) or (iii) of this section, shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed no more than 10 times those limits.

(ii) *Powered air purifying respirators.* A full facepiece powered air purifying respirator, or a powered air purifying respirator, or a respirator described in paragraph (d)(2)(iii) of this section, shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average concentrations of asbestos fibers are reasonably expected to exceed 10 times, but not 100 times, those limits.

(iii) *Type "C" supplied-air respirators, continuous flow or pressure-demand class.* A type "C" continuous flow or pressure-demand, supplied-air respirator shall be used to reduce the concentrations of airborne asbestos fibers in the respirator below the exposure limits prescribed in paragraph (b) of this section, when the ceiling or the 8-hour time-weighted average airborne concentrations of asbestos fibers are reasonably expected to exceed 100 times those limits.

(iv) *Establishment of a respirator program.* (A) The employer shall establish a respirator program in accordance with the requirements of the American National Standard Practices for Respiratory Protection, ANSI Z88.2–1980 (Revision of ANSI Z88.2–1969), which is incorporated by reference herein.

(B) ANSI Z88.2–1980 is available for inspection at the Office of the Federal Register Information Center, Rm. 8301, 1100 L St., NW., Washington, DC 20408. This incorporation by reference was approved by the Director of the Office of the Federal Register. This material is incorporated as it exists on the date of approval and a notice of any change in this material will be published in the Federal Register. Copies of the incorporated material may be obtained from the Document Control Officer (TS–793), Office of Toxic Substances, EPA, Rm. 107,401 M St., SW., Washington, DC 20460, and from the American National Standards Institute, 1430 Broadway, New York, NY 10018, (212–354–3473).

(C) No employee shall be assigned to tasks requiring the use of respirators if, based upon his most recent examination, an examining physician determines that the employee will be unable to function normally wearing a respirator, or that the safety or health of the employee or other employees will be impaired by his use of a respirator. Such employee shall be rotated to another job or given the opportunity to transfer to a different position whose duties he is able to perform with the same employer, in the same geographical area and with the same seniority, status, and rate of pay he had just prior to such transfer, if such a different position is available.

(3) Special clothing: The employer shall provide, and require the use of, special clothing, such as coveralls or similar whole body clothing, head coverings, gloves and foot coverings for any employee exposed to airborne concentrations of asbestos fibers, which exceed the ceiling level prescribed in paragraph (b) of this section.

(4) Change rooms:

(i) At any fixed place of employment exposed to airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section, the employer shall provide change rooms for employees working regularly at the place.

(ii) Clothes lockers: The employer shall provide two separate lockers or containers for each employee, so separated or isolated as to prevent contamination of the employee's street clothes from his work clothes.

(iii) Laundering:

(A) Laundering of asbestos-contaminated clothing shall be done so as to prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section.

(B) Any employer who gives asbestos-contaminated clothing to another person for laundering shall inform such person of the requirement in paragraph (d)(4)(iii)(A) of this section to effectively prevent the release of airborne asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section.

(C) Contaminated clothing shall be transported in sealed impermeable bags, or other closed, impermeable bags, or other closed, impermeable containers, and labeled in accordance with paragraph (g) of this section.

(e) *Method of measurement.* All determinations of airborne concentrations of asbestos fibers shall be made by the membrane filter method at 400–450x (magnification)(4 millimeter objective) with phase contrast illumination.

(f) *Monitoring*—(1) *Initial determinations.* Every employer shall cause every place of employment where asbestos fibers are released to be monitored in such a way as to determine whether every employee's exposure to asbestos fibers is below the limits prescribed in paragraph (b) of this section. If the limits are exceeded, the employer shall immediately undertake a compliance program in accordance with paragraph (c) of this section.

(2) *Personal monitoring.* (i) Samples shall be collected from within the breathing zone of the employees, on membrane filters of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(ii) *Sampling frequency and patterns.* After the initial determinations required by paragraph (f)(1) of this section, samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of employees.

(3) *Environmental monitoring.* (i) Samples shall be collected from areas of a work environment which are representative of the airborne concentrations of asbestos fibers which may reach the breathing zone of employees. Samples shall be collected on a membrane filter of 0.8 micrometer porosity mounted in an open-face filter holder. Samples shall be taken for the determination of the 8-hour time-weighted average airborne concentrations and of the ceiling concentrations of asbestos fibers.

(ii) *Sampling frequency and patterns.* After the initial determinations required by paragraph (f)(1) of this section, samples shall be of such frequency and pattern as to represent with reasonable accuracy the levels of exposure of the employees.

(4) *Employee observation of monitoring.* Affected employees, or their representatives, shall be given a reasonable opportunity to observe any monitoring required by this paragraph and shall have access to the records thereof.

(g) *Caution signs and labels*—(1) *Caution signs*—(i) *Posting.* Caution signs

VOL 51 ISS 80 AP 25 1986

shall be provided and displayed at each location where airborne concentrations of asbestos fibers may be in excess of the exposure limits prescribed in paragraph (b) of this section. Signs shall be posted at such a distance from such a location so that an employee may read the signs and take necessary protective steps before entering the area marked by the signs. Signs shall be posted at all approaches to areas containing excessive concentrations of airborne asbestos fibers.

(ii) *Sign specifications.* The warning signs required by paragraph (g)(1)(i) of this section shall conform to the requirements of 20" x 14" vertical format signs specified in 29 CFR 1910.145(d)(4), and to this paragraph (g)(1)(ii). The signs shall display the following legend in the lower panel, with letter sizes and styles of a visibility at least equal to that specified in this paragraph (g)(1)(ii).

Legend	Notation
Asbestos	1" Sans Serif, Gothic or Block.
Dust Hazard	¾" Sans Serif, Gothic or Block.
Avoid Breathing Dust	¼" Gothic.
Wear Assigned Protective Equipment.	¼" Gothic.
Do Not Remain In Area Unless Your Work Requires It.	¼" Gothic.
Breathing Asbestos Dust May be Hazardous To Your Health.	14 Point Gothic.

Spacing between lines shall be at least equal to the height of the upper of any two lines.

(2) *Caution labels*—(i) *Labeling.* Caution labels shall be affixed to all raw materials, mixtures, scrap, waste, debris, and other products containing asbestos fibers, or to their containers, except that no label is required where asbestos fibers have been modified by a bonding agent, coating, binder, or other material so that during any reasonably foreseeable use, handling, storage, disposal, processing, or transportation, no airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section will be released.

(ii) *Label specifications.* The caution labels required by paragraph (g)(2)(i) of this section shall be printed in letters of sufficient size and contrast to be readily visible and legible. The label shall state:

CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
BREATHING ASBESTOS DUST MAY
CAUSE SERIOUS BODILY HARM

(h) *Housekeeping*—(1) *Cleaning.* All external surfaces in any place of employment shall be maintained free of accumulations of asbestos fibers if, with their dispersion, there would be an excessive concentration.

(2) *Waste disposal.* Asbestos waste, scrap, debris, bags, containers, equipment, and asbestos-contaminated clothing, consigned for disposal, which may produce in any reasonably foreseeable use, handling, storage, processing, disposal, or transportation airborne concentrations of asbestos fibers in excess of the exposure limits prescribed in paragraph (b) of this section shall be collected and disposed of in sealed impermeable bags, or other closed, impermeable containers.

(i) *Recordkeeping*—(i) *Exposure records.* Every employer shall maintain records of any personal or environmental monitoring required by this section. Records shall be maintained for a period of at least 20 years and shall be made available upon request to the Environmental Protection Agency, the Assistant Secretary of Labor for Occupational Safety and Health, the Director of the National Institute for Occupational Safety and Health, and to authorized representatives of either.

(2) *Employee access.* Every employee and former employee shall have reasonable access to any record required to be maintained by paragraph (i)(1) of this section, which indicates the employee's own exposure to asbestos fibers.

(3) *Employee notification.* Any employee found to have been exposed at any time to airborne concentrations of asbestos fibers in excess of the limits prescribed in paragraph (b) of this section shall be notified in writing of the exposure as soon as practicable but not later than 5 days of the finding. The employee shall also be timely notified of the corrective action being taken.

(j) *Medical Examinations*—(1) *General.* The employer shall provide or make available at his cost, medical examinations relative to exposure to asbestos required by this paragraph.

(2) *Preplacement.* The employer shall provide or make available to each of his employees, within 30 calendar days following his first employment in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination, which shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 x 17 inches) at the discretion of the physician, a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(3) *Annual examinations.* On or before April 27, 1986, and at least annually thereafter, every employer shall provide, or make available, comprehensive medical examinations to each of his employees engaged in occupations exposed to airborne concentrations of asbestos fibers. Such annual examination shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 x 17 inches) at the discretion of the physician, a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(4) *Termination of employment.* The employer shall provide, or make available, within 30 calendar days before or after the termination of employment of any employee engaged in an occupation exposed to airborne concentrations of asbestos fibers, a comprehensive medical examination which shall include, as a minimum, a chest roentgenogram (posterior-anterior 14 x 17 inches) at the discretion of the physician, a history to elicit symptomatology of respiratory disease, and pulmonary function tests to include forced vital capacity (FVC) and forced expiratory volume at 1 second ($FEV_{1.0}$).

(5) *Recent examinations.* No medical examination is required of any employee, if adequate records show that the employee has been examined in accordance with this paragraph within the past 1-year period.

(6) *Medical records*—(i) *Maintenance.* Employers of employees examined pursuant to this paragraph shall cause to be maintained complete and accurate records of all such medical examinations. Records shall be retained by employers for at least 20 years.

(ii) *Access.* The contents of the records of the medical examinations required by this paragraph shall be made available, for inspection and copying, to the Environmental Protection Agency, the Assistant Secretary of Labor for Occupational Safety and Health, the Director of NIOSH, to authorized physicians and medical consultants of either of them, and, upon the request of an employee or former employee, to his physician. Any physician who conducts a medical examination required by this paragraph shall furnish to the employer of the examined employee all the information specifically required by this paragraph, and any other medical information related to occupational exposure to asbestos fibers.

§ 763.124 Reporting.

(a) Employers subject to this rule must report to the Regional Asbestos Coordinator for the EPA Region in which the asbestos abatement project is located at least 10 days before they begin any asbestos abatement project except one that involves less than either 3 linear feet or 3 square feet of friable asbestos material and is covered by this rule, other than an emergency project. Employers must report any emergency project covered by this rule as soon as possible but in no case more than 48 hours after the project begins. A list of the EPA Regional Offices is given under 40 CFR 1.7(b).

(b) The report must include:

(1) The employer's name and address.

(2) The location, including street address, of the asbestos abatement project.

(3) The scheduled starting and completion dates for the asbestos abatement project.

(c) If a report is mailed to EPA, the report must be postmarked at least 10 days before the asbestos abatement project begins unless the report is for an emergency project. In such a case, the report must be postmarked as soon as possible but in no case more than 48 hours after the project begins.

(d) Employers do not have to report under this section if they submit a notice to EPA under the National Emission Standard for Asbestos, 40 CFR 61.146, at least 10 days before they begin the asbestos abatement project and that notice clearly indicates that employees not covered by the OSHA Asbestos Standard or an Asbestos Standard adopted by a State as part of a State plan approved by OSHA will perform some or all of the asbestos abatement work.

(Approved by the Office of Management and Budget under the control number 2070-0072)

§ 763.125 Enforcement.

(a) Failure to comply with any provision of this Part is a violation of section 15 of the Act (15 U.S.C. 2614).

(b) Failure or refusal to establish and maintain records or to permit access to or copying of records, as required by the Act, is a violation of section 15 of the Act (15 U.S.C. 2614).

(c) Failure or refusal to permit entry or inspection as required by section 11 of the Act (15 U.S.C. 2610) is a violation of section 15 of the Act (15 U.S.C. 2614).

(d) Violators may be subject to the civil and criminal penalties in section 16 of the Act (15 U.S.C. 2615) for each violation.

(e) EPA may seek to enjoin an asbestos abatement project in violation of this Part, or take other actions under the authority of sections 7 of 17 of the Act (15 U.S.C. 2606 or 2616).

§ 763.126 Inspections.

EPA will conduct inspections under section 11 of the Act (15 U.S.C. 2610) to ensure compliance with this Part.

Tobacco Inspection; Proposed Rule

BEST COPY AVAILABLE

VOL 51 ISS 80 AP 25 1986 UMI

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 29

Tobacco Inspection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rulemaking.

SUMMARY: Pub. L. 99–198, sections 1161 and 1166, approved December 23, 1985 (Amendments to section 213 of the Dairy and Tobacco Adjustment Act of 1983) (7 U.S.C. 511r) requires that all flue-cured and burley tobacco offered for importation into the United States not contain any prohibited residue of any pesticide that has been cancelled, suspended, revoked, or otherwise prohibited under the Federal Insecticide, Fungicide and Rodenticide Act. Further, all flue-cured or burley tobacco permitted entry into the United States must be accompanied by a written identification of any and all end users or purchasers to whom the importer may transfer such imported tobacco. Finally, the law requires that the Secretary fix and collect fees to cover, as nearly as practicable, the costs of these additional services. It is proposed that the regulations be amended to provide for the testing and certification of imported tobacco.

DATE: Comments are due on or before May 27, 1986.

ADDRESS: Send comments on imported tobacco to the Director, Tobacco Division, Agricultural Marketing Service (AMS), United States Department of Agriculture (USDA), Room 502, Annex Building, Washington, DC 20250. Comments will be available for public inspection at this location during regular business hours.

FOR FURTHER INFORMATION CONTACT: Director, Tobacco Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, DC 20250, telephone (202) 447–2567.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Department proposes to amend the regulations governing the inspection and grading of tobacco (7 CFR Part 29, Subpart B *et seq.*) to provide for the testing by the Department of imported flue-cured and burley tobacco for pesticide residues and to fix and collect fees for these services. These fees and charges would, as nearly as practicable, cover the cost of such services, including the administrative and supervisory costs customarily included by the Secretary in user fee calculations. The regulations would also be amended to provide for the identification of the end users of imported flue-cured and burley tobacco. The authority for these regulations is contained in Pub. L. 99–198, sections 1161 and 1166 (7 U.S.C. 511r) ("the Act") and the Tobacco Inspection Act (48 Stat. 731; 7 U.S.C. 511 *et seq.*). The proposed amendments are designed to implement the statutory provisions requiring testing of imported flue-cured and burley tobacco for pesticide residues and the identification of end users in a manner that, insofar as practicable, does not place an undue burden on the Federal Inspection Service or impede the expeditious movement of the commodity in commerce. The results of testing and data collected on volume, and end users will be kept confidential and released in a manner that will not reveal the identity of any individual entity. This information will be periodically compared with statistics released by other government agencies to insure that all imported flue-cured and burley tobacco is accounted for as required by the Act.

The Department currently inspects for grade and quality all tobacco offered for importation into the United States except oriental and cigar types. Most imported tobacco arrives in this country by vessel, typically in 40-foot containers which carry 90–99 packages weighing approximately 500 pounds each. Generally, these containers are transferred to a rail or truck carrier and transported to an inland port of entry where the tobacco is unloaded for warehousing, manipulation, or manufacturing. The majority of imported tobacco is initially stored in bonded warehouses. Shipments are identified by invoices and packing lists which give detailed accountings of the tobacco, including country of origin, weight, and company grade.

In proposing pesticide residue levels, the Department has relied upon research conducted by several land grant universities and the regulations of the Environmental Protection Agency found at 40 CFR Part 180.

It is proposed that all flue-cured and burley tobacco offered for importation into the United States, including tobacco entering foreign trade zones, but excluding transshipped tobacco, be subject to testing for pesticide residues and that information be collected for the identification of end users. The importer would be required to complete a Pesticide and End User Certification form at the time of importation. On the form the importer would certify either that the tobacco is free of prohibited pesticide residues, or that it will not move in commerce until it is tested pursuant to these regulations and found to be free of prohibited pesticide residues. Tobacco certified as being free of prohibited pesticide residues would be subject only to random sampling and testing.

All imported flue-cured and burley tobacco would be assessed fees to cover the costs of sampling and testing under these regulations. The fee for sampling and testing imported flue-cured and burley tobacco in accordance with these regulations would initially be set at $.0010 per pound. Imported flue-cured and burley tobacco not accompanied by a certification that it is free of prohibited pesticide residues would be subject to an additional fee of $.0030 per pound. These fees were determined after a thorough review of the procedures to be used, the anticipated volume to be sampled and tested and the number of staff hours necessary to provide and supervise the testing service. Since this is a new program, the costs actually incurred would be closely monitored during the startup phase. Based on this review, adjustments would be made in the fee as necessary.

The Act also contains provisions relating to domestically-produced flue-cured and burley tobacco. Regulations implementing these provisions will be published separately by the Agricultural Stabilization and Conservation Service (ASCS) before the openings of the flue-cured and burley sales seasons. It may be noted that existing law and regulations require that domestic producers of flue-cured and burley tobacco must certify that no banned pesticides have been used, and that approved pesticides have been used in accordance with label requirements.

These proposed rules have been reviewed under USDA procedures established to implement Executive Order 12291 and Departmental Regulation 1512–1 and have been determined to be "nonmajor" because they do not meet any of the criteria established for major rules under the Executive Order. Initial review of the regulations contained in 7 CFR Part 29 for need, currentness, clarity, and effectiveness has been completed. During the startup phase of this operation, the Department will closely monitor the procedures established in the final rule to insure that any problems which may arise are promptly addressed.

In compliance with the Office of Management and Budget (OMB) regulations, 5 CFR Part 1320 Controlling Paperwork Burdens on the Public, which implements the Paperwork Reduction Act of 1980, Pub. L. 96–511, the

APR 1986 1239

information collection requirements contained in this proposed rule have submitted to OMB for review as prescribed in § 1320.13 Clearance of Collection of Information Requirements in Proposed Rules under Section 3504(h) of the Paperwork Reduction Act. Comments covering the information collection requirements contained in this proposed rule may be addressed to: The Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer, AMS, USDA, Washington, DC 20503. Telephone: (202) 395–7313.

Additionally, in conformance with the provisions of Pub. L. 96–354, the Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business of this proposed rule. A number of firms which are affected by these proposed regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. The Administrator, Agricultural Marketing Service, has certified that these actions will have no significant economic impact upon all entities, small or large, and will not substantially affect the normal movement of the commodity in the marketplace.

All persons who desire to submit written data, views, or arguments for consideration in connection with this proposal for imported tobacco may file them with the Director, Tobacco Division, Agricultural Marketing Service, Room 502 Annex Building, United States Department of Agriculture, Washington, DC 20250, not later than May 27, 1986.

List of Subjects in 7 CFR Part 29

Reporting and recordkeeping requirements, Tobacco.

It is proposed that the regulations at 7 CFR Part 29, Subpart B, be amended as follows:

1. The authority citation for 7 CFR Part 29 continues to read:

Authority: Sec. 19, 49 Stat. 734 as amended, 7 U.S.C. 511m; and Section 213, 97 Stat. 1140, as amended, 7 U.S.C. 511r.

§ 29.400 [Amended]

2. The heading of § 29.400 is revised to read as follows: *Inspection, Certification, and Testing of Imported Tobacco.*

3. Section 29.400 is redesignated as § 29.400(a) and a new paragraph (b) is added as follows:

(b) All flue-cured or burley tobacco, including stems, offered for importation into the United States, including tobacco entering foreign trade zones, but excluding transshipped tobacco, shall be accompanied by a pesticide and end user certification completed by the importer. Any flue-cured or burley tobacco that is not certified as being free of prohibited pesticide residues shall not be permitted entry into the United States until the Secretary has determined that the tobacco meets the pesticide residue requirements in these regulations.

§ 29.401 [Amended]

4. In § 29.401 the following definitions are added:

* * * * *

(m) *End User Certification.* A document issued by the Tobacco Division in a form approved by the Director containing a certification by the importer or subsequent purchaser to identify any and all end users of imported flue-cured or burley tobacco.

(n) *Pesticide.* Any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, and any substance or mixture of substances intended for use as a plant regulator, defoliant, or desiccant.

(o) *Pesticide Certification.* A document issued by the Tobacco Division in a form approved by the Director containing a certification by the importer that flue-cured and burley tobacco offered for importation does not contain residue of any banned pesticide.

(p) *Banned Pesticide.* Any pesticide that has been cancelled, suspended, revoked, or otherwise prohibited under the Federal Insecticide, Fungicide and Rodenticide Act (7 U.S.C. 135 *et seq.*), or has not been approved or sanctioned by the Environmental Protective Agency (EPA) for use on tobacco.

(q) *Stems.* The midribs or large central veins of tobacco leaves.

(r) *Pesticide Test Sample.* An official sample or samples, collected from a lot of tobacco by the Secretary of Agriculture for analysis by a certified chemist to ascertain the residue levels of banned pesticides.

(s) *Sample Identification Form.* A document approved by the Director that identifies and accompanies the sample to the testing facility on which the test results will be certified by a chemist in charge of testing.

(t) *Subsequent Purchaser.* Any entity that acquires ownership of tobacco after importation.

(u) *Testing.* The chemical analysis of a pesticide test sample to determine residue levels of banned pesticides.

(v) *End User.* A domestic manufacturer of cigarettes or other tobacco products; an entity that mixes, blends, processes, alters in any manner, or stores imported tobacco for export; or any individual that the Secretary may identify as making use of imported tobacco for the production of tobacco products.

(w) *Reexported.* Any imported tobacco not used to manufacture tobacco products that is subsequently exported.

(x) *Certified Chemist.* A person trained in chemistry who is qualified to make a written certification as to the composition and chemical properties of tobacco.

(y) *Blended.* Tobacco that is combined or mixed into a uniform product.

(z) *Leaves.* Whole, undivided tobacco leaves containing lamina and stem.

(aa) *Strips.* The sides of tobacco leaf from which the stem has been removed or a lot of tobacco composed of strips.

5. The following new §§ 29.425–29.431 are added:

§ 29.425 Submission and disposition of pesticide certification.

The importer shall complete a pesticide certification on a form approved by the Director for each lot of flue-cured or burley tobacco, including stems, offered for importation. The importer shall present the original and first copy of the certification to the inspector at the time the tobacco is inspected under the provisions of §§ 29.400–29.407 and keep the third copy for their records. The inspector shall forward the original to the Director and the first copy to the appropriate field office.

§ 29.426 Collection of pesticide test samples.

Any lot of tobacco not certified by the importer as being free of prohibited pesticide residues shall be sampled in sufficient detail to determine whether the lot conforms with the pesticide residue standards. Lots of imported tobacco certified by the importer shall be sampled on a random basis and tested to determine whether they conform with the pesticide residue standards.

§ 29.427 Pesticide residue standards.

(a) The maximum allowable residue levels expressed in total parts per million for the following specific pesticides are as follows:

DDT	1.5
TDE	1.0
TOXAPHENE	2.0
ENDRIN	.1
ALDRIN	.1
DIELDRIN	.1
HEPTACHLOR	.2
CHLORDANE	.3
EDB (Ethylene Dibromide)	.8

VOL 51 ISS 80 APR 25 1986 UMI

FORMOTHION	.2
TAMARON (Methamidophos)	.2
DBCP (Dibromocloropropane)	50.0
PERMETHRIN	.1

(b) The maximum allowable residue levels for any other banned pesticide shall be 4.0 times the generally recognized lowest detectable limit attainable expressed in parts per million.

§ 29.428 Identification of sample for testing.

Samples of imported tobacco shall be identified by the inspector on a form approved by the Director. The original and first copy shall accompany the sample to the designated testing facility. The third copy of the identification form will be sent to the Director. Upon the completion of testing the designated facility will complete the form and mail the original to the Director and retain the first copy for their records.

§ 29.429 Disposition of imported tobacco exceeding pesticide residue standards.

Within 10 days of the receipt of test results from pesticide test samples, the Director shall notify the importer or entity responsible for the lot of tobacco of the test results. If the test results indicate that the lot or any portion of the lot contains a banned peaticide exceeding the standards, the Director will notify the importer or entity responsible for the affected tobacco and the appropriate U.S. Customs officials that the tobacco cannot enter the United States. The importer or other entity shall notify the Director in writing of the methods by which the tobacco will be disposed of and provide 5 days advance notice of the time and place of final disposition. The Department will monitor the disposition procedures to verify that the tobacco has been accurately identified as to lot, kind, type, and grade. U.S. Customs regulations at 19 CFR 144.5(a) shall determine the time period allowed for final disposition.

§ 29.430 Appeals.

Appeals of test results for imported tobacco must be made in writing to the Director within 30 days from the receipt of notification. The statement must specify in detail the relief requested. The importer or entity requesting the appeal will bear the cost of any subsequent sampling and testing. Subsequent samples will be selected only from tobacco which is in the original package and from tobacco which has not been mixed, blended, or altered in any manner since the initial sampling.

§ 29.431 Submission and disposition of end user certification for imported tobacco.

The importer shall identify the end user or users of each lot of imported flue-cured and burley tobacco on a form approved by the Director. If the importer is unable to identify the end user or users at the time of importation, an amended certification shall be executed within 30 days or at such time as the subsequent purchasers or end users can be identified for any portion of the lot. Subsequent purchasers or end users so identified shall also complete an end user certification until the tobacco is used in the manufacture of tobacco products or is reexported. The original and first copy shall go to the Director or his representative and the importer or subsequent purchaser shall retain the third copy for their records.

§ 29.500 [Amended]

6. The heading of § 29.500 is revised to read as follows: *Fees and Charges for Inspection and Testing of Imported Tobacco.*

7. Existing § 29.500 is redesignated as § 29.500(a) and a new paragraph (b) is added as follows:

(b) The fee for sampling, testing and certification of imported flue-cured and burley tobacco for prohibited pesticide residues is $.0010 per pound, and shall be paid by the importer. The fee for testing imported flue-cured and burley tobacco not accompanied by a certification that it is free of prohibited pesticide residues shall be an additional $.0030 per pound. Fees for services rendered shall be remitted by check or draft in accordance with a statement issued by the Director, and shall be made payable to "Agricultural Marketing Service."

Dated: April 23, 1986.

William T. Manley,

Deputy Administrator, Marketing Programs.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Title 3—

The President

Proclamation 5468 of April 23, 1986

Older Americans Month, 1986

By the President of the United States of America

A Proclamation

Have your health and have everything. That saying has special meaning for the elderly. Good health and fitness allow all of us, no matter what our age, the freedom and independence to choose how and where we live and to stay involved with our families and friends. Health and fitness enable us to take an active part in community life and to pursue our goals, whether they involve a career, hobbies, volunteer activities, travel, creative pursuits, or home life.

Good health is good common sense, but it is not enough to know this, we have to act accordingly. How we live can make all the difference. Proper diet, regular exercise, moderation in drinking, and avoidance of drugs and tobacco become even more important as we grow older. And life spans can be made longer and more pleasant by regular medical check-ups, sufficient rest, and continuing involvement in satisfying personal relationships and wholesome pursuits that keep the mind active.

Besides what the individual can do for himself, some older Americans still need the help of others to remain independent and in their own homes. Some need assistance with personal and housekeeping activities; others need attention, love, and encouragement. Families, friends, community groups, and the whole range of private and government providers of special services can do so much to help those older people who truly need assistance.

When we adopt good health habits ourselves, encourage others to do the same, and dedicate ourselves to helping those in need, we are truly fulfilling the tradition of good neighborliness.

The Congress, by Senate Joint Resolution 315, has expressed its appreciation and respect for the achievements of older Americans and its desire that these Americans continue to play an active role in the life of the Nation and has requested the President to issue a proclamation designating May 1986 as "Older Americans Month."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1986 as Older Americans Month. I ask public officials at all levels, community agencies, educators, the communications media, and the American people to take this opportunity to honor older Americans and to encourage them to do everything they can to make health and fitness an integral part of their lives, so that they can truly enjoy the golden warmth of their sunset years.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Proclamation 5469 of April 24, 1986

National Reading Is Fun Week, 1986

By the President of the United States of America

A Proclamation

The pleasure that comes from reading is usually the magnet that draws people to practice and improve their reading skills. And the wide distribution of these skills not only enriches those who possess them but is a pillar of strength for a self-governing Nation. Yet many of America's 66 million people under the age of 18 need encouragement and direction to improve their reading skills to the point where they can become functionally literate and properly informed adults. Illiteracy and limited literacy cause much pain, frustration, and humiliation. And because their victims cannot reach their full productive potential, the economy is billions of dollars the poorer.

Traditionally, Americans have recognized problems in society and worked at applying practical solutions. Over the past two decades, dedicated volunteer efforts have enabled millions of children to discover the joy of reading. Through a variety of imaginative programs, thousands of children have been given the motivation and the practical help they need to unlock the treasure house of the printed page. Doors have been opened to richer lives. Currently, more than 100,000 volunteers are giving of their time and talents to open these doors of opportunity to young people who long to experience the joy of reading. But there is a need for still more volunteers who wish to help others and experience the deep satisfaction of knowing they have transformed the lives of others and set them on the path to discovery, understanding, and delight. Yes, for those who can read, reading is fun.

The Congress, by Senate Joint Resolution 288, has designated April 20 through April 26, 1986, as "National Reading is Fun Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim April 20 through April 26, 1986, as National Reading is Fun Week. I invite the Governors of every State, local officials, and all Americans to observe this week by supporting programs that help young people to acquire the skill of reading that leads to the joy of reading.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 81
Monday, April 28, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 630

Absence and Leave; Recredit for Dependents of Federal Civilian or Uniformed Service Personnel

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is amending its sick leave regulations to extend the 3-year limitation on recredit of sick leave for dependents of Federal civilian or uniformed service personnel who leave Federal employment to accompany their sponsors on Federal overseas assignments. The purpose of this change is to help these employees avoid the forfeiture of substantial amounts of sick leave when they return to Federal employment.

EFFECTIVE DATE: May 28, 1986.

FOR FURTHER INFORMATION CONTACT: James Matteson, (202) 632-4634.

SUPPLEMENTARY INFORMATION: On November 14, 1985, OPM published proposed regulations at 50 FR 47060 to extend the 3-year limitation on recredit of sick leave (imposed by 5 CFR 630.502(b)(1)) under certain conditions.

During the 60-day public comment period, we received comments from one individual, three labor organizations, and one agency. The individual and two of the labor organizations supported the proposed regulations without change. One labor organization suggested that the proposed regulations be applied to all Federal civilian employees, rather than only to those who accompany their sponsors on overseas assignments. The proposed regulations addressed a specific problem encountered by dependents of Federal civilian and uniformed service personnel. We know of no such problem being encountered by employees in the United States. Therefore, we have not adopted the suggestion.

The agency stated that the proposed regulations were unclear as to whether the 3-year sick leave recredit period could be extended in situations that involve an intervening time period between the date the employee separates from the Federal service and the date he or she accompanies the sponsor on the overseas assignment. We believe that an intervening time period between the date the employee separates and the date he or she accompanies the sponsor on the overseas assignment is immaterial so long as the employee's separation from the service is for the purpose of accompanying the sponsor on the overseas assignment. Therefore the final regulations require that the employee's separation must be for the purpose of accompanying a civilian or military sponsor on an overseas assignment.

The agency also stated that the proposed regulations were unclear as to whether the 3-year sick leave recredit period could be extended to cover the situation in which an individual returns from overseas before the sponsor's assignment ends, but after the 3-year recredit period has expired. The final regulations provide that the additional 2-year period begins on the date of the employee's return from an overseas area to which the sponsor was assigned.

The agency also questioned our rationale for extending the sick leave recredit period for 2 years, rather than for the actual amount of time spent overseas. The proposed regulations were intended to mirror 5 CFR 315.608(b), which provides that a former employee-dependent has 2 years after his or her return from overseas in which to be reappointed noncompetitively. We believe this same 2-year period should be the basis for extending the sick leave recredit period for these employees.

The final regulations also clarify the definitions of key terms by including a specific reference to the definitions in 5 CFR 315.608(b).

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because the regulations will affect only Federal employees and agencies.

List of Subjects in 5 CFR Part 630

Government employees.

Office of Personnel Management.
Constance Horner,
Director.

Accordingly, 5 CFR Part 630 is amended as follows:

PART 630—ABSENCE AND LEAVE

1. The authority citation for Part 630 is revised as set forth below, and the authority citations following all the sections in Part 630 are removed:

Authority: 5 U.S.C. 6311; Section 630.303 also issued under 5 U.S.C. 6133(a); Section 630.502 also issued under sec. 1(2) of E.O. 11228.

2. In § 630.502, paragraphs (c), (d), and (e) are redesignated as paragraphs (e), (f), and (g), respectively; paragraph (b)(2) is redesignated as paragraph (c); a new paragraph (d) is added as set forth below; and the existing paragraph (b)(1) is redesignated as paragraph (b) and revised to read as follows:

§ 630.502 Sick leave recredit.

* * * * *

(b) Except as provided in paragraphs (c) and (d) of this section, an employee who is separated from the Federal Government is entitled to a recredit of sick leave if he or she is reemployed in the Federal Government without a break in service of more than 3 years.

* * * * *

(d)(1) An employee who separated from the Federal Government to accompany a civilian or uniformed sponsor on official assignment to an overseas area is entitled to a recredit of sick leave within the time limit provided by paragraph (b) of this section or within no more than 2 years after he or she returns to the United States from an overseas area to which the sponsor was assigned, whichever is later, provided the individual—

(i) Was a family member of a Federal civilian employee or of a member of a uniformed service who was assigned to an overseas area; and

VOL 51 ISS 81 APR 28 1986 UMI

(ii) Accompanied the civilian employee or uniformed sponsor on official assignment in the overseas area during the 3-year period specified in paragraph (b) of this section.

(2) For the purpose of this paragraph, "accompanied the civilian or uniformed sponsor on official assignment in the overseas area," "family member," "Federal civilian employee," "member of a uniformed service," "overseas area," "sponsor," and "United States" have the meanings given to them in § 315.608(b) of this chapter.

5 CFR Parts 870, 871, 872, 873, and 890

Federal Employees' Group Life Insurance Program and Federal Employees Health Benefits Program

AGENCY: Office of Personnel Management.

ACTION: Final rule.

SUMMARY: These revised regulations permit annuitants whose disability annuities were terminated and later restored to re-enroll for health benefits coverage and resume any life insurance coverge the individual may have had immediately before his or her annuity was terminated. The regulations permit prospective coverage, upon proper application after September 15 1985, for any disability annuitant whose annuity has been restored since December 31, 1983, or is restored in the future.

EFFECTIVE DATE: May 28, 1986.

FOR FURTHER INFORMATION CONTACT: Agatha Gray, (202) 632-0003.

SUPPLEMENTARY INFORMATION: On October 17, 1985 OPM published interim regulations in the **Federal Register** (50 FR 42005) to permit a disability annuitant who was enrolled in the Federal Employees Health Benefits or Federal Employees' Group Life Insurance Program and whose annuity was terminated to resume participation in the Programs if such annuity is restored after December 31, 1983. The interim regulations implemented a provision of Pub. L. 99-53, approved June 17, 1985, which corrected a then existing inequity in the area of insurance coverge.

One written comment from an insurance company was received within the specified 30-day comment period. That insurance company offered no objections to the regulations and supported the additions to the regulations.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect Federal employees and annuitants.

PART 890—[AMENDED]

Except for the following corrections, the Federal Employees' Group Life Insurance Program and the Federal Employees Health Benefits Program interim regulations published on October 17, 1985, (50 FR 42005) are adopted without change:

§ 890.30 [Amended.]

1. On page 42006, column 2, § 890.301, in the third line of paragraph (z), insert the word "part" between "this" and "immediately."

§ 890.306 [Amended.]

2. Also on page 42006, column 3, § 890.306, in the second line of paragraph (f), insert the word "an" between "of" and "enrollment."

5 CFR Part 890

Federal Employees Health Benefits Program

AGENCY: Office of Personnel Management.

ACTION: Revised interim regulations.

SUMMARY: The Office of Personnel Management (OPM) is issuing interim regulations to implement changes to the Federal Employees Health Benefits (FEHB) program made by the Federal Employees Benefits Improvement Act of 1986. These interim regulations are a revision to interim regulations published June 13, 1985, which were issued to implement FEHB program changes made by the Civil Service Retirement Spouse Equity Act of 1984.

DATES: Interim rule effective on April 28, 1986. Comments must be received on or before May 28, 1986.

ADDRESSES: Send comments to Reginald M. Jones, Assistant Director for Pay and Benefits Policy, Compensation Group, Office of Personnel Management, P.O. Box 57, Washington, D.C. 20044, or deliver to OPM, Room 4351, 1900 E Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mary Ann Mercer, (202) 632-0003.

SUPPLEMENTARY INFORMATION: On June 13, 1985, OPM published interim regulations in the **Federal Register** (50 FR 24757) to implement changes to the FEHB program made by the Civil Service Retirement Spouse Equity Act of 1984, Pub. L. 98-615. Comments were requested from interested parties prior to publishing final regulations. Seven comments were received (four from Federal agencies, two from carriers in the FEHB program, and one from a professional association) and considered.

However, the Federal Employees Benefits Improvement Act of 1986, Pub. L. 99-251, was enacted February 27, 1986, which changed several of the provisions of Pub. L. 98-615. Therefore, OPM is issuing revised interim regulations to implement the most recent changes in law and to clarify portions of the regulations published June 13, 1985, in response to the comments received. Another opportunity to comment is provided before final regulations are issued.

A discussion of the regulatory changes made to implement Pub. L. 99-251 and the clarifying changes made to the June 13, 1985, regulations follows:

Eligible Former Spouses

Certain former spouses previously denied health benefits coverage under Pub. L. 98-615 may now receive benefits. Under Pub. L. 98-615, a former spouse who had been awarded a portion of a former employee's retirement benefits was excluded from health benefits coverage if the marriage ended before May 7, 1985. Section 201(c) of the Federal Employees Benefits Improvement Act of 1986 permits these former spouses to enroll in the FEHB program if all other requirements for coverage are met. Generally, a former spouse may now apply for health benefits under the FEHB program if he or she currently receives, or has future entitlement to receive, a portion of a former employee's retirement benefits or a survivor annuity benefit, regardless of the date of the court order evidencing the dissolution of the marriage [§ 890.803(a)(3)].

Pub. L. 99-251 also permits a former spouse of an employee who died before May 7, 1985, to enroll for health benefits providing the employee was eligible for immediate retirement on or before the date of death and all other requirements for coverage are met.

Employing Office

The interim regulations were unclear about the "employing office" (for handling FEHB enrollments) for a former spouse whose marriage to a former employee was dissolved after the employee's retirement and who has future entitlement to an annuity. In these cases, the former spouse is not an annuitant, yet the marriage dissolved after the employee retired. These revised interim regulations make it clear that the employing office for a former spouse who meets these criteria is the office which has the authority to approve payment of an annuity for the retired employee.

One agency also suggested that OPM amend the regulations to state whether the employing office [§ 890.101(a)(5)] is the operating level personnel office or central payroll records office. OPM believes that the location of the former spouse enrollment function should be left to the discretion of the individual agencies.

Enrollment Process

One comment concerned the process for obtaining an application. The commenter found the regulations unclear on what constitutes an application and from whom it is obtained. The commenter also found unclear the responsibilities of the employing office, such as, who provides the schedule of payments to the former spouse, the timeframe in which the schedule will be provided, and the timeframe within which the employing office will process the application.

These revised interim regulations clarify the enrollment and payment schedule processes. Section 890.808(a) now makes it clear that the application does not have to be a completed Standard Form 2809, Health Benefits Registration Form; it may simply be an informal written notice (letter, statement, etc.) to the employing office of intent to apply for health benefits. This application merely preserves the FEHB enrollment right while the administrative tasks associated with enrollment are being completed. Section 890.808(b)(2) now states that the employing office is responsible for sending the payment schedule to the former spouse at the time it sends notice of eligibility.

In response to the suggestion that OPM set timeframes for administrative tasks associated with the former spouse's enrollment, we have not imposed timeframes because there is no effective enforcement mechanism. However, the effective date of a former spouse enrollment (the first day of the first pay period beginning more than 30 days after the employing office receives the Standard Form 2809, or an appropriate substitute, and satisfactory proof of eligibility) discussed in the following paragraph encourages timely processing of the enrollment by the employing office. Further, we expect the number of former spouses applying for health benefits after the initial start-up period to be small enough that employing offices will be able to carry out their administrative duties in a timely manner.

Effective Date of Coverage

The effective date of enrollment under the June 13, 1985, interim regulations (i.e., the first day of the first pay period after the date of the agency's receipt of the Standard Form 2809 and satisfactory proof of eligibility) does not allow agencies sufficient time to process the enrollment. We had originally intended that enrollments for former spouses commence at the same time as enrollments of employees. Processing enrollments of former spouses requires more time, however, because the former spouse's entitlement to health coverage must be verified, while employees are automatically entitled to health coverage by virtue of their employment. Since the employing office is unable to process the enrollment until it reviews and approves the Standard Form 2809 completed by the former spouse and the documents submitted along with it as evidence of eligibility, the revised interim regulations set the effective date as the first day of the pay period beginning more than 30 days after the employing office receives the Standard Form 2809 (or an appropriate substitute) and satisfactory proof of eligibility. The 30-day provision should allow employing offices enough time to process the enrollment. In cases in which the former spouse applied for health coverage in writing prior to the effective date of these revised interim regulations, the applicable effective date will be established according to the interim regulations published on June 13, 1985. The 30-day buffer period is applicable only to cases in which the written application is filed on or after the effective date of these revised interim regulations.

Payment of Premiums

The two health carrier respondents suggested that OPM require former spouses to prepay premiums. The carriers are concerned that if premiums are due after the pay period in which the former spouse is covered, as many as four pay periods could elapse before a former spouse's coverage will be terminated for nonpayment of premium. This delay would enable the former spouse to maintain an upaid enrollment for a considerable amount of time. Further, if the former spouse fails to pay the premium within the time frames established by the regulations, coverage will be terminated retroactive to the end of the last pay period for which payment has been received. Thus, any claims payment made by the carrier during the period of upaid enrollment must be resolved between the carrier and the former spouse.

We agree that prepayment of premiums would have merit for former spouses who have no employer-employee relationship and who are required, by law, to pay both the enrollee's and the Government's share of premiums. However, the risk to FEHB carriers is inherent in the statutory extension of FEHB coverage to former spouses and we are unable to devise an administratively acceptable system of prepayments that would be effective.

Although we have not adopted the suggestion of prepaid premiums, we have revised the regulations to reduce the unpaid enrollment period to 15 days by dropping the 31-day grace period for payment of overdue premiums provided in the June 13, 1985, regulations. If the former spouse does not pay by the due date, the employing office will send the notice immediately to the former spouse

VOL 51 ISS 81 AP 28 1986 UMI

that payment must be made within 15 days after receipt of the notice or coverage will be terminated. This method of payment will prompt the former spouse to make timely payments for coverage and significantly reduce the period of risk for the carriers.

These revised interim regulations also give special consideration to the time period for premium payment for overseas personnel. Since correspondence overseas takes longer than the 15-day general provision in the regulations, we have extended the 15-day period to 45 days for former spouses overseas to allow sufficient time for them to be notified and remit payment before the agency terminates coverage.

Two comments concerned the treatment of a former spouse annuitant's coverage when the annuity is insufficient to cover the amount of the premium. One commenter suggested that rather than require the former spouse to elect a lower cost enrollment or termination of coverage the regulations should entitle the former spouse annuitant to pay the full premium or premium balance by check. Pub. L. 98-615 does not place a statutory restriction on the way in which a former spouse may make premium payments. Because the former spouse annuity, or portion of the retiree's annuity, may be quite small and because many former spouses will have already established the habit of paying directly to the employing office, we have reconsidered our position. These revised regulations now permit the former spouse to make the total premium payment directly to the retirement system when the annuity or portion of the retiree's annuity is insufficient to cover the full premium amount [§ 890.306(d)]. The former spouse, however, must pay the full premium to the retirement system. Dividing payment between an annuity withholding and a direct payment would be confusing (due to annuity fluctuations as a result of COLA increases, changes in deductions, etc.) and administratively impractical.

One agency suggested that former spouses make payments on a monthly cycle because former spouses may find it difficult to track Federal biweekly pay periods. These revised interim regulations grant agencies discretion to base the former spouse premium payment cycle on any regular pay period established for their employees, including a monthly pay period.

Other

One carrier commented that, in the FEHB generally, carriers are unable to reconcile membership or payments received from OPM with any specific member and noted that this problem is exacerbated with former spouse enrollments. We do not believe that former spouse enrollments aggravate the reconciliation process. OPM currently obtains from agency records a supplemental semi-annual headcount report by plan for former spouses which is included along with the regular employee headcount report for carriers' use in reconciling enrollment. We believe that this method works reasonably well. However, OPM will continue to monitor and improve the reconciliation process.

One respondent expressed concern that § 890.806(c)(2), which denies coverage as a family member if there is evidence calling a child's paternity or maternity into question, would be inappropriately used by agencies. The respondent's concern is that a Federal agency's decision to deny coverage may supersede judicial and/or administrative findings related to parental rights. It is the intent of the regulations that agency determinations be made in accordance with statutory requirements for coverage in the FEHB program.

One carrier noted a conflict between § 890.301(f)(1) of the June 18, 1985, interim regulations, which denies a family member an entitlement to convert to an individual contract with the plan when a former spouse changes enrollment to self alone, and § 890.807(b), which entitles family members to convert to a private plan when their enrollment is terminated. OPM agrees that family members should have a right to convert when their coverage is terminated, regardless of the reason for termination. These revised regulations treat family members who lose coverage because the former spouse changes to self alone as family members who lose coverage because of any other change in status.

Section 890.301(i) prohibits an enrollment change from self-alone to self and family when selecting a new plan upon termination of enrollment by an employee organization plan. One respondent found an apparent conflict between this provision and the provision at § 890.301(e)(2), which permits a change to self and family within 60 days after birth or acquisition of a child who meets the requirements of a qualified family member. However, there is no conflict because the prohibition in § 890.301(i) does not apply if another event permits a change to self and family.

Another commenter questioned what responsibilities agencies have to authenticate a former spouse's initial claim of eligibility or continued eligibility for health benefits. The former spouse bears the burden of providing acceptable proof (as determined by the agency) of initial eligibility. It is in the former spouse's best interest to provide any documents the agency may require as proof because failure to provide the required documents may result in delays in coverage. Once coverage is obtained, a number of circumstances will cause the former spouse to lose entitlement, such as, remarriage prior to age 55 and issuance of a revised court order terminating benefits. At the time the former spouse enrolls for health benefits, he or she is required to certify in writing that he or she will notify the employing office within 31 days of an event that terminates eligibility. Should the former spouse fail to notify the employing office of an ineligibility to continue enrollment, any claims payment made during the period of ineligibility will be resolved between the carrier and the former spouse.

Two agencies suggested that the former spouse's enrollment transfer along with the employee's when the employee transfers to a new agency, separates, or retires, rather than remain with the agency which employed the employee at the time of divorce. The agencies expressed concern that the 31-day conversion period available to the former spouse could expire before the employing office is notified of the employee's separation, transfer, or retirement from another agency. (A former spouse's enrollment would not be terminated solely by virtue of a transfer or retirement because the former spouse's future title to all or a portion of annuity would still exist. It would be terminated, however, if an employee separates with no future entitlement to annuity or a separated employee dies before becoming eligible for a deferred annuity.)

The law requires that the former spouse's enrollment be processed and maintained by the office which employed the employee at the time of divorce until the former spouse begins receiving annuity payments. However, there are circumstances under which the former spouse, through no fault of his or her own, may belatedly become aware of an event that terminates his or her FEHB enrollment. In these cases, the former spouse should not lose the right to convert. Accordingly, these revised interim regulations provide a temporary extention of coverage through 31 days after the employing office's notice to the former spouse that coverage is terminated where the former spouse could not have known that (a) the employee on whose service the former spouse's health benefits entitlement was based separated from service with no future entitlement to annuity; or (b) the separated employee on whose service the former spouse's health benefits entitlement was based died before becoming eligible for a deferred annuity. In these cases, the former spouse must pay the full premium during the extended period, exclusive of the 31-day period following the notice.

One respondent suggested a separate FEHB enrollment form for former spouses. A special enrollment form for former spouses has not been prescribed because the number of former spouses seeking health benefits coverage is not expected to be large enough to warrant procuring, stocking, and maintaining currency of a separate form. We believe the Standard Form 2809, with the "Remarks" section cross-referenced to the employee, former employee, or annuitant, is acceptable.

Waiver of Notice of Proposed Rulemaking

Pursuant to section 553(b)(3)(B) of title 5 of the U.S. Code, I find that good cause exists for waiving the general notice of proposed rulemaking. The notice is being waived because certain entitlements are conveyed immediately by the authorizing statute. Regulatory guidance is needed immediately for effective implementation.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because the regulations merely implement the amendments to the Federal Employees Health Benefits Act under the Civil Service Retirement Spouse Equity Act of 1984, Pub. L. 98-615 and the Federal Employees Benefits Improvement Act of 1986, Pub. L. 99-251.

List of Subjects in 5 CFR Part 890

Administrative practice and procedure, Claims, Government employees, Health insurance, Retirement.

U.S. Office of Personnel Management.

Constance Horner,

Director.

Accordingly, OPM is amending 5 CFR Part 890 as follows:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

1. The authority citation for Part 890 is revised to read as set forth below and the authority citations following all the sections in Part 890 are removed:

Authority: 5 U.S.C. 8913; sec. 890.102 also issued under 5 U.S.C. 1104 and sec. 3(5) of Pub. L. 95-454, 92 Stat. 1112; sec. 890.301 also issued under 5 U.S.C. 8905(b); sec. 890.302 also issued under 5 U.S.C. 8901(5) and 5 U.S.C. 8901(9); sec. 890.701 also issued under 5 U.S.C. 8902(m)(2); Subpart H also issued under Title I of Pub. L. 98-615, 98 Stat. 3195, and Title II of Pub. L. 99-251.

2. Section 890.101 is amended by revising paragraphs (a)(5) and (a)(9) to read as follows:

§ 890.101 Definitions; time computations.

(a) * * *

(5) "Employing office" means the office of an agency to which jurisdiction and responsibility for health benefits actions for an employee, an annuitant, or an eligible former spouse of an employee or annuitant, have been delegated.

(i) For an enrolled annuitant (including survivor annuitant and former spouse annuitant) who is not also an eligible employee, "employing office" is the office which has the authority to approve payment of annuity or worker's compensation for the annuitant concerned.

(ii) For a former spouse of an annuitant whose marriage dissolved after the employee's retirement and who has entitlement to receive future annuity payments under section 8341(h) or 8345(j) of title 5, United States Code, "employing office" is the office which has the authority to approve payment of annuity for the annuitant or former spouse concerned.

(iii) For a former spouse of a current employee, and a former spouse of an annuitant or separated employee having title to a deferred annuity whose marriage dissolved during the employee's Federal service, "employing office" is the agency that employed the employee or annuitant at the time the marriage was dissolved.

* * * * *

(9) "Pay period" means the biweekly pay period established pursuant to section 5504 of title 5, United States Code, for the employees to whom that section applies and the regular pay period for employees not covered by that section. "Pay period" as it relates to a former spouse who is not actively receiving an annuity means any regular pay period for employees of the agency to which jurisdiction and responsibility for health benefits actions for the former spouse have been delegated as provided by paragraph (a)(5) of this section. "Pay period" for annuitants means the period for which a single installment of annuity is customarily paid.

* * * * *

3. Section 890.104 is amended by revising paragraph (a) to read as follows:

§ 890.104 Initial decision and reconsideration.

(a) *Who may file.* An employee, annuitant, or former spouse may request OPM to reconsider an initial decision of an employing office (including OPM) that denies coverage or change of enrollment.

* * * * *

4. Section 890.301 is amended by revising paragraphs (d)(2), (e), (f), (h), (i), (k), (n), and (u) to read as follows:

§ 890.301 Opportunities to register to enroll and change enrollment.

* * * * *

(d) * * *

(2) An enrolled employee, annuitant, or former spouse may change to another plan, another option, or from self alone to self and family, or may make any combination of these changes.

(e) *Change in family status.* (1) Other than a former spouse, an enrolled employee or annuitant may register to change enrollment from self alone to self and family, or from one plan or option to another, or both; and an employee, if not registered to be enrolled, may register to be enrolled, at any time during the period beginning 31 days before a change in marital status and ending 60 days after the change in marital status. Other than a former spouse, an enrolled employee or annuitant may change enrollment from self alone to self and family within 60 days after any other change in family status.

(2) An enrolled former spouse may register to change enrollment from self alone to self and family, or from one plan or option to another, or both, within 60 days after the birth or acquisition of a child who is a qualified family member under § 890.804(a) of this part.

(f) *Change to self alone.* (1) An employee, annuitant, or former spouse may register at any time to change enrollment from self and family to self alone.

(2) Other than a former spouse, an employee or annuitant who is covered by the enrollment of another under this part may elect self alone coverage within 31 days after a change in the covering enrollment has been filed under authority of this paragraph.

* * * * *

(h) *Move from area served by comprehensive medical plan.* If a comprehensive medical plan limits full service to a geographic area, an employee, annuitant, or for her spouse enrolled in that plan who moves outside the full service area or, if already living outside the full service area, moves further from the full service area, may register at any time after the move, to be enrolled in another health benefits plan.

(i) *Termination by employee organization plan.* An employee, annuitant, or former spouse who is enrolled in a health benefits plan sponsored or underwritten by an employee organization and whose membership in the employee organization is terminated, may register to be enrolled in another plan under the following conditions:

(1) Health benefits enrollment is terminated by the plan; and,

(2) Registration to enroll in another plan is submitted within 31 days after termination of enrollment in the employee organization plan.

The employee, annuitant, or former spouse may not change enrollment from self alone to self and family under this paragraph.

* * * * *

(k) *Termination of plan in which enrolled.* If a plan is discontinued in whole or part, each employee, annuitant, and former spouse whose enrollment is thereby terminated may enroll in another plan. If the discontinuance is at the end of a contract period which is immediately preceded by an open season, the time for enrollment is the open season. Otherwise, OPM will establish a time and effective date for enrollment. Persons who fail to change enrollment within the time set are considered to have cancelled the plan in which enrolled, except that if one option of a plan is discontinued, enrolled employees, annuitants, and former spouses who do not change plans will be considered enrolled in the remaining option of the plan.

* * * * *

(n) *On becoming eligible for coverage under Title XVIII of the Social Security Act.* An enrolled employee, annuitant, or former spouse with a high option enrollment may register, at any time after the 31st day before he or she is eligible for coverage under Title XVIII of the Social Security Act (Medicare), to change enrollment to the low option of any available plan under this part.

* * * * *

(u) *Child's coverage ends.* An employee, annuitant, or former spouse may register to change enrollment from self alone to self and family within 31 days after an eligible child loses coverage under another enrollment under this part.

* * * * *

5. Section 890.302 is amended by revising paragraphs (d) and (e) to read as follows:

§ 890.302 Coverage of family members.

* * * * *

(d) *Child incapable of self-support.* When an employee, annuitant, or former spouse enrolls for a family which includes a child who has become 22 years of age and is incapable of self-support, the employing office will require such enrollee to submit a physician's certificate verifying the child's disability. The certificate must—

(1) State that the child is incapable of self-support because of a physical or mental disability that existed before the child became 22 years of age and that can be expected to continue for more than 1 year;

(2) Include a statement of the name of the child, the nature of the disability, the period of time it has existed, and its probable future course and duration; and,

(3) Be signed by the physician and show the physician's office address. The employing office will require the employee, annuitant, or former spouse to submit the certificate on or before the date the child becomes 22 years of age. However, the employing office may accept otherwise satisfactory evidence of incapacity not timely filed.

(e) *Renewal of certificates of incapacity.* The employing office will require the employee, annuitant, or former spouse who has submitted a certificate of incapacity to renew that certificate on the expiration of the minimum period of disability certified.

* * * * *

6. Subpart H is revised to read as follows:

Subpart H—Benefits for Former Spouses

Sec.

890.801 Introduction.
890.802 Definition.
890.803 Who may enroll.
890.804 Coverage.
890.805 Application time limitations.
890.806 Effective dates of coverage.
890.807 Termination of enrollment.
890.808 Employing office responsibilities.

Subpart H—Benefits for Former Spouses

§ 890.801 Introduction.

This subpart sets forth policies and procedures for obtaining health benefits coverage that are unique to former spouses of Federal employees and retirees.

§ 890.802 Definition.

In this subpart, "Qualifying court order" means a qualifying court order as described in § 831.1704 of this title.

§ 890.803 Who may enroll.

(a) Except as specified in paragraph (b) of this section, a former spouse is eligible to enroll in a health benefits plan under this part provided that—

(1) The former spouse whose marriage to an employee or employee annuitant is dissolved has not remarried if under age 55; and

(2) The former spouse was enrolled in a health benefits plan under this part as a family member at any time during the 18 months preceding the date of the dissolution of marriage; and

(3) (i) the former spouse currently receives, or has future title to receive (A) a portion of annuity payable to the employee upon retirement based on a qualifying court order for purposes of 5 U.S.C. 8345(j); (B) survivor annuity benefits based on a qualifying court order for purposes of 5 U.S.C. 8341(h); or (C) a survivor annuity elected by the employee under 5 U.S.C. 8339(j)(3) (or benefits similar to those under this paragraph under another retirement system for Government employees); *or*

(ii) The former spouse was married to an employee who retired before May 7, 1985, and (A) the employee annuitant elects to provide a survivor annuity to the former spouse under procedures prescribed in § 831.621 of this title; or (B) the former spouse satisfies all of the conditions for a survivor annuity in § 831.622 of this title; *or*

(iii) The former spouse was married to an employee who died before May 7, 1985, and the employee was eligible for an immediate annuity on or before the date of death, *and* the former spouse satisfies all of the conditions for a survivor annuity in § 831.622 of this title.

(b) A former spouse or an employee who separates from Federal service before becoming eligible for immediate annuity is eligible to enroll only if the former spouse's marriage to the employee dissolved before the employee left Federal service.

(c) If a former spouse cannot apply for benefits on his or her own behalf because of a mental or physical disability, application may be filed by a court-appointed guardian.

§ 890.804 Coverage.

(a) *Type of enrollment.* A former spouse who meets the requirements of § 890.803 may elect coverage for self alone or for self and family. A family enrollment covers only the former spouse and any unmarried dependent natural or adopted child of both the former spouse and the employee, former employee or employee annuitant, provided such child is not otherwise covered by a health plan under this part. An unmarried dependent child must be under age 22 or incapable of self-support because of a mental or physical disability existing before age 22. No person may be covered by two enrollments.

(b) *Proof of dependency.* (1) A child is considered to be dependent on the former spouse or the employee, former employee, or employee annuitant if he or she is—

(i) A legitimate child;

(ii) An adopted child;

(iii) A recognized natural child who lives with the former spouse or the employee, former employee, or employee annuitant in a regular parent-child relationship.

(iv) A recognized natural child for whom a judicial determination of support has been obtained; or

(v) A recognized natural child to whose support the former spouse, or the employee, former employee, or employee annuitant makes regular and substantial contributions in accordance with § 890.302(b)(2).

(c) *Exclusions from coverage.* Coverage as a family member may be denied—

(1) If evidence shows that the former spouse, employee, former employee, or annuitant did not recognize the child as his or her own, despite a willingness to support the child; or

(2) If evidence calls the child's paternity or maternity into doubt, despite the former spouse's employee's, former employee's, or employee annuitant's recognition and support of the child.

(d) *Child incapable of self-support.* When a former spouse enrolls for a family enrollment which includes a child who has become 22 years of age and is incapable of self-support, the employing office shall determine such child's eligibility in accordance with § 890.302(d), (e), and (f).

(e) *Meaning of unmarried child.* A child, under age 22 or incapable of self-support, who has never married or whose marriage has been annulled, or a child who is divorced or widowed is considered to be unmarried.

§ 890.805 Application time limitations.

Former spouses must apply for health benefits coverage by the latest of—

(a) February 27, 1987;

(b)(1) Within 60 days after the dissolution of the marriage to the Federal employee; or (2) if the marriage dissolved after retirement, within 60 days after the dissolution of the marriage or within 60 days after the retired employee elects to provide a survivor annuity for the former spouse under 5 U.S.C. 8339(j)(3); or

(c)(1) Within 60 days after the employee annuitant elects to provide a former spouse annuity under § 831.621; or (2) within 60 days after the date of the OPM notice of entitlement to a former spouse annuity under § 831.622.

§ 890.806 Effective dates of coverage

(a) *Generally.* (1) The effective date of enrollment is the first day of the pay period beginning more than 30 days after the date the employing office receives the properly completed Standard Form 2809 or an appropriate substitute (i.e., a signed statement with sufficient information to execute enrollment) and satisfactory proof of eligibility.

(2) The effective date of a change of enrollment is the first day of the pay period after the date the employing office receives the properly completed Standard Form 2809.

(b) *Change required because of insufficient annuity.* When a former spouse annuitant changes to a lower cost enrollment as provided by § 890.301(g), the change is effective immediately upon loss of coverage under the prior enrollment.

§ 890.807 Termination of enrollment.

(a)(1) A former spouse's enrollment terminates, subject to the temporary extension of coverage for conversion, at midnight of the last day of the pay period in which the earliest of the following events occurs:

(i) Court order ceases to provide entitlement to survivor annuity or portion of retirement annuity under a retirement system for Government employees.

(ii) Former spouse remarries before age 55.

(iii) Former spouse dies.

(iv) Employee or annuitant on whose service the benefits are based dies and no survivor annuity is payable.

(v) Separated employee on whose service the benefits are based dies before the requirements for deferred annuity have been met.

(vi) Employee on whose service benefits are based leaves Federal service before establishing title to an immediate annuity or a deferred annuity.

(vii) Refund of retirement money is paid to the separated employee on whose service the health benefits are based.

(2) OPM may authorize a longer time frame for the temporary extension of coverage for conversion than the 31 days provided in § 890.401(a) if in OPM's judgment the former spouse could not have known that (1) the employee on whose service benefits are based left Federal service before establishing title to an immediate or deferred annuity; or (2) the separated employee on whose service the benefits are based died before the requirements for deferred annuity had been met. In such cases, the right of conversion may be exercised up to 31 days after the employing office's notice of termination. The former spouse must pay the full premium (employee's and Government's share) during the extended period, exclusive of the 31–day period following the notice.

(3) Termination of enrollment for failure to pay premiums within the time frame establishment in accordance with § 890.808(d)(1) is retroactive to the end of the last pay period for which payment has been timely received.

(4) A former spouse whose enrollment is terminated under this paragraph may not reenroll.

(b) *Coverage of members of the family.* The coverage of a member of the family of a former spouse terminates, subject to the temporary extension of coverage for conversion, at midnight of the earlier of the following dates:

(1) The day on which the individual ceases to be an eligible family member.

(2) The day the former spouse ceases to be enrolled, unless the family member is entitled as a survivor annuitant to contined enrollment or is entitled to continued coverage under the enrollment of another.

(c) *Cancellation.* A former spouse may cancel enrollment at any time by filing with the employing office a properly completed health benefits form. If a former spouse cancels enrollment, the cancellation becames effective on the last day of the pay period after the pay period in which the health benefits form cancelling the enrollment is received by the employing office. The former spouse and family members, if any, are not entitled to the temporary extension of coverage for conversion or to convert to an individual contract for health benefits. A former spouse who cancels his or her enrollment may not later reenroll.

§ 890.808 Employing office responsibilities.

(a) *Application for benefits.* The former spouse's application for health benefits may be in the form of a Standard Form 2809, letter, or written statement to the employing office.

VOL 51 ISS 81 AP 28 1986 UMI

(b) *Administration of the enrollment process.* (1) The employing office will set up a method for accepting applications for enrollment, informing the former spouse what documents to submit and where to submit them for an eligibility determination, and collecting premium payments. The method will include procedures for verifying the eligibility requirements under § 890.803(a) (1) and (2). The employing office must obtain OPM documentation that the former spouse meets the additional requirement under § 890.803(a)(3)(i), (ii) or (iii).

(2) The employing office will send the former spouse notice, in writing, of its decision. When an employing office informs a former spouse of his or her eligibility to enroll, it will identify the documents on which it based its decision and will include a premium payment schedule and statement of the requirements for continued enrollment under § 890.803. If the former spouse does not qualify for health benefits coverage, the employing office must give the former spouse a reconsideration right under § 890.104.

(3) The employing office will maintain a health benefits file for the former spouse as a file separate from the personnel records of the employee or former employee.

(4) The former spouse will be required to certify that he or she meets the requirements listed in § 890.803 and that he or she will notify the employing office within 31 days of an event that results in failure to meet one or more of the requirements.

(c) *Qualifying court order.* Subject to a 31-day extension period for conversion, the duration of health benefits coverage will coincide with any period specified in the qualifying court order providing for an annuity. A court order not meeting the requirements under § 831.1704 will not be used to establish or continue entitlement to a former spouse's health benefits coverage.

(d) *Premium payments.* (1) The former spouse must remit to the employing office the full subscription charge for the enrollment for every pay period during which the enrollment continues, exclusive of the 31-day temporary extension of coverage for conversion provided in §§ 890.401 and 890.807(a)(2). Payment must be made in accordance with a schedule established by the employing office [see § 890.101(a)(9)]. If the employing office does not receive payment by the date due, the employing office will notify the former spouse by certified mail return receipt requested that continuation of coverage rests upon payment being made within 15 days (45 days for former spouses residing overseas) after receipt of the notice. The enrollment of an individual who fails to remit payment within the specified time frame will be terminated.

(2) The employing office will submit all premium payments collected from former spouses along with its regular health benefits payments to OPM. The full subscription charge for former spouses will be classified as "withholdings" and included in the "Withholdings" section of the Standard Form 2812, Journal Voucher and Report of Withholdings and Contributions For Health Benefits, Group Life Insurance, and Civil Service Retirement.

(e) *Withholding from annuity.* The retirement system acting as employing office for a former spouse will establish a method for withholding the full subscription charge from the former spouse's annuity check. When the annuity is insufficient to cover the full amount of health benefits premium due, the retirement system will notify the former spouse of the opportunity to register to be enrolled in another plan as provided by § 890.301(q) or to make direct payment of the full premium directly to the retirement system.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Amendment of Grade and Size Requirements for Certain Grapefruit and Tangerines

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action lowers the minimum size requirements for shipments of Florida white seedless grapefruit and imports of white seedless grapefruit from size 48 (3 9/16 inches) to size 56 (3 5/16 inches). It also lowers the minimum grade requirement for domestic and export shipments of Florida Honey tangerines from Florida No. 1 to U.S. No. 2 Russet and the minimum size requirement from size 176 (2 5/16 inches) to size 210 (2 1/16 inches). The relaxations are effective through August 17, 1986. The size relaxation recognizes changes in supply and demand conditions for smaller size white seedless grapefruit and Honey tangerines and is necessary to promote the interest of growers and consumers. The relaxation in the grade requirements for Honey tangerines recognizes the grade composition of the available fruit supply, and current and prospective demand conditions for this fruit.

EFFECTIVE DATE: April 21, 1986–August 17, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250; telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1521–1 and Executive Order 12291 and has been designated as a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that about 95 handlers of Florida citrus are currently subject to regulations under the marketing order for oranges, grapefruit, tangerines, and tangelos grown in Florida and that approximately 28 importers of grapefruit will be subject to this action under the grapefruit import regulation during the course of the current season and that the great majority of these groups may be classified as small entities. While regulations issued under this order and corresponding import requirements impose some costs on affected handlers and importers and the number of such persons may be substantial, the added burden on small entities, if present at all, is not significant. This action is issued under the marketing agreement and Order No. 905 (7 CFR Part 905), both as amended, regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action was recommended unanimously by the Citrus

Administrative Committee at its April 15, 1986, meeting. The committee works with USDA in administering the marketing agreement and order program.

Florida Citrus Regulation 6 was issued on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. The committee meets prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Florida oranges, grapefruit, tangerines, and tangelos. Prior to making any such recommendations, the committee submits to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information, and determines whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the act.

The minimum grade and size requirements, specified herein, reflect the committee's and the Department's appraisal of the need to relax the grade and size requirements applicable to domestic and export shipments of Florida Honey tangerines and the size requirements applicable to domestic and import shipments of white seedless grapefruit in recognition of the current and prospective supply and demand for such fruit. This action is necessary to permit handlers to ship the remaining supply of marketable fruit to meet market needs. Both the Florida grapefruit and tangerine shipping seasons are coming to a close, with about 90 percent of the grapefruit crop shipped and about 95 percent of the tangerines shipped through March 1986.

This action lowers the minimum size requirement for domestic and import shipments of white seedless grapefruit from size 48 (3 9/16 inches) to size 56 (3 5/16 inches) during the period from April 21, 1986, through August 17, 1986. This action also lowers the minimum grade and size requirements for domestic and export shipments of Florida Honey tangerines from Florida No. 1 to U.S. No. 2 Russet and size 176 (2 5/16 inches) to size 210 (2 1/16 inches), respectively, during the period April 21, 1986, through August 17, 1986. The relaxation in minimum grade and size requirements for such citrus recognizes the grade and size composition of the available citrus supply, and current and prospective demand conditions for this citrus.

Under § 8e of the act (7 U.S.C. 608e–1), whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality, or maturity requirements as those in effect for the domestically produced commodity. Thus, the size requirement for imported white seedless grapefruit (7 CFR 944.106) also must be relaxed to conform to the size requirement for domestic shipments for Florida white seedless grapefruit during the period specified. Under the terms of the import regulation prescribed in § 944.106(a) the size requirement for imported white seedless grapefruit automatically changes to conform to the relaxed size requirement for domestic shipments of white seedless grapefruit.

Based upon the recommendation and information submitted by the Citrus Administrative Committee, and upon other available information, it is hereby found that regulation of Florida and imported white seedless grapefruit and Florida Honey tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which these relaxations are based and the effective date necessary to effectuate the declared purposes of the act. This action relieves restrictions on shipments of white seedless grapefruit and Honey tangerines and must be taken promptly to enable handlers to take advantage of the relaxed requirements. Also, handlers are aware of the relaxations and the effective dates and require no additional time to comply therewith.

PART 905—[AMENDED]

BILLING CODE 3410-02-M

7 CFR Part 1032

Milk in the Southern Illinois Marketing Area; Order Suspending Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: The action suspends for April 1986 the limitation on the amount of milk that may be delivered directly from the farms of producers to nonpool plants and still be pooled and priced under the Southern Illinois order. The action was requested by a cooperative association that represents producers who supply milk for the market. This suspension is necessary because proponent cooperative recently lost a fluid-use account. This suspension will assure that the cooperative's member dairy farmers who have regularly supplied the market's fluid needs will continue to share in the market's Class I sales during April 1986.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, Diary Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued March 28, 1986; published April 3, 1986 (51 FR 10452).

The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who have regularly supplied the market's fluid needs will continue to have their April 1986 milk production pooled and priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Southern Illinois marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on April 3, 1986 (51 FR 10452) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon. No comments opposing the proposed action were received.

After consideration of all relevant material, including the proposal in the notice and other available information, it is hereby found and determined that for the month of April 1986 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1032.13(b)(2), the words "on any day during the months of May, June, and July, during the months of August and December for not more than 12 days of production of producer milk by such producer, and in any other month for not more than 8 days of production of producer milk by such producer;"

Statement of Consideration

This action suspends the April 1986 limitation on diversions of milk to certain nonpool plants. The suspension will allow unlimited quantities of a dairy farmer's April milk production to be moved directly from the farm to manufacturing plants that are not regulated under a Federal order and remain pooled and priced under the order.

Under the current order provisions, not more than 8 days of a producer's April milk production may be diverted to such nonpool plants. During the following months of May through July, there is no limit on such diversions.

The proposal to remove the April limit this year was made by the National Farmers Organization (NFO), a cooperative association that represents dairy farmers who supply milk for the market. Public comments on the proposed action were invited. No opposing views were received.

The suspension is needed because NFO recently lost a Class I account. The milk which had been supplied by the proponent cooperative to a pool distributing plant located in the St. Louis area has been replaced by receipts from producers who have not been associated with the Southern Illinois order and the cooperative's milk is now without a fluid-use market. Without the suspension, the cooperative would have to make costly and inefficient movements of milk solely to qualify the milk of producers who have regularly supplied the market's fluid needs for pool participation in April.

Since unlimited diversions are permitted during the months of May-July, a suspension of the limit for April will give NFO four months to evaluate its marketing situation under this order. It would also give the cooperative time to make any adjustments it deems necessary to accommodate its loss of a fluid milk account.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that without the suspension costly and inefficient movements of milk would have to be made to qualify the milk of producers who have regularly supplied the market's fluid needs for pool participation in April 1986.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No views were filed in opposition to this action.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1032

Milk marketing orders, Milk, Diary products.

It is therefore ordered, That the aforesaid provisions in § 1032.13(b)(2) of the Southern Illinois order are hereby suspended for April 1986.

PART 1032—MILK IN THE SOUTHERN ILLINOIS MARKETING AREA

1. The authority citation for 7 CFR Part 1032 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

§ 1032.13 [Suspended in Part]

2. In § 1032.13(b)(2), the words "on any day during the months of May, June, and July, during the months of August and December for not more than 12 days of production of producer milk by such producer, and in any other month for not more than 8 days of production of producer milk by such producer;" are suspended.

Effective date: April 28, 1986.

Signed at Washington, DC, on: April 22, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing & Inspection Services.

BILLING CODE 3410-02-M

7 CFR Part 1040

Milk in the Southern Michigan Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends for the months of April through September 1986 the requirement in the Southern Michigan Federal milk order that a cooperative association deliver to pool distributing plants at least 50 percent of its members' producer milk in order to qualify its supply plants as pool plants under the order. The suspension was requested by a cooperative association that represents producers supplying milk to the fluid market. The action is needed to ensure that dairy farmers who historically have been associated with the Southern Michigan market will continue to share in the market's fluid milk sales.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447-4829.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension: Issued March 26, 1986; published April 1, 1986 (51 FR 11053).

The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Southern Michigan marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on April 1, 1986 (51 FR 11053) concerning a proposed suspension of certain provisions of the order. Interested parties were afforded an opportunity to file data, views, and arguments thereon. No comments were received.

After consideration of all relevant information, including the proposal in the notice and other available information, it is hereby found and determined that for the months of April through September 1986 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1040.7(b)(2), the words "if transfers from supply plants to plants described in paragraph (b)(5) of this section and by direct delivery from the farm to plants qualified under paragraph (a) of this section are:"

2. In § 1040.7(b)(2), paragraphs (i) and (ii).

Statement of Consideration

This action makes inoperative for the months of April through September 1986 the provisions requiring a cooperative association to deliver at least 50 percent of its members' producer milk to pool distributing plants, either through its supply plants or directly from farms, in order to qualify the supply plants as pool plants. The suspension was requested by Michigan Milk Producers Association (MMPA), which represents producers supplying the market.

This action is needed because milk production in this market has increased approximately four percent during the first three months of 1986 compared to 1985 and at the same time the cooperative's Class I sales to distributing plants have decreased about ten percent from 1985. Producer milk utilized for Class I milk increased only 0.5 percent for the first three months of 1986 compared to 1985.

MMPA pools approximately 87 percent of its members' milk on the Southern Michigan market using the supply plant pooling standard. MMPA during February and March 1986, processed through its balancing plants about 86 percent of the market's reserve milk supply while its market share of producer milk was only 64 percent. This imbalance is expected to become more severe during the spring flush and summer months because other cooperative associations operating in the market lack sufficient manufacturing facilities.

Because of the above, it is inappropriate to maintain the qualification requirement for a cooperative association to deliver to distributing plants at least 50 percent of its members' producer milk in order to qualify its supply plants as pool plants under the order.

If the provisions were not suspended for the months of April through September 1986, MMPA likely would encounter considerable difficulty in pooling certain supply plants and the milk of producers who historically have been associated with the Southern Michigan fluid market. Without the suspension, milk would be shipped in an inefficient and costly manner merely to assure its continued pooling under the order. This would disrupt the orderly marketing of milk in the Southern Michigan marketing area.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

BEST COPY AVAILABLE

VOL 51 ISS 81 APR 28 1986 UMI

(a) This suspension is necessary to reflect current marketing conditions in the marketing area in that substantial quantities of milk from producers who regularly supply the market otherwise could be excluded from the marketwide pool, or else shipped in an inefficient and costly manner, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views, or arguments concerning this suspension. No comments were filed.

Therefore, good cause exists for making this order effective upon publication in the Federal Register.

List of Subjects in 7 CFR Part 1040

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the following language in § 1040.7(b)(2) of the Southern Michigan order is suspended for the months of April through September 1986, as follows:

PART 1040—MILK IN THE SOUTHERN MICHIGAN MARKETING AREA

1. The authority citation for 7 CFR Part 1040 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1040.7 [Suspended in Part]

2. In 7 CFR Part 1040, the following words in § 1040.7(b)(2) are suspended: "if transfers from such supply plant to plants described in paragraph (b)(5) of this section and by direct delivery from the farm to plants qualified under paragraph (a) of this section are:"

3. In 7 CFR Part 1040, paragraphs (i) and (ii) in § 1040.7(b)(2) are suspended.

Effective date: April 28, 1986.

Signed at Washington, DC on: April 22, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing & Inspection Services.

BILLING CODE 3410-02-M

---

7 CFR Part 1094

Milk in the New Orleans-Mississippi Marketing Area; Order Suspending Certain Provision

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends for the months of April through June 1986 the percentage of producer milk of members of a cooperative that must be delivered to a pool distributing plant in order for a cooperative association to qualify its plant as a pool plant under the New Orleans-Mississippi order for that month. The suspension was requested by a cooperative association with member-producers who supply milk for the market. Interested parties were invited to submit comments regarding the proposed suspension. No comments in opposition were received. The action is needed to ensure that dairy farmers who have historically supplied the fluid needs of the New Orleans-Mississippi market will share in the market's Class I milk sales during April through June 1986.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–3060.

SUPPLEMENTARY INFORMATION: The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who have been historically associated with the market continues to have their milk priced under the order for April through June 1986 and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the New Orleans-Mississippi marketing area.

After consideration of all relevant material it is hereby found and determined that for the months of April through June 1986 the following provision of the order does not tend to effectuate the declared policy of the Act:

In § 1094.7(c), the provision "45 percent or more of the".

Statement of Consideration

This action removes for April through June 1986 the requirement that 45 percent of the producer milk of members of a cooperative association must be physically received at pool distributing plants during the month in order for a balancing plant operated by a cooperative association to qualify as a pool plant under the New Orleans-Mississippi milk order. The suspension was requested by Gulf Dairy Association, Inc., a cooperative association, for the months of March through June 1986. Proponent cooperative represents a large number of the market's producers.

This action is needed due primarily to a sudden reduction in Class I sales by a distributing plant that is supplied by proponent cooperative. The plant bottles a major portion of its bulk milk receipts under the same label as milk bottled by another plant in a nearby market. Some milk in such nearby market was contaminated with the pesticide heptachlor. As a consequence, consumers are reluctant to buy milk that is packaged under such label regardless of where such milk is bottled. Such action by consumers has lessened the amount of milk bottled by the plant that the cooperative supplies raw milk to and, thus, resulted in a reduction in Class I sales to the plant by the cooperative association.

The resulting loss of Class I sales has forced the cooperative to use in its balancing plant for the manufacture of cheese much of the milk supply previously associated with such Class I use. Such shift in the use of member milk of the cooperative will result in the cooperative not meeting the pooling requirement that 45 percent or more of the producer milk of members of the cooperative association must be physically received during the month at pool distributing plants. Consequently, unless the suspension action is granted, producers who have historically supplied the fluid milk needs of the market would not have their milk priced and pooled under the order.

Suspension action for the month of March was granted in a prior document. There was no opportunity to invite interested parties to comment on the suspension for March since the request was not received until March 28.

With regard to cooperative's request for suspension action for the additional months of April through June, interested parties were invited to submit comments. No comments in opposition were received.

It is hereby found and determined that thirty days' notice of the effective date hereof are impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that substantial quantities of milk of producers who regularly supply the market otherwise would be excluded from the marketwide pool, thereby causing a disruption in the orderly marketing of milk; and

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this suspension. No comments in opposition were received.

Therefore, good cause exists for making this order effective upon publication in the Federal Register.

List of Subjects in 7 CFR Part 1094

Milk marketing orders, Milk, Dairy Products.

It is therefore ordered, That the aforesaid provision in § 1094.7(c) of the New Orleans-Mississippi order is hereby suspended for April through June 1986.

PART 1094—MILK IN THE NEW ORLEANS-MISSISSIPPI MARKETING AREA

1. The authority citation for 7 CFR Part 1094 continues to read as follows:

Authority: Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C.601–674.

§ 1094.7 [Suspended in Part]

2. In § 1094.7(c) the provisions "45 percent or more of the" is suspended.

Effective Date: April 28, 1986.

Signed at Washington, DC, on: April 22, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing & Inspection Services.

7 CFR Part 1106

Milk in the Southwest Plains Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues through August 1986 a suspension of the 20-percent shipping standard in the Southwest Plains order that certain supply plants must meet to qualify as pool plants. The action was requested by a cooperative association and supported by two other cooperatives and the operator of a supply plant. These parties represent a substantial majority of the producers who supply milk for the market. This action, which extends a suspension of the supply plant shipping standard for March to meet emergency marketing conditions, is needed to ensure that dairy farmers who have historically supplied the fluid needs of the market will share in the market's Class I milk sales during the months of April through August 1986.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Proposed Suspension: Issued March 28, 1986; published April 3, 1986 (51 FR 11453).

The Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who have been historically associated with the market will continue to have their milk priced under the order for the months of April through August 1986 and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*) and of the order regulating the handling of milk in the Southwest Plains marketing area.

Notice of proposed rulemaking was published in the Federal Register on April 3, 1986 (51 FR 11453) concerning a proposed suspension of certain provisions of the order. Interested parties were afforded the opportunity to file written data, views and arguments. No comments opposing the proposed action were received.

After consideration of all relevant material, including the proposal in the notice and all other available information, it is hereby found and determined that for the months of April through August 1986 the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1106.7(b)(1), the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) of this section. A plant not meeting such 20 percent requirement in any month of such February-August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) of the section are not less than 50 percent of receipts or diversions, as previously specified."

Statement of Consideration

This action continues through August 1986 a suspension of the 20-percent shipping standard that certain supply plants must meet to qualify as pool plants under the Southwest Plains order.

The current order provides that a supply plant which qualified as a pool plant during each of the immediately preceding months of September through January shall continue to be a pool plant during the following months of February through August if at least 20 percent of the supply plant's receipts are shipped to distributing plants.

The proposal to suspend the shipping standard for the months of April through August 1986 was made by Mid-America Dairymen, Inc. (Mid-Am). The action is supported by two other cooperative associations and the operator of a supply plant at Bentonville, Arkansas. These organizations represent a substantial majority of the market's producers.

Because of the emergency marketing conditions that resulted from a pesticide problem, the 20-percent standard was suspended for March. An extension of the action for March is needed because handlers operating fluid milk plants that are regulated under the order are still refusing to accept any milk produced in Arkansas because some of the milk supply has been found to contain the pesticide heptachlor. As a result, a substantial number of dairy herds in Arkansas have been quarantined. Although milk from these farms is not being marketed, the operators of the fluid bottling plants want to avoid the risk of receiving contaminated milk and are refusing to accept any milk produced on other farms in the area.

In its comments Mid-Am stated that, although no new herds have been quarantined recently, adverse publicity associated with the pesticide situation has resulted in distributing plants continuing to not accept milk from the Arkansas area.

The milk supply for fluid plants that normally originates on farms in Arkansas has been replaced by milk from other states and the Arkansas produced milk that is normally received at the Bentonville supply plant for shipment to distributing plants continues to be without a fluid-use market. Since the magnitude and duration of the pesticide problem is not specifically known at this time, an extension of the current suspension will permit Arkansas producers who have historically supplied the market's fluid

VOL 51 ISS 81 AP 28 1986 UMI

milk needs to continue to have their April–August milk production priced and pooled under the order.

It is hereby found and determined that thirty day's notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that without such action substantial quantities of milk of producers who have regularly supplied the market's fluid needs would be excluded from the marketwide pool, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given to interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No views opposing such action were received.

Therefore, good cause exists for making this order effective upon publication in the Federal Register.

List of Subjects in 7 CFR Part 1106

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions in § 1106.7(b)(1) of the Southwest Plains order are hereby suspended for the months of April through August 1986.

PART 1106—MILK IN THE SOUTHWEST PLAINS MARKETING AREA

1. The authority citation for 7 CFR Part 1106 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1106.7 [Suspended in Part]

2. In § 1106.7(b)(1), the words "until any month of such period in which less than 20 percent of the milk received or diverted as previously specified, is shipped to plants described in paragraph (a) of this section. A plant not meeting such 20 percent requirement in any month of such February–August period shall be qualified in any remaining month of such period only if transfers and diversions pursuant to paragraph (b)(2) of this section to plants described in paragraph (a) of the section are not less than 50 percent of receipts or diversions, as previously specified." are suspended.

Effective Date: April 28, 1986.

Signed at Washington, DC, on: April 22, 1986.

Karen K. Darling,

Deputy Assistant Secretary, Marketing & Inspection Services.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 166

[Docket No. 86-063]

Swine Health Protection Provisions; Kentucky

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which removed Kentucky from the list of States that have primary enforcement responsibility under the Swine Health Protection Act (the Act) and added Kentucky to the list of States that do not have primary enforcement responsibility under the Act but, under cooperative agreements with the Animal and Plant Health Inspection Service, issue licenses to persons desiring to operate a treatment facility for garbage that is to be treated and fed to swine. This amendment was made pursuant to a request from Kentucky and section 10 of the Act. The intended effect of this amendment is to help ensure that certain requirements for the feeding of garbage to swine under the Act are enforced in Kentucky and thereby help prevent the dissemination of certain swine diseases.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: Dr. L. W. Schnurrenberger, Special Diseases Staff, VS, APHIS, USDA, Room 822, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436-8487.

SUPPLEMENTARY INFORMATION:

Background

A document published in the Federal Register on January 16, 1986 (51 FR 2347–2348), amended the "Swine Health Protection Provisions" regulations in 9 CFR Part 166 with respect to Kentucky. Pursuant to a request from Kentucky and pursuant to the requirements of section 10 of the Swine Health Protection Act (the Act), the document removed Kentucky from the list of States that have primary enforcement responsibility under the Act and added Kentucky to the list of States that do not have primary enforcement responsibility under the Act but, under cooperative agreements with the Animal and Plant Health Inspection Service, issue licenses to persons desiring to operate a treatment facility for garbage that is to be treated and fed to swine.

The interim rule became effective upon publication. Comments were solicited for 60 days following publication. No comments were received. The factual situation which was set forth in the interim rule still provides a basis for the amendment.

Executive Order 12291 and Regulatory Flexibility Act

This action is issued in conformance with Executive Order 12291 and has been determined to be not a major rule. Based on information compiled by the Department, it has been determined that this action will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Persons who operate facilities for the treatment of garbage to be fed to swine and certain persons who feed or permit the feeding of garbage to swine are required to be regulated because of the Swine Health Protection Act. Almost all persons who operate facilities for the treatment of garbage to be fed to swine or who feed or permit the feeding of garbage to swine would be considered small entities. Further, the amendments affirmed by this document will affect less than one percent of such persons who operate facilities for the treatment of garbage to be fed to swine and less than one percent of such persons who feed or permit the feeding of garbage to swine.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (See 7 CFR 3015, Subpart V).

List of Subjects in 9 CFR Part 166

African swine fever, Animal diseases, Foot-and-mouth disease, Garbage, Hog cholera, Hogs, Swine vesicular disease, Vesicular exanthema of swine.

PART 166—SWINE HEALTH PROTECTION

Accordingly, the interim rule amending § 166.14 of 9 CFR 166, published in the Federal Register at 51 FR 2347–2348 on January 16, 1986, is adopted as a final rule.

Authority: 7 U.S.C. 3802, 3803, 3804, 3806, 3809, 3811; 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, DC, this 23rd day of April 1986.

Billy G. Johnson,

Acting Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

FEDERAL RESERVE SYSTEM

12 CFR Parts 207, 220, 221 and 224

Securities Credit Transactions; Regulations G, T, U and X

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The List of Marginable OTC Stocks is comprised of stocks traded over-the-counter (OTC) that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List is published from time to time by the Board as a guide for lenders subject to the regulations and the general public. This document sets forth additions to or deletions from the previously published List effective February 11, 1986 and will serve to give notice to the public about the changed status of certain stocks.

EFFECTIVE DATE: May 13, 1986.

FOR FURTHER INFORMATION CONTACT: Peggy Wolffrum, Research Assistant, Division of Banking Supervision and Regulation, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202)–452–2781, or Joy W. O'Connell, Telecommunication Device for the Deaf (TDD) (202)–452–3244.

SUPPLEMENTARY INFORMATION: Set forth below are stocks representing additions to or deletions from the Board's List of Marginable OTC Stocks. A copy of the complete List incorporating these additions and deletions was filed with the original of this document. This List supersedes the last complete List which was effective February 11, 1986 (51 FR 3938, January 31, 1986). The List includes those stocks that the Board of Governors has found meet the criteria specified by the Board and thus have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant incorporating such stocks within the requirements of Regulations G, T, U and X (12 CFR 207, 220, 221 and 224, respectively). It also includes, as a result of an amendment to the margin regulations (49 FR 35756, September 12, 1984), any stock designated under an SEC rule as qualified for trading in a national market system (NMS Security). The List of Marginable OTC Stocks, as it is now called, is a composite of the List of OTC Margin Stocks and all NMS securities. Additional OTC securities may be designated as NMS securities in the interim between the Board's quarterly publications. They will become automatically marginable at broker-dealers upon the effective date of their designation. The names of these securities are available at the Board and the Securities and Exchange Commission and will be subsequently incorporated into the Board's next quarterly List. Copies of the current List may be obtained from any Federal Reserve Bank.

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the List specified in 12 CFR 207.6(a) and (b), 220.17(a) and (b), and 221.7(a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of this List as soon as possible. The Board has responded to a request by the public and allowed a two-week delay before the List is effective.

List of Subjects

12 CFR Part 207

Banks, Banking, Credit, Federal Reserve System, Margin, Margin requirements, National Market System (NMS security), Reporting requirements, Securities.

12 CFR Part 220

Banks, Banking, Brokers, Credit, Federal Reserve System, Margin, Margin requirements, Investments, National Market System (NMS security), Reporting requirements, Securities.

12 CFR Part 221

Banks, Banking, Credit, Federal Reserve System, Margin, Margin requirements, Securities, National Market System (NMS security), Reporting requirements.

12 CFR Part 224

Banks, Banking, Borrowers, Credit, Federal Reserve System, Margin, Margin requirements, Reporting requirements, Securities.

Accordingly, pursuant to the authority of sections 7 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78g and 78w), and in accordance with § 207.2(k) and 6(c) of Regulation G, § 220.2(s) and 17(c) of Regulation T, and § 221.2(j) and 7(c) of Regulation U, there is set forth below a listing of additions to and deletions from the Board's List:

[Airspace Docket No. 85-AWA-50]

Alteration of VOR Federal Airway V-532; Kansas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters the description of Federal Airway V-532 by extending that airway from Salina, KS, direct to Lincoln, NE. Pilots routinely request direct routing between Salina and Lincoln. This expedites traffic, aids flight planning, and saves fuel by eliminating the current dogleg via Pawnee City, NE.

EFFECTIVE DATE: 0901 G.m.t., July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8628.

SUPPLEMENTARY INFORMATION:

History

On January 30, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of VOR Federal Airway V-532 by extending the airway from Salina, KS, direct to Lincoln, NE, (51 FR 3796). Pilots routinely request direct routing between Salina and Lincoln. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the description of VOR Federal Airway V-532 by extending that airway from Salina, KS, direct to to Lincoln, NE. The Minneapolis Air Route Traffic Control Center has received numerous requests for direct routing from Lincoln to Salina. In order to assist users, the FAA has designated VOR Federal Airway V-532 as a direct route between Salina and Lincoln. This action saves fuel, reduces controller workload and aids flight planning.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal Airways.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V-532 [Amended]

By removing the words "to Salina." and by substituting the words "Salina; to Lincoln, NE."

Issued in Washington, D.C., on April 21, 1986.

James Burns, Jr.,
Manager, Airspace-Rules and Aeronautical Information Division.

[FR Doc. 86-9353 Filed 4-25-86; 8:45 am]
BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 85-ANM-33]

Alteration of VOR Federal Airway V-491 and Establishment of V-589; Wyoming

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment alters Federal Airway V-491 by renumbering the segment between Medicine Bow and Casper, WY, to V-589. The current description of V-491 creates some confusion because it is segmented by ending at Casper, WY, and does not begin again until Rapid City, SD. This action eliminates that confusion and simplifies flight planning through the area.

EFFECTIVE DATE: 0901 G.m.t., July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

History

On February 27, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the description of V-491 by renumbering the segment between Medicine Bow and Casper, WY, to V-589 (51 FR 6918). The current description creates confusion because the airway is segmented. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations amends VOR Federal Airway V-491 by renumbering the segment between Medicine Bow and Casper, WY, to V-589. V-491 begins at Medicine Bow and ends at Casper, WY. Then, V-491 does not begin again until Rapid City, SD. This action eliminates the confusion when referencing V-491 because it is segmented and simplifies flight planning through the area.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal Airways.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V-491 [Amended]

By removing the words "From Medicine Bow, WY; INT Medicine Bow 336° and Casper 216° radials; to Casper, WY."

V-589 [New]

From Medicine Bow, WY, via INT Medicine Bow 336° and Casper, WY, 216° radials; to Casper.

Issued in Washington, D.C., on April 21, 1986.

James Burns, Jr.,
Manager, Airspace-Rules and Aeronautical Information Division.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM 79-14]

Natural Gas Policy Act; Incremental Pricing Acquisition Cost Thresholds

AGENCY: Federal Energy Regulatory Commission.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the National Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Raymond A. Beirne, Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, DC 20426, (202) 357-8500

VOL 51 ISS 81 AP 28 1986 UMI

Order of the Director, OPPR

Issued: April 23, 1986.

Section 206 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to § 375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of May 1986 are issued by the publication of a price table for the month. The incremental pricing acquisition cost threshold prices for months prior to those reflected on the table are found in § 282.304.

The incremental pricing threshold for May, 1986 reflect a two-month lag adjustment described in the notice of the March 1, 1986 thresholds.

List of Subjects in 18 CFR Part 282

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 10

[T.D. 86-61]

Withdrawal of Customs Regulations Amendments Relating to Cancellation of Temporary Importation Bonds

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of withdrawal.

SUMMARY: This documents withdraws amendments to the Customs Regulations which would have eliminated the requirement that Customs officers examine merchandise imported temporarily under bond or under an A.T.A. carnet, before exportation, and supervise the exportation process in order to have the temporary importation bond or carnet canceled. Proof of exportation would have been verified by documentary evidence ordinarily submitted to Customs.

It has now been determined that while these amendments would have eased Customs workload and been of some benefit to importers, the changes could have compromised enforcement efforts.

DATE: Withdrawal effective April 28, 1986.

FOR FURTHER INFORMATION CONTACT: Arnold Sarasky, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202-566-8648).

SUPPLEMENTARY INFORMATION:

Background

Under the provisions of Schedule 8, Part 5, Subpart C, Tariff Schedules of the United States (19 U.S.C. 1202), certain classes of articles, when not imported for sale or sale on approval, may be admitted to the U.S. without the payment of duty by furnishing Customs with a bond providing for exportation of the articles under Customs supervision. The Customs Regulations governing these temporary importations under bond are found in § 10.31 *et seq.* (19 CFR 10.31 *et seq.*) These regulations, as well as those in Part 114, Customs Regulations (19 CFR Part 114), also govern importations made under an A.T.A. carnet, which is an international customs document which may be used for the temporary duty-free importation of certain articles into a country in lieu of the usual customs documents required. The carnet serves as a guarantee for the payment of duties which may become due on articles temporarily imported and not exported.

Pursuant to § 10.38(a), Customs Regulations (19 CFR 10.38(a)), an "Application for Exportation of Articles Under Special Customs Bond", Customs Form 3495, must be filed with the district director a sufficient length of time in advance of the date on which articles entered under a temporary importation bond or carnet are to be exported. This requirement permits Customs to examine and identify the articles if circumstances warrant examination. Customs is required to supervise the exportation process.

Section 10.39, Customs Regulations (19 CFR 10.39), sets forth the procedures for cancellation of bonds.

Because of increased demands for Customs Service and decreased staffing, it was believed that the requirements of supervision and examination were unrealistic and not necessary. Accordingly, by a document published in the **Federal Register** as T.D. 85-40 on March 12, 1985 (50 FR 9797), §§ 10.38 and 10.39 were amended to eliminate the requirement that Customs officers examine articles imported temporarily under bond or an A.T.A. carnet, before exportation, and supervise the exportation process in order to have the bond or carnet canceled. The amendments provided that documentary evidence ordinarily submitted to Customs, which shows that the articles were exported, would be considered adequate proof of exportation.

As explained in T.D. 85-40, the procedure for allowing the submission of documentary evidence as proof of exportation was already in effect in Customs field offices by virtue of notification given the field offices on April 3, 1981. Shortly thereafter, by T.D. 81-124, published in the Customs Bulletin on May 20, 1981, the public was informed that the requirements of §§ 10.38 and 10.39, Customs Regulations, were being suspended at the importer's option of presenting documentary proof of exportation. T.D. 81-124 was not published in the **Federal Register.**

T.D. 85-40 provided that the amendments to §§ 10.38 and 10.39 were to become effective on April 11, 1985. However, because of concern that the changes could have compromised enforcement efforts, by notice published in the **Federal Register** as T.D. 85-66 on April 10, 1985 (50 FR 14093), the effective date of the amendments was delayed indefinitely.

After consideration of comments received from our field offices in regard to this change and further review of this matter, it has been determined advisable to withdraw T.D. 85-40 and the proposal published in the **Federal Register** on September 9, 1983 (48 FR 40738). It has also been decided to rescind T.D. 81-124 inasmuch as there is now no basis for permitting the procedures allowed by this rule.

This existing §§ 10.38 and 10.39, Customs Regulations, therefore, will remain in effect. This, the Customs Form 3495 must be filed with the district director and Customs will retain the option of examining the merchandise imported temporarily under bond or carnet, before exportation, and supervising its exportation.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: April 21, 1986.

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Parts 2640 and 2648

Redetermination of Withdrawal Liability Upon Mass Withdrawal

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule correction.

SUMMARY: This document corrects the final rule on the redetermination of withdrawal liability upon a mass withdrawal and the accompanying definitions that appeared in the **Federal Register** of Tuesday, March 25, 1986 at 51 FR 10314. This action is needed to correct typographical errors and to add the citations for other regulations referred to in this rule and in the definitions applicable to this rule.

FOR FURTHER INFORMATION CONTACT: Ellan H. Spring, Corporate Policy and Regulations Department (35100), 2020 K St., NW., Washington, D.C. 20006, 202-956-5051 (202-956-5059 for TTY and TDD). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The following corrections are made in FR Doc. 86-6119, appearing at page 10314 in the issue of March 25, 1986:

1. On page 10317, column 3, the definition of "(u)nfunded vested benefits" in § 2640.7 is corrected by deleting "multiemployer" preceding "valuation regulation" and inserting in its place "mass withdrawal" and by deleting the period at the end and adding in its place "(29 CFR Part 2676)."

2. On page 10317, column 3, the heading for Part 2648 is corrected by adding "REDETERMINATION OF" immediately before "WITHDRAWAL LIABILITY".

3. On page 10318, column 3, § 2648.3(c) is corrected by removing "very" in the 13th line and replacing it with "every", and § 2648.3(c)(3) is corrected by inserting "not" immediately after "(t)he plan sponsor has".

4. On page 10319, column 1, § 2648.5 is corrected by changing the reference to "section 4209(c)(1)(A)(ii)" to "section 4219(c)(1)(A)(ii)".

5. On page 10321, column 3, § 2648.8(g)(6)(i) is corrected by deleting "multiemployer" preceding "valuation regulation" and inserting in its place "mass withdrawal" and by deleting the semicolon and adding in its place "(29 CFR Part 2676);".

6. On page 10322, column 1, § 2648.9(g) is corrected by changing the reference to "§ 2648.7(g)(1)-(g)(3)" to "§ 2648.8(g)(1)-(g)(3)".

Issued in Washington, D.C. this 21st day of April, 1986.

Kathleen P. Utgoff,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 210, 212, and 218

Information Collection; Solid Minerals

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule.

VOL 51 ISS 81 AP 28 1986 UMI

SUMMARY: This final rule describes the information collection necessary to start up and operate the MMS's new Auditing and Financial System for solid minerals. The information to be collected is required from lessees, lease operators and payors to provide comprehensive sales and royalty data on coal and other solid minerals produced from leased Federal and Indian lands. The data is used to document payments, to maintain royalty accounts, and for audits.

EFFECTIVE DATE: June 20, 1986. See discussion of effective date in the Supplementary Information section.

FOR FURTHER INFORMATION CONTACT: Dennis Whitcomb, Telephone: (303) 231-3432, (FTS) 328-3432.

SUPPLEMENTARY INFORMATION: The principal authors of this final rulemaking are Mr. Geary Keeton and Mr. Billie Clark of the Minerals Management Service, Lakewood, Colorado.

I. Background

The Department of the Interior (DOI) is charged with the responsibility for the collection, analysis and distribution of royalty payments on minerals produced from leased Federal and Indian lands. The Royalty Management Program is administered by the Department's Minerals Management Service (MMS).

To fulfill its responsibilities, the MMS is using two comprehensive integrated accounting systems, the Auditing and Financial System (AFS) and the Production Accounting and Auditing System (PAAS).

The AFS is a revenue accounting system which monitors royalties and related information reported by the lessees or operators of record who are required to pay rentals and royalties. The PAAS is a production accounting system which monitors minerals production and disposition from the source to the point of royalty determination. These systems are designed to implement the 1982 recommendation of the Commission on Fiscal Accountability of the Nation's Energy Resources (Linowes Commission), and depart substantially from the previous Royalty Accounting System (RAS) they are replacing. In addition to providing the controls and capabilities of modern accounting systems, these new systems embody the "modified Internal Revenue Service (IRS) concept" of accepting royalty and sales information as correct subject to audit. The two systems operate independently, but at the same time information from AFS is compared with information from PAAS to assure that minerals produced on Federal and Indian lands are properly accounted for and that appropriate royalties on those minerals are paid.

In concert with the MMS Royalty Management responsibilities, the Bureau of Land Management (BLM) is responsible for the verification of production upon which royalties are payable. This rule does not revise the BLM production verification responsibility.

In response to the Linowes Commission report, Congress enacted the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*). The Act requires the Secretary of the Interior to ". . . establish a comprehensive inspection, collection and fiscal and production accounting and auditing system to provide the capability to accurately determine oil and gas royalties, interest, fines, penalties, fees, deposits, and other payments owed, and to collect and account for such amounts in a timely manner" (30 U.S.C. 1711(a)). For solid minerals, the Act requires the Secretary to "study the question of the adequacy of royalty management for coal, uranium and other energy and nonenergy minerals . . ." (30 U.S.C. 1752(a)). Such a study was undertaken and a conclusion was reached that in order to comply with the intent of Congress to provide adequate controls to accurately determine royalties and other amounts due, the AFS and PAAS systems should be extended to cover solid minerals royalty management in addition to oil and gas. An examination of existing laws regarding solid minerals royalty management concluded that new legislation is not required to extend PAAS and AFS to cover solid minerals. MMS already has adequate authority under the mineral leasing laws to obtain from lessees the information necessary to determine and account for royalty payments.

This rulemaking, therefore, serves to implement the recommendation of the solid minerals royalty management study by placing solid minerals under the AFS. A separate rulemaking would also place solid minerals under PAAS after the publication of the PAAS regulations. (See 51 FR 8168, March 7, 1986.)

Under the AFS, payors are required to report oil and gas royalty data on Form MMS-2014 and payor information on Form MMS-4025. Under the AFS, solid mineral payors would be required to submit data on Form MMS-4014 and Form MMS-4030. These two forms replace several forms previously required for the RAS. The forms replaced include forms 9-373A for coal, 9-368 for phosphate, 9-128a through 9-128d for sodium and potassium, and 9-1146 for silica sands.

This rule requires payors to submit a Report of Sales and Royalty Remittance for Solid Minerals (Form MMS-4014) with every payment. This report includes specific information on the royalties due and being paid. The MMS will use the sales and royalty data on form MMS-4014 to identify the payor and the lease subaccounts, to maintain the lease accounts on a monthly or quarterly basis as appropriate, to reconcile or audit the accounts, to distribute payments to States and Indians, and to correlate lump sum payments with the appropriate subaccount charge entries.

At the time of conversion to AFS from RAS, payors also will be required to complete a separate Solid Minerals Payor Information Form (Form MMS-4030) for each Federal or Indian lease on which rent, production or minimum royalties are paid. This form provides specific information on who pays rent, minimum royalties, advance royalties, and production royalties; it identifies revenue sources and selling arrangements for the lease, and provides necessary information to assure that AFS covers all interests in the lease for all products. The MMS will use this information to establish a static, automated data base that reduces the amount of information payors must provide routinely. The MMS also will use the information to assign a unique Accounting Identification Number (AID) to each royalty source within the lease. The MMS will then send confirmation letters to the payors to provide the AID numbers which are needed to complete the Report on Sales and Royalty Remittance for Solid Minerals (Form MMS-4014). The information which would be required by the form corresponds with the payors' own sales and enables the payors to simply transfer figures from their own record to Form MMS-4014. A new Form MMS-4030 will be required to be submitted only when there is a change in the information previously submitted.

This rulemaking will amend 30 CFR Part 210 by revising § 210.10 of Subpart A and by adding §§ 210.200, 210.201, 210.202 and 210.203 to Subpart E. The new Subpart E Solid Minerals, General, replaces the existing Subpart E and Subpart F. Also, this rulemaking will amend 30 CFR Part 212 to apply to solid mineral leases the records maintenance requirements now applicable to oil and gas leases. Section 218.56 of 30 CFR Part 218, Subpart B will be redesignated § 218.40 of Subpart A and amended by this rulemaking. This action is being taken so that assessments for late or incorrect reports and failure to report may be applied to both fluid and solid mineral AFS reporting.

MMS is already in the process of implementing the AFS and phasing out the RAS. In the proposed rule, we specifically proposed that the effective date of this rule would be retroactive to the date the proposed rule was published in the Federal Register, June 20, 1985, 50 FR 25585. It is important to the accounting requirement of solid minerals royalties and for a smoother and a more equitable transition from RAS to AFS that the Form MMS-4014 and Form MMS-4030 be used without delay. In fact, reporters already are using the forms. MMS, therefore, has determined that there is good cause, in accordance with 5 U.S.C. 553, to make this rule effective June 20, 1985.

II. Summary of Rules Adopted

The following sections summarize the most significant provisions of the regulations being adopted. The rules being adopted are essentially the same as the proposed rules. The amendments to 30 CFR Part 212 were proposed as amendments to Part 210. While the final rule places the proposed revision in a different part, the language and effect of the proposal is unchanged. The provisions are being placed in Part 212 because that part currently contains the identical requirement for oil and gas leases. Because of the similarity of the proposed and final rule, the discussion in this preamble for the proposed rules applies to the final rules. Where changes are being made to the final rules, they are discussed in this preamble except for minor clarifications.

Part 210

The provisions of 30 CFR Part 210 establish the reporting requirements for the Auditing and Financial System (AFS). This part indicates the types of reports which must be filed in order for the AFS to accomplish its stated goal to assure that minerals produced on Federal and Indian lands are properly accounted for and that appropriate royalties on those minerals are paid. This rulemaking will amend Part 210 to bring solid minerals reporting under the AFS.

Part 212

The provisions of Part 212 establish the records maintenance requirements for Federal and Indian leases. This final rule will subject solid mineral leases to the same requirements now imposed on oil and gas leases.

Part 218

The provisions of Part 218 establish certain reporting requirements and assessments for late reports, incorrect reports, and failure to report. This rule being adopted will amend Part 218 so that the assessment provisions may be applied to both fluid and solid mineral AFS reporting.

III. Comments Received on Proposed Rules

The proposed rulemaking published June 20, 1985, provided for a 30-day public comment period which ended July 22, 1985. [50 FR 25585]. Two comments were received. All comments received are addressed in this section, and the text of these regulations has been changed to reflect comments as appropriate.

One commentor referenced the Solid Minerals Payor Handbook which provides detailed reporting instructions to supplement this rulemaking. The commentor stated that reporting by selling arrangement would not benefit MMS in its royalty verification efforts. Also, the commentor felt that reporting retroactive price adjustments by month is time consuming and error prone. MMS requires all payors to report by selling arrangement. It is a data element used to distinguish royalty information on a lease reported by the same payor. The selling arrangement is necessary to verify that the appropriate royalty is paid. In regard to retroactive price adjustments by month, we believe it is necessary to have detail information by month to verify proper payment on a lease and to insure corrections are made to the appropriate payment.

Regarding § 210.10 *Information Collection,* a commentor suggested that the table showing forms for MMS-4025 and MMS-2014 should state they are for reporting oil and gas information. MMS agrees with this suggestion and the information has been incorporated in the section.

IV. Procedural Matters

Executive Order 12291

The Department of the Interior has determined that this is not a major rule and does not require a regulatory analysis under Executive Order 12291.

The regulatory burden on industry due to the information collection requirements for Form MMS-4014 and Form MMS-4030 is estimated to be approximately $14,540. Therefore, a regulatory impact analysis is not required.

Regulatory Flexibility Act

Some portions of the approximately $14,540 cost burden to industry would fall on the small businesses that are among the potential respondents. Since the total cost to the public is quite small, and because the MMS provides special training and assistance to small organizations, there would be no significant economic effect on small entities. Consequently, it does not require a Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) analysis.

Paperwork Reduction Act of 1980

The information collection requirements contained in §§ 210.10, 210.200, 210.201, 210.202 and 210.203 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1010-0084.

National Environmental Policy Act of 1969

The Department of Interior has determined that this final rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment; therefore, preparation of an environmental impact statement is not required.

List of Subjects

30 CFR Part 210

Continental shelf, Geothermal energy, Government contracts, Mineral royalties, Oil and gas exploration, Public lands-mineral resources, Reporting and recordkeeping requirements.

30 CFR Part 212

Coal, Government contracts, Mineral royalties, Oil and gas exploration, Public lands-mineral resources, Reporting and recordkeeping requirements.

30 CFR Part 218

Coal, Continental shelf, Electronic funds transfers, Geothermal energy, Government contracts, Indian-lands, Mineral royalties, Oil and gas exploration, Public lands-mineral resources.

Under the authority of the Secretary of the Interior contained in 30 U.S.C. 1751, 30 CFR Parts 210, 212, and 218 are amended as set forth below.

VOL 51 ISS 81 AP 28 1986 UMI

Dated: March 25, 1986.

James E. Cason,

Acting Assistant Secretary, Land and Minerals Management.

PART 210—[AMENDED]

30 CFR Part 210 is amended as follows:

1. The authority citation for Part 210 is revised to read as follows:

Authority: The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), as amended; the Act of May 21, 1930 (30 U.S.C. 301–306); the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351–359), as amended; the Act of March 3, 1909 (25 U.S.C. 396);as amended; the Act of May 11, 1938 (25 U.S.C. 396a–396q) as amended; the Act of February 28, 1891 (25 U.S.C. 397), as amended; the Act of May 29, 1924 (25 U.S.C. 398); the Act of March 3, 1927 (25 U.S.C. 398a–398e); the Act of June 30, 1919 (25 U.S.C. 399) as amended; R.S. § 411 (43 U.S.C. 1457), see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 *et seq.*), as amended; The National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) as amended; the Act of December 12, 1980 (Pub. L. 96–514, 94 Stat. 2964); the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97–78, 95 Stat. 1070); the Outer Continental Shelf Lands Act (43 U.S.C. 1331 *et seq.*), as amended; section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262); Secretarial Order No. 3071 of January 19, 1982, as amended; Secretarial Order 3087, as amended; the Indian Mineral Development Act of 1982 (25 U.S.C. 2101 *et seq.*); the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*).

2. 30 CFR 210.10, is amended by adding Form MMS–4014 and Form MMS–4030, and deleting Form 9–361/361A and Form 9–614A, so that as revised the table reads as follows:

§ 210.10 Information collection.

* * * * *

Form No., Name, and Filing Date	OMB No.
MMS—4025—Oil and gas payor information form-due 30 days after issuance of a new lease or a change to an existing lease	1010–0033
MMS–2014—Report of sales and royalty remittance-oil and gas-due by the end of first month following production month for royalty payment and for rentals no later than anniversary date of the lease	1010–0022
MMS–4030—Solid minerals payor information form-due 30 days after issuance of a new lease or change to an existing account established by an earlier form	1010–0084
MMS–4014—Report of sales and royalty remittance-solid minerals-due by end of month following sales or production month (unless lease terms specify a different frequency for royalty payments) and for rentals no later than the date specified in the lease terms	1010–0084

* * * * *

3. Part 210 is further amended by revising the title of Subpart E, to read: "*Solid Minerals, General*", and by adding §§ 210.200, 210.201, 210.202, and 210.203 to read as follows:

PART 210—FORMS AND REPORTS

Subpart E—Solid Minerals, General

Sec.

210.200 Required recordkeeping.
210.201 Solid minerals payor information form.
210.202 Report of sales and royalty remittance-solid minerals.
210.203 Special forms and reports.

Subpart E—Solid Minerals, General

§ 210.200 Required recordkeeping.

Information required by the Minerals Management Service (MMS) shall be filed using the forms prescribed in this subpart, copies of which are available from MMS. Instructions on the completion of these forms are provided in the Payor Handbook—Solid Minerals, also available from MMS. Records and supporting data may be maintained in hardcopy, microfilm, microfiche, or other recorded media that is readily available and readable.

§ 210.201 Solid minerals payor information form.

A Solid Minerals Payor Information Form (Form MMS–4030) must be submitted to MMS for each Federal and Indian solid minerals lease on which royalties, rentals or minimum royalties are paid. This form does not change any requirement for a separate approval, if required, by the Department of the Interior. The Form MMS–4030 shall identify the payor of rent, minimum royalty, advance royalty and production royalty, and identify revenue sources and selling arrangements for all lease products. The completed form must be filed by each royalty payor no later than 30 days after MMS provides notice that the payor is converted to the Auditing and Financial System (AFS). After filing the initial form, a new Form MMS–4030 must be filed no later than 30 days after the occurrence of any of the following:

(a) Assignment of all or any part of the lease;
(b) Adoption of a new mining method;
(c) Production of a new product;
(d) A change in a selling arrangement;
(e) Change in royalty rate;
(f) Change of payor; or
(g) Abandonment of a lease.

§ 210.202 Report of sales and royalty remittance-solid minerals.

A completed Report of Sales and Royalty Reimttance—Solid Minerals (Form MMS–4014) must accompany all payments to MMS for rents (other than first year) and royalties for Federal and Indian solid minerals leases. On leases where payment is remitted directly to an Indian tribe or Bureau of Indian Affairs office, the payor also must send a completed form MMS–4014 to MMS for processing in AFS. The Form MMS–4014 shall identify the payor and the lease subaccounts, contain production, sales, and royalty data, and identify the time period applicable to the data. Completed forms are due at the end of the month following the production or sales period as applicable. Unless the lease terms specify a different royalty payment frequency, all reports and payments are due monthly. If the lease terms do specify a different frequency for payment, the reporting must coincide with the payment. The Form MMS–4014 for rental payments is due no later than the rental payment date specified in the lease terms.

§ 210.203 Special forms and reports.

The MMS may require submission of additional information on special forms or reports. When special forms or reports other than those referred to in this subpart are necessary, instructions for the filing of such forms or reports will be given by MMS. Requests for the submission of such forms will be made in conformity with the requirements of the Paperwork Reduction Act of 1980 and other applicable laws.

4. Part 210 is further amended by:

a. Removing Subpart F.

b. Redesignating Subparts G and H as Subparts F and G, respectively.

PART 212—[AMENDED]

30 CFR Part 212 is amended as follows:

1. The authority citation for Part 212 is revised to read as follows:

Authority: The Mineral Leasing Act of February 25, 1920, as amended (30 U.S.C.181 *et seq.*); the Mineral Leasing Act for Acquired Lands, as amended (30 U.S.C. 351–359); the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*) the National Historic Preservation Act of 1966 as amended (16 U.S.C. 1201 *et seq.*) the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) the Act of March 3, 1909 as amended (25 U.S.C. 396); the Act of May 11, 1938, as amended (25 U.S.C. 396a-396q); The Act of February 28, 1891, as amended (25 U.S.C. 397); The Act of May 29, 1924 (25 U.S.C. 398); The Act of March 3, 1927, (25 U.S.C. 398a-398e); The Act of June 30, 1919, as amended (25 U.S.C. 399); RS. § 441 (43 U.S.C. 1457); The Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471 *et seq.*) the National Environmental Policy Act of 1969, as amended; (42 U.S.C. 4321 *et seq.*); the Freedom of Information Act (5 U.S.C. 552); the Indian Mineral Development Act of 1982 (25 U.S.C. 2101 *et seq.*); the Federal Oil and Gas Royalty Management act of 1982 (30 U.S.C. 1701 *et seq.*).

2. Section 212.200 (a) is added to read as follows:

§ 212.200 Maintenance of and access to records.

(a) All records pertaining to Federal and Indian solid minerals leases shall be maintained by a lessee, operator, revenue payor, or other person for 6 years after the records are generated unless the record holder is notified, in writing, that records must be maintained for a longer period. When an audit or investigation is underway, records shall be maintained until the record holder is released by written notice of the obligation to maintain records.

* * * * *

§212.200 [Amended]

3. Section 212.200 (b)(1) is amended by changing the word "coal" to "products".

4. Part 212 is further amended by:

(a) Revising the title of Subpart E to read "*Solid Minerals—General*

(b) Removing Subpart F.

(c) Redesignating Subparts G and H as Subparts F and G, respectively.

PART 218—[AMENDED]

1. The authority citation for Part 218 is revised to read as follows:

Authority: The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*), as amended; the Act of May 21, 1930 (30 U.S.C. 301–306); the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351–359) as amended; the Act of March 3, 1909 (25 U.S.C. 396), as amended; the Act of May 11, 1938 (25 U.S.C. 396a–396q), as amended; the Act of February 28, 1891 (25 U.S.C. 397), as amended; the Act of May 29, 1924 (25 U.S.C. 398); the Act of March 3, 1927 (25 U.S.C. 398a–398e); the Act of June 30, 1919 (25 U.S.C. 399) as amended; R.S. § 441 (43 U.S.C. 1457), see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 *et seq.*), as amended; The National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) as amended; the Act of December 12, 1980 (Pub. L. 96–514, 94 Stat. 2964); the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97–78, 95 Stat. 1070); the Outer Continental Shelf Lands Act (43 U.S.C. 1331 *et seq.*), as amended; the Geothermal Act of 1970 (30 U.S.C. 1001 *et seq.*) as amended; section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262); Secretarial Order No. 3071 of January 19, 1982, as amended; Secretarial Order 3087, as amended; the Indian Mineral Development Act of 1982 (25 U.S.C. 2101 *et seq.*); the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*).

2. Section 218.56 of Subpart B is redesignated as § 218.40 of Subpart A, General Provisions.

3. Paragraph (c) of newly designated § 218.40, is amended by adding, after "Form MMS–2014" the following statement, "or Form MMS–4014."

4. Paragraph (e) of newly designated § 218.40 is redesignated as paragraph (d).

5. Section 218.57 of Subpart B is redesignated as § 218.56.

6. Part 218 is further amended by:

(a) Revising the title of Subpart E to read "*Solid Minerals—General.*"

(b) Removing Subpart F.

(c) Redesignating Subparts G and H as Subparts F and G, respectively.

[FR Doc. 86-9403 Filed 4-25-86; 8:45 am]

BILLING CODE 4310-05-M

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 936

Approval of Permanent Program Amendment From the State of Oklahoma Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of a program amendment submitted by the State of Oklahoma as an amendment to the State's permanent regulatory program (hereinafter referred to as the Oklahoma program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment establishes a program for blaster training, examination and certification.

Oklahoma submitted the proposed program amendment on August 8, 1985. OSMRE published a notice in the Federal Register on October 29, 1985, announcing receipt of the amendment and inviting public comment on the adequacy of the proposed amendment (50 FR 43724).

After providing opportunity for public comment and conducting a thorough review of the program amendment, the Director has determined that the amendment meets the requirements of SMCRA and the Federal regulations, and is approving it. The Federal rules at 30 CFR Part 936 codifying decisions concerning the Oklahoma program are being amended to implement this action.

This rule is being made effective immediately in order to expedite the State program amendment process and encourage States to conform their programs to the Federal standards without undue delay; consistency of the State and Federal standards is required by SMCRA.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. James Moncrief, Director, Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, Room 2432, 333 West Fourth Street, Tulsa, Oklahoma 74103, Telephone: (918) 581–7923.

SUPPLEMENTARY INFORMATION:

I. Background

The Oklahoma program was conditionally approved by the Secretary of the Interior on January 19, 1981 (46 FR 4910). Information pertinent to the general background, revisions, modifications and amendments to the proposed permanent program submission as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Oklahoma program can be found in the January 19, 1981 Federal Register (46 FR 4910), in the April 2, 1982 Federal Register (47 FR 14152), in the May 4, 1983 Federal Register (48 FR 20050) and the August 28, 1984 Federal Register (49 FR 34000). Subsequent actions on conditions of approval and program amendments are identified at 30 CFR 936.11 and 936.15.

At the time of the Secretary's approval of the Oklahoma program, OSMRE had not yet promulgated Federal rules governing the training and certification of blasters. Therefore, the State was not required to include such requirements in its program.

On March 4, 1983, OSMRE issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Part 850 (48 FR 9498). The Federal rules require each State to design and implement its own blaster certification program.

Under the Federal rules, each State must develop the method of training, examining, and certifying blasters which best meets local needs within the Federal regulatory framework. The Federal rules require training, field experience, a written examination, and specify certain other requirements.

The Federal rules 30 CFR 850.12 require the State regulatory authority to develop a program and submit it to OSMRE as a proposed program amendment within 12 months after the publication date of the Federal rules. The Federal rules at 30 CFR 816.61(c) further provide that no later than 12 months after the State's blaster certification program has been approved by OSMRE all blasting operations in the State shall be conducted under the direction of a certified blaster.

VOL 51 ISS 81 AP 28 1986 UMI

II. Submission of Amendment

On August 8, 1985, the State of Oklahoma submitted to OSMRE an amendment to its permanent regulatory program. The amendment submitted by the Oklahoma Department of Mines (ODM) consists of proposed provisions to implement a blaster training, examination and certification program as required by 30 CFR Part 850.

The October 29, 1985 **Federal Register** announced receipt of the proposed modifications by OSMRE as well as the public comment period. In that same notice, OSMRE announced that a public hearing would be held only if requested. No requests were received and no hearing was held.

On March 4, 1986, a representative from OSMRE met with representatives from the Oklahoma Miner Training Institute (OMTI) to review the State's blaster certification examination. The State also provided OSMRE with some clarifying material concerning its training course.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15, that the program amendments submitted by Oklahoma on August 8, 1985, meets the requirements of SMCRA and 30 CFR Chapter VII as discussed below.

General

The Oklahoma submission provides that the Oklahoma Department of Mines (ODM) with assistance from the Oklahoma Miner Training Institute (OMTI) will administer the program for the training, examination and certification of all blasters. It sets standards and procedures for ODM and OMTI to administer the blaster certification program.

The Oklahoma regulations for blaster training, examination and certification are found at Part 850 of the Oklahoma regulations.

Section 850.5—Definitions

Section 850.5 of the Oklahoma regulations defines the term "blaster" in a manner similar to and no less effective than the Federal definition at 30 CFR 850.5.

Section 850.12—Responsibility

Section 850.12 of the Oklahoma regulations sets forth the areas of responsibility for both the Department of Mines and the Miner Training Institute in the administration of the blaster certification program. The ODM is responsible for promulgating rules governing the training, examination, certifications and enforcement of the blaster certification. The OMTI is responsible for assisting the ODM in developing and adopting a program to examine and certify all persons directly responsible for the use of explosives. The Director finds these provisions to be no less effective than the Federal regulations at 30 CFR 850.12.

Section 850.13—Training

Section 850.13 of the Oklahoma regulations sets forth the training requirements for persons seeking to become certified blasters. The ODM will ensure that adequate courses are available to train individuals responsible for the use of explosives on surface coal mining operations. This section also identifies the subject areas to be addressed in the training of potential blasters. The Director finds these provisions to be no less effective than the Federal regulations at 30 CFR 850.13.

Section 850.14—Examination

Section 850.14 of the Oklahoma regulations requires both a written examination, administered by the OMTI, and practical field experience prior to certification. The written examination shall test an applicant's competence in and practical application of the topics set forth in section 850.13. The Director finds the State's provisions to be no less effective than the Federal regulations at 30 CFR 850.14.

Section 850.15—Certification

Section 850.15 of the Oklahoma regulations establishes the conditions of blaster certification and recertification. The certification will expire 2 years from the date of issuance. After the initial certification period, all blasters must successfully complete a recertification course administered by the OMTI to demonstrate their continued competency.

This section also addresses provisions concerning the protection and proper use of the blaster certificate by the blaster and suspension/revocation measures to be implemented by the ODM when the blaster violates such provisions. The Director finds that the State's provisions to be no less effective than the Federal regulations at 30 CFR 850.15.

IV. Public Comments

Of the Federal agencies invited to comment on the proposed amendment, responses were received from the Bureau of Mines, U.S. Environmental Protection Agency and the U.S. Fish and Wildlife Service. No substantive comments were received.

The disclosure of Federal agency comments is made pursuant to section 503(b)(1) of SMCRA, 30 U.S.C. 1253(b)(1) and 30 CFR 732.17(h)(10)(i).

V. Director's Decision

The Director, based on the above findings, is approving the August 8, 1985 amendment to the Oklahoma program. The Director is amending Part 936 of 30 CFR Chapter VII to reflect approval of the above State program modification.

VI. Procedural Requirements

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1291(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for action directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and Regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 936

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: April 21, 1986.

James W. Workman,

Office of Surface Mining Reclamation and Enforcement, Deputy Director, Operations and Technical Services.

PART 936—OKLAHOMA

30 CFR Part 936 is amended as follows:

1. The authority citation for Part 936 continues to read as follows:

Authority: Pub. L. 95–87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*).

§ 936.15 [Amended]

2. 30 CFR 936.15 is amended by adding a new paragraph (h) to read as follows:

* * * * *

(h) The following amendment, as submitted to OSMRE on August 8, 1985, is approved effective April 28, 1986: Modifications to Part 850 of the Rules and Regulations of the Oklahoma Department of Mines to establish a program for blaster training, examination and certification.

§ 936.16 [Amended]

3. 30 CFR 936.16 is amended by removing and reserving the section.

BILLING CODE 4310–05–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP Memphis, TN Reg. 86–04]

Safety Zone Regulations; Arkansas River, From Mile 314.0 to Mile 316.0

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone from mile 314.0 to mile 316.0 on the McClellan-Kerr Arkansas River System. The zone is needed to protect marine traffic from a safety hazard associated with restricted navigation due to shoaling within the channel. Entry into this zone is prohibited unless authorized by the captain of the port.

EFFECTIVE DATE: This regulation becomes effective on 15 April 1986. It terminates on 15 May 1986.

FOR FURTHER INFORMATION CONTACT: Lieutenant D. G. Atkinson, Coast Guard Marine Safety Office Memphis, TN at (901) 521–3941.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to respond to potential hazards to the vessels involved.

Drafting Information

The drafter of this regulation is Lieutenant D.G. ATKINSON, project officer for the captain of the port.

Discussion of Regulation

The circumstances requiring this regulation resulted from the shoaling of the Arkansas River mile 314.0 to 316.0.

This regulation is issued pursuant to 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

Regulation

In consideration of the foregoing, Subpart C of Part 165 of Title 33, Code of Federal Regulations, is amended as follows: 1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. A new § 165.T02010 is added to read as follows:

§ 165.T02010 Safety Zone: Arkansas River, from mile 314. to mile 316.0.

(a) *Location.* The following area is a safety zone: McClellan-Kerr Arkansas River System between miles 314.0 and 316.0.

(b) *Effective date.* This regulation becomes effective on 15 April 1986. It terminates on 15 May 1986.

(c) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, entry into this area is prohibited. (2) Tows are authorized to transit this area when they meet the following restrictions:

(i) Tows shall contact lockmaster of lock 14 on channel 16 VHF/FM prior to entering this area for entry or passing instructions.

(ii) Tows transitting this zone shall adhere to directions of lockmaster of lock 14 pertaining to tow size and configuration.

Dated: April 14, 1986.

R.J. O'Pezio,

Captain of the Port.

[FR Doc. 86–9433 Filed 4–25–86; 8:45 am]

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[A–2–FRL–2968–2]

National Emission Standards for Hazardous Air Pollutants and Standards of Performance for New Stationary Sources Delegation of Authority to the State of New Jersey

AGENCY: Environmental Protection Agency.

ACTION: Final rule; Delegation of Authority.

SUMMARY: This notice announces the delegation of authority by the Environmental Protection Agency (EPA) to the State of New Jersey to implement and enforce additional source categories of the Standards of Performance for New Stationary Sources (NSPS) (40 CFR Part 60) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) (40 CFR Part 61) along with revisions and amendments to the NSPS and NESHAPS. This delegation was requested by the New Jersey Department of Environmental Protection (NJDEP). NSPS and NESHAPS are air pollution control requirements set under the Clean Air Act. This action informs all affected sources of the need to submit to the State, in addition to the EPA, all the information required pursuant to the delegated subparts. NSPS are applicable to certain categories of new air pollution sources. NESHAPS are applicable to certain categories of both new and existing sources.

EFFECTIVE DATE: This action is effective on April 28, 1986. These actions were applicable on June 24, 1985 and November 29, 1985.

FOR FURTHER INFORMATION CONTACT: Francis W. Giaccone, Chief, Air Compliance Branch, Air & Waste Management Division, EPA Region II Office, 26 Federal Plaza, New York, New York 10278, (212) 264–0627.

SUPPLEMENTARY INFORMATION: Sections 111(c) and 112(d) of the Clean Air Act directs the Administrator of the Environmental Protection Agency (EPA) to delegate EPA's authority to implement and enforce Standards of Performance for New Stationary Sources (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAPS) to any state which has submitted adequate procedures. Nevertheless, the Administrator still retains concurrent authority to enforce the standards following delegation of authority to a state.

VOL 51 ISS 81 APR 28 1986 UMI

On April 30, 1985 EPA notified the NJDEP of two newly promulgated NSPS along with the revisions and amendments to existing NSPS and NESHAPS promulgated between June 30, 1984 and December 1984. NJDEP accepted the two NSPS, and revisions and amendments to existing NSPS and NESHAPS in a letter dated June 19, 1985 from the Commissioner of the NJDEP to the EPA Regional Administrator, Region II. On November 21, 1985 the Commissioner of the NJDEP wrote to the EPA Regional Administrator to accept delegation of one additional NSPS and two NESHAPS. The following provides a complete listing of NSPS and NESHAPS delegated to the NJDEP. The new categories now being delegated by today's action are identified with an asterisk (*). All revisions and amendments to the existing NSPS and NESHAPS promulgated between June 30, 1984 and December 1984 are included here by reference.

EPA's Findings

EPA's determination that the delegation be approved is based on the Agency's review of the New Jersey Air Pollution Control Act, N.J.S.A. 26:2C; the State Public Records Act, N.J.S.A. 47:1A-4; and Title 7, Chapters 27 and 27B of the New Jersey Administrative Code. Based on that review, EPA determined that such delegation is, therefore, appropriate and so notified the Commissioner of the NJDEP, in a letter dated September 14, 1984. NJDEP subsequently accepted delegation of the additional categories in letters dated June 13, 1985 and November 21, 1985. This delegation of additional NSPS and NESHAPS is based on the conditions delineated in EPA's letter of February 19, 1985 to the Commissioner. Copies of all correspondence and EPA's delegation letter are available for public inspection in the Office of the Air Compliance Branch at the Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Consequences of EPA's Action

Effective June 24, 1985 and November 29, 1985, all correspondence, reports and notifications required by the delegated NSPS and NESHAPS should be submitted to the Office of the New Jersey Department of Environmental Protection, Enforcement Element, Division of Environmental Quality, CN-027, Trenton, New Jersey 08625.

The Office of Management and Budget has exempted this action from the requirements of section 3 of Executive Order 12991.

This Notice is issued under the authority of sections 111 and 112 of the Clean Air Act, as amended (42 U.S.C. 7411).

[FR Doc. 86-9434 Filed 4-25-86; 8:45 am]
BILLING CODE 6560-50-M

40 CFR Part 799

[OPTS-42033B; FRL-2963-8]

Cresols; Testing Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is issuing a final rule establishing testing requirements under section 4(a) of the Toxic Substances Control Act (TSCA) for manufacturers and processors of cresols. Cresols is a chemical category consisting of three cresol isomers; *ortho*-cresol (CAS No. 95-48-7), *meta*-cresol (CAS No. 108-39-4), and *para*-cresol (CAS No. 106-44-5). The testing requirements include (1) mutagenic effects studies (including tests for chromosomal aberrations, gene mutations, and cellular transformations) on specified cresol isomers, (2) a developmental toxicity study (teratogenicity) with each cresol isomer, and (3) a two-generation reproductive effects study with each cresol isomer.

DATES: In accordance with 40 CFR 23.5 (50 FR 7271; February 21, 1985), this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern ["daylight" or "standard" as appropriate] time on May 12, 1986. This rule shall become effective on June 11, 1986.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St., SW., Washington, DC 20460, Toll Free: (800-424-9065), In Washington, DC: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 11, 1983 (48 FR 31812), EPA issued a proposed rule for cresols under section 4(a) of TSCA to require testing of cresols for subchronic toxicity, mutagenicity, carcinogenicity, developmental toxicity (teratogenicity), reproductive effects, neurotoxicity, and skin sensitization. Public comments on the proposed rule have been received and reviewed. EPA is now promulgating a final test rule requiring that manufacturers and processors of cresols test these chemicals for mutagenic effects, developmental toxicity, and reproductive effects. In addition, in its Initial Report (42 FR 55026; October 12, 1977), the Interagency Testing Committee recommended that the cresols be tested not only for health effects, but also for environmental effects. However, EPA has decided not to require environmental effects testing because available information allows

VOL 51 ISS 81 AP 28 1986 UMI

EPA to reasonably predict that exposure of aquatic organisms to cresols should not cause chronic effects. Further, EPA is finalizing only a portion of the testing which was initially proposed. Based on the results of studies conducted in accordance with this rule, a second rule requiring chronic testing of the cresols may be issued later.

I. Introduction

This document is part of the overall implementation of section 4 of the Toxic Substances Control Act (TSCA, Pub. L. 94-469, 90 Stat. 2003 *et seq.* (15 U.S.C. 2601 *et seq.*)); which contains authority for EPA to require development of data on assessing the risks to health and the environment posed by exposure to particular chemical substances or mixtures.

Under section 4(a)(1) of TSCA, EPA must require testing of a chemical substance or mixture to develop health or environmental data if the Administrator finds that:

(A)(i) the manufacture, distribution in commerce, processing, use, or disposal of a chemical substance or mixture, or that any combination of such activities, may present an unreasonable risk of injury to health or the environment,

(ii) there are insufficient data and experience upon which the effects of such manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data; or

(B)(i) a chemical substance or mixture is or will be produced in substantial quantities, and (I) it enters or may reasonably be anticipated to enter the environment in substantial quantities or (II) there is or may be significant or substantial human exposure to such substance or mixture,

(ii) there are insufficient data and experience upon which the effects of the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on health or the environment can reasonably be determined or predicted, and

(iii) testing of such substance or mixture with respect to such effects is necessary to develop such data.

EPA uses a weight-of-evidence approach in making a section 4(a)(1)(A)(i) finding in which both exposure and toxicity information are considered to make the finding that the chemical may present an unreasonable risk. For the finding under section 4(a)(1)(B)(i), EPA considers only production, exposure, and release information to determine whether there is or may be substantial release. For the second finding under both sections 4(a)(1) (A) and (B), EPA examines toxicity and fate studies to determine whether existing information is adequate to reasonably determine or predict the effects of human exposure to, or environmental release of, the chemical. In making the third finding, that testing is necessary, EPA considers whether any ongoing testing will satisfy the information needs for the chemical and whether testing that the Agency might require would be capable of developing the necessary information.

For a more complete understanding of the statutory section 4 findings, see EPA's proposals on chloromethane and chlorinated benzenes (45 FR 48510; July 16, 1980) and dichloromethane, nitrobenzene, and 1,1,1-trichloroethane (46 FR 30300; June 5, 1981).

II. Background

A. Profile

Cresols ($CH_3C_6H_4OH$) is a chemical category of three isomers: *ortho*-cresol (CAS No. 95-48-7), *meta*-cresol, (CAS No. 108-39-4), and *para*-cresol (CAS No. 106-44-5). The cresols are available commercially as individual isomers and as isomer mixtures. They are also contained in cresylic acid, a mixture of cresols and other phenolic compounds. U.S. production of cresols and cresylic acid, or "cresylics" in 1984 was about 117.5 million pounds. Of this amount, 40.7 million pounds was *ortho*-cresol, and 76.8 million was all other cresols (Ref. 1). Imports of *ortho*-, *meta*-, *para*-, (*meta*, *para*)-cresol mixtures, and cresylic acid were 14.9 million pounds in 1984 (Ref. 2). Therefore, the total production and imports of cresols and cresylic acid in 1984 was about 132.4 million pounds.

Cresols are used as wire enamel solvents, automotive cleaners, and organic intermediates in manufacturing phenolic resins and phosphate esters. Additional uses of either individual isomers or mixtures are as follows: in the production of several herbicides and disinfectants; as cleaning compounds, degreasers, and antioxidants; and in ore flotation. The level 1 Economic Impact Analysis, which accompanied the proposed cresols rule, contains a detailed description of uses and manufacturing processes.

B. ITC Recommendations

The Interagency Testing Committee (ITC) designated cresols for priority consideration in its Initial Report, published in the Federal Register on October 12, 1977 (42 FR 55026). The ITC recommended that the Agency require industry to test cresols for the following health effects: carcinogenicity, mutagenicity, teratogenicity, and other chronic effects. The ITC also recommended testing for environmental effects, specifically chronic effects in fish and other aquatic organisms.

The ITC's recommendations were based on the large volume of cresols produced in the United States. It was estimated in the ITC's report that the U.S. production of cresols in 1975 was about 90 million pounds. The ITC reported an estimated annual environmental release of approximately 45 million pounds. In addition, the ITC was concerned that the wide use of cresols as industrial solvents could lead to substantial occupational exposure. The ITC cited the National Institute for Occupational Safety and Health's (NIOSH) estimates that roughly 2 million workers are exposed to cresols. The ITC also was concerned that cresols are used in many consumer products and that these uses could result in a large consumer and general population exposure.

C. Proposed Rule

EPA issued a proposed rule, published in the Federal Register of July 11, 1983 (48 FR 31812), which would require that cresols be tested for subchronic toxicity, mutagenic effects including chromosomal aberrations, gene mutations, and cellular transformations, carcinogenicity, developmental toxicity, reproductive effects, neurotoxicity, and skin sensitization.

EPA based its proposed testing requirements on the authority of section 4(a)(1)(B) of TSCA. The Agency found that each of the three cresol isomers is manufactured, processed, and used in substantial quantities, and that these uses may result in substantial human exposure. Furthermore, EPA found that between 600,000 and 1.2 million people are exposed to cresols each year via manufacturing, processing, and/or use activities. Finally, EPA found that there was a lack of data from which to reasonably determine or predict the various effects for which testing was proposed and that testing was necessary to develop such data.

In addition, EPA found that there is evidence of potential adverse human health risks for mutagenic and carcinogenic effects resulting from the manufacture, processing, and use activities associated with cresols. However, the existing data which support this belief of potential risk for these effects were found to be inadequate to reasonably predict or determine the effects of these exposures to cresols. Therefore, in its proposed rule EPA determined that the testing of cresols for mutagenicity and carcinogenicity can also be based upon section 4(a)(1)(A) of TSCA. EPA also found that it is necessary to develop such data.

In the proposed rule, EPA also presented its reasons for not proposing testing for environmental effects. While the release of cresols to the environment is high, the Agency has determined that adequate information exists which allows EPA to reasonably predict that exposure to cresols should not cause adverse chronic effects to aquatic species. The Agency made a preliminary judgment that no additional environmental effects testing is needed at this time and requested public comments from interested parties on this decision.

D. Studies Received or Intitiated After Proposed Rule

The proposed cresols test rule specified that *meta*- and *para*-cresol be tested in the sister chromatid exchange (SCE) assay to determine the potential for gene mutations. Testing of the *ortho*-cresol isomer was not required because of the availability of an adequately conducted SCE assay on that isomer. However, following publication of the proposed test rule, the Chemical Industry Institute of Toxicology conducted experiments to determine the genotoxic potential of *ortho*-, *meta*-, and *para*-cresol, both *in vitro* and *in vivo*, using the SCE assay as a measure of genotoxicity (Ref. 3).

The Agency has reviewed this study and has found it adequate to meet the needs of the Agency for this proposed testing requirement (Ref. 4). Therefore, the proposed requirement for *meta*- and *para*-cresol to be tested in an SCE assay is not included in this final test rule for cresols.

In addition, a major development in another EPA program has altered the makeup of the final cresols test rule.

The Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA), requires that appropriate treatment standards must be met prior to land disposal of hazardous wastes containing cited chemical substance (Ref. 5).

The effect of the 1984 amendments is to establish a statutory presumption against land disposal of hazardous wastes. The amendments further provide that statutory bans on land disposal will go into effect on specific dates unless EPA determines on a case-by-case basis that land disposal is protective of human health and the environment or, prior to land disposal, wastes have been treated to a level or by a method such that threats to human health or the environment are minimized.

In order to make such a determination, EPA is developing treatment standards for wastes, based on technology levels and screening levels for chemical constituents of wastes. Wastes will be prohibited from land disposal, unless the appropriate treatment standards have been observed. To develop these screening levels, EPA requires information on the toxicological effects and the environmental fate of the chemical substances contained in wastes subject to regulation under RCRA.

The chemicals involved have been placed on a prioritized schedule for consideration and analysis of the available data on each chemical. For the majority of substances subject to the HSWA, EPA found sufficient data on which to base standards. However, for some substances either insufficient information is available to establish these screening levels, or, while there may be sufficient information to establish such standards, confirmatory or supporting information is needed to verify any assumptions the Agency may have made in developing these standards.

Cresols are constituents of wastes for which treatment standards must be set by November 8, 1986. Following a review by the Agency, it was determined that insufficient reliable information was available for cresols. As a result either EPA must obtain usable data in order to set an appropriate toxicity reference dose (RfD), or certain waste containing cresols would be banned as of November 8, 1986 from all land disposal.

The subchronic toxicity studies included in EPA's proposed test rule for cresols would provide the initial data needed to establish RfDs for the cresols. However, the Agency concluded that this rulemaking to require this testing (which has been proposed under the former two-phase test rule process) could not be completed in time to obtain data within the schedule imposed by the HSWA. Therefore, EPA has initiated subchronic toxicity studies for each of the three cresol isomers and OTS will not include such testing in the final cresols test rule.

The proposed cresols test also included requirements that neurotoxicity tests be performed in conjunction with the subchronic studies. The neurotoxicity testing also will be conducted by EPA because of the efficiency of performing such tests jointly with the subchronic studies. Therefore, EPA will conduct neuropathology studies on the individual cresol isomers and an expanded clinical observation of the test animals during the 90-day subchronic study.

In summary, the following tests in the proposed test rule for cresols have either been adequately peformed or are in the process of being performed, and they meet the needs of the Agency for these testing requirements and are not included in the final test rule for cresols: sister chromatid exchange assays on *meta*- and *para*-cresol; 90-day subchronic toxicity studies on *ortho*-, *meta*-, and *para*-cresol; and neuropathology on *ortho*-, *meta*-, and *para*-cresol.

Finally, the National Toxicology Program (NTP) is considering certain health effects testing of cresols. NTP is planning to conduct range-finding and subchronic studies and may initiate bioassays on one or more cresol isomers.

III. Response to Public Comments

The comments received by the Agency in response to the proposed rule for cresols were from the Cresols Task Force (CTF), Natural Resources Defense Council (NRDC), Chemical Manufacturers Association (CMA), Sherwin-Williams, Merichem, Ciba-Geigy, and the American Industrial Health Council (AIHC). The comments from the organizations mentioned above were received in October 1983. Since that time some of the affiliations of the commenters have changed. In May 1984, the CMA established a Cresols Program Panel to address EPA's Section 4 activities on cresols. The Panel consists of the major U.S. manufacturers and importers of cresols and is a refashioning of the CTF. In addition, Sherwin-Williams sold its *para*-cresol production facility to PMC Specialties Group, a subsidiary of PMC of Sun Valley, California (Ref. 6). For this document the commenters will continue to be referred to as the CMA, CTF, and Sherwin-Williams.

The most extensive comments received were those of the CTF. In general, the CTF's comments encompass most of the other significant comments received from other interested parties. Because the CTF submission includes the same subject areas covered by other commenters, EPA will direct the majority of its responses to the CTF submission.

The Agency did not receive any comments which in the Agency's judgment rebutted the substantial production and substantial human findings for cresols. The major issues

BEST COPY AVAILABLE

VOL 51 ISS 81 AP 28 1986 UMI

identified during the comment period are discussed below.

A. Comments on Exposure Issues

1. *Substantial production.* Several of the commenters stated that the cresols industry has seen a decline in manufacturing and sales, and that it is a mature chemical industry. However, none of the commenters volunteered any revised production estimates.

In the proposed test rule EPA estimated that the annual U.S. production volume was 169 million pounds, with another 17 million pounds imported into the United States each year. The most current EPA estimate is that in 1984 the production and imports of cresols and cresylic acid totalled approximately 132.4 million pounds (Ref. 6). The Agency believes that regardless of whether the total annual production and importation of cresols is 132.4 or 186 million pounds, these estimates still support a finding under section 4(a)(1)(B) of substantial production.

2. *Substantial human exposure.* The CTF, Sherwin-Williams, and Merichem commented that the Agency does not have a basis for the finding of substantial human exposure. They contend that EPA has overestimated the number of people who are exposed to cresols in the workplace and that EPA did not consider the following: whether or not the exposure to cresols is significant, the long history of cresol manufacture and use without any reports of chronic toxicity, the fact that cresols occur naturally in the human body, and that cresols do not occur in any consumer product.

EPA estimated in the proposed rule that between 687,000 and 1.2 million people are potentially exposed to cresols. Human exposure to cresols may occur in facilities which manufacture and process cresols and from the use of products which contain cresols. These exposure estimates made by EPA are intended to represent the upper (1.2 million people) and lower (687,000 people) bound estimates of the total number of persons exposed to cresols. The lower bound estimate was established using data provided by the CTF and Conoco. The upper bound estimate was based on data from the National Occupational Hazard Survey (NOHS) conducted in 1972–74.

The CTF commented that EPA's exposure estimates are inflated. The CTF presented a revised estimate of 126,000 people exposed. The Task Force conducted an analysis of the NOHS exposure estimate and concluded that the NOHS data support an upper-bound actual exposure of 126,000 people or 10 percent of the NOHS estimate (Ref. 7). The CTF also concluded that the NIOSH survey was inaccurate and based on production and use information which was out of date.

The CTF commented that EPA's estimate that 627,000 people are exposed to cresols from the use of cresols in cleaning compounds is also too high. As a result of this belief, the CTF commissioned an occupational survey on this use which, according to the CTF, shows that exposures from this use are very low. The survey was conducted for the CTF by the Johns Hopkins University School of Hygiene and Public Health. The Johns Hopkins report, on the basis of a survey of the Baltimore, Maryland, area estimates that nationwide there are approximately 148,000 mechanics exposed to cresol-containing cleaning compounds (Ref. 7).

The CTF also conducted an analysis of the NOHS estimates based on printouts of the underlying data obtained from NIOSH. According to the CTF's analysis of the data, the NOHS estimates of 1.2 million people exposed to cresols is overstated by a factor of at least 10. The Task Force analysis concentrated on the 14 percent of the NOHS estimate derived from 33,063 actual and tradename observations. The CTF criticized the accuracy of the NOHS numbers. It stated that a portion of the NOHS figures was based on products that may or may not contain cresols and some in which cresols are not used. As a result of its review of the NOHS survey, CTR concluded that the upper-bound limit of actual exposure is 126,000 people.

In addition, the occupational survey conducted by Johns Hopkins for the CTF only evaluates one user group, i.e., automobile mechanics exposed to cresol-containing cleaning compounds. In this survey, the estimates of workers exposed was 148,000. This estimate for only one user group is higher than the CTF's estimate for the total exposure based on CTF's analysis of the 1972–1974 NOHS survey. It is reasonable to assume that if 148,00 workers are estimated to be exposed during one use practice, then a much larger number of people would be exposed if all of the other uses for cresols were considered collectively.

Furthermore, the industry comments pointed out that cresols are not found in any end-use consumer products, but only in industrial products. EPA is aware of this; however, the uses in the automobile industry and wire enamel market and the use of cresols in strippers, cleaners, and degreases are such that substantial numbers of people are potentially exposed at the workplace.

In 1978, Conoco Chemicals Co. estimated the number of workers potentially exposed to cresols in truck and automobile cleaning compounds (Ref. 8). Based on upperbound estimates of 1978 market penetration of cresols-based cleaners, Conoco estimated that 627,000 mechanics may be exposed to cresols in these products. This use involves using cresol-based cleaning compounds in a tank-dipping process used to clean large items, usually automobile carburetors. While this use is still very substantial and results in high occupational exposure, the cresols industry emphasizes that new techniques have been developed which have minimized the exposure during this particular use practice. A new dipping product called an immersion cleaner, manufactured by Safety Kleen Corp., now used in garages is essentially enclosed and results in limited exposure. This method contracts with the open tank dipping used in the past. The industry contends that this new process has roughly half of the market for cresol-based cleaning compounds.

However, even if Conoco's 1978 estimate were halved, the resulting exposure estimates would still be over 300,000 people potentially exposed during this use practice.

In conclusion, EPA agrees with the industry comments on the cresols proposed rule that the estimate of 600,000 to 1.2 million people exposed is overstated. However, if EPA accepts the industry-generated estimate of 126,000 people exposed during manufacturing and processing and the estimate of 300,000 people, which is half of Conoco's original 1978 estimate, approximately 126,000 to 300,000 individuals exposed to cresols in the workplace results. The Agency believes that this estimate still satisfactorily meets the exposure criteria needed to permit it to make a section 4(a)(1)(B) finding, i.e., the chemical is produced in substantial quantities which may result in substantial human exposure.

3. *Inadvertant exposure.* The CTF commented that cresols are found in the human intestine as a natural product of the metabolism of tyrosine, which is one of the amino acids present in the body's protein. It further contends that cresols are ubiquitous in the natural environment and that industrial releases of cresols are minor when compared to the estimated annual volume released by natural sources. The Task Force suggests that these factors undermine the validity of an exposure-based finding under TSCA section 4(a)(1)(B).

However, it is only *para*-cresol which naturally occurs in the human body. The CTF also has ignored the relationship between cumulative multimedia exposure and threshold toxicity levels. Total exposure, intake, and subsequent uptake of a chemical must be considered from all sources. Total additive uptake must be analyzed in terms of dose/response relationships and threshold toxic levels for chronic and acute toxic effects. Natural occurrence does not negate the effect of higher anthropogenic or cumulative exposures eliciting toxic responses. Therefore, a risk assessment or an assessment for further testing must consider cumulative multimedia exposure. The Agency believes that any additional exposure to cresols may be cause for concern, presenting an additive effect, i.e., increased burden, on the body. An added loading of *para*-cresol may possibly present a cumulative exposure and therefore an unknown risk. The Agency has determined that this risk should be investigated.

4. *Levels of exposure.* The CTF, Merichem, and Sherwin-Williams all included comments in their submissions which concerned the levels of the cresols to which people are potentially exposed. All of the comments, in one way or another, stated that any exposures that may occur are so low that there is not cause for undue concern. The CTF states that "* * * 8-hour exposures of as high as 1 ppm are sustained only by a very few of the most highly exposed workers in cresols manufacturing facilities" (Ref. 7). However, it is also the workers who are exposed for long periods of time at low exposure levels with whom the Agency is concerned. Little information is known on the health risks associated with this type of exposure profile. Even though the industry commented that no chronic health problems have been noted among persons exposed to cresols in the past, there have been no studies, either clinical health or epidemiological, which prove or disprove this premise. Therefore, in order to reasonably determine or predict the risks to workers who are exposed to cresols for a few hours a day over several years, the Agency believes that chronic and other health effects information are needed.

B. Comments on Persons Subject to Testing

1. *Producers of synthetic cresols.* The Sherwin-Williams Co. commented that since it is reported to be the only domestic producer of *para*-cresol, used only in products where the *para*-cresol is consumed in the manufacturing process, it should not be subject to the final rule for cresols. It contends that the Agency cannot support a finding of substantial human exposure for *para*-cresol.

The Agency's finding of substantial occupational exposure to cresols is based on potential widespread exposures both to the individual isomers and to countless mixtures. Cresols are sold commercially in varying mixtures of the three isomers, two isomers, and single isomer, in combination with many other chemical components. Potential exposures in the workplace are to all three of the isomers as constituents of those mixtures, as well as to the pure isomers. *Para*-cresol is a component of these mixtures and hence, a component of the industrial products in which the cresol mixtures are used. It is on this basis that *para*-cresol manufacturers are subject to this rule.

Furthermore, it is the Agency's opinion that Sherwin-Williams manufactures *para*-cresol in substantial quantities and that the potential for widespread occupational exposure during the manufacturing, distribution, loading, shipping, sampling, processing, and/or disposal of *para*-cresol is high.

Therefore, the Agency does not agree with Sherwin-Williams and has determined that Sherwin-Williams is a manufacturer of cresols as defined under sections 3 and 4 of TSCA. The Agency has made no differentiation between different methods of cresols production.

2. *Processors of cresols.* The Ciba-Geigy Co. comments addressed the role of cresols processors in the conduct of and reimbursement for tests required in the final rule. Ciba-Geigy believes that all processors should be exempt from conducting tests and sharing costs. Further, it stated that if processors are to be included, then the processors should be divided into two groups, those who use cresols as raw material to form totally different chemical products and those "* * * who merely [mix] them and [pass] the resulting formulations on to a wider public" * * * "Ciba-Geigy recommends that processors who use cresols solely as raw materials to form new chemical products be exempt from the burden of testing and/or data reimbursement" (Ref. 9).

EPA does not agree that it should differentiate between types of processors in the section 4 test rule process. The definition of "process" in section 3(10) and the language of section 4(b)(3)(B) do not make a distinction such that the responsibilities of the two types of processors [as described by Ciba-Geigy) should differ in any way. Ciba-Geigy is a processor as defined under section of TSCA because it prepares cresols, after its manufacture, for distribution in commerce. However, under EPA's section 4 procedural rule (50 FR 20652) processors would be required to perform testing or be subject to reimbursement only if manufacturers fail to perform testing (See Units IVD and E).

C. Comments on the Economic Impact of the Cresols Test Rule

Several of the public comments submitted in response to the cresols proposed test rule addressed the adverse economic impact which the test rule would have on the cresols industry. The industry comments generally focused on a belief that EPA had underestimated the costs of testing and on an analysis of the price sensitivity of and competition within the cresol marketplace. They contended that the cresols industry is a mature chemical industry which has seen declining sales in recent years. In addition, they argued that EPA severely underestimated the real economic effects of the proposed test rule and that the testing costs on an annualized unit cost basis are not minor, as the Agency stated, but would impact heavily on the industry.

When the proposed cresols test rule was published (July 1983) the Agency's economic analysis was based on the best available information. The Agency attempted to factor in all of the variables which must be considered in conducting an economic assessment of one market of the vast chemical industry. As a result of both industry comments on the proposed rule and the Agency's independent acknowledgment that the economic variables within the cresols industry had changed, EPA conducted a supplemental economic analysis of the proposed cresol test rule program (Ref. 10).

This supplemental report factored in revised test costs and new economic data including more detailed and current information on the affected industry. The conclusions reached in the Agency's revised economic analysis indicate that the potential for adverse economic effects on the cresols-producing industry due to the estimated testing costs contained in the proposed rule was high. Therefore, the Agency is in general agreement with most of the comments about the economic impact of the proposed cresols test rule.

TSCA only requires that EPA acknowledge the existence of a potential economic impact [(TSCA sections 2 (b)(3) and (c), 4(B)(1)(C), and 24(a)(1))], not necessarily take any action because of it. However, the Agency believes that an alternative testing approach can mitigate the

VOL 51 ISS 81 AP 28 1986 UMI

adverse economic impact and also obtain the health effects data which the Agency has determined are necessary. This alternative approach is adopted in this final cresols test rule.

Cresols testing will be conducted in two tiers. At this time, selected mutagenicity tests, developmental toxicity studies, and reproductive effects studies will be finalized in this rule. At the conclusion of all of the testing required in the first test rule there will be an Agency decision point at which time a review of the collective data on cresols will occur. This collective data will include, but not be limited to, the tests finalized in this rule, as well as any health effects testing conducted by EPA and NTP.

At the same time, the Agency will publish in the Federal Register, notification that the testing required in the first cresol test rule has been completed and that the Agency has received all of the data. The Federal Register notice will announce the opening of a short public comment period during which time interested parties can review the data and submit comments as to what, if any, additional testing should be required for cresols. This review will determine the scope of any additional higher-tier testing and the chemical substance(s) which should be tested.

Following that decision, EPA may promulgate a second final test rule which could include 2-year oncogenicity bioassay(s) and upper-tier mutagenicity assay(s) on *ortho*-cresol, *meta*-cresol, and/or *para*-cresol. In addition, neurotoxicity testing may be included in the second final test rule for cresols.

As explained in unit II.D. of this document, EPA is conducting 90-day subchronic toxicity studies for each of the cresol isomers and has included in this testing expanded clinical observations of neurobehavioral characteristics and neuropathological examinations. Therefore, the remaining two neurotoxicity studies initially proposed for cresols, i.e., the functional observation battery and motor activity test, will not be conducted in the first final test rule.

However, if the results of the subchronic and neurotoxicity studies conducted by EPA indicate that the effect of cresols on neurobehavior and neuromotor function is a potential concern, then these two assays will be finalized as part of the second final rule for cresols. In the second final rule, if one is warranted, the neurotoxicity testing could be added to any oncogenicity bioassay as a satellite dose group.

Therefore, the upper-tier definitive health effects studies (oncogenicity and mutagenicity) and neurotoxicity studies (functional observation and motor activity) which have already been set forth in the proposed cresols rule (July 11, 1983; 48 FR 31812), will continue in a proposed status to be finalized at a later date should the Agency determine that a second final test rule is necessary to sufficiently characterize the health effects concerns of cresols.

EPA believes that this phased approach to the testing required in the proposed cresols test rule is warranted because it will reduce the possibility of adverse economic impact on the cresols industry resulting from the proposed cresols test rule. Further, and most importantly, the Agency believes that the health effects testing which was initially proposed in the cresols proposed rule will ultimately be fully addressed in this tiered test rule approach (See Unit V for Economic Impact of Final Rule).

D. Comments on Health Effects Testing

1. *Route of administration of test substance.* The proposed test rule required that inhalation be the route of administration of the test substance in the health effects studies (subchronic toxicity, oncogenicity, two-generation reproductive effects) for cresols. The CTF comments recommended that this be reconsidered by the Agency and that ingestion rather than inhalation be used. The cresols manufacturers contend that existing acute data, using oral, dermal, and inhalation routes, do not indicate that cresols induce any unique toxicity by the inhalation route. Further, CTF contends that existing data on cresols indicate that the target organs are systemic (CNS, liver, kidney) and that these organs are targets regardless of the route of administration of the test substance. It is the commenters' conjecture that EPA is, or should be, interested in systemic effects from long-term, low level exposures, and that these effects will be picked up in the animal testing regardless of the route of exposure.

The Agency has considered the CTF comments. While the Agency does not necessarily agree with all of the scientific rationale given by the CTF for altering the route of administration, EPA will allow the change from inhalation to ingestion. EPA believes that the gavage subchronic study being performed by the Agency will give information which will enable the Agency to make the necessary risk evaluations for cresols. Therefore, the Agency agrees to change the route of administration from inhalation to ingestion for the developmental toxicity and reproduction and fertility effects studies.

2. *Test substance.* The CTF commented that the health effects testing should be performed on an equal mixture of the three cresol isomers, i.e., ⅓ *ortho*-cresol, ⅓ *meta-cresol, and* ⅓ *para*-cresol. The industry believes that exposures to workers are more likely to be from a trimeric mixture than from individual isomers. CTF states that the single isomer use of cresol is generally as feedstock in chemical manufacture. However, while these statements are probably the case during the manufacture of cresols, cresols are sold commercially as mixtures of three isomers in a myriad of varying concentrations, mixtures of two isomers, particularly *meta*- and *para*-cresol, as single isomers, and in the commercial product cresylic acid. The Agency believes that widespread exposures are to both individual isomers and countless mixtures. It is because of the production of such a variety of mixtures that the Agency decided to test each isomer separately. There is no "standard" mixture to which people are more predominantly exposed. In addition, the Agency believes that each of the isomers is produced in such substantial quantities that each warrants individual investigations. Finally, the Agency believes that the most useful data will be obtained by using the purest available form of the chemical being studied. Therefore, the Agency disagrees with the industry comments and has determined that the health effects testing will be conducted with specified individual cresol isomers.

3. *Finding of unreasonable risk.* The CTF comments that there is no basis for a finding of potential unreasonable risk under section 4(a)(1)(A) of TSCA for mutagenicity and carcinogenicity. It states that the Agency's finding is only based on questionable and/or flawed studies. Most of the mutagenicity studies in question were conducted for the cresols industry consortium and submitted as a part of their public comments in response to the ITC's initial testing recommendations for cresols (42 FR 55026; October 12, 1977).

The Agency has reviewed the tests and considers that the positive results seen in several of the short-term mutagenicity tests are valid and significant. In addition, the section 4(a)(1)(A) finding of "may present an unreasonable risk" for oncogenicity was based on evidence which suggests that the three cresol isomers have a capacity for promoting the appearance of skin tumors in mice.

However, as explained in unit III. C. of this preamble, the Agency is not requiring oncogenic testing for cresols at this time. However, a finding of potential unreasonable risk for mutagenic effects remains a valid basis for the mutagenicity testing required in this rule.

4. *Neurotoxicity testing.* The CTF commented on the neurotoxicity tests which were proposed in the cresols rule. While CTF apparently agreed with the need for some neurotoxicity testing, it questioned the choice of tests. In addition, it stated that a general screening procedure should be conducted before considering chronic low-level neurotoxicity testing. The most critical of the specific comments had to do with "weak basis" for requiring testing and the inappropriateness of neurotoxicity testing as standard operating procedure for these types of chemicals.

The Agency agrees with the CTF that neurotoxicity testing should begin with a screen, and that was the approach the Agency proposed in the test rule. The proposed testing is the neurotoxicity screening procedure. It is the Agency's general policy in implementing TSCA section 4 to require these three neurotoxicity tests, i.e., neuropathology, motor activity, and functional observation battery, in test rules based on a finding of substantial production and exposure.

However, because EPA is conducting a portion of the proposed neurotoxicity studies, EPA is not requiring that any neurotoxicity studies be performed in this final rule (see units II.D. and III.C. of this document). However, based on the results of the neurotoxicity evaluations conducted by EPA, the Agency may require that the functional observation battery and motor activity evaluations, which were proposed for cresols, be included in the second final test rule.

5. *Tiered mutagenicity scheme.* The CTF, CMA, AIHC, and NRDC submitted comments on the proposed mutagenicity testing requirements for cresols. Some of the issues covered were related to the choice of tests, the automatic triggers to higher level mutagenicity tests and oncogenicity testing, and mutagenicity as a regulatable endpoint. The Agency's response to a variety of public comments on this approach, the test sequences, and the assays (and triggers for oncogenicity testing) contained within them may be found in the final Phase I test rule for the C_9 aromatic hydrocarbon fraction (C_9) (50 FR 20662; May 17, 1985) and the final Phase I test rule for mesityl oxide (MO) (50 FR 51857; December 20, 1985).

A. *Automatic triggers for chronic oncogenicity bioassay.* As discussed in the final Phase I test rules for C_9 and MO, the Agency believes that the use of sequences of tiered tests for mutagenicity testing and the use of automatic triggers to require chronic oncogenicity bioassays based on the results of certain mutagenicity assays are consistent with both current scientific knowledge and the regulatory approach to chemical testing established under section 4 of TSCA. Existing data show a strong correlation between positive results in certain mutagenicity tests and positive results in animal chronic oncogenicity bioassays for a large number of substances tested in both types of systems. Thus, positive results in one or more of these mutagenicity assays provide a basis for concluding that the substance may be an oncogen and, in conjuction with evidence of both an active chemical structure and the potential for human exposure to the substance, that such exposure may present an unreasonable risk of oncogenicity. If all of these mutagenicity tests yield negative results, the likelihood of the specified chemical being oncogenic is small and the chronic bioassay will not be required. Conversely, if any one of these trigger tests is positive, potential oncogenicity of a chemical is suggested and a chronic bioassay is essential to confirm or deny that potential and provide a basis for judging what oncogenic risk exposure to the specific chemical may present.

However, in view of the potential adverse economic impact of the proposed cresols rule on the cresols-producing industry (see unit III. C. of this preamble), the Agency has altered its approach in the final cresols test rule. Because EPA is now using a two-tiered test rule, there are no longer automatic triggers to the oncogenicity bioassays or upper-tier mutagenicity assays, i.e., mouse specific locus assay and heritable translocation assay. These higher-tier, more definitive tests will not be addressed in this document. A second test rule may require 2-year bioassay(s) and upper-tier mutagenicity assay(s), as well as possible neurotoxicity testing.

b. *Mutagenicity as a regulatable endpoint.* While the industry commenters agreed that appropriate mutagenicity assays can be used for assessing carcinogenic potential, they objected to the use of the more elaborate tests to assess mutagenic risk as a separate endpoint. They objected to EPA's apparent use of rigid inflexible testing schemes in favor of a tiered approach to permit informed scientific judgment.

The sequence of tiered tests employed by EPA in assessing the mutagenic potential of chemical substances, which are required in this final Phase I test rule for specific cresol isomers, were previously described in the proposed test rule issued by the Agency for cresols (48 FR 31812; July 11, 1983), and are more completely described in the final Phase I test rule for C_9 and MO. Although these general test sequences are usually employed, the Agency ultimately specifies the required mutagenicity test for each specific chemical substance on a case-by-case basis. In the case of the cresol isomers, many of the isomers have already been tested in several mutagenicity assays. The cresols mutagenicity scheme has been designed so that only selected isomers will be tested in specific test systems.

The Agency feels that there is a consensus in the scientific community on the need for identifying mammalian mutagens. While it is recognized that there is, as yet, no generally accepted single methodology for estimating human risk from mutagenic agents, it is the Agency's view that appropriate methodologies for testing do exist and are valid. Therefore, the Agency concludes that it is appropriate at this time to obtain mutagenicity data on cresols to determine whether additional upper-tier mutagenicity assays, i.e., mouse specific locus and/or heritable translocations, are necessary for one or more of the three cresol isomers. Any additional mutagenicity testing will be required in a subsequent final rule for cresols.

Even though the upper-tier mutagenicity tests and the 2-year bioassays will not be automatically triggered as a result of first and second tiers of mutagenicity testing, the first and second tiers will remain as proposed, except for the deletion of the SCE assays as discussed in Unit II.D. of this preamble. EPA believes the use of automatic triggers between these first tiers is suitable. It should be noted that this does not exclude the public from requesting modification in the test program. Provisions are available under section 21 of TSCA for the public to petition EPA at any time to amend a rule under section 4.

6. *Other health effects testing issues.* In the cresols proposed rule, the Agency included testing each cresol isomer for skin sensitization. The purpose of this evaluation is to identify the effects, and hence possible hazard, to a population repeatedly exposed to a test substance.

After reflecting upon the inclusion of this test in the proposed rule, EPA has

VOL 51 ISS 81 AP 28 1986 UMI

decided to delete the skin sensitization study from the final cresols rule. The Agency has determined that because of the highly corrosive nature of cresols to the skin, little additional useful information would be derived from conducting a sensitization study with cresols.

E. Comments on Environmental Effects Testing

The ITC recommended that cresols be tested for chronic effects in fish and other aquatic organisms. The Agency believes that there is substantial release and exposure to the environment by cresols. However, the Agency made a preliminary decision in the proposed test rule and concluded that there is sufficient information to reasonably predict that cresols do not pose a chronic aquatic toxicity hazard. This information includes ambient concentrations predicted through computer models, a large quantity of acute toxicity data, monitoring data, and known bioconcentration, biodegradation, and persistence values. The Agency acknowledges that there is no existing chronic toxicity data for cresols, but believes that this combined information allows EPA to reasonably predict whether or not exposure of aquatic organisms to cresols should cause chronic effects.

However, EPA was aware that the information on which the Agency made its preliminary decisions is open to many different interpretations. For this reason, EPA specifically requested in the cresols rule that interested parties submit comments on this issue.

The Agency received comments from both NRDC and CTF. NRDC commented that enough consideration was not given "* * * to possible subtle or chronic ecological consequences of discharges during lapses of treatment or to discharges into other bodies of water." In addition, NRDC was concerned that "* * * cresols are acidic compounds and could affect the chemistry of sensitive locales when discharged in large quantities." Therefore, NRDC states that environmental effects testing should be initiated for cresols.

EPA, in response to NRDC's comments, re-reviewed all of the information from which it made the preliminary decision not to test cresols for environmental effects. The Agency believes that the environmental effects data and analyses which exist for cresols are adequate to permit the Agency to make an evaluation of any potential chronic effects which might result from exposure to cresols. The information on which the Agency bases its decision not to require environmental effects testing is extensive, and when properly analyzed and interpreted, can provide information on the potential of a chemical to cause chronic effects. Further, all of the available acute, monitoring, and modeling data, in conjunction with data on the transport and fate of the chemical in an aquatic habitat, provide an important segment of the scientific basis for assessing the risk resulting from the release of that chemical into the environment.

The CTF comments support the Agency's preliminary decision on the environmental effects testing. CTF contends that cresols degrade rapidly in the environment and that concentrations of cresols in the water, even under worst-case conditions, would not approach the levels that would pose a chronic aquatic toxicity hazard.

The Agency has reviewed both sets of comments and has found no basis to alter its initial environmental testing decision. Therefore, no additional environmental effects testing on cresols will be required at this time. The Agency believes that substantial information is available to the Agency to enable it to make an assessment of risk for cresols on aquatic organisms. In sections 4(a)(1)(A)(ii) and (B)(ii) of TSCA, the Agency must find that,

> there are insufficient data and experience upon which the effects to the manufacture, distribution in commerce, processing, use, or disposal of such substance or mixture or of any combination of such activities on * * * the environment can reasonably be determined or predicted.

EPA does not believe that it can make that finding for cresols for environmental effects testing at this time.

F. Comments on Protocol Submission and the Phased Test Rule Process

The NRDC submitted comments concerning the need for requiring validated protocols and recommended modification of the Agency's two-phase test rule process. These comments were considered and addressed in both the final Phase I test rule for the C_9 aromatic hydrocarbon fraction (50 FR 20662, 20666–20667; May 17, 1985) and the final rule on Test Rule Development and Exemption Procedures, published in the Federal Register of October 10, 1984 (49 FR 39774).

EPA shares NRDC's desire that test rules should be completed as rapidly as possible, and the Agency has decided to modify the test rule development process for cresols. Elsewhere in this issue of the Federal Register, EPA is proposing certain TSCA guidelines as the required test standards for cresols. The Agency is also proposing that the test data from each required study be submitted within certain time frames. By taking this action, EPA believes that testing will be initiated more expeditiously than would occur if the normal two-phase process were followed (see Unit IV.E., below).

IV. Final Test Rule for Cresols

A. Findings

EPA is basing the final testing requirements for cresols on the authority of section 4(a)(1)(B) of TSCA. EPA finds that each of the three cresol isomers is manufactured, processed, and used in substantial quantities that may result in substantial human exposure. Furthermore, EPA finds that there are insufficient data available to either reasonably determine or predict the result of this exposure in the areas of mutagenic, developmental toxicity, and reproductive effects. These findings are based on the following information:

1. There are substantial amounts of cresols produced in or imported into the United States each year. It is estimated that production and imports of cresols totalled 132.4 million pounds in 1984.

2. Estimates indicate that between 148,000 and 300,000 people are exposed to cresols each year via manufacturing, processing, and/or use activities.

3. EPA finds that there are insufficient data on all of these cited human health effects from which to reasonably determine or predict the result of exposure to cresols and that testing of cresols for these effects is necessary to develop such data.

4. EPA does not believe that the final rule will result in a loss to society of the benefits of cresols because the Agency's economic evaluation has shown that the economic impact of testing these substances will be minimal.

In addition, EPA has found that (a) there is evidence of potential unreasonable human health risks from mutagenic effects resulting from the manufacture, processing, and use activities associated with cresols, and that while there are existing data which support this belief with respect to these effects, (b) these existing data are inadequate to reasonably predict or determine the effects of these exposures to cresols, and (c) testing is necessary for these effects. Therefore, EPA believes that requiring testing of cresols for mutagenicity can also be based upon section 4(a)(1)(A) of TSCA.

B. Required Testing

EPA is requiring that each of the three cresol isomers, *ortho*-cresol, *meta*-cresol, and *para*-cresol, shall be tested in the following health effects studies: (1) Mutagenic effects studies (including tests for chromosomal aberrations, gene mutations, and cellular transformations on specified cresol isomers), (2) developmental toxicity, and (3) two-generation reproductive effects studies.

C. Test Substance

EPA is requiring that *ortho*-cresol, *meta*-cresol, and *para*-cresol of at least 99 percent purity be used as the test substances because this grade is readily available and will best allow EPA to assess the hazards presented by the various cresol isomers.

D. Persons Required to Test

Section 4(b)(3)(B) specifies that the activities for which the Agency makes section 4(a) findings (manufacture, processing, distribution, use and/or disposal) determine who bears the responsibility for testing. Manufacturers are required to test if the findings are based on manufacturing ("manufacture" is defined in section 3(7) of TSCA to include "import"). Processors are required to test if the findings are based on processing. Both manufacturers and processors are required to test if the exposures occur during use, distribution, or disposal. Because EPA has found that the manufacturing, processing, use, and distribution in commerce of *ortho*-, *meta*-, and/or *para*-cresol give rise to potential substantial exposures, EPA is proposing that persons who manufacture or process, or who intend to manufacture or process, any of the cresol isomers at any time from the effective date of this test rule to the end of the reimbursement period be subject to the rule's requirements for that isomer. The end of the reimbursement period ordinarily will be 5 years after the submission of the last final report required under the test rule. As discussed in the Agency's test rule development and exemption procedures (40 CFR Part 790), EPA expects that manufacturers will conduct testing and that processors will ordinarily be exempted from testing.

Because TSCA contains provisions to avoid duplicative testing, not every person subject to this rule must individually conduct testing. Section 4(b)(3)(A) of TSCA provides that EPA may permit two or more manufacturers or processors who are subject to the rule to designate one such person or a qualified third person to conduct the tests and submit data on their behalf. Section 4(c) provides that any person required to test may apply to EPA for an exemption from that requirement.

E. Test Rule Development and Exemptions

Elsewhere in this issue of the Federal Register, the Agency is proposing that certain TSCA guidelines be utilized as test standards for the development of data under this rule for *ortho*-, *meta*-, and *para*-cresol. As discussed in that notice and in previous notices (50 FR 20652; May 17, 1985), EPA has reviewed the method for development of test rules and has decided that for most section 4 rulemakings, the Agency will utilize single-phase rulemaking. In light of this decision, EPA has reevaluated the process for developing test standards for section 4 rulemakings initiated under a two-phase process and has determined that for certain of these two-phase rules, TSCA test guidelines are generally available for promulgation as relevant test standards. EPA has decided that where TSCA test guidelines are available, the Agency in most cases will propose the relevant guidelines as the test standards for those rules.

EPA believes that, in line with its commitment to expedite the section 4 rulemaking process, it is appropriate to propose the applicable TSCA test guidelines as test standards at the same time as a Phase I final test rule is issued. With regard to the rulemaking for *ortho*-, *meta*-, and *para*-cresol, TSCA test guidelines are available for the testing requirements included in this Phase I final rule. Thus, in the accompanying notice the Agency is proposing these TSCA guidelines as test standards.

The public, including the manufacturers and processors subject to the Phase I rule, will have an opportunity to comment on the use of the TSCA test guidelines or to propose alternate test methods. The Agency will review the submitted comments and will modify the TSCA test guidelines, where appropriate, when the test standards are promulgated.

During the development of a test rule under the two-phase process, persons subject to the Phase I final rule are normally required to submit proposed study plans within 90 days after the effective date of the Phase I final rule (see 40 CFR 790.30(a)(2), published in the Federal Register of May 17, 1985 (50 FR 20658)). However, because EPA is proposing applicable TSCA test guidelines as the test standards for the studies required by this Phase I final rule, persons subject to the rule, i.e., manufacturers and processors of *ortho*-, *meta*-, and/or *para*-cresol, are not required to submit proposed study plans for the required testing. Persons subject to this rule, however, are still required to submit notices of intent to test or exemption applications in accordance with 40 CFR 790.25, published in the Federal Register of May 17, 1985 (50 FR 20657). For this rule, once the test standards are promulgated, persons who have notified EPA of their intent to test must submit study plans (which adhere to the promulgated test standards) no later than 30 days before the initiation of each required test.

Processors of *ortho*-, *meta*-, and/or *para*-cresol subject to this rule, unless they are also manufacturers, will not be required to submit letters of intent, exemption applications, or study plans (before testing is initiated) unless manufacturers fail to sponsor the required tests. The basis for this decision is that manufacturers are expected to pass an appropriate portion of the test costs on to processors through the pricing of products containing *ortho*-, *meta*-, and/or *para*-cresol.

EPA's final regulations for the issuance of exemptions from testing requirements are in 40 CFR Part 790. In accordance with those regulations, any manufacturer or processor subject to this Phase I test rule may submit an application to EPA for an exemption from conducting any or all of the tests required under this rule. If manufacturers perform all the required testing, processors will be granted exemptions automatically without having to file applications.

Because persons subject to this rule for cresols are not required to submit proposed study plans for approval, EPA will grant conditional exemptions under this rule following EPA's receipt of a letter of intent to conduct the required tests rather than after receipt and approvals of a study plan. Notice of EPA's adoption of the final test standards and deadlines will be announced in a final Phase II test rule.

F. Repprting Requirements

EPA is requiring that all data developed under this rule be reported in accordance with the EPA Good Laboratory Practice (GLP) standards pursuant to 40 CFR Part 792.

EPA is required by TSCA section 4(b)(1)(C) to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing these deadlines elsewhere in this issue of the Federal Register. These proposed data submission deadlines are open for public comment and may be modified, where appropriate, when the final Phase II test rule is promulgated.

TSCA section 12(b) requires that persons who export or intend to export

VOL 51 ISS 81 AP 28 1986 UMI

to a foreign country any *ortho-*, *meta-*, and/or *para*-cresol, subject to the testing requirements of this rule, notify EPA of such exportation or intent to export. While the results of required testing may not be available for some time, a notice to the foreign government about the export of such substances subject to test rules serves to alert it to the Agency's concern about the substances. It gives the government the opportunity to request such data that the Agency may currently possess plus whatever data may become available as a result of testing activities. Thus, upon the effective date of this rule, persons who export or intend to export *ortho-*, *meta-*, and/or *para*-cresol must submit notices to the Agency pursuant to TSCA section 12(b)(1) and 40 CFR Part 707. For additional information, see the Federal Register of November 19, 1984 (49 FR 45561).

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will announce the receipt within 15 days in the Federal Register as required by section 4(d). Test data received pursuant to this rule will be made available for public inspection by any person except in those cases where the Agency determines that confidential treatment must be accorded pursuant to section 14(b) of TSCA.

G. Enforcement Provisions

The Agency considers failure to comply with any aspect of a section 4 rule to be a violation of section 15 of TSCA. Section 15(1) of TSCA makes it unlawful for any person to fail or refuse to comply with any rule or order issued under section 4. Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to: (1) Establish or maintain records or (2) submit reports, notices, or other records required by the Act or any regulations issued under TSCA.

Additionally, TSCA section 15(4) makes it unlawful for any person to fail or refuse to permit entry or inspection as required by section 11. Section 11 applies to any "establishment, facility, or other premises in which chemical substances or mixtures are manufactured, processed, stored, or held before or after their distribution in commerce * * *" The Agency considers a testing facility to be a place where the chemical is held or stored and, therefore, subject to inspection. Laboratory audits and/or inspections will be conducted periodically in accordance with procedures outlined in TSCA section 11 by designated representatives of the EPA for the purpose of determining compliance with the final rule for *ortho-*, *meta-*, and *para-cresol*. These inspections may be conducted for purposes which include verification that testing has begun, that schedules are being met, that reports accurately reflect the underlying raw data and interpretations and evaluations thereof, and that the studies are being conducted according to EPA GLP standards and the test standards established in the second phase of this rulemaking.

EPA's authority to inspect a testing facility also derives from section 4(b)(1) of TSCA, which directs EPA to promulgate standards for the development of test data. These standards are defined in section 3(12)(B) of TSCA to include those requirements necessary to assure that data developed under test rules are reliable and adequate, and such other requirements as are necessary to provide such assurance. The Agency maintains that laboratory inspections are necessary to provide this assurance.

Violators of TSCA are subject to criminal and civil liability. Persons who submit materially misleading or false information in connection with the requirement of any provision of this rule may be subject to penalties calculated as if they had never submitted their data. Under the penalty provisions of section 16 of TSCA, and person who violates section 15 could be subject to a civil penalty of up to $25,000 per day for each violation. Intentional violations could lead to the imposition of criminal penalties up to $25,000 for each day of violation and imprisonment for up to 1 year. Other remedies are available to EPA under sections 7 and 17 of TSCA, such as seeking an injunction to restrain violations of TSCA section 4.

Individuals as well as corporations could be subject to enforcement actions. Sections 15 and 16 of TSCA apply to "any person" who violates various provisions of TSCA. EPA may, at its discretion, proceed against individuals as well as companies themselves. In particular this includes individuals who report false information or who cause it to be reported. In addition, the submission of false, fictitious, or fraudulent statements is a violation under 18 U.S.C. 1001.

V. Economic Analysis of Final Test Rule

To assess the economic impact of this rule, EPA has prepared an economic analysis that evaluates the potential for significant economic impacts on the industry as a result of the required testing (Ref. 6). The economic analysis estimates the costs of conducting the required testing and evaluates the potential for significant adverse economic impact as a result of these test costs by examining four market characteristics of cresols: (1) Price sensitivity of demand, (2) industry cost characteristics, (3) industry structure, and (4) market expectations.

Total testing costs for the final rule for cresols are estimated to range from $764,095 to $1,050,230. This estimate includes the costs for both the required minimum series of tests as well as the conditional ones.

The estimated 1983 production volume for each of the three isomers is approximately 28, 28, and 40 million pounds for *para-*, *meta-*, and *ortho*-cresol, respectively. The costs of testing are first allocated to each isomer on the basis of production volume. The test costs for each isomer are then allocated to the commercial products containing the isomer based on percentage composition and total production of the commercial product. Based on this allocation method and the maximum costs of required and conditional testing, the annualized unit costs of testing range from a low of 0.08 cents per pound for cresylic acid, to a high of 0.34 cents per pound for *meta-* and *para*-cresol mixtures. Compared to the unit sales value for the commercial products, the unit test costs range from a low of 0.10 percent of price to a high of 0.42 percent of price.

Based on these costs and a consideration of the market characteristics of cresol products, the economic analysis indicates that the potential for significant economic impact is low. This conclusion is based on the following observations: (1) The estimated unit test costs are small and represent a relatively small percentage of product unit value (i.e., less than one percent of unit value in the worst case); (2) relatively stable, and in some cases moderate, growth is expected in most markets for cresols; and (3) demand in most of the markets does not appear to be very sensitive to small increases in price. For a complete discussion of the economic implications of this rule, see the economic analysis support document (Ref. 6).

VI. Availability of Test Facilities and Personnel

Section 4(b)(1) of TSCA requires EPA to consider "the reasonably foreseeable availability of the facilities and personnel needed to perform the testing required under the rule." Therefore, EPA conducted a study to assess the availability of test facilities and personnel to handle the additional demand for testing programs negotiated with industry in place of rulemaking.

Copies of the study, "Chemical Testing Industry: Profile of Toxicological Testing," October 1981, can be obtained through the NTIS under publication number PB 82-140773. On the basis of this study, the Agency believes that there will be available test facilities and personnel to perform the testing required in this test rule.

VII. Rulemaking Record

EPA has established a public record for this rulemaking (docket number 42033B). This record includes the basic information the Agency considered in developing this rule and appropriate Federal Register notices.

This record includes the following information:

A. Supporting Documentation

(1) Federal Register notices pertaining to this final rule consisting of:

(a) Notice containing the ITC designation of cresols to the Priority List (42 FR 55026; October 12, 1977).

(b) Notice of proposed rule on cresols (48 FR 31612; July 11, 1983).

(c) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (48 FR 53922; November 29, 1983).

(d) Notice of final rule on test rule development and exemption procedures (49 FR 39774; October 10, 1984).

(e) Notice of final rule concerning data reimbursement (48 FR 31786; July 11, 1983).

(f) Notice of interim final rule on test rule development and exemption procedures (50 FR 20662; May 17, 1985).

(g) Notice of final rule on the C_9 Aromatic Hydrocarbon Fraction (50 FR 20662; May 17, 1985).

(h) Notice of final rule on mesityl oxide (50 FR 51657; December 20,1985).

(2) Support documents consisting of:

(a) Cresols technical support document for proposed rule.

(b) Economic impact analysis of NPRM for cresols.

(c) Economic impact analysis of final test rule for cresols.

(3) Communications consisting of:

(a) Written public comments.

(b) Transcription of public meeting.

(c) Summaries of phone conversations.

(d) Meeting summaries.

(e) Reports—published and unpublished contractor's reports.

B. References

Confidential Business Information (CBI), while part of the record, is not available for public review. A public version of the record, from which CBI has been deleted, is available for inspection from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in Rm. E-107, 401 M St., SW., Washington, D.C.

VIII. Other Regulatory Requirement

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the order. First, the actual annual cost of all the testing proposed for cresols is estimated at $764,095—$1,050,230 over the market life of the chemical. Second, because the cost of the required testing will be distributed over a large production volume, the rule will have only very minor effects on users' prices (less than 1 percent a year) for this chemical even if all test costs were passed on. Finally, taking into account the nature of the market for this substance, the low level of costs involved, and the expected nature of the mechanisms for sharing the costs of the required testing, EPA concludes that there will be no significant adverse economic effects of any type as a result of this rule.

This proposed regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291. Any written comments received from OMB are included in the Public Record for this rulemaking.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub. L. 96-354, September 19, 1980), EPA is certifying that this test rule will not have a significant impact on a substantial number of small businesses for the following reasons:

1. There are not a significant number of small businesses manufacturing or importing this chemical.

2. Small processors are not expected to perform testing themselves, or participate in the organization of the testing effort.

3. Small processors will experience only very minor costs, if any, in securing exemption from testing requirements.

4. Small processors are unlikely to be affected by reimbursement requirements.

C. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and have been assigned OMB control number (2070-0033).

D. Comprehensive Environmental Response, Compensation and Liability Act ("Superfund")

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA (42 U.S.C. 9601 *et seq.*, Pub. L. 96-510, December 10, 1980)) requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (NRC) of the release. (See CERCLA section 103(a), and 50 FR 13456; April 4, 1985). The National Response Center can be notified at (800) 424-8802, except from the Washington, DC metropolitan area, where the telephone number for notification is (202) 426-2675. All designated hazardous substances will have an RQ of one pound until adjusted by regulation under CERCLA, unless such substances are already on the list of CERCLA

VOL 51 ISS 81 AP 28 1986 UMI

hazardous substances and have been assigned an RQ (see CERCLA section 102). Cresols have been assigned an RQ of 1,000 pounds.

List of Subjects in 40 CFR Part 799

Testing, Environmental protection, Hazardous substances, Chemicals, Recordkeeping and reporting requirements.

Dated: April 21, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

PART 799—[AMENDED]

Therefore, Part 799 is amended as follows:

1. The authority citation continues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

2. New § 799.1250 is added, to read as follows:

§ 799.1250 Cresols.

(a) *Identification of test substances.* (1) *ortho*-Cresol (CAS No. 95–48–7), *meta*-cresol (CAS No. 108–39–4), and *para*-cresol (CAS No. 106–44–5) shall each be tested in accordance with this section.

(2) *ortho*-, *meta*-, and *para*-Cresol of at least 99 percent purity shall be used as the test substance.

(b) *Persons required to submit study plans, conduct tests, and submit data.* (1) All persons who manufacture or process or intend to manufacture or process cresols from the effective date of this rule (June 11, 1986) to the end of the reimbursement period shall submit letters of intent to conduct testing or exemption applications, study plans, and/or shall conduct tests and submit data as specified in this section, Subpart A of this Part, and Part 790 of this chapter.

(2) Persons subject to this section are not subject to the requirements of §§ 790.30 (a) (2), (5), and (6) and (b), and 790.87(a)(1)(ii) of this chapter.

(3) Persons who notify EPA of their intent to conduct tests in compliance with the requirements of this section must submit study plans for those tests no later than 30 days before the initiation of each of those tests.

(4) In addition to the requirements of § 790.87(a) (2) and (3) of this chapter, EPA will conditionally approve exemption applications for this rule if EPA has received a letter of intent to conduct the testing from which exemption is sought and EPA has adopted test standards and schedules in a final Phase II test rule.

(c) *Health effects testing*—(1) *Mutagenic effects—chromosomal aberrations*—(i) *Required testing.* (A) *In vitro* cytogenetics tests shall be conducted individually with *ortho*-, *meta*-, *and para*-cresol;

(B) An *in vivo* cytogenetics test shall be conducted for each isomer which produces a negative result in the *in vitro* cytogenetics test conducted pursuant to paragraph (c)(1)(i)(A) of this section.

(C) A dominant lethal assay shall be conducted for each isomer which produces a positive result in either the *in vitro* or the *in vivo* cytogenetics test conducted pursuant to paragraphs (c)(1)(i) (A) and (B) of this section.

(ii) *Test standards* [Reserved].

(iii) *Reporting requirements* [Reserved].

(2) *Mutagenic effects—gene mutations*—(i) *Required testing.* (A) A DNA damage assay shall be conducted with *meta*-cresol.

(B) A gene mutation in somatic cells assay shall be conducted individually with *meta*- and *para*-cresol.

(C) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be conducted individually with *ortho*- and *para*-cresol.

(D) A sex-linked recessive lethal test in *Drosophila melanogaster* shall be conducted with *meta*- cresol if it produces a positive result in the DNA damage assay or gene mutation in somatic cells assay conducted pursuant to paragraphs (c)(2)(i) (A) and (B) of this section.

(ii) *Test standards* [Reserved].

(iii) *Reporting requirements* [Reserved].

(3) *Mutagenic effects—cellular transformation*—

(i) *Required testing.* (A) A Balb/c-3T3 cellular transformation test performed without metabolic activation shall be conducted individually with *meta*- and *para*-cresol.

(B) A Balb/c-3T3 cellular transformation test performed with metabolic activation shall be conducted with each isomer which produces a negative result in the cellular transformation test without metabolic activation conducted pursuant to paragraph (c)(3)(i)(A) of this section.

(C) A Balb/c-3T3 cellular transformation test performed with metabolic activation shall be conducted with *ortho*-cresol.

(ii) *Test standards* [Reserved].

(iii) *Reporting requirements* [Reserved].

(4) *Developmental toxicity*—(i) *Required testing.* A developmental toxicity study shall be conducted individually with *ortho*-, *meta*-, and *para*-cresol.

(ii) *Test standards.* [Reserved].

(iii) *Reporting requirements* [Reserved].

(5) *Reproductive effects—(i) Required testing.* A two-generation reproductive effects study shall be conducted individually with *ortho*-, *meta*-, and *para*-cresol.

(ii) *Test standards* [Reserved].

(iii) *Reporting requirements* [Reserved].

(Information collection requirements have been approved by the Office of Management and Budget under control number 2070–0033)

BILLING CODE 6560–50–M

GENERAL SERVICES ADMINISTRATION

41 CFR Chapter 101

[FPMR Temp. Reg. E–81, Supp. 1]

Property Management; Acquisition of Systems Furniture

AGENCY: Federal Supply Services GSA.

ACTION: Temporary regulation.

SUMMARY: This supplement revises the expiration date of FPMR Temp. Reg. E–81 from June 30, 1986, to March 15, 1986. This advances the expiration date of the regulation to provide for earlier elimination of the requirement that GSA review and, as appropriate, approve agency plans for acquiring systems furniture. After March 15, 1986, the review and approval of plans for acquiring systems furniture will be the responsibility of agencies. The action is being taken because it has been determined that experience with systems furniture is now widespread among agencies.

DATES: *Effective date:* March 15, 1986.

Expiration date: June 30, 1986.

FOR FURTHER INFORMATION CONTACT: Dan Rowan, Furniture Commodity Center, (703–557–8473).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter E to read as follows:

Federal Property Management Regulations Temporary Regulation E–81 Supplement 1

April 7, 1986.

To: Heads of Federal agencies

Subject: Acquisition of systems furniture

1. *Purpose.* This supplement revises the expiration date of FPMR Temporary Regulation E–81.

2. *Effective date.* This supplement is effective March 15, 1986.

3. *Expiration date.* This supplement expires on June 30, 1986.

4. *Explanation of changes.* The expiration date in paragraph 3 of FPMR Temporary Regulation E–81 is revised to March 15, 1986.

Paul Trause,

Acting Administrator of General Services.

[FR Doc. 86–9423 Filed 4–25–86; 8:45 am]

BILLING CODE 6820–24–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6710]

List of Communities Eligible for the Sale of Flood Insurance, Michigan et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The dates listed in the fourth column of the table.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 457, Lanham, Maryland 20706, Phone: (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646–2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance—floodplains.

The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 et. seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of Eligible Communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard areas identified
Michigan:				
Grand Traverse	Acme, township of	260749—New	Mar. 3, 1986, Emerg	
Do	East Bay, township of	260746—New	do

Radio broadcasting.

Erratum

In the Matter of Oversight of the Radio and TV Broadcast Rules.

Released: April 18, 1986.

In the above captioned *Order*, released March 7, 1986 and published in the **Federal Register** on March 24, 1986 at 51 FR 9963, there was an error in paragraph 10 of the rules Appendix pertaining to revision of § 73.3613. The correction of the error, as published in the Erratum on April 9, 1986, was incomplete.

It is corrected to read:

10. 47 CFR 73.3613 is amended by removing paragraphs (a)(2) [Reserved], (a)(5) [Reserved] and (a)(6) [Reserved] and redesignating paragraphs (a)(3) and (a)(4) as (a)(2) and (a)(3) respectively; and revising paragraph (d) to read as follows:

§ 73.3613 Filing of contracts.

* * * * *

(d) The following contracts, agreements or understandings need not be filed but shall be kept at the station and made available for inspection upon request by the FCC: Contracts relating to the sale of broadcast time to "time brokers" for resale; subchannel leasing agreements for Subsidiary Communications Authorization operation; franchise/leasing agreements for operation of telecommunications services on the TV vertical blanking interval; time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events (such as athletic contests, musical programs and special events) broadcast pursuant to the contract is not under control of the station; and contracts with chief operators.

Federal Communications Commission.

[MM Docket No. 85-255; RM-4982]

FM Broadcast Station in Oswego, NY

AGENCY: Federal Communications Commission.

ACTION: Final Rule.

SUMMARY: Action taken herein allocates Channel 244A to Oswego, New York, as the community's second local FM service, at the request of William Kirkpatrick.

EFFECTIVE DATE: May 29, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Report and Order (Proceeding Terminated)

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Oswego, New York); MM Docket No. 85-255, RM-4982.

Adopted: April 9, 1986.

Released: April 22, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making*, 50 FR 34873, published August 28, 1985, proposing the allocation of Channel 244A to Oswego, New York, as the community's second local FM service, at the request of William Kirkpatrick ("petitioner"). Petitioner submitted comments reiterating his intention to apply for the channel, if allocated. No other comments were received.

2. The petitioner was requested to furnish the Commission with a study showing that a site was available from which a Channel 244A operation could provide the required 70 dBu signal over Oswego since the necessary 11.4 kilometer east site restriction is beyond the distance for which we could assume such coverage. Petitioner has responded by stating that such a site does exist in the area of North Scriba and that a Channel 244A operation from that point could provide the required 70 dBu signal over all of Oswego. We have examined petitioner's showing and believe that the requisite city-grade signal can be provided over all of Oswego from the site which he has identified.

3. Canadian concurrence in the allocation has been received since Oswego is located within 320 kilometers (200 miles) of the U.S.-Canadian border.

4. We believe that the channel should be allocated to Oswego since it could provide the community with its second local FM service. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective May 29, 1986, the FM Table of Allotments, § 73.202(b) of the Rules, is amended with respect to the community listed below, to read as follows:

City	Channel No.
Oswego, NY	244A, 288A

5. The window period for filing applications will open on May 30, 1986, and close on June 30, 1986.

6. It is further ordered, that this proceeding is terminated.

VOL 51 ISS 81 AP 28 1986 UMI

7. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

Federal Communications Commission.

[MM Docket No. 85-219; RM-4911]

FM Broadcast Station in Toppenish, WA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: Action taken herein, at the request of Radio Broadcasters, Inc., allots Class C2 Channel 225 as a substitute for Channel 224A at Toppenish, Washington, and modifies the license of Station KZHR(FM) (Channel 224A) to specify operation on the Class C2 channel.

EFFECTIVE DATE: May 29, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Report and Order (Proceeding Terminated)

In the Matter of Amendment § 73.202(b), Table of Allotments, FM Broadcast Stations, (Toppenish, Washington); MM Docket No. 85-219, RM-4911.

Adopted: April 9, 1986.

Released: April 22, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making*, 50 FR 30976, published July 31, 1985, proposing the substitution of Class C2 Channel 225 for Channel 224A at Toppenish, Washington. The *Notice* was adopted in response to a petition filed by Radio Broadcasters, Inc., licensee of Station KZHR(FM), which also requested modification of its license to specify operation on Channel 225C2. Petitioner filed supporting comments and reply comments reiterating its interest in the channel substitution. No other comments were received.

2. The substitution can be made in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules.

3. We believe the public interest would be served by the substitution of Channel 225C2 for Channel 224A at Toppenish in order to provide that community and the surrounding area with its first wide coverage FM station. Since no other party expressed an interest in the use of the new channel, we are herein modifying the license of Station KZHR(FM) to specify operation on Channel 225C2 in lieu of Channel 224A. See, *Modification of FM and TV Station Licenses*, 98 FCC 2d 916 (1984).

4. Accordingly, pursuant to the authority contained in sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, that effective May 29, 1986, the FM Table of Allotments, § 73.202(b) of the Commission's Rules, is amended for the following community:

City	Channel No.
Toppenish, WA	225C2

5. It is further ordered, that pursuant to section 316(a) of the Communications Act of 1934, as amended, the license of Station KZHR(FM), Toppenish, Washington is modified to specify operation on Channel 225C2 subject to the following conditions:

(a) The licensee shall submit to the Commission a minor change application for a construction permit (Form 301) specifying the new facility.

(b) Upon grant of the construction permit, program tests may be conducted in accordance with § 73.1620; and

(c) Nothing contained herein shall be construed to authorize a change in transmitter location or to avoid the necessity of filing an environmental impact statement pursuant to § 1.301 of the Commission's Rules.

6. It is further ordered, that this proceeding is terminated.

7. For further information concerning this proceeding, contact Patricia Rawlings, Mass Media Bureau, (202) 634-6530.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Proposed Rules

Federal Register
Vol. 51, No. 81
Monday, April 28, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 581

Processing Garnishment Orders for Child Support and/or Alimony

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) is proposing a revision to its regulations concerning the processing of garnishment orders for child support and/or alimony. The proposed regulations would amend the attorney fee provisions to conform with an interpretation of the statutory garnishment provisions recently announced by the Department of Justice. Under the recent interpretation, remuneration will only be subject to garnishment for attorney fees when the attorney fees are expressly awarded as alimony or as child support.

DATE: Comments should be received by June 27, 1986.

ADDRESS: Send or deliver comments and/or designated agent information to W. Scott Burke, General Counsel, Office of Personnel Management, Room 5H30, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Murray M. Meeker, (202) 632-4518.

SUPPLEMENTARY INFORMATION: The proposed revisions respond to certain suggestions presented by public interest groups and make certain technical and typographical corrections. Because of economic constraints, this proposed rule does not include changes to Appendix A to Part 581, the list of agents designated to accept legal process. Changes to Appendix A will appear when the proposed rule is published as a final rule. Governmental entities are urged to review the current Appendix A in title 5 of the Code of Federal Regulations (October 1, 1985 edition) and advise OPM, at the following address if any changes should be made: Office of the General Counsel, Office of Personnel Management, 1900 E St., NW, Rm. 5H30, Washington, DC 20415. OPM has already received changes from the following agencies: Merit Systems Protection Board; Farm Credit Administration; Department of Transportation, Federal Aviation Administration and Maritime Administration; Department of Defense, Defense Investigative Service; Department of the Interior, Bureau of Reclamation, Office of Surface Mining, and Heritage Conservation and Recreation Service; National Endowment for the Arts; Veterans Administration, Nevada: Henderson Outpatient Clinic and Las Vegas Outpatient Clinic; and National Archives and Records Administration.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have significant economic impact on a substantial number of small entities because their effects are limited primarily to Federal employees.

U.S. Office of Personnel Management.

Constance Horner,

Director.

PART 581—PROCESSING GARNISHMENT ORDERS FOR CHILD SUPPORT AND/OR ALIMONY

Accordingly, OPM proposes to amend 5 CFR Part 581 as follows:

1. The authority citation for Part 581 continues to read as follows:

Authority: 42 U.S.C. 659, 661–662; 15 U.S.C. 1673; E.O. 12105

2. In § 581.102, paragraphs (d), (e), and (g) are revised to read as follows:

§ 581.102 Definitions.

* * * * *

(d) "Child support" means periodic payments of funds for the support and maintenance of a child or children, and, subject to and in accordance with State or local law, includes, but is not limited to, payments to provide for health care, education, recreation, clothing, or to meet other specific needs of such a child or children; the term also includes attorney's fees, interest, and court costs, when and to the extent that the same are expressly made recoverable as such under a decree, order, or judgment issued in accordance with applicable State or local law by a court of competent jurisdiction.

(e) "Alimony" means periodic payments of funds for the support and maintenance of a spouse or former spouse, and, subject to and in accordance with 6tate or local law, includes, but is not limited to, separate maintenance, alimony pendente lite, maintenance, and spousal support. Alimony also includes attorney's fees, interest, and court costs, if they are expressly made recoverable as such under a decree, order, or judgment issued in accordance with applicable State or local law by a court of competent jurisdiction. This term does not include any payment or transfer of property or its value by an individual to his or her spouse or former spouse in compliance with any community property settlement, equitable distribution of property, or other division of property between spouses or former spouses. (See instead 5 U.S.C. 8345(j) and 5 CFR Part 831, Subpart Q.)

* * * * *

(g) "Legal obligation" means an obligation to pay alimony and/or child support that is enforceable under appropriate State or local law. A legal obligation may include current as well as past due alimony and/or child support debts depending on the law in the jurisdiction from which the legal process was issued.

3. In § 581.103, the introductory text of paragraph (a) is republished and paragraph (a)(23)(iv) is revised to read as follows:

§ 581.103 Moneys which are subject to garnishment.

(a) For the personal service of a civilian employee obligor:

* * * * *

(23) Moneys due on account of the services of a deceased employee obligor, including:

* * * * *

(iv) Retroactive pay as provided for in section 5344(b)(2) of title 5 of the United States Code; and

* * * * *

VOL 51 ISS 81 APR 28 1986 UMI

4. In § 581.104, paragraphs (c) and (f) are revised to read as follows:

§ 581.104 Moneys which are not subject to garnishment.

* * * * *

(c) Refunds and other payments made in connection with overpayments or erroneous payments of income tax and other taxes levied under title 26 of the United States Code;

* * * * *

(f) Veterans' educational assistance payments under sections 1651 et seq., of title 38 of the United States Code;

* * * * *

5. In § 581.105, the introductory text of the section paragraphs (a), (b)(3) and (b)(4) are revised, paragraph (b)(5) is added, and the introductory text of paragraph (b) is republished to read as follows:

§ 581.105 Exclusions.

In determining the amount of any "moneys due from, or payable by, the United States" to any individual, there shall be excluded amounts which:

(a) Are owed by the individual to the United States, except where the obligor's debt is for child support and the amount owed the United States results from an income tax lien or levy under section 6331 of title 26 of the United States Code;

(b) Are required by law to be deducted from the remuneration or other payment involved, including, but not limited to:

* * * * *

(3) Amounts mandatorily withheld for the U.S. Soldiers' and Airmen's Home;

(4) Fines and forfeitures ordered by a court-martial or by a commanding officer; and

(5) Amounts deducted for Medicare;

* * * * *

6. In § 581.202, paragraph (c) is revised to read as follows:

§ 581.202 Service of process.

* * * * *

(c) Where it does not appear from the face of the process that it has been brought to enforce the legal obligation(s) defined in § 581.102(d) and/or (e), the process must be accompanied by a certified copy of the court order or other document establishing such legal obligation(s).

* * * * *

7. In § 581.305, the introductory text of paragraph (a) is republished, paragraph (a)(6) is revised and paragraph (g) is added to read as follows:

§ 581.305 Honoring legal process.

(a) The governmental entity shall comply with legal process, except where the process cannot be complied with because:

* * * * *

(6) Where notice is received that the obligor has appealed either the legal process or the underlying alimony and/or child support order, payment of moneys subject to the legal process shall be suspended; i.e., moneys shall continue to be withheld, but these amounts shall be retained by the governmental entity until the entity is ordered by the court, or other authority, to resume payments or otherwise disburse the suspended amounts. However, no suspension action shall be taken where the applicable law of the jurisdiction wherein the appeal is filed requires compliance with the legal process while an appeal is pending. Where the legal process has been issued by a court in the District of Columbia, a motion to quash shall be deemed equivalent to an appeal.

* * * * *

(g) A failure by the party bringing the garnishment action to comply with the provisions of the Uniform Reciprocal Enforcement of Support Act (URESA) or the Revised Uniform Reciprocal Enforcement of Support Act, by itself, shall not be a valid basis for a governmental entity to refuse to comply with legal process.

BILLING CODE 6325-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85-AWA-6]

Proposed Establishment of Airport Radar Service Areas

AGENCY: Federal Aviation Administraiton (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM); extension of comment period and notice of an informal airspace meeting.

SUMMARY: This notice announces extension of the comment period on an NPRM which proposes to establish an Airport Radar Service Area at Standiford Field Airport, Louisville, KY, and give notification of informal airspace meeting.

DATES: Comments must be received on or before July 3, 1986. Meeting will be held June 12, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket [AGC-204], Airspace Docket No. 85-AWA-6, 800 Independence Avenue, SW., Washington, DC 20591.

Informal Airspace meeting beginning at 7:30 p.m. will be held at:

The 100th Division United States Army Reserve Center, 3580 Century Division Way, Building 3, Louisville, KY.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

The official docket may be examined in the Rules Docket, weekday, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room, 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Robert Burns, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85-AWA-6." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Dockets both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

Background

Airspace Docket No. 85-AWA-6, published on September 30, 1985, (50 FR 39822) proposed to establish an Airport Radar Service Area (ARSA) at Standiford Field Airport, Louisville, KY, and an informal airspace meeting was scheduled for February 27, 1986, to receive additional public comment on the proposal. In addition to publication of the informal airspace meeting in the Federal Register, the FAA intended to mail individual notices of the meeting to pilots in the Louisville, KY, area. Due to an administrative error not all of the individual mailings were made in a timely manner. This action extends the period for public comment on Airspace Docket No. 85-AWA-6, as it applies to Standiford Field Airport, Louisville, KY, only, and schedules an additional informal airspace meeting.

Meeting Procedures

In addition to seeking written comments on this proposal, the FAA will hold a additional informal airspace meeting for Standiford Field Airport, Louisville, KY, in order to receive additional input with respect to the proposal. Persons who plan to attend the meeting should be aware of the following procedures to be followed:

(a) The meeting will be informal in nature and will be conducted by the designated representative of the Administrator. Each participant will be given an opportunity to make a presentation.

(b) There will be no admission fee or other charge to attend and participate. The meeting will be open to all persons on a space-available basis. The FAA representative may accelerate the agenda to enable early adjournment if the progress of the meeting is more expeditious than planned.

(c) The meeting will not be recorded. A summary of the comments made at the meeting will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meeting may be accepted at the discretion of the FAA representative. Participants submitting handout materials should present an original and two copies to the presiding officer for approval before distribution. If approved by the presiding officer, there should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the meeting should not be taken as expressing a final FAA position.

Extension of Comment Period and Notice of Public Meeting

The comment period for Airspace Docket No. 85-AWA-6 as it applies to Standiford Field Airport, Louisville, KY, is extended to close on July 3, 1986. An informal airspace meeting is scheduled for June 12, 1986, to be held at The 100th Division United States Army Reserve Center, 3580 Century Division Way, Building 3, Louisville, KY, beginning at 7:30 p.m.

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

Issued in Washington, DC, on April 21, 1986.

14 CFR Part 71

[Airspace Docket No. 86-AWA-15]

Proposed Alteration of VOR Federal Airways; Nebraska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the description of V-15, V-136, V-159, and V-172 located in the vicinity of Omaha, NE. The Neola, IA, very high frequency omni-directional radio range and tactical air navigational aid (VORTAC) is being decommissioned and all airways that have Neola in their descriptions will require amendment. This action is due to the planned decommissioning of the Neola VORTAC, as part of the Central Region's Networking Plan.

DATES: Comments must be received on or before June 9, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Central Region, Attention: Manager, Air Traffic Division, Docket No. 86-AWA-15, Federal Aviation Administration, 601 East 12th Street, Federal Building, Kansas City, MO 64106.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC. 20591; telephone: (202) 426-8626.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the

VOL 51 ISS 81 AP 28 1986 UMI

airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWA-15." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter VOR Federal Airways V-15, V-138, V-159, and V-172 located in the vicinity of Omaha, NE. The Neola, IA, VORTAC is being decommissioned and all airways that have Neola in their descriptions are proposed for realignment. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

V-15—[Amended]

By removing the words "From St. Joseph, MO, via INT St. Joseph 343° and Neola, IA, 157° radials; Neola; INT Neola 322° and Sioux City, IA, 159° radials; Sioux City;" and substituting the words "From Sioux City, IA;"

V-138—[Amended]

By removing the words "; 1,200 feet AGL INT of Lincoln 040° and Neola, IA, 253° radials; Neola;" and substituting the words ". From Omaha, NE; INT Omaha 032°T(024°M) and Fort Dodge, IA, 222°T(215°M) radials;"

V-159—[Amended]

By removing the words "INT St Joseph 328° and Omaha, NE, 155° radials; Omaha;" and by substituting the words "Omaha, NE;"

V-172—[Amended]

By removing the words "; Neola, IA; Newton, IA;" and substituting the words ". From Omaha, NE, INT Omaha 060°T(056°M) and Newton, IA, 262°T(256°M) radials; Newton;"

Issued in Washington, DC, on April 17, 1986.

James Burns, Jr.,

Manager, Airspace-Rules and Aeronautical Information Division.

[Airspace Docket No. 85-ASO-20]

Proposed Alteration of Restricted Areas R-2904 Starke, FL, and R-2903B Stevens Lake, FL

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the lateral and vertical limits of Restricted Area R-2903B Stevens Lake, FL, and the vertical limits of R-2904 Starke, FL. The proposed realignment of R-2903B will increase the lateral limits to include the southern portion of the Camp Blanding Military Reservation. The proposal will also stratify and renumber portions of the Restricted Areas R-2903B and R2904. These changes are being made at the request of the United States Army in order to accommodate new artillery requirements.

DATE: Comments must be received on or before June 10, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 85-ASO-20, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Ronald C. Montague, Airspace and Aeronautical Information Requirements Branch (ATO-240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 426-3128.

SUPPLEMENTARY INFORMATION:

Comments Invited

This proposal is being circulated by the FAA at the request of the U.S. Army in an effort to fully inform the public.

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factural basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 85-ASO-20." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposals

The FAA is considering amendments to Parts 71 and 73 of the Federal Aviation Regulations (14 CFR Parts 71 and 73) to alter the lateral and vertical limits of R-2903B and subdivide R-2904 and R-2904A and R-2904B. This amendment will establish R-2903A, R-2903C and R-2903D. The proposed alteration will increase the lateral limits of R-2903B to include the southern portion of the Camp Blanding Military Reservation near Keystone Airpark, FL. Additionally, the alteration will increase the vertical limits of R-2903B to FL 320. The vertical limits of R-2904B will be FL 320. The additional airspace requested in this proposal is the minimum airspace necessary to accomplish new artillery requirements as well as current operations. Sections 71.151 and 73.29 of Parts 71 and 73 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

Because of the projected impact on nonparticipating aircraft, the following was agreed to by the U.S. Army:

1. The vertical airspace overlying R-2903A, from FL 230 to FL 320 will have a limited time of use of 2000 local to 0500 local, not to exceed 24 days per year.

2. The vertical airspace overlying R-2904A, from 1,800 feet mean sea level to FL 320 will have a limited time of use of 2000 local to 0500 local, not to exceed 24 days per year.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9197]

Roy Brog; Proposed Consent Agreement With Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a former chairman of the board of a Salt Lake City, Utah manufacturer and distributor of a dry milk substitute, among other things, to cease making any representations concerning the health benefits or expected shelf life for "Meadow Fresh White", a powdered, dairy-based milk substitute, or other food products, without reliable and competent substantiation. Also, respondent is prohibited from excluding some distributors in computing "average" distributor earnings without proper disclosures concerning the method of computation.

DATE: Comments will be received until June 27, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave. NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/H-238A, Larry Hodapp, Washington, DC 20580. (202) 523-3860.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's rules of practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considerd by the Commission and will available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

Before Federal Trade Commission

[Docket No. 9197]

Agreement Containing Consent Order to Cease and Desist

In the matter of Roy Brog, individually and as a former officer and director of Meadow Fresh Farms, Inc.

Roy Brog, individually and as a former officer and director of Meadow Fresh Farms, Inc., ("respondent") and counsel for the Federal Trade Commission enter into this agreement in accordance with the Commission's rules governing consent order procedures. The parties agree that:

1. Respondent Roy Brog is a former officer and director of Meadow Fresh Farms, Inc. His address is 1320 East 2300 North, Logan, Utah 84321.

2. Respondent has been served with a copy of the complaint issued by the Federal Trade Commission charging him with violations of section 5 of the Federal Trade Commission Act.

3. Respondent admits all the jurisdictional facts set forth in the Commission's complaint in this proceeding.

4. Respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

5. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondent, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This agreement is for settlement purposes only and does not constitute an admission by respondent that the law has been violated as alleged in the complaint.

7. This agreement contemplates that, if it is accepted by the Commission, and if

such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's Rules, the Commission may, without further notice to respondent, (1) issued its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to respondent's address as stated in this agreement shall constitute service. Respondent waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

8. Respondent has read the complaint and order contemplated hereby. He understands that once the order has been issued, he will be required to file one or more compliance reports showing that he has fully complied with the order. Respondent further understands that he may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

ORDER

I

It Is Ordered that respondent Roy Brog, individually and as a former officer and director of Meadow Fresh Farms, Inc., and respondent's agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacturing, advertising, offering for sale, sale, or distribution of a powdered, dairy-based drink called "Meadow Fresh" or any other food product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, unless at the time of such representation respondent possesses and relies upon reliable and competent scientific evidence that substantiates any such representation: (a) Any benefit in preventing cardiovascular or other disease through the use of such product, (b) any nutritional or other health related attribute of such product, or (c) any expected shelf life of such product. "Reliable and competent" shall mean for purposes of this order those tests, analyses, research, studies, or other evidence conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the profession or science to yield accurate and reliable results.

II

It Is Further Ordered that respondent Roy Brog, individually and as a former officer and director of Meadow Fresh Farms, Inc., and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacturing, advertising, offering for sale, sale or distribution of any prdduct or service in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing as an "average," directly or by implication, any computation of income levels, earnings, sales or other payments received by distributors as a whole or by a specified distributor category which is based on less than all distributors in the stated category, unless the fact that some distributors are excluded and the basis for any such exclusion are clearly and prominently disclosed in close proximity to such representation.

"Distributor" as used in this order shall refer to any person, partnership or corporation which is granted the right to offer, sell or distribute goods or services manufactured, processed, distributed, offered or sold by respondent or to recruit other persons, partnerships or corporations to be distributors of respondent's goods or services.

III

It Is Further Ordered that respondent shall, for at least three years after the date the representation is last disseminated, maintain and upon request make available to the Federal Trade Commission for inspection and copying copies of:

1. All materials relied upon to substantiate any representation covered by this order; and

2. All test reports, studies, surveys, or demonstrations in his possession or control, or of which he has knowledge, that contradict any representation covered by this order.

IV

It Is Further Ordered that respondent shall promptly notify the Commission of the discontinuance of his present business or employment and that, for a period of four years from the date of service of this order, respondent shall promptly notify the Commission of each affiliation with a new business or employment, with each such notice to include the respondent's new business address and a statement of the nature of the business or employment in which the respondent is newly engaged, as well as a description of respondent's duties and responsibilities in connection with the business or employment.

V

It Is Further Ordered that respondent shall forthwith distribute a copy of this order to all distributors of products manufactured or marketed by respondent.

VI

It Is Further Ordered that respondent shall, within sixty (60) days after service of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which he has complied with this order.

Analysis of Proposed Consent Order to Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Roy Brog, former officer and director of Meadow Fresh Farms, Inc., South Orange Street, Salt Lake City, Utah, a multilateral marketer of powdered milk drinks.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After 60 days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint alleges that Roy Brog has represented that "Meadow Fresh," a powdered, dairy-based drink, is associated with a reduction in the incidence of cardiovascular disease due to reduced levels of xanthine oxidase, that xanthine oxidase is a major contributor to cardiovascular problems, that Meadow Fresh has an expected storage life of up to ten years under reasonable storage conditions, and that he possessed and relied upon a

BEST COPY AVAILABLE

VOL 51 ISS 81 AP 28 1986 UMI

reasonable basis for these representations. The complaint alleges that at no time has Roy Brog possessed and relied upon a reasonable basis for such representations.

In addition, the complaint alleges that Roy Brog has made false and misleading representations regarding the income being derived by distributors of Meadow Fresh. The complaint alleges that Roy Brog disseminated figures which purported to be average monthly income figures, but which were, in fact, computed by considering only the minority of distributors who actually earned some income during the applicable period. The complaint alleges that this manner of computation results in income figures which are substantially larger than those that would be found by including all distributors in the computation and providing the average of their income.

The proposed consent order prohibits Roy Brog from making any representation regarding any benefit in preventing cardiovascular or other disease through the use of a food product, any nutritional or other health related attribute of such product, or any expected shelf life of such product, unless at the time of such representation he possesses and relies upon reliable and competent scientific evidence that substantiates such representation.

The proposed consent order also would prohibit Roy Brog from representing as an average any computation of earning or sales of distributors of any product or service which is based upon less than all distributors, unless he discloses the fact that some distributors are excluded and the basis for such exclusion at the same time.

Finally, the proposed order would require Roy Brog to retain any substantiation required by the proposed order for three years, to notify the Commission of any change in his business affiliation for a four year period, to provide all his distributors with a copy of the order, and to file a compliance report within 60 days after service of the order.

The purpose of this analysis is to facilities public comment on the proposed order; it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 935

Public Comment and Opportunity for Public Hearing on Proposed Modifications of the Missouri Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: OSMRE is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of proposed program amendments submitted by the State of Missouri as modifications to the Missouri Permanent Regulatory Program (hereinafter referred to as the Missouri program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments pertain to the State's blaster training, examination and certification provisions; revegetation requirements, bond forfeitures; penalty assessments, and inspection and enforcement activities.

This notice sets forth the times and locations that the Missouri program and the proposed amendments are available for public inspection, the comment period during which interested persons may submit written comment on the proposed program elements, and the procedures that will be followed regarding the public hearing.

DATE: Written comments not received on or before 4:00 p.m., May 28, 1986, will not necessarily be considered.

If requested, a public hearing on the proposed modifications will be held on May 23, 1986, beginning at 10:00 a.m. at the location shown below under **ADDRESSES.**

ADDRESS: Written comments should be mailed or hand delivered to: Mr. William J. Kovacic, Office of Surface Mining Reclamation and Enforcement, Kansas City Field Office, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106.

If a public hearing is held its location will be at the Federal Building, 601 E. 12th, Kansas City, Missouri.

FOR FURTHER INFORMATION CONTACT: Mr. William J. Kovacic, Field Office Director, Office of Surface Mining Reclamation and Enforcement, Kansas City Field Office, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106, Telephone: (816) 374-5527.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Missouri program, the proposed modifications to the program, a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSMRE offices and the office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays. Each requester may receive, free of charge, one single copy of the proposed amendments by contacting the OSMRE Kansas City Field Office.

Kansas City Field Office, Office of Surface Mining Reclamation and Enforcement, 1103 Grand Avenue, Room 502, Kansas City, Missouri 64106.

Office of Surface Mining Reclamation and Enforcement, Room 5315 A, 1100 L Street, NW., Washington, D.C. 20240.

Missouri Land Reclamation Commission, 1026-D Northeast Drive, Jefferson City, Missouri 65101.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **DATES** or at locations other than the OSMRE Kansas City, Missouri, Field Office will not necessarily be considered and included in the Administrative Record for the proposed rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under **FOR FURTHER INFORMATION CONTACT** by the close of business May 19, 1986. If no one requests to comment a public hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSMRE officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment have been heard.

Public Meeting

Persons wishing to meet with the OSMRE representatives to discuss the proposed amendments may request a meeting at that OSMRE Field Office listed under **FOR FURTHER INFORMATION CONTACT.**

All such meetings are open to the public and, if possible notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

II. Background on the Missouri State Program

On November 21, 1980, the Secretary of the Interior conditionally approved the Missouri program under SMCRA for the regulation of surface coal mining operations in the State (45 FR 77027).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Missouri program can be found in the November 21, 1980 **Federal Register** (45 FR 77027). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 925.10, 30 CFR 925.15, and 30 CFR 925.16.

III. Supplementary Information

On June 18, 1985, Missouri submitted to OSMRE draft new rules for training, examination and certification of blasters; draft proposed amendments on revegetation requirements, penalty assessments and regulatory program inspection and enforcement activities. Receipt of the draft documents was published in the **Federal Register** on July 31, 1985 (50 FR 30857).

The draft proposed revisions to the Missouri rules were as follows:

10 CSR 40-2.090 Revegetation Requirements

The amendment would update interim regulations by incorporating permanent program standards for measuring revegetation success.

10 CSR 40-3.160 Training, Examination and Certification of Blasters

The amendment would establish requirements and procedures that will be followed for training, examination and certification of persons engaging in or directly responsible for the use of explosives in surface coal mining operations.

10 CSR 40-8.030 Permanent Program Inspection and Enforcement

The amendment would clarify, revise and set forth requirements for permanent program inspection and enforcement. Specifically, the amendment concerns the state requirements for conducting partial inspections of each inactive surface coal mining and reclamation operation; it would allow aerial inspections to be conducted in the inspection of surface coal mining and reclamation sites; allow for the extension of the abatement period beyond 90 days under certain circumstances; and allow the waiving of informal public hearing when certain requirements are met.

10 CSR 40-8.040 Penalty Assessment

The amendment would clarify, revise and set forth the method of assessment of penalties for violation of the regulatory program. Specifically, the amendment revises procedures for assessing civil penalties and establishes procedures for conducting informal assessment conferences.

IV. Submission of Program Amendment

By a letter dated March 13, 1986, the Missouri Land Reclamation Commission formally submitted the proposed regulatory amendments pursuant to 30 CFR 732.17, blaster training, examination, and certification; revegetation requirements, penalty assessments and inspection and enforcement activities for OSMRE's approval. The actual rule changes submitted for approval were adopted by the Missouri Land Reclamation Commission on October 23, 1985, but implementation of the revised rules is pending until approved by OSMRE. The State regulations at 10 CSR 40-7.031(3)(B) Bond Forfeiture, published in the Missouri Register on October 7, 1985, as an Emergency Amendment, were also submitted on March 13, 1986. In the amendment, Missouri proposes to amend its approved program by supplementing its regulations at 10 CSR 40-3.160 Training, Examination, and Certification of Blasters. Additionally, the State proposes to amend its program by revising 10 CSR 40-2.090 Revegetation Requirements (Interim Program), 10 CSR-40.8.030 Permanent Program Inspection and Enforcement, and 10 CSR 40-8.040 Penalty Assessment.

Therefore, the Director is seeking public comment on the adequacy of the proposed program amendments. If OSMRE finds the amendments in accordance with SMCRA and no less effective than the Federal regulations, they will be approved and become part of the Missouri program.

V. Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1291(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from Section 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD3 86-07]

Empire State Regatta, Albany, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

VOL 51 ISS 81 AP 28 1986 UMI

SUMMARY: The Coast Guard is considering a proposal to establish Special Local Regulations for the Empire State Regatta which is sponsored by the Capital Rowing Club, Inc. of New Scotland, New York. The purpose of this regulation is to provide for the safety of participants and spectators on navigable waters during this event.

DATES: Comments must be received on or before May 28, 1986.

ADDRESSES: Comments should be mailed to Commander (b), Third Coast Guard District, Governors Island, New York, NY 10004-5098. The comments will be available for inspection and copying at the Boating Safety Office, Building 110, Governors Island, New York, NY. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Lucas A. Dlhopolsky, (212) 668-7974.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD3 86-07) and the specific section of the proposal to which their comments apply and give reasons for each comment. Receipt of comments will be acknowledged if a stamped, self-addressed postcard or envelope is enclosed. The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are Mr. Lucas A. Dlhopolsky, Project Officer, Boating Safety Office, and Ms. MaryAnn Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Proposed Regulations:

This is the second consecutive year that the Empire State Regatta will be held in the same location on the Hudson River on the second weekend in June. The sponsor plans to hold this three day event annually on the first or second weekend in June. In preparation for the event, floats used to mark the race course are connected to anchors that were installed in the rock river bottom in 1986. In order to make use of these permanently set anchors, the event must be held in the same location each year. Because of the annual nature of this event, the Coast Guard proposes to promulgate a permanent amendment to Part 100 of Title 33, Code of Federal Regulations. Each year the Coast Guard will provide the public full and adequate notice of the annual crew race event by publication in the Third District Local Notice to Mariners and in a Federal Register notice. The Empire State Regatta is sponsored by the Capital Rowing Club, Inc. of New Scotland, New York on behalf of the United States Rowing Association. This crew racing event will serve as the 1986 Northeast Regional Championships. The races will be held on a 2000 meter course on the Hudson River adjacent to Albany, New York. Approximately 250 crew shells, ranging in size from 20 to 60 feet in length will race in heats throughout the day from 9:00 a.m. to 6:00 p.m. on June 14 and 15, 1986. The race course will consist of six lanes marked by seven rows of buoys anchored to the bottom of the river. Small styrofoam buoys marked with retroreflective tape will be set in the river on June 13, 1986 and will be removed overnight on June 15 into early June 16, 1986. The sponsor shall arrange for several vessels which will assist the Coast Guard Patrol Commander in providing for the safety of the event and spectator craft. The Coast Guard intends to restrict vessel movement within this section of the Hudson River during this event to provide for the safety of the participants and spectators on navigable waters. Vessels less than 20 meters in length will be allowed to transit the regulated area at nowake speeds at specified intervals (approximately every two hours) throughout each race day as directed by the Coast Guard Patrol Commander. Larger vessels will not be allowed to pass through the regulated area at any time during the effective period unless in an emergency and authorized by the Coast Guard Patrol Commander. The Coast Guard Captain of the Port of New York will again, as last year, contact the numerous commercial facilities along the Hudson River north of the regulated area to ask their cooperation in scheduling any vessel transits so as not to interfere with this event. Mariners are urged to use extreme caution when transiting the regulated area. The Coast Guard will issue a safety voice broadcast and this regulation will be published in the Local Notice To Mariners to advise the general public and commercial users on the Hudson River of the event.

Economic Assessment And Certification

This proposed regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. This event will draw a large spectator crowd along the shores of the Hudson River which should compensate certain area merchants for the inconvenience of having navigation restricted. Smaller craft will be allowed to transit the regulated area at designated times during each race day and after the conclusion of each day's racing. In 1985 a survey of river traffic users indicated that any inconvenience to waterway transportation would be minimal. In fact most commercial marine interests successfully adjusted their schedules to avoid transiting this area last year during the effective period of the regulation which was from 6:00 a.m. on June 7 through 6:00 a.m. on June 10, 1985.

Since the impact of this regulation is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Proposed Regulation:

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations as follows:

PART 100—[AMENDED]

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Part 100 is amended by adding § 100.308 to read as follows:

§ 100.308 Empire State Regatta, Albany, New York.

(a) *Regulated Area.* That section of the Hudson River between the I-90 Interchange Bridge on the north and the northern end of Culver Dike on the south.

(b) *Effective Period.* This regulation will be effective from 6:00 a.m. on June 13, 1986 through 6:00 a.m. on June 16, 1986 and thereafter annually on the first or second weekend (Friday, Saturday, Sunday into early Monday) in June as published in the Third District Local Notice to Mariners and in a Federal Register notice.

(c) *Special Local Regulations.* (1) The regulated area shall be intermittently closed to all vessel traffic from 6:00 a.m. on Friday to 6:00 a.m. on Monday except as specified below or as directed by the Coast Guard Patrol Commander.

(2) Vessels greater than 20 meters in length shall not transit the regulated area at any time during the effective period unless allowed to do so by the Coast Guard Patrol Commander.

(3) Vessels less than 20 meters in length may transit the regulated area only if escorted by an official patrol vessel. From 9:00 a.m. through 6:00 p.m. on Saturday and Sunday, official patrol vessels will escort transiting vessels less than 20 meters at specified intervals (approximately every two hours) as directed by the Coast Guard Patrol Commander. At all other times, the regatta sponsor shall provide a sufficient number of escort vessels to ensure timely transits for vessels less than 20 meters.

(4) Unless otherwise directed by the Coast Guard Patrol Commander, transiting vessels shall: proceed at no-wake speeds, remain clear of the race course area as marked by the sponsor-provided buoys, not interfere with races or any shells in the area, make no stops and keep to the eastern edge of the Hudson River.

(5) Official patrol vessels include Coast Guard and Coast Guard Auxiliary vessels, New York State and local police boats and other vessels so designated by the regatta sponsor or Coast Guard Patrol Commander.

(6) No person or vessel may enter or remain in the regulated area during the effective period unless participating in the event, or authorized to be there by the sponsor or Coast Guard patrol personnel.

(7) All persons and vessels shall comply with the instructions of U.S. Coast Guard patrol personnel. Upon hearing five or more blasts from a U.S. Coast Guard vessel, The operator of a vessel shall stop immediately and proceed as directed. U.S. Coast Guard patrol personnel include commissioned, warrant and petty officers of the Coast Guard. Members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation and other applicable laws.

(8) For any violation of this regulation, the following maximum penalties are authorized by law:

(i) $500 for any person in charge of the navigation of a vessel.

(ii) $500 for the owner of vessel actually on board.

(iii) $250 for any person.

(iv) Suspension or revocation of a license for a licensed officer.

Dated: April 17, 1986.

P.A. Yost,

Vice Admiral, U.S. Coast Guard, Commander, Third Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 16

[FRL-2988-1]

Privacy Act of 1974; Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to amend its regulations implementing the Privacy Act of 1974 in two ways. First, EPA proposes to add a new general exemptions section to its regulations. The proposed new section will exempt from compliance with certain provisions of the Privacy Act of 1974 the system of records called "EPA-4 OIG Criminal Investigative Index and Files—EPA/OIG," maintained by the Office of Investigations of the Office of Inspector General (OIG), and "EPA-17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OCI," maintained by the Office of Criminal Investigations (OCI) of the National Enforcement Investigations Center (NEIC). A general exemption for these systems or records will help maintain the efficiency and integrity of investigations conducted by the OIG and the NEIC.

Second, EPA proposes to amend the specific exemptions section of its regulations, which currently exempts from compliance with certain provisions of the Privacy Act of 1974 three systems of records. The proposed amendment will clarify EPA's reasons for exempting these three systems of records. The proposed amendment will also make minor corrections to the names of two of the three systems of records referenced in the regulations to conform to the information contained in EPA's notice of revisions to these systems of records published elsewhere in today's Federal Register. In addition, the proposed amendment will exempt from compliance with certain provisions of the Privacy Act of 1974 the new system of records called "EPA-17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OCI," maintained by the NEIC's office of Criminal Investigations. EPA's notice of this new system of records is published elsewhere in today's Federal Register. Finally, the proposed amendment will exempt from compliance with certain provisions of the Privacy Act of 1974 an existing system of records containing some records that are properly classified by other Federal agencies at levels up to and including "secret." EPA's notice of revisions to this system of records is published elsewhere in today's Federal Register.

DATE: Comments must be submitted on or before May 28, 1986.

ADDRESS: Send written comments to: Connie Tasker, Chief, Information Management Branch, Information Management and Services Division (PM-211D), Environmental Protection Agency, 401 M Street SW Washington, D.C. 20460.

Comments received on this proposed rule will be available for reviewing and copying from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays, in Rm. M2114, Environmental Protection Agency, 401 M Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Connie Tasker, (202) 475-8675.

SUPPLEMENTARY INFORMATION: As authorized by the general exemption provisions of 5 U.S.C. 552a(j)(2), EPA proposed to amend its regulations implementing the Privacy Act of 1974, which are published at 40 CFR Part 16, by adding a new § 16.13 to exempt from compliance with certain provisions of the Privacy Act of 1974 the systems of records called "EPA-4 OIG Criminal Investigative Index and Files—EPA/OIG," maintained by the OIG's Office of Investigations, and "EPA-17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OIC," maintained by the NEIC's Office of Criminal Investigations.

The exemption is consistent with the investigation and law enforcement responsibilities of the OIG's Office of Investigations and the NEIC's Office of Criminal Investigations, components of EPA which perform as their principal function activities pertaining to the enforcement of criminal laws. Authority for the criminal law enforcement activities of the OIG's Office of Investigations is the Inspector General Act of 1978, 5 U.S.C. app. Authority for the criminal law enforcement activities of the NEIC's Office of Criminal Investigations is 28 U.S.C. 533, with appointment letter from Benjamin Civiletti, Attorney General, to Douglas Costle, Administrator, EPA, dated January 16, 1981. Exempting these systems of records from compliance with certain provisions of the Privacy

VOL 51 ISS 81 AP 28 1986 UMI

Act of 1974, pursuant to the general exemption provisions of 5 U.S.C. 552a(j)(2), will not only protect investigative information and confidential sources, but will also prevent the subject of investigations from frustrating the investigative process. The exemption will apply only to information contained in the EPA–4 system of records, which is indexed by the names of individuals and entities that are the subjects of investigations by the OIG's Office of Investigations, and the EPA–17 system of records, which is indexed by the names of individuals and entities that are the subjects of investigations by the NEIC's Office of Criminal Investigations, and only to the extent that these systems of records contain criminal law enforcement material.

EPA also proposed to amend the specific exemptions section of its regulations implementing the Privacy Act of 1974, which is published at 40 CFR 16.14. As authorized by the specific exemption provisions of 5 U.S.C. 552a (k)(2) and (k)(5), EPA published a final rule in the **Federal Register** of November 19, 1975 (40 FR 53582) exempting from compliance with certain provisions of the Privacy Act of 1974 three systems of records. The proposed amendment will explain EPA's reasons for exempting these three systems of records from such provisions. The proposed amendment will also make minor corrections to the names of two of the systems of records referenced in § 16.14. What was formerly called "EPA–4 Inspection Branch Reports—EPA" is now called "EPA–4 OIG Criminal Investigative Index and Files—EPA/OIG," and what was formerly called "EPA–5 Personnel Security File System—EPA" is now called "EPA–5 OIG Personnel Security Files—EPA/OIG." As corrected, the names of these two systems of records will conform to the information contained in EPA's notice of revisions to these systems of records published elsewhere in today's **Federal Register**.

In addition, as authorized by the specific exemption provisons of 5 U.S.C. 552a(k)(2), the proposed amendment will exempt from certain provisions of the Privacy Act of 1974 the new system of records called "EPA–17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OCI." This system of records consists of investigatory material complied and maintained by the NEIC's Office of Criminal Investigations for law enforcement purposes. EPA's notice of this new system of records is published elsewhere in today's **Federal Register**.

Finally, as authorized by the specific exemption provisions of 5 U.S.C. 552a(k)(1), the proposed amendment will add a new § 16.14(c) to exempt from certain provisions of the Privacy Act of 1974 the existing system of records called "EPA–5 OIG Personnel Security Files—EPA/OIG," which contains some records that are classified by other Federal agencies at levels up to and including "secret." Those records are specifically authorized under criteria established by Executive Order 12356 to be kept secret in the interest of national defense or foreign policy and are in fact properly classified by other Federal agencies pursuant to that Executive Order. EPA's notice of revisions to this system of records is published elsewhere in today's **Federal Register**.

Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether a regulation is "major" and therefore subject to the regulatory impact analysis requirements of the Executive Order. Major rules are those which impose a cost on the economy of $100 million a year or more or have certain other economic impacts. I have determined that this proposed rule is not "major" and, therefore, is not subject to the Executive order. This proposed rule was submitted to the Office of Management and Budget (OMB) before publication, as required by the Executive order.

Environmental Impact Statement

This proposed rule does not affect the environment. An Environmental Impact Statement is not required under the National Environmental Policy Act of 1969.

Paperwork Reduction Act

This proposed rule does not constitute an information collection request within the meaning of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Therefore, this proposed rule is not subject to the requirements of the Paperwork Reduction Act of 1980.

Regulatory Flexibility Act

Section 603 of the Regulatory Flexibility Act, 5 U.S.C. 603, requires EPA to prepare and make available for comment an initial regulatory flexibility analysis in connection with any rulemaking for which EPA must publish a general notice of proposed rulemaking. The initial regulatory flexibility analysis must describe the impact of the proposed rule on small business entities.

Section 605(b) of the Act, however, provides that section 603 of the Act "shall not apply to any proposed or final rule if the head of the Agency certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." This rule, which exempts from certain provisions of the Privacy Act of 1974 four EPA systems of records, will not produce any economic impact on any businesses, large or small. Accordingly, under section 605(b) of the Act, I hereby certify that this rule will not, if promulgated, have significant economic impact on a substantial number of small entities. In accordance with section 605(b) of the Act, I am providing a copy of this certification and statement to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 40 CFR Part 16

Privacy.

Dated: April 17, 1986.

Lee M. Thomas,

Administrator.

PART 16—[AMENDED]

Therefore, it is proposed that 40 CFR Part 16 be amended as follows:

1. The authority citation for Part 16 continues to read as follows:

Authority: 5 U.S.C. 552a.

2. Section 16.13 is added to read as follows:

§ 16.13 General exemptions.

(a) *Systems of records affected.*

EPA–4 OIG Criminal Investigative Index and Files—EPA/OIG.

EPA–17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OCI.

(b) *Authority.* Under 5 U.S.C. 552a(j)(2), the head of any agency may by rule exempt any system of records within the agency from certain provisions of the Privacy Act of 1974, if the system of records is maintained by an agency or component thereof which performs as its principal function any activity pertaining to the enforcement of criminal laws and which consists of:

(1) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status;

(2) Information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or

(3) Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

(c) *Scope of exemption.* (1) The EPA–4 system of records identified in § 16.13(a) is maintained by the Office of Investigations of the Office of Inspector General (OIG), a component of EPA which performs as its principal function activities pertaining to the enforcement of criminal laws. Authority for the criminal law enforcement activities of the OIG's Office of Investigations is the Inspector General Act of 1978, 5 U.S.C. app.

(2) The EPA–17 system of records identified in § 16.13(a) is maintained by the Office of Criminal Investigations (OCI) of the National Enforcement Investigations Center (NEIC), a component of EPA which performs as its principal function activities pertaining to the enforcement of criminal laws. Authority for the criminal law enforcement activities of the NEIC's Office of Criminal Investigations is 28 U.S.C. 533, with appointment letter from Benjamin Civiletti, Attorney General, to Douglas Costle, Administrator, EPA, dated January 16, 1981.

(3) The systems of records identified in § 16.13(a) are exempted from the following provisions of the Privacy Act of 1974: 5 U.S.C. 552a(c) (3) and (4); (d); (e) (1), (2), (3), (4) (G), (H), and (I), (5), and (8); (f); and (g).

(4) To the extent that the exemption claimed under 5 U.S.C. 552a(j)(2) is held to be invalid for the systems of records identified in § 16.13(a), then an exemption under 5 U.S.C. 552a(k)(2) is claimed for these systems of records.

(d) *Reasons for exemption.* The systems of records identified in § 16.13(a) are exempted from the above provisions of the Privacy Act of 1974 for the following reasons:

(1) 5 U.S.C. 552a(c)(3) requires an agency to make the accounting of each disclosure of records available to the individual named in the record at his request. These accountings must state the date, nature, and purpose of each disclosure of a record and the name and address of the recipient. Accounting for each disclosure would alert the subjects of an investigation to the existence of the investigation and the fact that they are subjects of the investigation. The release of such information to the subjects of an investigation would provide them with significant information concerning the nature of the investigation, and could seriously impede or compromise the investigation, endanger the physical safety of confidential sources, witnesses, law enforcement personnel and their families, and lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

(2) 5 U.S.C. 552a(c)(4) requires an agency to inform any person or other agency about any correction or notation of dispute made by the agency in accordance with subsection (d) of the Act. Since EPA is claiming that these systems of records are exempt from subsection (d) of the Act, concerning access to records, this section is inapplicable and is exempted to the extent that these systems of records are exempted from subsection (d) of the Act.

(3) 5 U.S.C. 552a(d) requires an agency to permit an individual to gain access to records pertaining to him, to request amendment to such records, to request a review of an agency decision not to amend such records, and to contest the information contained in such records. Granting access to records in these systems of records could inform the subject of an investigation of an actual or potential criminal violation of the existence of that investigation, of the nature and scope of the information and evidence obtained as to his activities, of the identity of confidential sources, witnesses, and law enforcement personnel, and could provide information to enable the subject to avoid detection or apprehension. Granting access to such information could seriously impede or compromise an investigation, endanger the physical safety of confidential sources, witnesses, law enforcement personnel and their families, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony, and disclose investigation techniques and procedures. In addition, granting access to such information could disclose classified, security-sensitive, or confidential business information and could constitute an unwarranted invasion of the personal privacy of others.

(4) 5 U.S.C. 552a(e)(1) requires each agency to maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required by statute or by executive order of the President. The application of this provision could impair investigations and law enforcement, because it is not always possible to detect the relevance or necessity of specific information in the early stages of an investigation. Relevance and necessity are often questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established. In addition during the course of the investigation, the investigator may obtain information which is incidental to the main purpose of the investigation but which may relate to matters under the investigative jurisdiction of another agency. Such information cannot readily be segregated. Furthermore, during the course of the investigation, the investigator may obtain information concerning the violation of laws other than those which are within the scope of his jurisdiction. In the interest of effective law enforcement, the EPA investigators should retain this information, since it can aid in establishing patterns of criminal activity and can provide valuable leads for other law enforcement agencies.

(5) 5 U.S.C. 552a(e)(2) requires an agency to collect information to the greatest extent practicable directly from the subject individual when the information may result in adverse determinations about an individual's rights, benefits, and privileges under Federal programs. The application of this provision could impair investigations and law enforcement by alerting the subject of an investigation of the existence of the investigation, enabling the subject to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony. Moreover, in certain circumstances the subject of an investigation cannot be required to provide information to investigators, and information must be collected from other sources. Furthermore, it is often necessary to collect information from sources other than the subject of the investigation to verify the accuracy of the evidence collected.

(6) 5 U.S.C. 552a(e)(3) requires an agency to inform each person whom it asks to supply information, on a form that can be retained by the person, of the authority under which the information is sought and whether disclosure is mandatory or voluntary; of the principal purposes for which the information is intended to be used; of the routine uses which may be made of the information; and of the effects on the person, if any, of not providing all or any part of the requested information. The application of this provision could provide the subject of an investigation with substantial information about the nature of that investigation, which could interfere with the investigation. Moreover, providing such a notice to the subject of an investigation could seriously impede or compromise an undercover investigation by revealing its existence and could endanger the physical safety of confidential sources, witnesses, and investigators by revealing their identities.

(7) 5 U.S.C. 552a(e)(4)(G) and (H) require an agency to publish a **Federal Register** notice concerning its procedures for notifying an individual at his request if the system of records contains a record pertaining to him, how he can gain access to such a record, and how he can contest its content. Since EPA is claiming that these systems of records are exempt from subsection (f) of the Act, concerning agency rules, and subsection (d) of the Act, concerning access to records, these requirements are inapplicable and are exempted to the extent that these systems of records are exempted from subsections (f) and (d) of the Act. Although EPA is claiming exemption from these requirements,

VOL 51 ISS 81 APR 28 1986 UMI

EPA has published such a notice concerning its notification, access, and contest procedures because, under certain circumstances, EPA might decide it is appropriate for an individual to have access to all or a portion of his records in these systems of records.

(8) 5 U.S.C. 552a(e)(4)(I) requires an agency to publish a Federal Register notice concerning the categories of sources of records in the system of records. Exemption from this provision is necessary to protect the confidentiality of the sources of information, to protect the privacy and physical safety of confidential sources and witnesses, and to avoid the disclosure of investigative techniques and procedures. Although EPA is claiming exemption from this requirement, EPA has published such a notice in broad generic terms in the belief that this is all subsection (e)(4)(I) of the Act requires.

(9) 5 U.S.C. 552a(e)(5) requires an agency to maintain its records with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in making any determination about the individual. Since the Act defines "maintain" to include the collection of information, complying with this provision would prevent the collection of any data not shown to be accurate, relevant, timely, and complete at the moment it is collected. In collecting information for criminal law enforcement purposes, it is not possible to determine in advance what information is accurate, relevant, timely, and complete. Facts are first gathered and then placed into a logical order to prove or disprove objectively the criminal behavior of an individual. Material which may seem unrelated, irrelevant, or incomplete when collected may take on added meaning or significance as the investigation progresses. The restrictions of this provision could interfere with the preparation of a complete investigative report, thereby impeding effective law enforcement.

(10) 5 U.S.C. 552a(e)(8) requires an agency to make reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record. Complying with this provision could prematurely reveal an ongoing criminal investigation to the subject of the investigation.

(11) 5 U.S.C. 552a(f)(1) requires an agency to promulgate rules which shall establish procedures whereby an individual can be notified in response to his request if any system of records named by the individual contains a record pertaining to him. The application of this provision could impede or compromise an investigation or prosecution if the subject of an investigation was able to use such rules to learn of the existence of an investigation before it could be completed. In addition, mere notice of the fact of an investigation could inform the subject or others that their activities are under or may become the subject of an investigation and could enable the subjects to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony. Since EPA is claiming that these systems of records are exempt from subsection (d) of the Act, concerning access to records, the requirements of subsections (f)(2) through (5) of the Act, concerning agency rules for obtaining access to such records, are inapplicable and are exempted to the extent that these systems of records are exempted from subsection (d) of the Act. Although EPA is claiming exemption from the requirements of subsection (f) of the Act, EPA has promulgated rules which establish Agency procedures because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in these systems of records. These procedures are described elsewhere in this Part.

(12) 5 U.S.C. 552a(g) provides for civil remedies if an agency fails to comply with the requirements concerning access to records under subsections (d) (1) and (3) of the Act; maintenance of records under subsection (e)(5) of the Act; and any other provision of the Act, or any rule promulgated thereunder, in such a way as to have an adverse effect on an individual. Since EPA is claiming that these systems of records are exempt from subsections (c) (3) and (4), (d), (e) (1), (2), (3), (4) (G), (H), and (I), (5), and (8), and (f) of the Act, the provisions of subsection (g) of the Act are inapplicable and are exempted to the extent that these systems of records are exempted from those subsections of the Act.

(e) *Exempt records provided by another agency.* Individuals may not have access to records maintained by the EPA if such regulation that such records are subject to general exemption under 5 U.S.C. 552a(j). If an individual requests access to such exempt records, EPA will consult with the source agency.

(f) *Exempt records included in a nonexempt system of records.* All records obtained from a system of records which has been determined by regulation to be subject to general exemption under 5 U.S.C. 552a(j) retain their exempt status even if such records are also included in a system of records for which a general exemption has not been claimed.

3. Section 16.14 is revised to read as follows:

§ 16.14 Specific exemptions.

(a) *Exemption under 5 U.S.C. 552a(k)(2)*—(1) *Systems of records affected.*

EPA–2 General Personnel Records—EPA.

EPA–4 OIG Criminal Investigative Index and Files—EPA/OIG.

EPA–5 OIG Personnel Security Files—EPA/OIG.

EPA–17 NEIC Criminal Investigative Index and Files—EPA/NEIC/OCI.

(2) *Authority.* Under 5 U.S.C. 552a(k)(2), the head of any agency may by rule exempt any system of records within the agency from certain provisions of the Privacy Act of 1974, if the system of records is investigatory material compiled for law enforcement purposes, other than material within the scope of subsection (j)(2).

(3) *Scope of exemption.* (i) The systems of records identified in § 16.14(a)(1) are exempted from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in 5 U.S.C. 552a(k)(2): 5 U.S.C. 552a(c)(3); (d); (e)(1), (4)(G), (H), and (I); and (f).

(ii) An individual is "denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of such material," only if the Agency actually uses the material in denying or proposing to deny such right, privilege, or benefit.

(iii) To the extent that records contained in the systems of records identified in § 16.14(a)(1) are maintained by the Office of Investigations of the OIG or by the Office of Criminal Investigations of the NEIC, components of EPA which perform as their principal function activities pertaining to the enforcement of criminal laws, then an exemption under 5 U.S.C. 552a(j)(2) is claimed for these records.

(4) *Reasons of exemption.* The systems of records identified in § 16.14(a)(1) are exempted from the above provisions of the Privacy Act of 1974 for the following reasons:

(i) 5 U.S.C. 552a(c)(3) requires an agency to make the accounting of each disclosure of records available to the individual named in the record at his request. These accountings must state the date, nature, and purpose of each disclosure of a record and the name and address of the recipient. Accounting for each disclosure would alert the subjects of an investigation to the existence of the investigation and the fact that they are subjects of the investigation. The release of such information to the subjects of an investigation would provide them with significant information concerning the nature of the investigation, and could seriously impede or compromise the investigation, endanger the physical safety of confidential sources, witnesses, law enforcement personnel and their families, and lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony.

(ii) 5 U.S.C. 552a(d) requires an agency to permit an individual to gain access to records pertaining to him, to request amendment to such records, to request a review of an agency decision not to amend such records, and to contest the information contained in such records. Granting access to records in these systems of records could inform the subject of an investigation of an actual or potential criminal violation of the existence of that investigation, of the nature and scope of the information and evidence obtained as to his activities, of the identity of confidential sources, witnesses, and law enforcement personnel, and could provide information to enable the subject to avoid detection or apprehension. Granting access to such information could seriously impede or compromise an investigation, endanger the physical safety of confidential sources, witnesses, law enforcement personnel and their families, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony, and disclose investigative techniques and procedures. In addition, granting access to such information could disclose classified, security-sensitive, or confidential business information and could constitute an unwarranted invasion of the personal privacy of others.

(iii) 5 U.S.C. 552a(e)(1) requires each agency to maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required by statute or by executive order of the President. The application of this provision could impair investigations and law enforcement, because it is not always possible to detect the relevance or necessity of specific information in the early stages of an investigation. Relevance and necessity are often questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established. In addition, during the course of the investigation, the investigator may obtain information which is incidental to the main purpose of the investigation but which may relate to matters under the investigative jurisdiction of another agency. Such information cannot readily be segregated. Furthermore, during the course of the investigation, the investigator may obtain information concerning the violation of laws other than those which are within the scope of his jurisdiction. In the interest of effective law enforcement, EPA investigators should retain this information, since it can aid in establishing patterns of criminal activity and can provide valuable leads for other law enforcement agencies.

(iv) 5 U.S.C. 552a(e)(4) (G) and (H) require an agency to publish a Federal Register notice concerning its procedures for notifying an individual at his request if the system of records contains a record pertaining to him, how he can gain access to such a record, and how he can contest its content. Since EPA is claiming that these systems of records are exempt from subsection (f) of the Act, concerning agency rules, and subsection (d) of the Act, concerning access to records, these requirements are inapplicable and are exempted to the extent that these systems of records are exempted from subsections (f) and (d) of the Act. Although EPA is claiming exemption from these requirements, EPA has published such a notice concerning its notification, access, and contest procedures because, under certain circumstances, EPA might decide it is appropriate for an individual to have access to all or a portion of his records in these systems of records.

(v) 5 U.S.C. 552a(e)(4)(I) requires an agency to publish a Federal Register notice concerning the categories of sources of records in the system or records. Exemption from this provision is necessary to protect the confidentiality of the sources of information, to protect the privacy and physical safety of confidential sources and witnesses, and to avoid the disclosure of investigative techniques and procedures. Although EPA is claiming exemption from this requirement, EPA has published such a notice in broad generic terms in the belief that this is all subsection (e)(4)(I) of the Act requires.

(vi) 5 U.S.C. 552a(f)(1) requires an agency to promulgate rules which shall establish procedures whereby an individual can be notified in response to his request if any system of records named by the individual contains a record pertaining to him. The application of this provision could impede or compromise an investigation or prosecution if the subject of an investigation was able to use such rules to learn of the existence of an investigation before it could be completed. In addition, mere notice of the fact of an investigation could inform the subject or others that their activities are under or may become the subject of an investigation and could enable the subjects to avoid detection or apprehension, to influence witnesses improperly, to destroy evidence, or to fabricate testimony. Since EPA is claiming that these systems of records are exempt from subsection (d) of the Act, concerning access to records, the requirements of subsections (f) (2) through (5) of the Act concerning agency rules for obtaining access to such records, are inapplicable and are exempted to the extent that these systems or records are exempted from subsection (d) of the Act. Although EPA is claiming exemption from the requirements of subsection (f), EPA has promulgated rules which establish Agency procedures because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in these systems of records. These procedures are described elsewhere in this Part.

(b) *Exemption under 5 U.S.C. 552a(k)(5)*—(1) *Systems of records affected.*

EPA–2 General Personnel Records—EPA.

EPA–4 OIG Criminal Investigative Index and Files—EPA/OIG.

EPA–5 OIG Personnel Security Files—EPA/OIG.

(2) *Authority.* Under 5 U.S.C. 552a(k)(5), the head of any agency may by rule exempt any system of records within the agency from certain provisions of the Privacy Act of 1974, if the system of records is investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, under an implied promise that the identity would be held in confidence.

(3) *Scope of exemption.* (i) The systems of records identified in § 16.14(b)(1) are exempted from the following provisions of the Privacy Act of 1974, subject to the limitations of 5 U.S.C. 552a(k)(5): 5 U.S.C. 552a (c)(3); (d); (e)(1), (4) (H) and (I); and (f) (2) through (5).

(ii) To the extent that records contained in the systems of records identified in § 16.14(b)(1) reveal a violation or potential violation of law, then an exemption under 5 U.S.C. 552a(k)(2) is also claimed for these records.

(4) *Reasons for exemption.* The systems of records identified in § 16.14(b)(1) are exempted from the above provisions of the Privacy Act of 1974 for the following reasons:

(i) 5 U.S.C. 552a(c)(3) requires an agency to make the accounting of each disclosure of records available to the individual named in the record at his request. These accountings must state

VOL 51 ISS 81 AP 28 1986 UMI

the date, nature, and purpose of each disclosure of a record and the name and address of the recipient. Making such an accounting could cause the identity of a confidential source to be revealed, endangering the physical safety of the confidential source, and could impair the future ability of the EPA to compile investigatory material for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information.

(ii) 5 U.S.C. 552a(d) requires an agency to permit an individual to gain access to records pertaining to him, to request amendment to such records, to request a review of an agency decision not to amend such records, and to contest the information contained in such records. Granting such access could cause the identity of a confidential source to be revealed, endangering the physical safety of the confidential source, and could impair the future ability of the EPA to compile investigatory material for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information.

(iii) 5 U.S.C. 552a(e)(1) requires each agency to maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required by statute or by executive order of the President. The application of this provision could impair investigations, because it is not always possible to detect the relevance or necessity of specific information in the early stages of an investigation. Relevance and necessity are often questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established.

(iv) 5 U.S.C. 562a(e)(4)(H) requires an agency to publish a **Federal Register** notice concerning its procedures for notifying an individual at his request how he can gain access to any record pertaining to him and how he can contest its content. Since EPA is claiming that these systems of records are exempt from subsections (f) (2) through (5) of the Act, concerning agency rules, and subsection (d) of the Act, concerning access to records, these requirements are inapplicable and are exempted to the extent that these systems of records are exempted from subsections (f) (2) through (5) and (d) of the Act. Although EPA is claiming exemption from these requirements, EPA has published such a notice concerning its access and contest procedures because, under certain circumstances, EPA might decide it is appropriate for an individual to have access to all or a portion of his records in these systems of records.

(v) 5 U.S.C. 552a(e)(4)(I) requires an agency to publish a **Federal Register** notice concerning the categories of sources of records in the system of records. Exemption from this provision is necessary to protect the confidentiality of the sources of information, to protect the privacy and physical safety of confidential sources, and to avoid the disclosure of investigative techniques and procedures. Although EPA is claiming exemption from this requirement, EPA has published such a notice in broad generic terms in the belief that this is all subsection (e)(4)(I) of the Act requires.

(vi) 5 U.S.C. 552a(f) (2) through (5) require an agency to promulgate rules for obtaining access to records. Since EPA is claiming that these systems of records are exempt from subsection (d) of the Act, concerning access to records, the requirements of subsections (f) (2) through (5) of the Act, concerning agency rules for obtaining access to such records, are inapplicable and are exempted to the extent that this system of records is exempted from subsection (d) of the Act. Although EPA is claiming exemption from the requirements of subsections (f) (2) through (5) of the Act, EPA has promulgated rules which establish Agency procedures because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system of records. These procedures are described elsewhere in this Part.

(c) *Exemption under 5 U.S.C. 552a(k)(1).*—(1) *System of records affected.*

EPA–5 OIG Personnel Security Files—EPA/OIG.

(2) *Authority.* Under 5 U.S.C. 552a(k)(1), the head of any agency may by rule exempt any system of records within the agency from certain provisions of the Privacy Act of 1974, if the system of records is subject to the provisions of 5 U.S.C. 552(b)(1). A system of records is subject to the provisions of 5 U.S.C. 552(b)(1) if it contains records that are specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive order. Executive Order 12356 establishes criteria for classifying records which are to be kept secret in the interest of national defense or foreign policy.

(3) *Scope of exemption.* To the extent that the system of records identified in § 16.14(c)(1) contains records provided by other Federal agencies that are specifically authorized under criteria established by Executive Order 12356 to be kept secret in the interest of national defense or foreign policy and are in fact properly classified by other Federal agencies pursuant to that Executive Order, the system of records is exempted from the following provisions of the Privacy Act of 1974: 5 U.S.C 552a (c)(3); (d); (e)(1), (4) (G), (H), and (I); and (f).

(4) *Reasons for exemption.* The system of records identified in § 16.14(c)(1) is exempted from the above provisions of the Privacy Act of 1974 for the following reasons:

(i) 5 U.S.C. 552a(c)(3) requires an agency to make the accounting of each disclosure of records available to the individual named in the record at his request. These accountings must state the date, nature, and purpose of each disclosure of a record and the name and address of the recipient. Making such an accounting could result in the release of properly classified information, which would compromise the national defense or disrupt foreign policy.

(ii) 5 U.S.C. 552a(d) requires an agency to permit an individual to gain access to records pertaining to him, to request amendment to such records, to request a review of an agency decision not to amend such records, and to contest the information contained in such records. Granting such access could cause the release of properly classified information, which would compromise the national defense or disrupt foreign policy.

(iii) 5 U.S.C. 552a(e)(1) requires each agency to maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency required by statute or by executive order of the President. The application of this provision could impair personnel security investigations which use properly classified information, because it is not always possible to know the relevance or necessity of specific information in the early stages of an investigation. Relevance and necessity are often questions of judgment and timing, and it is only after the information is evaluated that the relevance and necessity of such information can be established.

(iv) 5 U.S.C. 552a(e)(4) (G) and (H) require an agency to publish a **Federal Register** notice concerning its procedures for notifying an individual at his request if the system of records contains a record pertaining to him, how he can gain access to such a record, and how he can contest its content. Since EPA is claiming that this system of records is exempt from subsection (f) of the Act, concerning agency rules, and subsection (d) of the Act, concerning access to records, these requirements are inapplicable and are exempted to the extent that this system of records is exempted from subsections (f) and (d) of the Act. Although EPA is claiming exemption from these requirements, EPA has published such a notice concerning its notification, access, and contest procedures because, under certain circumstances, EPA might decide it is appropriate for an individual to have access to all or a portion of his records in this system of records.

(v) 5 U.S.C. 552a(e)(4)(I) requires an agency to publish a **Federal Register** notice concerning the categories of sources of records in the system of records. Exemption from this provision is necessary to prevent the release of properly classified information, which would compromise the national defense or disrupt foreign policy. Although EPA is claiming exemption from this requirement, EPA has published such a notice in broad generic terms in the belief that this is all subsection (e)(4)(I) of the Act requires.

(vi) 5 U.S.C. 552a(f)(1) requires an agency to promulgate rules which shall establish procedures whereby an individual can be notified in response to his request if any system of records named by the individual contains a record pertaining to him. The application of this provision could result in the release of properly classified information, which would compromise the national defense or disrupt foreign policy. Since EPA is claiming that this system of records is exempt from subsection (d) of the Act, concerning access to records, the requirements of subsections (f) (2) through (5) of the Act, concerning agency rules for obtaining access to such records, are inapplicable and are exempted to the extent that this system of records is exempted from subsection (d) of the Act. Although EPA is claiming exemption from the requirements of subsection (f) of the Act, EPA has promulgated rules which establish Agency procedures because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system of records. These procedures are described elsewhere in this Part.

(d) *Exempt records provided by another agency.* Individuals may not have access to records maintained by the EPA if such records were provided by another agency which has determined by regulation that such records are subject to general exemption under 5 U.S.C. 552a(j) or specific exemption under 5 U.S.C. 552a(k). If an individual requests access to such exempt records, EPA will consult with the source agency.

(e) *Exempt records included in a nonexempt system of records.* All records obtained from a system of records which has been determined by regulation to be subject to specific exemption under 5 U.S.C. 552a(k) retain their exempt status even if such records are also included in a system of records for which a specific exemption has not been claimed.

Requirements for Implementation Plans; Surface Coal Mines and Fugitive Emissions; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of public comment period.

SUMMARY: On October 26, 1984, EPA proposed that fugitive emissions be included in threshold applicablility determinations of whether surface coal mines would be required to obtain air quality new source review permits (49 FR 43211). On February 28, 1986, EPA reopened this public comment period for 60 days, until April 29, 1986 (51 FR 7090).

Representatives of the surface coal mining industry have requested that EPA extend this public comment period, noting in part the need for additional time to complete studies. In response to those requests, I am hereby extending by 30 days the public comment period.

DATES: The close of public comment period is extended from April 29, 1986, to May 29, 1986.

ADDRESSES: Comments should be submitted (preferably in triplicate) to Central Docket Section (LE–131A), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, Attention: Docket No. A–84–33.

FOR FURTHER INFORMATION CONTACT: Mr. Kirt Cox, U.S. Environmental Protection Agency (MD–15), Research Triangle Park, North Carolina 27711, telephone: 919–541–5591, FTS 629–5591.

Dated: April 18, 1986.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

Cresols; Proposed Testing Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Elsewhere in this issue of the **Federal Register**, EPA is issuing a final test rule establishing testing requirements under section 4(a) of the Toxic Substances Control Act (TSCA) for manufacturers and processors of cresols. Cresols is a chemical category consisting of three cresol isomers: *ortho*-cresol (CAS No. 95–48–7), *meta*-cresol (CAS No. 108–39–4), and *para*-cresol (CAS No. 106–44–5). In this document, EPA is proposing that certain TSCA test guidelines be utilized as the test standards for the required studies. EPA is also proposing that tests be submitted within specified time frames.

DATES: Submit written comment on or before June 12, 1986. If persons request time for oral comment by May 28, 1986, EPA will hold a public meeting on this proposed rule in Washington, DC. For further information on arranging to speak at the meeting, see Unit VI of this preamble.

ADDRESS: Submit written comments, identified by the document control number (OPTS–42033C), in triplicate to: TSCA Public Information Office (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–108, 401 M St., SW., Washington, DC 20460.

A public version of the administrative record supporting this action (with any confidential business information deleted) is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Rm. E–543, 401 M St., SW., Washington, DC 20460. Toll Free: (800–424–9065), In Washington, DC: (554–1404), Outside the USA: (Operator 202–554–1404).

SUPPLEMENTARY INFORMATION: Elsewhere in this issue of the **Federal Register**, EPA is issuing a final test rule

VOL 51 ISS 81 AP 28 1986 UMI

under section 4(a) of TSCA to require testing of cresols for mutagenic effects, developmental toxicity, and reproductive effects. The Agency is proposing in this document the test standards to be used and the time frames for submission of the required test data.

I. Background

Elsewhere in this issue of the **Federal Register**, EPA is promulgating a Phase I final rule pursuant to TSCA section 4 that establishes testing requirements for manufacturers and processors of cresols. The Phase I rule specifies the following testing requirements for cresols: (1) Mutagenic effects studies (including tests for chromosomal aberrations, gene mutations, and cellular transformations) on specified cresol isomers; (2) developmental toxicity study with each cresol isomer; and (3) two-generation reproductive effects study with each cresol isomer.

Once this Phase I test rule becomes effective, manufacturers and processors of cresols would normally be required (under the two-phase test rule development process) to submit proposed study plans for each of these required studies and proposed schedules for both the initiation of testing and the submission of study data. (See 40 CFR 790.30, published in the **Federal Register** of May 17, 1985 (50 FR 20658).) EPA would review the submitted study plans and schedules and would thereafter issue them (with any necessary modifications) in a Phase II test rule proposal. This proposal would request public comment on the ability of the proposed study plans to ensure that the resulting data would be reliable and adequate. After evaluating and responding to public comment, EPA would adopt the study plans, including the reporting schedules, in a Phase II final rule as the required test standards and data submission deadlines. (See 40 CFR 790.32, published in the **Federal Register** of May 17, 1985 (50 FR 20659).)

However, in the case of the cresols test rule, which was initiated under the two-phase process, EPA has decided to propose the relevant TSCA test guidelines as the test standards (see Unit III below). In addition, EPA is proposing that the data from the required studies be submitted within certain time periods. These time periods will serve as the data submission deadlines required by TSCA section 4(b)(1) (see Unit IV below). The reasons for this change in the test rule development process for cresols are discussed below.

II. Change in the test rule development process

A. Test Standards and Data Submission Deadlines

TSCA section 4(b)(1) specifies that test rules shall include standards for the development of test data ("test standards") and deadlines for submission of test data. Under a two-phase test rule development process utilized by EPA since 1982 (47 FR 13012; March 26, 1982) and formally adopted in the fall of 1984 (49 FR 39774; October 10, 1984), test standards and data submission deadlines were to be adopted during the second phase of the rulemaking process. Upon issuance of the Phase I final rule, which established the effects and characteristics for which a given chemical substance must be tested, persons subject to the rule would be required by a specified date to submit study plans detailing the methodologies and protocols they intended to use to perform the required tests. Such study plans were to include proposed schedules for the initiation and completion of testing and submission of test data. (See 40 CFR 790.30 (a) and (c), published in the **Federal Register** of October 10, 1984 (49 FR 39774).) In the second phase, after consideration of public comment, the Agency would promulgate the Phase II final rule adopting the study plans (with any necessary modifications) as the test standards for the development of test data and deadlines for submission of test data.

In December 1983, the Natural Resources Defense Council (NRDC) and the Industrial Union Department of the American Federation of Labor-Congress of Industrial Organizations filed an action under TSCA section 20 which challenged, among other things, the use of the two-phase process. In an August 23, 1984 Opinion and Order, the Court found that utilization of the two-phase rulemaking process was permissible. However, the Court also held that the Agency was subject to a standard of promulgating test rules within a reasonable time frame. *NRDC* v. *EPA*, 595 F. Supp. 1255 (S.D.N.Y. 1984).

After the issuance of that Opinion, the Agency decided that to expedite development of section 4 test rules, it would utilize a single-phase rulemaking process for most test rules. In the document announcing this decision, EPA stated that the single-phase approach offers a number of advantages over the two-phase process (see 50 FR 20652, 20653; May 17, 1985). In this single-phase approach, the Agency proposes (in one document) not only the effects for which testing will be required, but also proposes pertinent TSCA test guidelines as the test standards and time frames for the submission of test data. After receiving and evaluating public comment on the proposed testing requirements, test guidelines, and data submission deadlines, EPA promulgates a final test rule.

This single-phase approach shortens the rulemaking period and expedites the initiation of required testing that would usually result from use of the two-phase rulemaking process. The single-phase process also eliminates the requirement under the two-phase approach for industry to submit test protocols for approval. Moreover, by allowing commenters to submit alternative testing methodologies during the comment period, the single-phase approach preserves the flexibility of the two-phase process.

These same advantages, i.e., expedited initiation of testing and the elimination of study plan submission requirements for persons subject to a Phase I rule, are factors considered by EPA in deciding to modify the rulemaking process for cresols. By proposing both pertinent TSCA test guidelines as the test standards and data submission deadlines at the time of issuance of the Phase I rule, EPA expects that the Phase II final rule will be issued 6 months sooner than would occur if the usual two-phase process was followed. Thus, required testing will be initiated on a more expedited basis. In addition, for each of the required tests for cresols, appropriate TSCA test guidelines are available (see Unit III below). Thus, EPA believes that there is no need for manufacturers and processors of cresols to develop study plans for approval independent of these TSCA guidelines.

B. Modifications to Requirements Under a Phase I Final Rule For Cresols

As indicated above, persons subject to the cresols Phase I final rule and who have notified EPA of their intent to test would normally be required to submit study plans and proposed data submission deadlines within a specified time of the final rule's effective date. (See 40 CFR 790.30(a) and (c), published in the **Federal Register** of May 17, 1985 (50 FR 20658).) However, because EPA is proposing certain TSCA test guidelines as the test standards and data submission deadlines, persons subject to the Phase I final rule are not required to submit proposed study plans for the required testing or proposed dates for the initiation and completion of that testing.

However, persons subject to the Phase I final rule for cresols are still required to submit notices of intent to test or exemption applications in accordance with 40 CFR 790.25, published in the **Federal Register** of May 17, 1985 (50 FR 20657). Moreover, once the test standards are promulgated in the Phase II final rule, those persons who have notified EPA of their intent to test must submit study plans (which adhere to the promulgated test standards) no later than 30 days before the initiation of each required test.

III. Proposed Test Standards

The Phase I rule specifies that cresols be tested for mutagenic effects (including tests for chromosomal aberrations, gene mutations, and cellular transformations), development toxicity, and reproductive effects. The Agency is now proposing that this testing of cresols be conducted in accordance with specific guidelines set forth in Title 40 of the Code of Federal Regulations (CFR) as enumerated below. Test methods under new Parts 796, 797, and 798 were published in the **Federal Register** of September 27, 1985 (50 FR 39252). The health effects tests to be conducted are:

1. *Mutagenicity*: Chromosomal effects.
2. *In Vitro* Mammalian Cytogenetics test, which appears at 40 CFR 798.5375.

b. *In Vivo* Mammalian Bone Marrow Cytogenetics Tests: Chromosomal Analysis, which appears at 40 CFR 798.5385.

c. Rodent Dominant Lethal Assay, which appears at 40 CFR 798.5450.

2. *Mutagenicity*: Unscheduled DNA Synthesis in Mammalian Cells in Culture assay, which appears at 40 CFR 798.5550.

3. *Mutagenicity*: Gene mutations.

a. Detection of Gene Mutations in Somatic Cells in Culture assay, which appears at 40 CFR 798.5300.

b. Sex-linked Recessive Lethal Test in *Drosophila melanogaster*, which appears at 40 CFR 798.5275.

4. *Mutagenicity*: Cellular transformations. Morphologic Transformation of Mammalian Cells in Culture assay, which appears at 40 CFR 796.285.

5. *Developmental toxicity*: Developmental Toxicity Study, which appears at 40 CFR 798.4900.

6. *Reproductive effects*: Reproduction and Fertility Effects study, which appears at 40 CFR 798.4700.

EPA believes that the TSCA Health Effects Test Guidelines cited above, if properly followed, should produce adequate and reliable data. These guidelines describe methods for performing testing of chemical substance under TSCA. EPA reviews its TSCA test guidelines annually (see 47 FR 41657; September 22, 1982).

EPA has proposed in a separate **Federal Register** document (51 FR 1552; January 14, 1986), certain revisions to these TSCA guidelines to provide more explicit guidance on the necessary minimum elements for each study. These revisions will avoid repetitive chemical-by-chemical changes to the guidelines in their adoption as test standards for chemical-specific test rules. EPA is proposing that these modifications be adopted in the test standards for cresols.

The Agency believes that the TSCA test guidelines will provide relevant data to assess the potential human hazard resulting from exposure to cresols.

The chemical or physical properties, previous testing, specific manufacturing, use, disposal practices, and exposure patterns of a particular chemical, in some cases, will cause the Agency to make changes in TSCA guidelines which reflect the characteristics of a specific chemical. The changes made for the creosis in the guidelines and the justification for the use of these guidelines and for any changes are set forth below.

1. *In vitro mammalian cytogenetics test.* The *in vitro* cytogenetics test will detect structural chromosomal aberrations in cultured mammalian cells. For cresols, the solvent for the assay shall be dimethyl sulfoxide (DMSO) which was the solvent used for tesing the cresol isomers in previously conducted assays. In addition, the metabolic activation system for the assay shall be derived from Aroclor–1254 induced rat liver S–9 preparations because it is the system with the largest historical data base for use in this assay. Finally, the *in vitro* cytogenetic assay shall be performed in established cell lines or strains because of the historical data base available for these cell systems.

2. *In vivo mammalian bone marrow cytogenetics test.* The *in vivo* cytogenetics test is designed to detect structural chromosomal aberrations. For the use of cresols in this assay, the route of administration of the test substances shall be oral gavage. Furthermore, the test species shall be mice for the *in vivo* assay in order to allow species consistency among other required mutagenicity assays, i.e., rodent dominant lethal test, and also among upper-tier assays, i.e., heritable translocation assay, should they be required in the future.

3. *Rodent dominant lethal assay.* The rodent dominant lethal assay will determine whether or not a dominant lethal event is caused after exposure to a chemical substance. This dominant lethal event indicates that the test substance has affected germinal tissue of the test species. For cresols, the test substances shall be administered by oral gavage. Three dose levels shall be used. In addition, the test species shall be mice. Each male shall be mated to no more than two, and preferably to only one, female per mating interval. This is the optimum for this species. Further, females shall be left with the males for no longer than seven days, and mating shall continue for at least six weeks to ensure that the entire germ cell cycle is sampled.

4. *Unscheduled DNA synthesis in mammalian cells in culture.* This assay measures the repair of DNA damage induced by the test chemical. This assay shall be performed in primary cultures of rate hepatocytes because of the positive results obtained in this system with the equimixture of the isomers. In addition, the solvent used in the DNA damage assay shall be DMSO.

5. *Detection of gene mutations in somatic cells in culture.* This assay is used to detect possible mutations in mammalian cell culture systems induced by the chemical test substance. For cresols, the solvent used in this assay shall be DMSO. The metabolic activation system shall be derived from Aroclor–1254 induced rate liver S–9 preparations because it is the system with the largest historical data base for use in this assay. In addition, this assay shall be done in L5178Y cells because of a previous positive result in that cell system with the equimixture of the cresol isomers. Finally, a 4-hour exposure time shall be used because it is the standard exposure period recommended for this test.

6. *Sex-linked recessive lethal test in Drosophila melanogaster.* The sex-linked recessive lethal test using *Drosophila melanogaster* is designed to detect the occurrence of mutations, both point mutations and small deletions, in the germ line of the insect. For cresols, the oral route of administration shall be used in this assay. A concurrent negative control shall be included to ensure that any observed effects are a direct result of the chemical treatment. In addition, the results shall be confirmed in an independent assay because of the crucial nature of the results in determining any upper-tier mutagenicity testing in a subsequent test rule for cresols.

7. *Morphologic transformation of mammalian cells in culture.* This *in vitro* cellular transformation assay is a semi-quantitative assay for detection of the ability of chemical agents to morphologically alter cells in culture. Such transformation is associated with certain phenotypic changes such as loss of contact inhibition and the ability to form colonies in soft agar medium. The process by which these changes occur is

VOL 51 ISS 81 AP 28 1986 UMI

assumed to be closely related to the process of *in vivo* carcinogenesis. For cresols, *meta*-and *para*-cresol shall initially be tested in the cellular transformation assay performed without metabolic activation. *meta*- and *para*-Cresol shall be tested in the cellular transformation assay performed with metabolic activation only if they produce negative results in the cellular transformation assay without metabolic activation. *ortho*-Cresol shall only be tested in the cellular transformation assay performed with metabolic activation. This isomer has had negative results in a previously conducted cellular transformation assay without metabolic activation. Therefore, the next sequenced test is the cellular transformation assay with metabolic activation.

8. *Developmental toxicity study.* The developmental toxicity study is designed to provide information on the potential hazard to the unborn which may arise from exposure of the mother to the chemical test substance during pregnancy. Because of the large production and predicted widespread exposure of the human population to cresols, it was determined that cresols shall be tested for this effect. For cresols, the test substances shall be administered by oral gavage. In addition, the testing shall be performed in at least two mammalian species.

9. *Reproduction and fertility effects.* This guideline is designed to provide information concerning the effects of cresols on gonadal function, conception, parturition, and the growth and development of the offspring. The study can also give information about the effects of neonatal morbidity and mortality. It was determined that this test be required for cresols because of its substantial production, widespread use practices, and potential for widespread human exposure. For cresols, the test substance shall be administered by oral gavage.

IV. Reporting Requirements

EPA is proposing that all data developed under this rule be reported in accordance with its TSCA Good Laboratory Practice (GLP) standards, which appear in 40 CFR Part 792.

Further, test sponsors are required to submit individual study plans at least 30 days prior to beginning each study.

EPA is required by section 4(b)(1)(c) of TSCA to specify the time period during which persons subject to a test rule must submit test data. The Agency is proposing specific reporting requirements for each of the proposed test standards as follows:

1. The *in vitro* mammalian cytogenetics test shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

2. The *in vivo* mammalian bone marrow cytogenetics test, if required, shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

3. The rodent dominant lethal assay, if required, shall be completed and final results submitted to the Agency within two years of the effective date of the final test rule.

4. The unscheduled DNA synthesis in the mammalian cells in culture assay shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

5. The detection of gene mutations in somatic cells in culture assay shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

6. The sex-linked recessive lethal test in *Drosophila melanogaster*, if required, shall be completed and final results submitted to the Agency within two years of the effective date of the final test rule.

7. The morphologic transformation of mammalian cells in culture assay shall be completed and final results submitted to the Agency with one year of the effective date of the final test rule.

8. The development toxicity studies shall be completed and the final results submitted to the Agency within one year of the effective date of the final test rule.

9. The reproduction and fertility effects studies shall be completed and the final results submitted to the Agency within 29 months of the effective date of the final rule.

Interim progress reports shall be provided quarterly for each test. The progress reports shall begin 90 days after the effective date of the final Phase II test rule.

TSCA section 14(b) governs Agency disclosure of all test data submitted pursuant to section 4 of TSCA. Upon receipt of data required by this rule, the Agency will publish a notice of receipt within 15 days in the **Federal Register** as required by section 4(d). Test data received pursuant to this rule will be made available for public inspection by any person except in those cases where the Agency determines that confidential treatment must be accorded pursuant to section 14(b) of TSCA.

V. Issues for Comment

EPA invites comment on the use of the TSCA test guidelines and the chemical-specific modifications to these guidelines as the proposed test standards for the required testing of cresols. EPA also invites comment on the proposed schedule for the required testing.

VI. Public Meetings

If persons indicate to EPA that they wish to present oral comments on this proposed rule to EPA officials who are directly responsible for developing the rule and supporting analyses, EPA will hold a public meeting after the close of the public comment period in Washington, D.C. Persons who with to attend or to present comments at the meeting should call the TSCA Assistance Office (TAO): Toll Free: (800–424–9065); In Washington, DC: (544–1404); Outside the U.S.A. (Operator—202–544–1404), by May 28, 1986. A meeting will not be held if members of the public do not indicate that they wish to make oral presentations. While the meeting will be open to the public, active participation will be limited to those persons who arranged to present comments and to designated EPA participants. Attendees should call the TAO before making travel plans to verify whether a meeting will be held.

Should a meeting be held, the Agency will transcribe the meeting and include the written transcript in the public record. Participants are invited, but not required, to submit copies of their statements prior to or on the day of the meeting. All such written materials will become part of the EPA's record for this rulemaking.

VII. Public Record

EPA has established a record for this rulemaking [docket number (OPTS–42033C)]. This record includes basic information considered by the Agency in developing this proposal and appropriate **Federal Register** notices. The Agency will supplement the record with additional information as it is received.

This record includes the following information:

Supporting Documentation

(1) **Federal Register** notices pertaining to this proposed rule consisting of:
(a) Notice of final Phase I rule on cresols.
(b) Notice containing the ITC designation of cresols to the Priority List (42 FR 55026; October 12, 1977).
(c) Notice of proposed rule on cresols (48 FR 31612; July 11, 1983).
(d) Notice of final rule on EPA's TSCA Good Laboratory Practice Standards (49 FR 53922; November 29, 1984).
(e) Notice of final rule on test rule development and exemption procedures (49 FR 39774; October 10, 1984).
(f) Notice of final rule concerning data reimbursement (48 FR 41786; July 11, 1983).
(g) Notice of interim final rule on test rule development and exemption procedures (50 FR 20652; May 17, 1985).
(h) Notice of final rule on the C_9 Aromatic Hydrocarbon Fraction (50 FR 20662; May 17, 1985).
(i) Notice of final rule on mesityl oxide (50 FR 51857; December 20, 1985).
(2) Support documents consisting of:
(a) Cresols technical support document for proposed rule.
(b) Economic impact analysis of NPRM for cresols.
(c) Economic impact analysis of final test rule for cresols.
(3) Communications consisting of:
(a) Written public comments.
(b) Transcription of public meeting.
(c) Summaries of phone conversations.
(d) Meeting summaries.
(e) Reports—published and unpublished contractor's reports.

VIII. Other Regulatory Requirements

A. Executive Order 12291

Under Executive order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirements of a Regulatory Impact Analysis. This test rule is not major because it does not meet any of the criteria set forth in section 1(b) of the Order. The economic analysis of the testing of cresols is discussed in the final test rule which appears elsewhere in this issue of the **Federal Register**.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act (15 U.S.C. 601 *et seq.*, Pub.L. 96–354, September 19, 1980), EPA is certifying that this test rule, if promulgated, will not have significant impact on a substantial number of small businesses for the following reasons:

1. There is not a significant number of small businesses manufacturing cresols.
2. Small processors are not expected to perform testing themselves, or participate in the organization of the testing efforts.
3. Small processors will experience only very minor costs, if any, in securing exemption from testing requirements.
4. Small processors are unlikely to be affected by reimbursement requirements, and any testing costs passed on to small processors through price increases will be small.

C. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in the proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control number 2070–0033. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, 726 Jackson Place, NW., Washington, DC 20503, marked "Attention . . . Desk Officer for EPA." The final rule package will respond to any OMB or public comments on the information collection requirements.

D. Comprehensive Environmental Response, Compensation and Liability Act ("Superfund")

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) (42 U.S.C. 9601 *et seq.*, Pub. L. 96–510, December 10, 1980) requires that persons in charge of vessels or facilities from which hazardous substances have been released in quantities that are equal to or greater than the reportable quantities (RQs) immediately notify the National Response Center (NRC) of the release. (See CERCLA section 103(a), and 50 FR 13456; April 4, 1985.) The National Response Center can be notified at (800) 424–8802, except from the Washington, DC metropolitan area, where the telephone number for notification is (202) 426–2675. All designated hazardous substances will have an RQ of one pound until adjusted by regulation under CERCLA, unless such substances are already on the lost of CERCLA hazardous substances and have been assigned an RQ (see CERCLA section 102). Cresols have been assigned an RQ of 1,000 pounds.

List of Subjects in 40 CFR Parts 795 and 799

Testing, Environmental protection, Hazardous Substances, Chemicals, Recordkeeping and reporting requirements.

Dated: April 15, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

Therefore, it is proposed that Subchapter R of Chapter I of Title 40 of the Code of Federal Regulations be amended as follows:

1. By adding Part 795, consisting at this time of § 795.285 under Subpart D, to read as follows:

PART 795—PROVISIONAL TEST GUIDELINES

Subparts A–C—[Reserved]

Subpart D—Provisional Health Effects Guidelines

Sec.
795.285 Morphologic transformation of cells in culture.

Authority: 15 U.S.C. 2603.

Subparts A–C—[Reserved]

Subpart D—Provisional Health Effects Guidelines

§ 795.285 Morphologic transformation of cells in culture.

(a) *Purpose. In vitro* assays for cellular transformation are semi-quantitative assays for the ability of chemical agents to morphologically alter (transform) cells in culture. Such transformation is associated with certain phenotypic changes such as loss of contact inhibition and the ability to form colonies in soft agar medium. The process by which these changes occur is assumed to be closely related to the process of *in vivo* carcinogenesis. Morphologically transformed cells appear as foci of dense, piled-up, altered cells on an underlying monolayer of normal cells. Three types of foci have been recognized. Type III foci appear to be most closely correlated with *in vivo* tumor formation. The ultimate criterion for morphologic transformation is the ability of the transformed cells to induce tumors when inoculated into appropriate hosts. Not all cells which appear to be morphologically transformed are capable of tumor formation. In general, there is reasonably good correlation between *in vitro* transformation and *in vivo* oncogenesis, although the correlation varies depending on the system being studied. These systems are believed to be reasonably good predictors of *in vivo* activity, and positive results are viewed as potential indications of *in vivo* carcinogenesis.

(b) *Definitions.* (1) Morphologic transformation is the acquisition of certain phenotypic characteristics most notably loss of contact inhibition and loss of anchorage dependence which are often but not always associated with the ability to induce tumors in appropriate hosts.

(2) Type III foci of transformed cells are multilayered aggregations of densely staining cells with random orientation and criss-cross arrays at the periphery of the aggregate. They appear as dark stained areas on a light staining background monolayer which is one-cell thick.

(c) *Reference substances.* Not applicable.

(d) *Test method*—(1) *Principle.* (i) Three systems for detecting chemically-induced morphologic transformation have been described. They are:

(A) Systems which employ cell lines (cells with an indefinite lifespan).

(B) Systems which employ cell strains (cells with a finite or limited lifespan).

VOL 51 ISS 81 AP 28 1986 UMI

(C) Systems which detect the interaction between chemicals and oncogenic viruses.

(ii) This study will employ an established cell line for detection of morphologic transformation.

(2) *Description.* Cells in culture are exposed to the test substance, both with and without metabolic activation, for a defined period of time. Cytotoxicity is determined by measuring the colony forming ability and growth rate of the cultures after the treatment period. At the end of the treatment period, cultures are maintained in growth medium for a sufficient period of time to allow near-optimal expression of tranformed foci.

(3) *Cells.* (i) Balb/c-3T3 mouse cells originally obtained from clone A-31 or its derivatives shall be used in the assay. Cells shall be checked for mycoplasm contamination prior to use in the assay and may be checked for karyotype.

(ii) Appropriate culture media and incubation conditions (culture vessels, CO_2 concentrations, temperature, and humidity) shall be used.

(4) *Metabolic activation.* Cells shall be exposed to test substance both in the presence and absence of a metabolic activation system. The metabolic activation system shall be derived from primary cultures of rat hepatocytes.

(5) *Control groups.* Positive and negative (untreated and vehicle) controls shall be included in each experiment. 3-Methylcholanthrene is an example of a positive control for experiments without metabolic activation. Dimethylnitrosamine is an example of a positive control in experiments with metabolic activation.

(6) *Test chemicals*—(i) *Vehicle.* Test agents shall be dissolved in serum-complete culture medium prior to treatment of the cells.

(ii) *Exposure concentrations.* Several concentrations (usually at least four) of the test substance shall be used. These shall be selected on the basis of a preliminary cytotoxicity assay performed both with and without metabolic activation. The highest concentration shall produce a low level of survival (approximately 10 to 20 percent) and the survival in the lowest concentration shall approximate that of the negative control.

(e) *Test performance.* (1) Cells shall be exposed to the test substance both with and without metabolic activation. Exposure shall be for 72 hours for experiments without metabolic activation and for 48 hours for experiments with metabolic activation unless different exposure times are justified by the investigator.

(2) At the end of the exposure period, cells shall be washed and cultured to determine viability and to allow for expression of transformation.

(3) At the end of the incubation period (generally four to six weeks), cells shall be fixed and stained, and the number of transformed (Type III) foci shall be enumerated.

(4) All results shall be confirmed in independent experiment.

(5) Tumorigenic potential of isolated morphologically transformed foci may be determined by inoculation into suitable hosts.

(f) *Data and report*—(1) *Treatment of results.* (i) Data shall be presented in tabular form. Individual colony counts for the treated and control groups shall be presented for both transformation and survival.

(ii) Survival and cloning efficiencies shall be given as a percentage of the controls. Transformation shall be expressed as a number of foci per dish, the number of dishes with transformed foci, and the transformed foci per number of surviving cells.

(2) *Statistical evaluation.* Data shall be evaluated by appropriate statistical methods.

(3) *Interpretation of results.* (i) There are several criteria for determining a positive result, one of which is a statistically significant concentration-related increase in the number of transformed foci. Another criterion may be based upon the detection of a reproducible and statistically significant positive response for at least one of the test substance concentrations.

(ii) A test substance which does not produce either a statistically significant concentration-related increase in the number of transformed foci or a statistically significant and reproducible positive response at any one of the test points is considered to be negative in this system.

(iii) Both biological and statistical significance should be considered together in the evaluation.

(4) *Test evaluation.* (i) Positive results for an *in vitro* mammalian cell transformation assay indicate that, under the test conditions, the test substance induces morphologic transformation in the cultured mammalian cells used.

(ii) Negative results indicate that, under the test conditions, the test substance does not induce morphologic transformation in the cultured mammalian cells used.

(5) *Test report.* In addition to the reporting recommendations as specified under Subpart J of 40 CFR Part 792, the following specific information shall be reported:

(i) Cell type used, including subclone designation and passage number; number of cell cultures; methods used for maintenance of cell cultures.

(ii) Rationale for selection of concentrations and number of cultures.

(iii) Test conditions: composition of media, CO_2 concentration, concentration of test substance, vehicle, incubation temperature, incubation time, duration of treatment, cell density during treatment, type of metabolic activation system, positive and negative controls, length of expression period (including number of cells seeded and subculture and feeding schedules, if appropriate).

(iv) Methods used to enumerate numbers of viable cells and transformed foci.

(v) Dose-response relationship, where possible.

(g) *References.* for additional background information on this test guideline, the following references should be consulted:

PART 799—[AMENDED]

2. Part 799 is amended as follows:

a. The authority citation containues to read as follows:

Authority: 15 U.S.C. 2603, 2611, 2625.

b. In § 799.1250 by adding paragraphs (c)(1) (ii) and (iii), (2) (ii) and (iii), (3) (ii) and (iii), (4) (ii) and (iii), and (5) (ii) and (iii), to read as follows:

§ 799.1250 Cresols.

* * * * *

(c) * * *

(1) * * *

(ii) *Test standard.* (A)(*1*) In vitro mammalian cytogenetics test. This test shall be conducted with cresols in accordance with § 798.5375 of this chapter and modifications specified in paragraph (c)(l)(ii)(A)(*2*) of this section.

(*2*) Test standard modifications. The following modifications to § 798.5375 of this chapter are required.

(*i*) The requirement under § 798.5375 of this chapter is modified so that cresols shall be tested in established cell lines or strains. The cell line or strain used shall be checked for *Mycoplasm* contamination.

(*ii*) The requirement under § 798.5375 of this chapter is modified so that cresols shall be dissolved in DMSO prior to treatment of the cells.

(*iii*) The requirement under § 798.5375 of this chapter is modified so that the metabolic activation system for the assay shall be derived from Aroclor-1254 induced rat liver S-9 preparations.

(*iv*) The requirement under § 798.5375 of this chapter is modified so that at least three concentrations of the test substance over a range adequate to define the response shall be tested. The highest test concentration tested with and without metabolic activation shall be five milligrams per milliliter or that dose which show evidence of cytotoxicity or reduced mitotic activity.

(B)(*1*) In vivo mammalian bone marrow cytogenetics test. This chromosomal analysis test shall be conducted with cresols in accordance with § 798.5385 of this chapter and modifications specified in paragraph (c)(1)(ii)(B)(*2*) of this section.

(*2*) Test standard modifications. The following modifications to § 798.5385 of this chapter is modified so that the mouse is the required test species.

(*ii*) The requirement under § 798.5385 of this chapter is modified so that the test substance shall be administered once only by oral gavage.

(*iii*) The requirement under § 798.5385 of this chapter is modified so that three dose levels shall be used. The highest dose tested shall be the maximum tolerated dose or that producing some indication of cytotoxicity, e.g., partical inhabition of mitosis, or shall be the highest dose attainable.

(C)(*1*) *Rodent dominant-lethal assay.* This assay shall be conducted with cresols in accordance with § 798.5450 of this chapter and modifications specified in paragraph (c)(1)(ii)(C)(*2*) of this section.

(*2*) *Test standard modifications.* The following modifications to § 798.5450 of this chapter are required.

(*i*) The requirement under § 798.5450 of this chapter is modified so that the mouse is the required test species.

(*ii*) The requirement under § 798.5450 of this chapter is modified so that the route of administration of the test substance shall be by oral gavage.

(*iii*) The requirement under § 798.5450 of this chapter is modified so that three dose levels shall be used. The highest dose shall produce signs of toxicity, e.g., slightly reduced fertility, or shall be the highest dose attainable.

(*iv*) The requirement under § 798.5450 of this chapter is modified so that each male shall be mated to no more than two, and preferably to only one, female per mating interval. Females shall be left with the males for no longer than seven days, and mating shall continue for at least six weeks.

(iii) *Reporting requirement.* (A) The chromosomal aberration tests shall be completed and the final results submitted to the Agency as follows:

(*1*) The *in vitro* mammalian cytogenetics test within one year of the effective date of the final test rule.

(*2*) The *in vivo* mammalian bone marrow cytogenetics test, if required, within one year of the effective date of the final test rule.

(*3*) The rodent dominant lethal assay, if required, within two years of the final test rule.

(B) Interim progress reports shall be provided quarterly, beginning 90 days after the effective date of the final Phase II test rule.

(*2*) * * *

(ii) *Test standard.* (A) (*1*) *Unscheduled DNA synthesis in mammalian cells in culture assay.* This assay shall be conducted with cresols in accordance with § 798.5550 of this chapter and modifications specified in paragraph (c)(2)(ii)(A)(*2*) of this section.

(*2*) *Test standards modifications.* The following modifications ot § 798.5550 of this chapter are required.

(*i*) The requirement under § 798.5550 of this chapter is modified so that primary cultures of rat hepatocytes shall be the type of cells used in this assay.

(*ii*) The requirement under § 798.5550 of this chapter is modified so that cresols shall be dissolved in DMSO prior to treatment of the cells.

(B)(*1*) *Detection of gene mutations in somatic cells in culture.* This assay shall be conducted with cresols in accordance with § 798.5300 of this chapter and modifications specific in paragraph (c)(2)(ii)(B)(*2*) of this section.

(*2*) *Test standard modifications.* The following modifications to § 798.5300 of this chapter are required.

(*i*) The requirement under § 798.5300 of this chapter is modified so that cresols shall be tested in L5178Y mouse lymphoma cells. Cells shall be checked for *Mycoplasma* contamination.

(*ii*) The requirement under § 798.5300 of this chapter is modified so that cresols shall be dissolved in DMSO prior to treatment of the cells. The final concentration of the vehicle shall not interfere with cells viability or growth rate.

(*iii*) The requirement under § 798.5300 of this chapter is modified so that the metabolic activation system shall be derived from the postmitochondrial fraction (S–9) of rat livers pretreated with Aroclor 1254.

(*iv*) The requirement under § 798.5300 of this chapter is modified so that exposure shall be for four hours unless a different exposure time is justified by the investigator.

(C)(*1*) *Sex-linked recessive lethal test in Drosophila melanogaster.* This test shall be conducted with cresols in accordance with § 798.5275 of this chapter and modifications specified in paragraph (c)(2)(ii)(C)(*2*) of this section.

(*2*) *Test standard modifications.* The following modifications of § 798.5275 of this chapter are required.

(*i*) The requirement under § 798.5275 of this chapter is modified so that the oral route of administration shall be used in this assay.

(*ii*) The requirement under § 798.5275 of this chapter is modified so that a concurrent negative control shall be included in this assay.

(*iii*) The requirement under § 798.5275 of this chapter is modified so that the results of this test shall be confirmed in an independent assay.

VOL 51 ISS 81 AP 28 1986

(iii) *Reporting requirements.* (A) The gene mutation tests shall be completed and final results submitted to the Agency as follows:

(*1*) The unscheduled DNA synthesis in mammalian cells in culture assay within one year of the effective date of the final test rule.

(*2*) The detection of gene mutations in somatic cells in culture assay within one year of the effective date of the final test rule.

(*3*) The sex-linked recessive lethal test in *Drosophila melanogaster*, if required, within two years of the effective date of the final test rule.

(B) Interim progress reports shall be provided quarterly, beginning 90 days after the effective date of the final Phase II test rule.

(3) * * *

(ii) *Test standard.*—(A) *Morphologic transformation of mammalian cells in culture.* This test shall be conducted with cresols in accordance with § 795.285 of this chapter and modifications specified in paragraph (c)(3)(ii)(B) of this section.

(B) *Test standard modifications.* The following modifications of § 795.285 of this chapter are required.

(*1*) The requirement under § 795.285 of this chapter is modified so that *meta*- and *para*-cresol shall initially be tested in this assay performed without metabolic activation. Only if they produce negative results in the assay performed without activation will *meta*- and *para*-cresol then be tested in the assay with metabolic activation.

(*2*) The requirement under § 795.285 of this chapter is modified so that *ortho*-cresol shall only be tested in this assay performed with metabolic activation.

(iii) *Reporting requirements.* (A) The morphologic transformation of mammalian cells in culture assay shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

(B) Interim progress reports shall be provided quarterly, beginning 90 days after the effective date of the final Phase II test rule.

(4) * * *

(ii) *Test standard.*—(A) *Developmental toxicity.* This study shall be conducted with cresols in accordance with § 798.4900 of this chapter and modifications specified in paragraph (c)(4)(ii)(B) of this section.

(B) *Test standard modifications.* The following modifications to § 798.4900 of this chapter are required.

(*1*) The requirement under § 798.4900 of this chapter is modified so that the test substance shall be administered by oral gavage.

(*2*) The requirement under § 798.4900 of this chapter is modified so that at least two mammalian species shall be used in this study.

(iii) *Reporting requirements.* (A) The developmental toxicity study shall be completed and final results submitted to the Agency within one year of the effective date of the final test rule.

(B) Interim progress reports shall be provided quarterly, beginning 90 days after the effective date of the final Phase II test rule.

(5) * * *

(ii) *Test standard.*—(A) *Reproduction and fertility effects.* This study shall be conducted with cresols in accordance with § 798.4700 of this chapter and modifications specified in paragraph (c)(5)(ii)(B) of this section

(B) *Test standard modifications.* The requirement under 798.4700 of this chapter is modified so that the test substance shall be administered by oral gavage.

(iii) *Reporting requirements.* (A) The reporduction and fertility effects study shall be completed and final results submitted to the Agency within 29 months of the effective date of the final test rule.

(B) Interim progress reports shall be provided quarterly, beginning 90 days after the effective date of the final Phase II test rule.

(Information collection requirements have been approved by the Office of Management and Budget under control number 2070-0033.)

[FR Doc. 86-9410 Filed 4-25-86; 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

43 CFR Part 431

General Regulations for Power Generation, Operation, Maintenance and Replacement at the Boulder Canyon Project, Arizona/Nevada; Reopening of Comment Period

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of Reopening of Comment Period on Proposed General Regulations.

SUMMARY: The Bureau of Reclamation published proposed "General Regulations for Power Generation, Operation, Maintenance, and Replacement at the Boulder Canyon Project" in the **Federal Register** on March 6, 1986 (51 FR 7833-7835). Interested parties were invited to submit comments concerning the proposed General Regulations to the Regional Director, Bureau of Reclamation, Boulder City, Nevada within 45 days of the date of the notice.

On April 21, 1986, several of the current and proposed Boulder Canyon Project allottees requested an extension of the comment period. As a result of that request, the deadline for written comments concerning the proposed General Regulations has been reopened and extended.

DATES: All comments concerning the proposed General Regulations should be submitted on or before May 5, 1986.

ADDRESS: Written comments concerning the proposed General Regulations should be sent to: Mr. Edward Hallenbeck, Regional Director, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005.

FOR FURTHER INFORMATION CONTACT: Edward Hallenbeck (702) 293-8411.

Dated: April 24, 1986.

(Sgd.) C. Dale Duvall,

Commissioner.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-90; RM-5303]

TV Broadcast Station in Gary, IN

AGENCY: Federal Communications Commission.

ACTION: Extension of comment time.

SUMMARY: This action extends the time for filing comments and reply comments in a proceeding involving a proposal to exchange channels by the permittees of a noncommercial educational UHF station and a commercial UHF station in Gary, Indiana.

DATES: Comments must be filed on or before May 9, 1986, and reply comments on or before May 27, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau, (202) 634-6530.

Order Extending Time For Filing Comments and Reply Comments

In the Matter of Amendment of §73.606(b), Table of Assignments, Television Broadcast Stations (Gary, Indiana); MM Docket No. 86-90, RM-5303.

Adopted: April 14, 1986.

Released: April 17, 1986.

By the Chief, Policy and Rules Division.

1. On March 21, 1986, the Commission released a *Notice of Proposed Rule Making* in this proceeding. 51 FR 11063, published April 1, 1986. Inadvertently, the respective dates for filing comments and reply comments were specified as April 14, 1986 and April 29, 1986. In an *Erratum* released March 27, 1986, these dates were attempted to be corrected to read April 28, 1986 and May 13, 1986, respectively.

2. However, as indicated in the preceding paragraph, this *Notice* was not published in the **Federal Register** until April 1, 1986. Consequently, interested parties do not have the requisite 30 days to submit comments. Therefore, on our own motion, we are extending the dates for comments and reply comments.

3. Accordingly, it is ordered, that the time for filing comments and reply comments in the above captioned proceeding is extended to and including May 9, 1986 and May 27, 1986, respectively.

4. This action is taken pursuant to the authority contained in sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules.

Federal Communications Commission.

Notice of Proposed Rule Making

In the Matter of Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations (Webster, Massachusetts); MM Docket No. 86-145, RM-5121.

Adopted: April 9, 1986.

Released: April 22, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it a petition for rule making filed by Okun Broadcasting, Inc.[1] ("petitioner"), requesting the allocation of FM Channel 255A to Webster, Massachusetts, as that community's first local FM broadcast service. Petitioner submitted information in support of the proposal and stated its intention to apply for the channel.

2. We believe the petitioner's proposal warrants consideration. The channel can be allocated in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules provided there is a site restriction 7.9 kilometers (4.9 miles) west of the community. The site restriction will prevent a short spacing to Station WPLM-FM, Channel 256, Plymouth, Massachusetts and Station WROR, Channel 253, Boston, Massachusetts.

3. In view of the fact that the proposed allotment could provide a first FM broadcast service to Webster, Massachusetts, the Commission believes it is appropriate to propose amending the FM Table of Allotments, § 73.207(b) of the Commission's Rules, with respect to the following community:

[1] Petitioner is the licensee of AM Station WGFP, Webster, Massachusetts.

City	Channel No.	
	Present	Proposed
Webster, MA	255A	

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 13, 1986, and reply comments on or before June 30, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Mr. Alan Okun, Okun Broadcasting, Inc., Radio Station WGFP, 28 West Main Street, Dudley, Massachusetts 01570

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

UMI

VOL 51 ISS 81 AP 28 1986 UMI

Federal Communications Commission.

Charles G. Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86-147; RM-5129]

FM Broadcast Station in Hancock, MI

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the allotment of FM Channel 254C2 to Hancock, Michigan, in response to a petition filed by Thomas M. McNamara. This allotment could provide a second FM broadcast service to the community.

DATES: Comments must be filed on or before June 13, 1986, and reply comments on or before June 30, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the Matter of Amendment of § 73.202(b) Table of Allotments, FM Broadcast Stations (Hancock, Michigan); MM Docket No. 86-147, RM-5129.

Adopted: April 9, 1986.

Released: April 22, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it a petition for rule making filed by Thomas M. McNamara ("petitioner"), requesting the allocation of FM Channel 254C2 to Hancock, Michigan, as that community's second FM broadcast service. Petitioner submitted information in support of the proposal and stated his intention to apply for the channel.

2. We believe the petitioner's proposal warrants consideration. The channel can be allocated in compliance with the minimum distance separation requirements of § 73.207 of the Commission's Rules. Since Hancock is located within 199 miles (320) kilometers) of the common U.S.-Canadian border, Candian concurrence is required.

3. In view of the fact that the proposed allotment could provide a second FM broadcast service to Hancock, Michigan, the Commission believes it is appropriate to propose amending the FM Table of Allotments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Hancock, MI	229A	229A, 254C2

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 13, 1986, and reply comments on or before June 30, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

Thomas M. McNamara, JLM Enterprise, 4575 Marlborough Road, Okemos, Michigan 48864

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles G. Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) with respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleading, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86-146; RM-4956]

FM Broadcast Station in Palmyra, MO et al.

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the substitution of Class C2 Channel 248 for Channel 252A and modification of the license for Channel 252A at Palmyra, Missouri, in response to a petition filed by Palmyra Broadcasting Company. The allocation also requires the substitution of 237A for 249A at Pittsfield, Illinois and modification of the license for Station WBBA(FM) accordingly.

DATES: Comments must be filed on or before June 13, 1986, and reply comments on or before June 30, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended 1083, as amended, 47 U.S.C. 301, 303, 307. Notice of Proposed Rule Making and Order to Show Cause

In the matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Palmyra, Missouri and Pittsfield, Illinois); MM Docket No. 86-146, RM-4956.

Adopted: April 9, 1986.

Released: April 22, 1986.

By the Chief, Policy and Rules Division.

1. Before the Commission is a petition for rule making filed by Palmyra Broadcasting Company [1] ("petitioner"), requesting the substitution of FM Channel 248C2 for Channel 252A at Palmyra, Missouri. Petitioner also requests modification of its license for Station KIDS, to specify operation on the higher class channel.

2. Channel 248C2 can be assigned to Palmyra, Missouri, in compliance with the minimum distance separation

[1] Petitioner is the license of FM Station KIDS, Channel 252A, Palmyra, Missouri.

BEST COPY AVAILABLE

VOL 51 ISS 81 AP 28 1986 UMI

requirements of the Commission's Rules, provided Channel 249A is deleted from Pittsfield, Illinois. Channel 249A is presently licensed to Station WBBA(FM). Petitioner has proposed the substitution of Channel 237A for Channel 249A at Pittsfield. The proposed substitution at Pittsfield can be accomplished in compliance with the minimum distance separation requirements. As for the Palmyra proposal, should another party indicate an interest in the Class C2 allotment, the substitution at Palmyra could not be implemented unless an additional equivalent channel is also allotted. See, *Modification of FM and TV Station Licenses*, Docket 83-1148, 98 F.C.C. 2d 916 (1984).

3. Whenever an existing licensee is ordered to switch frequencies in order to accommodate a new channel allotment, we require that the proponent of the new allotment make a commitment that it will reimburse the affected station for the costs incurred in changing frequencies. Petitioner has stated that it understands that it would be its responsibility to reimburse Station WBBA for the reasonable costs in changing frequency.

4. In view of the fact that the proposed allotment could provide a wide area coverage station at Palmyra, Missouri, the Commission proposes to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Palmyra, MO	252A	249C2
Pittsfield, IL	249A	237A

5. It is ordered, that pursuant to section 316 of the Communications Act of 1934, as amended, Pike Broadcasting Company, the licensee of Station WBBA(FM), Pittsfield, Illinois, shall show cause why its license should not be modified to specify operation on Channel 237A in lieu of Channel 249A.

6. Pursuant to section 1.87 of the Commission's Rules, Pike Broadcasting Company, not later than June 13, 1986, may request that a hearing be held on the proposed modification. If the right to request a hearing is waived, Pike Broadcasting Company may, not later than June 13, 1986, file a written statement showing with particularity why its license should not be modified as proposed in the *Order to Show Cause*. In this case, the Commission may call on Pike Broadcasting Company to furnish additional information, designate the matter for hearing, or issue, without further proceedings, an *Order* modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statement is filed by the date referred to above, Pike Broadcasting Company will be deemed to have consented to the modification as proposed in the *Order to Show Cause* and a final *Order* will be issued by the Commission, if the above-mentioned channel modifications are ultimately found to be in the public interest.

7. It is further ordered, That the Secretary of the Commission shall send by Certified Mail, Return Receipt Requested, a copy of this *Order* to the following:

Pike Broadcasting Company,
Station WBBA(FM),
P.O. Box 537,
Pittsfield, Illinois 62363

8. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

9. Interested parties may file comments on or before June 13, 1986, and reply comments on or before June 30, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petition(s), or their counsel or consultant, as follows:

Eugene T. Smith,
715 "G" Street, SE.,
Washington, D.C. 20003
(Counsel for the petitioner)

10. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

11. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such at this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Notices

Federal Register
Vol. 51, No. 81
Monday, April 28, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Packers and Stockyards Administration

Proposed Posting of Stockyards; River Valley Livestock Market, Arkansas, et al.; Correction

On April 18, 1986, a notice was published in the **Federal Register** giving notice of the proposed posting for certain stockyards listing their facility number, name, and location of stockyards.

This notice is to correct the facility number assigned to the following market in the publication.

The notice should have read: TN–183, Lawrence County Feeder Pig Sale, Inc., Ethridge, Tennessee.

Done at Washington, DC, this 22nd day of April 1986.

Harold W. Davis,

Director, Livestock Marketing Division.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–588–502]

Antidumping; Nylon Impression Fabric From Japan; Final Determination of Sales at Not Less Than Fair Value

AGENCY: International Trade Administration/Import Administration/Commerce.

ACTION: Notice.

SUMMARY: We have determined that nylon impression fabric from Japan is not being, nor is likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. This investigation covers only imports by or for the account of Shirasaki Tape Co., Ltd. (Shirasaki) and Asahi Chemical Industry Company, Ltd. (Asahi). There is an outstanding antidumping duty finding on this merchandise (43 FR 22461, May 25, 1978). However, Asahi and Shirasaki were specifically excluded from that finding.

EFFECTIVE DATE: April 28, 1986.

FOR FURTHER INFORMATION CONTACT: John J. Kenkel or Charles Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–5404 or 377–5288.

Final Determination

We have determined that nylon impression fabric from Japan is not being, nor is likely to be, sold in the United States at less than fair value, as provided in section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act). We made fair value comparisons on approximately 90 percent of respondents' sales of the class or kind of merchandise to the United States during the period of investigation. Comparisons were based on the United States purchase price and the home market price. The weighted-average margin for Asahi is 0.06 percent. This is *de minimis*. Shirasaki had no sales at less than fair value.

Case History

On June 10, 1985, we received a petition from Bomont Industries and Burlington Industries, Inc., on behalf of the domestic nylon impression fabric industry. In compliance with the filing requirements of § 353.36 of the Commerce regulations (19 CFR 353.36), the petition alleged that imports of nylon impression fabric from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or are threatening material injury to, a U.S. industry. There is an outstanding antidumping duty finding on this merchandise (43 FR 22461, May 25, 1978). However, Asahi and Shirasaki were specifically excluded from this finding. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation on merchandise produced by or for the account of Asahi and Shirasaki. We notified the ITC of our action and initiated such an investigation on July 1, 1985 (50 FR 28111). On July 25, 1985, the ITC determined that there is reasonable indication that imports of nylon impression fabric from Japan are materially injuring a U.S. industry (50 FR 31053).

On August 6, 1985, we presented antidumping duty questionnaires to Asahi and Shirasaki. We received the responses on September 20, 1985.

On November 8, 1985, petitioners alleged that Asahi was selling nylon impression fabric in Japan during the period of investigation below its cost of production.

On November 15, 1985, we initiated a cost of production investigation of Asahi. We received Asahi's cost response on December 9, 1985.

On November 27, 1985, we issued a preliminary determination of sales at not less than fair value (50 FR 49976). On December 19–23, 1985, we verified the responses of Asahi and Shirasaki.

We initiated an investigation of middlemen on December 27, 1985, but subsequently terminated it when we learned that petitioners' request was predicated on erroneous information.

We held a public hearing on March 11, 1986.

Products Under Investigation

The merchandise covered by this investigation consists of nylon impression fabric from Japan woven from continuous filament yarns of nylon; whether texturized or non-texturized; finished; whether slit or uncut; and not inked for use in typewriters and printers; and currently classifiable under item numbers 347.6020, 338.5001, and 338.5002 of the *Tariff Schedules of the United States, Annotated*, produced by or for the account of Asahi and Shirasaki.

We have determined that inked ribbon is not the same class or kind of merchandise as uninked nylon impression fabric and, therefore, it is not within the scope of this investigation.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As Asahi sold the merchandise to unrelated Japanese trading companies knowing that it was destined for the United States, we used the packed price to the Japanese trading companies to represent the United States price. We deducted foreign inland freight.

As Shirasaki sold the merchandise to unrelated U.S. purchasers prior to importation into the United States, we used the purchase price of the subject merchanise, as provided in section 772(b) of the Act, to present the U.S. price. We calculated the purchase price based on the F.O.B. or C.I.F. packed price to U.S. purchasers. We deducted brokerage, foreign inland freight, ocean freight, inspection fees and marine insurance, where appropriate.

Foreign Market Value

The petitioners alleged that sales in the home market were at prices below the cost of producing the merchandise. We examined production costs for both respondents, which included all appropriate costs for materials, fabrication and general expenses.

As there were sufficient home market sales at or above the cost of production to constitute a basis for comparison, we calculated foreign market value based on home market price, in accordance with section 773(a) of the Act. We made adjustments, where appropriate, for differences in the physical characteristics of the merchandise, pursuant to § 353.16 of our regulations.

For Asahi, we deducted rebate costs from home market price. For Shirasaki, we deducted inland freight. For both companies, we made adjustments for differences in circumstances of sale related to credit expense pursuant to § 353.15 of our regulations. We also made adjustments for differences in Shirasaki's packing costs. We added U.S. packing costs to Asahi's unpacked home market price. In calculating foreign market value, we made currency conversions from Japanese yen to U.S. dollars in accordance with § 353.56(a) of our regulations, using certified daily exchange rates.

Verification

In accordance with section 776(a) of the Act, we verified all the information used in making this determination. We were granted access to the books and records of companies involved. We used standard verification procedures, including examination of relevant sales and financial records of the companies.

Petitioners' Comments

Comment 1: Petitioners argue that Shirasaki sells second quality nylon impression fabric in the "other" category in the home market for a higher price than first quality, resulting in fictitious prices in its home market. In lieu of Shirasaki's home market data, petitioners suggest using their revised data or Shirasaki's third country data.

DOC Position: We disagree. No second quality fabric was sold in the home market to unrelated parties. In fact, the "other" category contains more expensive specialty fabric sold at higher prices.

Comment 2: Shirasaki's actual sales prices are higher than those listed in its price list, leading petitioner to believe that Shirasaki's reported prices are unreliable.

DOC Position: We disagree. The reason for the higher prices was that the price list did not include credit expenses.

Comment 3: There are inaccuracies in Shirasaki's credit costs in both markets. Also payment may have been made by promissory note; if so, the Department should use the discount rate applied to those notes instead of Shirasaki's average short-term debt rate. Alternatively, the Department should use the country-wide interest rate for home market sales.

DOC Position: We disagree. While Shirasaki received payment on home market sales by promissory notes, they were not discounted. Therefore, we have used its average short-term interest rate. In addition, we have accounted for partial payments on home market sales. U.S. credit costs have been calculated from date of shipment and include all fees and commissions.

Comment 4: Asahi's contention that it sells unslit fabric to trading companies after finishing by Seiren makes no commercial sense, since Seiren has the capability to slit material yet does not perform this service for Asahi. The Department did not verify the distribution system of Asahi; therefore, it should use petitioner's market study as best information available. Petitioners also are concerned over Asahi's transfer prices—they make no commercial sense as well. Finally, Asahi must be receiving some kind of repayment from either the trading company or Seiren, especially since Seiren is losing money.

DOC Position: We disagree. The Department conducted an extensive verification of Asahi and its sales practices. We verified from Asahi's books and records that Asahi sells only unslit material and only to the trading companies. We found that Seiren was recovering its costs in its finishing operations for Asahi. Furthermore, since Asahi accounts for only a very small fraction of Seiren's business, we found no relationship between Seiren's losses and prices charged to Asahi for finishing the fabric.

Comment 5: The Department failed to verify whether slit fabric is sold by Asahi. Thus, the best information available should be used.

DOC Position: See our response to *comment 4, supra.*

Comment 6: Credit costs calculated by Asahi are wrong. The Department should use the discount rate for Asahi's promissory notes. Also, compensating balances should not be included in the computation of the interest rate. Alternatively, the Department should use the prime rate in Japan. Credit costs should be calculated from the date of shipment.

DOC Position: We partially agree. Since so few home market sales were discounted, we used the average short-term interest rate. We did not include compensatory balances in the calculation of the interest rate. We did calculate credit costs from the date of shipment.

Comment 7: "Product development" expenses in Asahi's home market should not be accounted for since they are directly related and were not verified.

DOC Position: We agree.

Comment 8: The interest rate to be used for Asahi's U.S. sales should include bank commissions, as does the rate for Shirasaki. The time for credit cost should be calculated from date of shipment.

DOC Position: We partially agree. For U.S. sales we have used the same interest rate that Asahi charge its customers. Asahi pays no bank fees or commissions, so none have been included. We did calculate credit costs from date of shipment.

Comment 9: Packing and inland freight costs of Asahi cannot be used. While the total amount was verified, individual amounts were not.

DOC Position: We disagree. In the absense of any alternative data offered the petitioners, we have used the data supplied by the respondent for the individual amounts, since they appear reasonable and, in any event, no matter how the total is bifurcated, the differental between home market and U.S. price is identical.

Comment 10: The cost information provided by Shirasaki shows that there are significant swings in unit costs from period to period and thus the—

UMI

VOL
51
ISS
81
AP
28
1986
UMI

Department should use monthly cost of production figures rather than aggregate.

DOC Position: We disgree. The Department used its usual methodology of calculating a weighted-average cost for the period of investigation. The cost data did not reflect significant swings in unit costs from period to period.

Comment 11: The Department should not rely on the general, selling and administrative (GS&A) expenses alleged by Shirasaki but should use the company-wide GS&A as the basis for determining the cost of production.

DOC Position: We do not believe the company-wide GS&A percentage is appropriate for NIF sold to unrelated home market customers. However, certain home marketing selling expense were allocated to export sales in the submission. These have been reallocated only to home market sales.

Comment 12: Shirasaki should have used the by-product method of allocating costs to second quality material.

DOC Position: Shirasaki did not produce by-products. Additionally, its method of accounting for second quality product was used for the final determination because it adequately accounts for the cost of such products.

Comment 13: The allocation method for labor costs in Shirasaki's slitting department are skewed products not sold in great quantity resulting in artifically lower production costs for the large-scale items.

DOC Position: We disagree. Although the time study used to allocate costs was prepared for the submission, it was based on production records maintained in the normal course of business. We believe that this allocation basis reflects the actual costs which may be attributable to each product.

Comment 14: Shirasaki's raw material and weaving should be increased by a reasonable amount for additional charges associated with weaving.

DOC Position: We disagree. We verified that all costs incurred in the weaving process. Including transportation and handling, were included in the cost of production data submitted by Shirasaki.

Comment 15: Shiraski may be deemed to be related to one of its weavers because it may have undue influence over it because of certain financial transactions with that weaver. Morever, this item was not verified by the Department.

DOC Position: We disagree. Shiraski is not considered to be "related" to its weaver, as defined by the Act.

Comment 16: Research and development costs do not appear to have been included by Shiraski in its production nor verified by the Department.

DOC Position: We disagree. During the verification, we determined that research and development expenses were correctly included in cost of production.

Comment 17: Asahi owns more than 5 percent of two raw material suppliers and because the price of the materials it receives from the companies are below the market price, the Department should use the market price rather than the transfer price to determine raw material cost.

DOC Position: We agree. The price of raw material purchases from unrelated supplies has been used to determined cost of raw material purchased from related supplier during the period of investigation.

Comment 18: Indirect costs associated with contract labor costs do not appear to have been reported by Asahi.

DOC Position: We disagree. These costs were included in weaving costs in the cost of production.

Comment 19: Asahi's weaver is financially and commercially related to Asahi. Thus. cost of weaving may not be a true arm's length price.

DOC Position: We disagree. We found no relationship between Asahi and its weaver on which to consider them related parties in accordance with the Act. Thus, they are deemed to have transacted their business at arm's length.

Comment 20: The Department should disregard Asahi's costs for finishing performing by Seiran, a related company, and use the best information available to it.

DOC Position: We examined during verification the costs of finishing performed by Seiren. We believe these costs have been correctly and fully reflected in the cost of production.

Comment 21: The Department should use Asahi's divisional financial statement GS&A percentage for the first half of the 1984 fiscal year rather than the percentage reported in the submission.

DOC Position: Although the GS&A percentage for the division pertinent to nylon impression fabric production is in fact lower than that cited in the verification report for the period indicated, and the corporate-wide percentage is approximately twice that figure, we believe these ratios do not reasonably illustrate the relationship of GS&A expense to the product's manufacturing cost. We believe the methodology used by the respondent in allocating GS&A expense in total to home market sales is correct. Also see our response to Asahi's *comment 1.*

Comment 22: For the following reasons, DOC should expand the period of investigation in order to determine whether there is a likelihood of dumping. First, the price list of one respondent for August 1985 showed lower U.S. dollar prices for some products. Second, affidavits from petitioners indicated lower prices in late 1985. Third, DOC import statistics showed lower average prices in January 1986 than in December 1985. Fourth, since the fluctuation in the yen/dollar exchange rate is permanent instead of a dramatic temporary change, the Department should not apply the 90-day lag rule. Fifth, even assuming that the 90-day lag rule should be used, then the Department should investigate prices since December 1985. Finally, given the new exchange rates, both companies are now selling below cost of production.

DOC Position: We disagree. The Department has found no evidence that Asahi and Shirasaki have sold the merchandise at less than fair value during the present six-month investigative period. During the past investigation on nylon impression fabric from Japan, the respondents Asahi and Shirasaki were specifically excluded because their margins were *de minimis* or minimal. Thus, the evidence is contrary to petitioners' allegation of a likelihood of sales at less than fair value.

Petitioners' evidence of lower U.S. dollar prices was obtained by comparing actual sales when credit was extended to a price list which did not include the cost of extending credit. When prices with like terms are compared, there is no evidence of lower U.S. dollar prices.

Because of lags in data collection, petitioner's citation of December 1985 and January 1986 import statistics really points to imports arriving up to three months before those dates and, coupled with no information on the product mix arriving during that period, leads us to the conclusion that petitioners' argument is without merit.

Petitioners' allegation of lower yen prices also is rejected. Petitioners compare an August price list with October exchange rates. the dramatic fall in the yen began in October. Petitioners provide no evidence of actual prices or price lists for the last three months of 1985.

Furthermore, 353.56 of the Department regulations, 19 CFR 353.56, also provides that "for purposes of fair value investigations, manufacturers . . . concerned will be expected to act within a reasonable period of time to take into account price differences resulting from sustained changes in prevailing exchange rates." The dramatic decline in the yen since October is such a sustained change.

The Commerce Department has determined that 90 days is a reasonable period of time for foreign companies to change their prices. *See Melamine Chemicals Inc.* v. *United States*, 732 F.2d 924 (Fed. Cir. 1984). Petitioners argue that Asahi's and Shirasaki's failure to raise their prices in the face of declining exchange rates indicates a likelihood of sales at less than fair value. However, Asahi and Shirasaki had 90 days before they were required to lower their prices, i.e., the period mid-October 1985 to mid-January 1986. The price list for this period could not be compared with the falling exchange rate to determine sales at less than fair value because the dramatic fall in the yen began in October 1985. Therefore, if the Department accepted the petitioners' request we would have at most only four weeks of data, i.e., mid-January to mid-February, 1986, as our period of investigation to make a finding of sales at less than fair value. In light of the six months of data in our original period of investigation, four weeks is an insufficient period to find that there are sales at less than fair value.

Comment 23: Public data have been withheld from petitioner and nonconfidential summaries have not been in sufficient detail. Therefore, responses should be rejected by the Department and best information available used.

DOC Position: We disagree. Respondents filed adequately detailed summaries of their confidential submissions. Counsel for petitioners also received all confidential versions of submissions under administrative protective order (APO).

Comment 24: Verification exhibits should be released to counsel for petitioners under administrative protective order (APO), particularly those that contain information which was requested in the questionnaire and those that contain publicly available information.

DOC Position: We partially agree. We gave counsel to petitioners copies of all of the verification exhibits containing public information and information requested in the questionnaire. In accordance with our long-held policy, we did not release verification exhibits containing confidential information because they contain no new data and their submission in this and future investigations is vital to our ability to conduct timely investigations. They merely contain supporting documents for data contained in the responses which were released to counsel for the petitioners under APO. We do not accept as verification exhibits data which should have been included in the responses.

Comment 25: Petitioners argue that inked nylon impression fabric from West Germany is transshipped from Japan via West Germany. These transshipments should be inspected to see if third country sales are being made below fair value.

DOC Position: We disagree. Counsel for petitioners did not provide substantiation of any kind that imports of linked nylon impression fabric from West Germany originated in Japan. To the contrary, we verified that Shirasaki did not export any of this product to West Germany. Asahi, in its response, provided affidavits from the West German importer and its purchasers, two companies which ink and distribute the Asahi merchandise, that the Japanese fabric is inked and resold to the ultimate user in Europe. Further, this investigation, as requested in the petition, covers only uninked nylon impression fabric. There were no imports of this product from West Germany during the period of investigation.

Comment 26: Asahi apparently sells short rolls in the U.S. at the same price as full rolls, giving evidence to the possibility of a fictitious market.

DOC Position: We disagree. Asahi only sold one short roll in one U.S. shipment and it was short by less than one percent. Therefore, Asahi was justified in not giving a discount.

Respondents' Comments

Asahi Comment 1: GS&A costs should be less than 10 percent instead of more. The percent mentioned by the Department in its verification report must be based on a miscalculation. Also Asahi's methodology to calculate GS&A costs on a unit basis is correct.

DOC Position: We partially agree. See our response to petitioners' *Comment 21, supra.* GS&A costs should be allocated to products on the basis of cost of sales.

Asahi Comment 2: Costs for certain materials paid to related suppliers reflect an arm's length transaction.

DOC Position: We disagree. See our response to petitioners' *Comment 17, supra.*

Asahi Comment 3: Compensating balances should be included in cost of credit in the home market. Also, the actual rate charged to U.S. customers should be used.

DOC Position: We disagree. See our response to petitoners' *Comment 6, supra.*

Shirasaki Comment 1: The verified average short-term interest rate should be used for both home and U.S. sales. The Department should not include the cost of bank fees and commissions in the cost of U.S. credit.

DOC Position: We disagree. We used average short-term interest rate for home market sales only. For U.S. sales, we used the discount rate actually used, including fees and commissions. We do agree that the period to be used should be from date of shipment to date of payment.

Shirasaki Comment 2: While depreciation was initially underreported, the amount accounted for a smaller percent change from cost of production than that stated by the Department in its verification report.

DOC Position: We agree. The recalculation of depreciation expense would increase GS&A expense for each product insignificantly and total cost of production by even less.

Shirasaki Comment 3: The Department should use 15 percent and not the 25 percent company-wide rate for selling, general and administrative expenses.

DOC Position: See our response to petitioners' *Comment 11, supra.*

Shirasaki Comment 4: The time study done for slitting should be used since it is part of the normal recordkeeping of the company and was not done specifically for this investigation.

DOC Position: We agree. See our response to petitioners' *Comment 13, supra.*

DOC Position: We agree. See our response to petitioners' *Comment 13, supra.*

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-DS-M

University of California et al.; Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-163. Applicant: University of California, Los Alamos National Laboratory, SM-30, Bikini Road, P.O. Box 990, Los Alamos, NM 87545. Instrument: ICP Mass Spectrometer, Model VG PlasmaQuad. Manufacturer: VG Instruments Inc., United Kingdom. Intended Use: The instrument is intended to be used to perform trace element analysis on a large variety of materials that are utilized in the nuclear weapons research program at the Los Alamos National Laboratory. Application received by Commissioner of Customs: March 24, 1986.

Docket No. 86-164. Applicant: State University of New York at Stony Brook, Stony Brook, NY 11794-3400. Instrument: Linear Position Sensitive Detector with 2 Preamplifiers, Model 112-5A/10. Manufacturer: Murtechnik, Austria. Intended Use: The instrument is intended to be used for detecting the x-ray diffraction from biological macromolecules such as that of muscle contractile systems with high time-resolving power. Particular interest will be on the study of filament dynamics related to cross-bridge motions, epoxy resin formation in materials research and sol-gel transitions. Application received by Commissioner of Customs: March 24, 1986.

Docket No. 86-165. Applicant: Princeton University, Director of Purchases, P.O. Box 33, Princeton, NJ 08544. Instrument: Mass Spectrometer, Model MS 50. Manufacturer: Kratos Analytical, United Kingdom. Intended Use: The instrument is intended to be used in the following chemistry research projects:

1. Biomimetic Control of Reactivity—The aim is to understand the mechanism by which nature controls chemical reactivity.

2. Synthetic and Mechanistic Organometallic Chemistry of Unsaturated Metal-Carbon Bonds—which includes the chemistry of carbene, carbyne and carbido metal complexes.

3. Static and Dynamic Stereochemistry of Organic and Organometallic Molecules—directed toward the exploration of the stereochemistry of organic and organometallic compounds through a detailed analysis of structures and reaction mechanisms.

4. Organic Synthesis—research directed toward the development of new synthesis methodology, and the synthesis of natural products and unusual structures.

5. Heterocyclic Chemistry—research concerned primarily with the development of new synthetic methods, particularly in the field of heterocyclic and aromatic chemistry and their exploitation for the synthesis of target molecules of exceptional biological interest.

6. Synthesis and Characterization of Molecular Models of the Active Site of the Photosynthetic Oxygen Evolving Enzyme.

7. Carbene and Carborane Chemistry.

8. Mechanistic Studies of Dioxygenases.

9. Organometallic Reagents for Organic Synthesis.

Application received by Commissioner of Customs: March 24, 1986.

Docket No. 86-166. Applicant: Columbia University, College of Physicians and Surgeons, 630 West 168th Street, New York, NY 10032. Instrument: Heterodyne Interferometer. Manufacturer: University of Neuchatel, Switzerland. Intended Use: The instrument will be used for vibration measurement of single cellular elements in the inner ears of living animals in the basal turn of the cochlea through the intact round window membrane. Application received by Commissioner of Customs: March 24, 1986.

Docket No. 86-169. Applicant: Texas A&M Research Foundation, University Drive and Wellborn Road, USDA Building, Room 219, College Station, TX 77843-2578. Instrument: UV/Visible Spectrophotometer Unit, Model SU-40A. Manufacturer: Hi-Tech Scientific Ltd., United Kingdon. Intended use: The instrument is intended to be used for studies of proteins and DNA from the bacterium E.coli which are involved in the replication of its DNA. The rates of binding will be examined and detected by changes in the Fluoresecence properties of the protein upon binding or changes in the absorption of light. Rapid mixing of the protein and DNA will be performed in the stopped-flow instrument and the kinetics of the interaction will be monitored. The instrument will also be used for research training of graduate students in the course Biochemistry 685. Application received by Commission of Customs: March 24, 1986.

Docket No. 86-175. Applicant: University of Washington, Seattle, WA 98195. Instrument: Gas Isotope Ratio Mass Spectrometer, Model MAT-251. Manufacturer: Finnigan MAT Corp., West Germany. Intended use: The instrument is intended ot be used for combined oceanographic and isotopic measurements for innovative marine science research. The current fields of research include:

Pore Water Studies
Nutrient Cycles in Natural Waters
Anoxic Basins
Hydrothermal Vent Systems
Organic Geochemistry
Food Webs

In addition, the instrument will be used for educational purposes in various oceanography courses in which students are instructed in the basic processes which affect the chemistry of sea water and marine sediments. Application recevied by Commission of Customs: March 24, 1986.

Docket No. 86-176. Applicant: University of Pennsylvania, Pennsylvania Muscle Institute, School of Medicine, B42 Anatomy-Chemistry Building, 37th and Hamilton Walk, Philadelphia, PA 19104-6083.

Instrument: Light Microscope with Accessories. Manufacturer: Sluzba Vyzkumu. Intended use: The instrument is intended to be used for research on blood vessels, heart and skeletal muscle to understand the mechanisms of normal muscle contraction and disease such as high blood pressure, heart failure and miscular dystrophy. Application received by Commissioner of Customs: March 24, 1986.

Docket No.: 86-177. Applicant: University of Pennsylvania, 415 S. University Avenue, Philadelphia, PA 19104. Instrument: Electron Microscope, Model JEM-4000EX. Manufacturer: JEOL, Japan. Intended use: The instrument is intended to be used to examine the following projects or materials:

1. Selectivity stained muscle cells.
2. Mitochondria in several kinds of organs.
3. Smooth muscle cells.
4. Heart muscle cells.
5. Cross-bridges in sleletal muscle.

Application received by Commissioner of Customs: March 25, 1986.

Docket No. 86-178. Applicant: Purdue University, 401 South Grant Street, Freehafer Hall, West Lafayette, IN 47907. Instrument: Flash Analog to Digital Converter and Computer Interface, Model DL 300. Manufacturer: Dr. B. Struck, West Germany. Intended Use: The instrument is intended to be used for studies of hadronic matter at the highest temperature. Proton-antiproton collider experiments will be conducted to obtain measurement of particle types emitted in the collision and their momentum distribution. In addition, graduate students will use the instrument for Ph.D. thesis work. Application received by Commissioner of Customs: March 25, 1986.

Docket No. 86-180. Applicant. National Aeronautics and Space Administration, Goddard Space Flight Center, Greenbelt Road, Greenbelt, MD 20771. Instrument: Magnetic Tape Abrasivity Test Monitor. Manufacturer: Fulmer Research Laboratory Ltd., United Kingdom. Intended ue: The instrument will be evaluated for feasibility of its use on the NSAS Space Tracking Data Network. Application received by Commissioner of Customs: April 1, 1986.

Docket No. 86-096. Applicant: Tulane University School of Medicine, New Orleans, LA 70112. Instrument: Electron Microscope, Model EM 109 with Accessories. Manufacturer: Carl Zeiss Inc., West Germany. Intended use: See notice at 51 FR 6157. Application received by Commissioner of Customs: October 14, 1985.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as these instruments are intended to be used, was being manufactured in the United States at the time the instruments were ordered.

Reasons: Each foreign instrument is a conventional transmission electron microscope (CTEM) and is intended for research or scientific educational uses requiring a CTEM. We know of no CTEM, or any other instrument suited to these purposes, which was being manufactured in the United States either at the time of order of each instrument or at the time of receipt of application by the U.S. Customs Service.

North Carolina State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Material Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-109. Applicant: North Carolina State University, Raleigh, NC 27695-8301. Instrument: Sized Yarn Testing Instrument. Manufacturer: Sulzer-Ruti, Switzerland. Intended use: See notice at 51 FR 6155.

VOL 51 ISS 81 AP 28 1986

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a method of subjecting sized yarns to cyclical elongation, abrasion and buckling. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

Princeton University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No.: 86-032. Applicant: Princeton University, Princeton, NJ 08544. Instrument: Simultaneous Analyzer System, Model TG-DSC-111. Manufacturer: Setaram, France. Intended Use: See notice at 50 FR 51445.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides for the simultaneous differential thermogravimetric and differential calorimetric measurements to temperatures of 827 °C. This capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

[Docket No. 60470-6070]

Information Relating to Bowhead Whales; U.S. Implementation of Bowhead Whale Strike Quota for 1986

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of information.

SUMMARY: NOAA publishes information for use in the development of the U.S. position before the International Whaling Commission (IWC) on the aboriginal/subsistence take of bowhead whales and in the domestic allocation of the existing IWC quota for bowhead whales to U.S. nationals. The allocation of the IWC quota for bowhead whales for the aboriginal/subsistence by U.S. natives is 32 strikes for 1986.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Becky Rootes, 202-634-7303.

SUPPLEMENTARY INFORMATION: NOAA is responsible for implementation and enforcement of the Marine Mammal Protection Act, the Endangered Species Act, and the Whaling Convention Act. In addition, it provides staff support to the U.S. Commissioner to the IWC and to the IWC Interagency Committee. Consistent with these responsibilities, NOAA develops positions relating to the aboriginal/subsistence harvest of bowhead whales pursuant to paragraph 13 of the Schedule to the International Convention on the Regulation of Whaling, 1946, and allocates the IWC quota for bowhead whales to U.S. natives under a cooperative agreement between NOAA and the Alaska Eskimo Whaling Commission (AEWC)..

On January 14, 1986, NOAA published in the **Federal Register** (51 FR 1550), a request for public comments regarding the data upon which the U.S. positions on the bowhead whale are based and the proposed allocation of strikes for the aboriginal/subsistence bowhead whale catch limit for 1986. NOAA received public comments on the proposed allocations that are summarized as follows: the first comment stated that additional information on the range of harvest limits and the mortality rate of struck and lost animals should be discussed, the second comment stated that the efficiency of the native hunt should be taken into account in establishing the catch limit, and the third comment requested that the IWC catch level be in place until 1987.

NOAA evaluated comments received on the proposed allocation of strikes for the 1986 aboriginal/subsistence bowhead whale catch limit. Following discussion with the AEWC, the 1986 strike limit for the aboriginal/subsistence hunt of bowhead whales was established at 32.

Discussion of Comments:

The first comment received requested discussion of catch limits for bowhead whales below 26 strikes. Catch limits below 26 strikes were considered by NOAA but not discussed in the **Federal Register** notice because they would not satisfy the Alaskan Eskimo subsistence requirements. It has been determined by the Department of the Interior that 26 landed whales are necessary to meet the needs of the Eskimos. Thus the minimum number of strikes required would be 26. The IWC management scheme permits the establishment of aboriginal/subsistence catches so long as they are set at levels which allow whale stocks to move toward or maintain the maximum sustainable yield level. Therefore, an allocation of the catch limit as established by the IWC should provide for growth in the bowhead population.

The second comment requested discussion of the mortality rate of struck whales and potential recruitment into the bowhead population given the proposed strike level. Given the estimates of actual recruits into the population of 49-73 and 62-106 whales per year as cited in the **Federal Register**, the net recruitment, given a strike level of 32 whales, would be 17-41 and 30-74 whales recruited annually after strikes taken, assuming the greatest possible mortality rate, 100 percent, of whales struck.

In response to a comment related to the efficiency of the native hunt, the U.S. position on bowhead strike levels has been to seek the number of strikes that will be required to provide the Eskimos with their established need of 26 whales. Given the efficiency rate of 75 percent, that strike level is 35 strikes. That the Eskimos have not reached the 75 percent efficiency rate to date means that the Eskimo need has not been met and does not translate into a lower required strike level.

Finally, one comment requested that the strike level be established through 1987. The Cooperative Agreement specifies that the number of strikes be allocated to the AEWC on an annual basis. NOAA has chosen to allocate the strike limit annually because this provides for an annual review of the actual hunt and because the quota is subject to annual review by the IWC Scientific Committee.

After due consideration of these comments, NOAA has allocated the strike limit of 32 strikes to the Alaskan Eskimos by amendment to the Cooperative Agreement between NOAA and the AEWC.

Authority: Article 5, 62 Stat. 1718, sec. 2-14, 64 Stat. 421-425; 16 U.S.C. 916 *et seq.*.

Dated: April 23, 1986.

Carmen J. Blondin,

Deputy Assistant Administrator For Fisheries Resource Management National Marine Fisheries Service.

BILLING CODE 3510-DR-M

DEPARTMENT OF EDUCATION

National Advisory Council on Indian Education; Meeting

AGENCY: National Advisory Council on Indian Education, Education.

ACTION: Notice of Closed Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Proposal Review Committee of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES: May 15-16, 1986, 9:00 A.M. until conclusion of business each day.

ADDRESS: U.S. Department of Education, 400 Maryland Avenue, SW., Room 2177, Washington, DC 202/732-1887.

FOR FURTHER INFORMATION CONTACT: Lincoln C. White, Executive Director, National Advisory Council on Indian Education, 2000 L Street, NW., Suite 574, Washington, DC 20036 (202/634-6160).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under section 442 of the Indian Education Act (20 U.S.C. 1221g). The Council is established to assist the Secretary in carrying out responsibilities under section 441(a) of the Indian Education Act (Title IV of Pub. L. 92-318), through advising Congress, the Secretary of Education, the Under Secretary of Education and the Assistant Secretary of Elementary and Secondary Education with regard to education programs benefiting Indian children and adults.

The Proposal Review Committee of the Council will meet in closed session starting at approximately 9:00 a.m., and will end at the conclusion of business each day, approximately 5:00 p.m. The agenda includes reviewing applications submitted under the Title IV, Indian Fellowship Program of the Indian Education Act. Under section 442(b)(2) of Part D of the Indian Education Act, the Council is authorized to review applications for assistance submitted under this program and to make recommendations to the Secretary of Education with respect to their approval.

The reviewing of applications must be held in the highest confidence until the announcement is released by proper authorities as to which projects will be funded. The premature disclosure of information discussed during the review process is likely to significantly frustrate impementation of agency action. Financial information which is privileged or confidential contained in and related to these proposals will be discussed at the review session. In addition, discussion will touch upon matters that would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. Such matters are protected by exemptions (9), (4), and (6) of section 552b(c) of Title 5 U.S.C.

A summary of the activities of the closed meeting and related matters which are informative to the public consistent with the policy of Title 5

VOL 51 ISS 81 AP 28 1986 UMI

U.S.C. 552b will be available to the public within fourteen days of the meeting.

Dated: April 17, 1986.
Signed at Washington, DC

Lincoln C. White,

Executive Director, National Advisory Council on Indian Education.

[FR Doc. 86-9473 Filed 4-25-86; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Restriction of Eligibility for Financial Assistance Award

AGENCY: Department of Energy (DOE).

ACTION: Notice of Restricted Eligibility for Financial Assistance Award.

SUMMARY: DOE announces that pursuant to 10 CFR 600.7(b), it intends to award on a restricted eligibility basis a cooperative agreement to the Companhia de Pesquisas E Lavras Minerais (COPELMI), Rio de Janeiro, Brazil, to support development of a feasibility study concerning the applicability of U.S. Underground Coal Gasification (UCG) technology to the coal deposits at Triumfo, Rio Grande Do Sul, Brazil. The DOE support for this effort is estimated at $1.7 million over an eighteen-month period.

Procurement Request No.: 01-86FE60877.000.

Project Scope: This cooperative effort is to be undertaken pursuant to the Memorandum of Understanding between the United States of America and the Federative Republic of Brazil of April 12, 1983. This cooperative effort is in furtherance of the Agreement for Exchange of Technical Information and Cooperation in the Field of Underground Coal Gasification between the United States Department of Energy and the Companhia Auxiliar of Empresas Electricas Brasileiras (CAEEB) dated January 21, 1985. The Brazilian Government has chosen the Companhia de Pesquisas E Lavras Minerais to represent CAEEB in the performance of this cooperative effort and placement of contracts with U.S. and Brazilian firms for the purpose of undertaking this project. U.S. funding for this effort is provided by the Trade Development Program Office of the International Development Cooperative Agency of the U.S. State Department.

This award provides major support for completion of a feasibility study relative to the application of underground coal gasification technologies to the high-ash, low-rank coals found in the southern portions of Brazil in the vicinity of the city of Porto Alegre. The feasibility study is a logical step in determining the advisability of pursuing development of an economically viable and commercially acceptable production facility.

In furtherance of the cooperation elicited in the referenced international agreements and advancement of underground coal gasification technologies to coal deposits otherwise uneconomical to mine, the DOE has determined that award to COPELMI on a restricted eligibility basis is appropriate.

FOR FURTHER INFORMATION CONTACT: James P. Beiriger, MA-452.1, U.S. Department of Energy, Office of Procurement Operations, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-1364.

Issued in Washington, D.C., on April 23, 1986.

David G. Newman,

Director, Office of Procurement Operations.

[FR Doc. 86-9478 Filed 4-25-86; 8:45 am]

BILLING CODE 6450-01-M

Financial Assistance Award Grant; Colorado State University

AGENCY: Department of Energy, San Francisco Operations Office.

ACTION: Notice of restriction of eligibility for grant award.

SUMMARY: DOE announces that it plans to award a Grant to Colorado State University, Solar Energy Applications Laboratory, in the amount of $390,000. The Statutory Authority authorizing the use of a grant award is Pub. L. 95-91, DOE Organization Act, and Pub. L. 93-577, Federal Non-Nuclear Energy Research and Development Act.

Scope of project: The proposed scope of the research is the testing, evaluation and optimization of solar cooling and heating components and systems in the three solar test houses at Colorado State University. Specific tasks include:

(1) The experimental testing and evaluation of a desiccant cooling and fresh air heating unit previously installed in the Solar House I system.

(2) Continuation of open cycle cooling research with the design, construction, operation, and analysis of a liquid desiccant dehumidifier coupled to a packed bed absorbent regenerator.

(3) Support data collection efforts for the control system and strategy work currently being conducted by Drexel University in Solar House III. Design, construct, operate, and analyze the performance of a boiling collector system.

(4) Continuation of Operating Agent responsibilities for the DOE for the International Energy Agency Solar Heating and Cooling Program task on Evacuated Collector Systems (Task VI).

FOR FURTHER INFORMATION CONTACT: Aundra Richards, Contracting Officer, CM Division, U.S. Department of Energy, San Francisco Operations Office, 1333 Broadway, Oakland, CA 94612.

Issued in San Francisco, California, April 15, 1986.

Donald W. Pearman, Jr.,

Acting Manager.

[FR Doc. 86-9397 Filed 4-25-86; 8:45 am]

BILLING CODE 6450-01-M

Financial Assistance Award Grant; University of Hawaii

AGENCY: Department of Energy, San Francisco Operations Office.

ACTION: Notice of restriction of eligibility for grant award.

SUMMARY: DOE announces that it plans to amend an existing Grant to the University of Hawaii, in the amount of $60,000. The Statutory Authority for use of a grant award is Pub. L. 94-91, DOE Organization Act, and Pub. L. 93-577, Federal Non-Nuclear Energy Research and Development Act.

Grant No. DE-FG03-85SF15799

Scope of Project

The University of Hawaii proposes to expand its geothermal research at the Puna Facility. Specifically, the proposed investigations will result in a better understanding of the scope and extent of the geothermal reservoir underlying the Puna area on the Big Island of Hawaii. The objective of the proposed research is to investigate the chemical and isotopic composition of fluids produced from the geothermal reservoir and to integrate the results into the existing geochemical, geological and geophysical data base to more precisely define the important characteristics of the Puna reservoir which may effect production and utilization of the resource.

This award of $60,000 to the University of Hawaii under the existing grant is intended for continuation of specific goal-oriented geothermal research. It is possible the application of the results of this research may extend the commercial life of the resource for a significant period of time.

The University of Hawaii has made substantial contributions to support the development and dissemination of geothermal resource data to the public sector so that private industry and others will be stimulated to utilized the geothermal resources of the State as an economic alternative to fossil fuels.

The University of Hawaii has published professional papers on its contributions to geothermal technology for a number of years. There is no other such source of unique, independent knowledge and competence in the State of Hawaii.

This award to the University on a restricted eligibility basis is appropriate.

FOR FURTHER INFORMATION CONTACT: Jane Hadly, U.S. Department of Energy, San Francisco Operations Office, Contracts Management Division, 1333 Broadway, Oakland, California 94612.

Issued in Oakland, California, April 8, 1986.

Donald W. Pearman, Jr.,

Acting Manager.

[FR Doc. 86-9398 Filed 4-25-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council; U.S. Refinery Capability Task Group Meeting

Notice is hereby given that the U.S. Refinery Capability Task Group will meet in May 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The U.S. Refinery Capability Task Group will be addressing a current study of the capability of the U.S. refining industry. Its analysis and findings will be based on information and data to be gathered by the various task groups.

The U.S. Refinery Capability Task Group will hold its fourteenth meeting on Wednesday, May 7, 1986, starting at 8:30 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the U.S. Refinery Capability Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review of the work of the Task Group.
3. Discussion of any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the U.S. Refinery Capability Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the U.S. Refinery Capability Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 17, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[OPPE-FRL-3009-1]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICR is available for review and comment.

FOR FURTHER INFORMATION CONTACT: Patricia Minami, (202) 382-2712 or FTS 382-2712.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: New Source Performance Standards (NSPS) for Volatile Organic Compounds: Fugitive Emission Sources, Synthetic Organic Chemical Manufacturing Industry (EPA ICR #0662). (This is an extension of a previously approved ICR; no changes are proposed.)

Abstract: Owners or operators of new plants producing any organic chemical from a list of over three hundred must document their control of fugitive emission sources at various intervals. EPA and plant management use these records to ensure compliance with the standards.

Respondents: Owners or operators of plants which produce any organic chemicals listed in 40 CFR 60.489 (SIC 5161).

Comments on all parts of this notice may be sent to:

BILLING CODE 6560-50-M

[FRL 2988-1(b)]

Privacy Act of 1974; Revisions to Existing Systems of Records

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of revisions to existing systems of records.

SUMMARY: In accordance with the Privacy Act of 1974, EPA previously published system of records notices for the EPA-4 system of records (called "Inspection Branch Reports—EPA") and the EPA-5 system of records (called "Personnel Security File System—EPA"). Those notices were published at 40 FR 43194 (Sept. 18, 1975), 41 FR 39689 (Sept. 15, 1976), and 43 FR 3502 (Jan. 25, 1978). EPA is publishing this notice to

VOL 51 ISS 81 AP 28 1986 UMI

revise information in those notices which has become obsolete.

After Congress passed the Inspector General Act of 1978, 5 U.S.C. app., EPA created the Office of Inspector General (OIG), which maintains these two systems of records. This notice changes the name of the EPA–4 system of records to "OIG Criminal Investigative Index and Files—EPA/OIG" and the name of the EPA–5 system of records to "OIG Personnel Security Files—EPA/OIG." This notice also provides additional information about these revised systems of records.

DATE: This notice will be effective without further notice on June 27, 1986, unless EPA receives written comments which would result in a contrary determination.

ADDRESS: Assistant Inspector General for Management and Technical Assessment, Office of Inspector General (A–109), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Anna M. Virbick, Acting Assistant Inspector General for Management and Technical Assessment, (202) 382–4912.

Lee M. Thomas,
Administrator.
Dated: April 17, 1986.

EPA–4

SYSTEM NAME:

OIG Criminal Investigative Index and Files—EPA/OIG.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Assistant Inspector General for Investigations, Office of Inspector General (A–109), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals and entities who are or have been the subjects of investigations conducted by the OIG, including present and former EPA employees; present and former EPA grant recipients, consultants, contractors, and subcontractors and their employees; and other individuals and entites doing business with EPA.

CATEGORIES OF RECORDS IN THE SYSTEM:

a. *Criminal Investigative Index.* Selected information from each investigative file, indexed by case file numbers, names of the subjects of investigations, and the cities, States, and EPA regions in which the subjects were located.

b. *Hard Copy Files.* All information relating to investigations, including the information contained in the criminal investigative index; information provided by the subjects of investigations; information provided by individuals with whom the subjects are associated (e.g., fellow workers, business associates, acquaintances, or relatives); information provided by Federal, State, local, and foreign investigatory or law enforcement agencies, and other government agencies, information provided by witnesses and confidential sources; information from public source materials; investigative notes; summaries of telephone calls; correspondence; a copy of the investigative report; and information about referrals for criminal prosecutions, civil proceedings, and administrative actions taken with respect to the subjects.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Inspector General Act of 1978, 5 U.S.C. app.; 44 U.S.C. 3101, 3102; EPA Order 3120.1A, "Reporting, Investigation, and Prevention of Unethical or Illegal Conduct;" and EPA Manual 6600, "Functions and Activities of the Office of the Inspector General."

PURPOSE(S):

The records contained in the systems are used by the OIG in furtherance of the responsibilities of the Inspector General under the Inspector General Act of 1978 to conduct and supervise investigations relating to programs and operations of the EPA; to promote economy, efficiency, and effectiveness in the administration of such programs and operations; and to prevent and detect fraud and abuse in such programs and opeations. The records are used in investigations individuals and entities suspected of having committed illegal or unethical acts and in any resulting criminal prosecutions, civil proceedings, or adminsitrative actions. The records are used in debarment and suspension proceedings under assistance programs and direct procurements. The records are used in conducting investigations of employees, consultations, contractors, subcontractors, and applicants in connection with pesonnel security deteminations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system may be used and disseminated to further the purposes described above. the following routine uses apply to the records contained in this system:

a. A record may be disclosed to an individual or to a Federal, State, local, foreign, or international agency, when necessary to further the ends of an investigation.

b. If a record indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statue or particular program statute, or by rule, regulation, or order issued pursuant thereto, or if a record indicates a violation or potential violation of a contract, a record, may be disclosed to the appropriate agency, whether Federal, State, local, foreign, or international, charged with the responsibility of investigating or prosecuting such violation, or of enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto, or or enforcing the contract.

c. If a record indicates a need to protect the interests of the Federal Government in a debarment or suspension proceeding, a record may be disclosed to the appropriate agency charged with protecting the interests of the Federal Government.

d. A record may be disclosed to a Federal, State, local, foreign, or international agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, if necessary to obtain information relevant to an EPA decision concerning the assignment, hiring, or retention of an individual, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

e. A record may be disclosed to a Federal, State, local, foreign, or international agency, in response to its request, in connection with the assignment, hiring, or retention of an individual, the issuance of a security clearance, the reporting of an investigation of an individual, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

f. A record may be disclosed in a proceeding before a court or adjudicative body before which the EPA is authorized to appear, or in the course of settlement negotiations with opposing counsel, when—

(1) the EPA, or any component thereof; or (2) any employee of the EPA in his or her official capacity; or (3) any employee of the EPA in his or her individual capacity, where the EPA has agreed to represent the employee; or (4) the United States, where the EPA determines that litigation is likely to affect the EPA or any of its components—

is a party to litigation or has an interest in such litigation, and the EPA determines that the use of such records is relevant and necessary to the litigation; provided, however, that in each case the EPA determines that disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

g. A record may be disclosed to a Member of Congress who submits an inquiry on behalf of an individual, when the Member of Congress informs the EPA System Manager that the individual to whom the record pertains has authorized the Member of Congress to have access to the record. In such cases, the Member of Congress has no more right to the record than does the individual.

h. A record may be disclosed to the Department of Justice to obtain its advice in determining whether EPA must disclose the record under the Freedom of Information Act, 5 U.S.C. 552.

i. A record may be disclosed to the Office of Management and Budget to obtain its advice in determining whether EPA must disclose the record under the Privacy Act of 1974, 5 U.S.C. 552a.

j. A record may be disclosed to a Federal agency which has the authority to subpoena other Federal agencies' records (e.g., the Internal Revenue Service or the United States Civil Rights Commission) and which has issued a valid subpoena for the record.

k. A record may be disclosed to the Department of Justice when—

(1) the EPA, or any component thereof; or (2) any employee of the EPA in his or her official capacity; or (3) any employee of the EPA in his or her individual capacity, where the Department of Justice has agreed or is considering a request to represent the employee; or (4) the United States, where the EPA determines that litigation is likely to affect the EPA or any of its components—

is a party to litigation or has an interest in such litigation, and the EPA determines that the use of such records by the Department of Justice is relevant and necessary to the litigation; provided, however, that in each case, the EPA determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

l. A record may be disclosed to the Department of the Treasury and the Department of Justice when EPA is seeking an *ex parte* court order to obtain taxpayer information from the Internal Revenue Service.

m. A record may be disclosed to commercial contractors (debt collection agencies) for the purpose of collecting delinquent debts, as authorized by the Debt Collection Act of 1982, 31 U.S.C. 3718.

n. A record may be disclosed to a "consumer reporting agency," as that term is defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) and the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)), for the purpose of obtaining information in the course of an investigation.

o. A record may be disclosed to a private firm which contracts with the EPA, to the extent that such records are relevant and necessary to the contractor's performance of the contract. The contractor shall be required to comply with the requirements of the Privacy Act of 1974, 5 U.S.C. 552a.

p. A record may be disclosed to the Administrator of General Services and the Archivist, or the designee of either, during an inspection of records management practices and programs being conducted under the authority of 44 U.S.C. 2904 and 2906.

q. A record may be disclosed to a Federal, State, or local agency for use in computer matching programs to prevent and detect fraud and abuse in benefit programs administered by those agencies, to support civil and criminal law enforcement activities of those agencies and their components, and to collect debts and overpayments owed to those agencies and their components. This routine use does not provide unrestricted access to records for such law enforcement and related antifraud activities. Each request for disclosure will be considered in accordance with the Computer Matching Guidelines, issued by the Office of Management and Budget (OMB) on May 11, 1982, published at 47 FR 21656 (May 19, 1982), and the Computer Match Checklist, issued by OMB on December 29, 1983, or any superseding guidance.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The criminal investigative index is stored on index cards and computer floppy disks. The hard copy files are stored in file folders. All records are stored under secure conditions, which are described in the Safeguards section.

RETRIEVABILITY:

Records in the criminal investigative index are retrieved by the last names of the subjects of investigations and by case numbers. Records in the hard copy files are retrieved by case file numbers.

SAFEGUARDS:

Direct access is limited to authorized staff of the Office of the Assistant Inspector for Investigations. Additional access within EPA is limited to authorized officials and employees on a need-to-know basis. All records, when not in the possession of an authorized individual, are stored in locked cabinets in a locked room with restricted access.

RETENTION AND DISPOSAL:

Records are retained and disposed of in accordance with EPA Records Control Schedules, Appendix B, Schedule 19 (pending approval of the National Archives and Records Administration).

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Inspector General for Investigations, Office of Inspector General (A–109), Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460.

NOTIFICATION PROCEDURES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement. However, EPA has promulgated rules which establish procedures for notifying an individual at his request if the system of records contains a record pertaining to him because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system. Requests for notification should be made in writing to the System Manager in accordance with EPA's regulations at 40 CFR Part 16.

RECORD ACCESS PROCEDURES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement. However, EPA has promulgated rules which establish procedures for notifying an individual at his request how he can gain access to a record in a system of records pertaining to him because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system. Requests for access should be made in writing to the System Manager in accordance with EPA's regulations at 40 CFR Part 16.

CONTESTING RECORD PROCEDURES:

See Record Access Procedures section of this notice.

VOL 51 ISS 81 AP 28 1986 UMI

RECORD SOURCE CATEGORIES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement. However, EPA is publishing the following generic list of categories of sources of records in this system: the subjects of investigations; individuals with whom the subjects of investigations ar associated (e.g., fellow workers, business associates, acquaintances, or relatives); Federal, State, local, or foreign investigatory or law enforcement agencies; other government agencies; confidential sources; witnesses; concerned citizens; and public source materials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(j)(2), this system is exempt from the following provisions of the Privacy Act of 1974: 5 U.S.C. 552a(c)(3) and (4); (d);(e) (1), (2), (3), (4) (G), (H), and (I), (5),and (8); (and (g). Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in that subsection. 5 U.S.C. 552a (c)(3); (d); (e)(1), (4) (G), (H), and (I); and (f). Pursuant to 5 U.S.C. 552a(k)(5), this system is exempt from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in that subsection: 5 U.S.C. 552a (c)(3); (d); (4) (H) and (I); and (f) (2) through (5). These exemptions were published as regulations in the **Federal Register**, in accordance with the requirements of 5 U.S.C. 553(b) (1), (2), and (3), (c), and (e). For additional information, contact the System Manager.

EPA-5

SYSTEM NAME:

OIG Personnel Security Files—EPA/OIG.

SECURITY CLASSIFICATION:

Most of the records in this system are unclassified. However, some records in the system are classified by other Federal Agencies at levels up to and including "secret" in accordance with Executive Order 12356.

SYSTEM LOCATION:

Assistant Inspector General for Management and Technical Assessment, Office of Inspector General (A–109), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who are or have been the subjects of personnel security investigations (e.g., background investigations, national agency checks and inquiries, and periodic reinvestigations) conducted by the OIG or the Office of Personnel Management (OPM), including present and former EPA employees, consultants, contractors, and subcontractors in sensitive and nonsensitive positions; and applicants for sensitive positions within the EPA.

CATEGORIES OF RECORDS IN THE SYSTEM:

A. *Computerized Reference:* Selected information from some personnel security files, indexed by the subject's social security number, place of birth, type of investigation, date of investigation, agency which conducted the investigation, type of security clearance, date of security clearance, and sensitivity of the position occupied.

B. *Hard Copy Files:* All information relating to personnel security investigations, including information contained in the computerized reference; information provided by the subjects of investigations on forms SF–171, SF–85, SF–86, SF–87, OPM–329–A, and EPA–1480–40, and in interviews or correspondence; information provided by individuals with whom the subjects are associated (e.g., fellow workers, business associates, acquaintances, or relatives); information provided by Federal, State, local, or foreign investigatory or law enforcement agencies, or other government agencies; information provided by confidential sources; information provided by former employers, references named by the subjects, credit agencies, and educational institutions; pre-appointment investigative reports; summaries of telephone calls; correspondence; public source materials; and information about referrals for criminal prosecutions, civil proceedings, and administrative actions taken with respect to the subjects.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10450, as amended; Executive Order 12356; Atomic Energy Act of 1954, as amended, 42 U.S.C. 2165; Inspector General Act of 1978, 5 U.S.C. app.; 5 U.S.C. 301, 3301, 3302; 44 U.S.C. 3101, 3102; 5 CFR Parts 731 and 732; the OPM Federal Personnel Manual; EPA Manual 6500, "Functions and Activities of the Office of the Inspector General;" and EPA Delegations Manual 1–6–B, "Personnel Security."

PURPOSE(S):

The records contained in the system are used by the OIG to develop information on EPA employees, consultants, contractors, subcontractors, and applicants that will help the EPA determine suitability, eligibility, or qualifications for Federal civilian employment, Federal contracts, or access to classified information. To the extent that records in this system reveal a violation or potential violation of law, then such records would be used by the OIG in furtherance of the responsibilities of the Inspector General under the Inspector General Act of 1978 to conduct and supervise investigations relating to programs and operations of the EPA; to promote economy, efficiency, and effectiveness in the administration of such programs and operations; and to prevent and detect fraud and abuse in such programs and operations. Such records would be used in investigating individuals and entities suspected of having committed illegal or unethical acts and in any resulting criminal prosecutions, civil proceedings, or administrative actions.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The records in this system may be used and disseminated to further the purposes described above. The following routine uses apply to the records contained in this system:

a. A record may be disclosed to an individual or to a Federal, State, local, foreign, or international agency, when necessary to further the ends of an investigation.

b. If a record indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or particular program statute, or by rule, regulation, or order issued pursuant thereto, or if a record indicates a violation or potential violation of a contract, a record may be disclosed to the appropriate agency, whether Federal, State, local, foreign, or international, charged with the responsibility of investigating or prosecuting such violation, or of enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto, or of enforcing the contract.

c. A record may be disclosed to a Federal, State, local, foreign, or international agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, if necessary to obtain information relevant to an EPA decision concerning the assignment, hiring, or retention of an individual, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

d. A record may be disclosed to a Federal, State, local, foreign, or international agency, in response to its request, in connection with the assignment, hiring, or retention of an individual, the issuance of a security clearance, the reporting of an investigation of an individual, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

e. A record may be disclosed in a proceeding before a court or adjudicative body before which the EPA is authorized to appear, or in the course of settlement negotiations with opposing counsel, when—

(1) The EPA, or any component thereof; or (2) any employee of the EPA in his or her official capacity; or (3) any employee of the EPA in his or her individual capacity, where the EPA has agreed to represent the employee; or (4) the United States, where the EPA determines that litigation is likely to affect the EPA or any of its components—

is a party to litigation or has an interest in such litigation, and the EPA determines that the use of such records is relevant and necessary to the litigation; provided, however, that in each case the EPA determines that disclosure of the records is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

f. A record may be disclosed to a Member of Congress who submits an inquiry on behalf of an individual, when the Member of Congress informs the EPA System Manager that the individual to whom the record pertains has authorized the Member of Congress to have access to the record. In such cases, the Member of Congress has no more right to the record than does the individual.

g. A record may be disclosed to the Department of Justice to obtain its advice in determining whether EPA must disclose the record under the Freedom of Information Act, 5 U.S.C. 552.

h. A record may be disclosed to the Office of Management and Budget to obtain its advice in determining whether EPA must disclose the record under the Privacy Act of 1974, 5 U.S.C. 552a.

i. A record may be disclosed to a Federal agency which has the authority to subpoena other Federal agencies' records (e.g., the Internal Revenue Service or the United States Civil Rights Commission) and which has issued a valid subpoena for the record.

j. A record may be disclosed to the Department of Justice when—

(1) The EPA, or any component thereof; or (2) any employee of the EPA in his or her official capacity; or (3) any employee of the EPA in his or her individual capacity, where the Department of Justice has agreed or is considering a request to represent the employee; or (4) the United States, where the EPA determines that litigation is likely to affect the EPA or any of its components—

is a party to litigation or has an interest in such litigation, and the EPA determines that the use of such records by the Department of Justice is relevant and necessary to the litigation; provided, however, that in each case, the EPA determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

k. A record may be disclosed to the Department of the Treasury and the Department of Justice when EPA is seeking an *ex parte* order to obtain taxpayer information from the Internal Revenue Service.

l. A record may be disclosed to commercial contractors (debt collection agencies) for the purpose of collecting delinquent debts, as authorized by the Debt Collection Act of 1982, 31 U.S.C. 3718.

m. A record may be disclosed to a "consumer reporting agency," as that term is defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) and the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)), for the purpose of obtaining information in the course of a personnel security investigation.

n. A record may be disclosed to a private firm which contracts with the EPA, to the extent that such records are relevant and necessary to the contractor, performance of the contract. The contractor shall be required to comply with the requirements of the Privacy Act of 1974, 5 U.S.C. 552a.

o. A record may be disclosed to the Administrator of General Services and the Archivist, or the designee of either, during an inspection of records management practices and programs being conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The computerized reference is stored on bound computer printout sheets. The hard copy files are stored in file folders. All records are stored under secure conditions, which are described in the Safeguards section.

RETRIEVABILITY:

Records in the computerized reference are retrieved by the social security numbers of the subjects of personnel security investigations. Records in the hard copy files are retrieved by the last names of the subjects of personnel security investigations.

SAFEGUARDS:

Direct access is limited to authorized employees of the Personnel Security Staff, Office of the Assistant Inspector General for Management and Technical Assessment. Additional access within EPA is limited to authorized officials and employees on a need-to-know basis. All records, when not in the possession of an authorized individual, are stored in file cabinets or safes and/or in a locked central file room with restricted access. Classified records are stored in accordance with Executive Order 12356.

RETENTION AND DISPOSAL:

Records are retained and disposed of in accordance with EPA Records Control Schedules, Appendix B, Schedule 19 (pending approval of the National Archives and Records Administration).

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Inspector General for Management and Technical Assessment, Office of Inspector General (A–109) Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

NOTIFICATION PROCEDURES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement to the exent that the system contains investigatory material compiled for law enforcement purposes. EPA also claims that the system is exempt from this requirement to the extent that the system contains records which are specifically authorized under criteria established by Executive Order 12356 to be kept secret in the interest of national defense or foreign policy and which are in fact properly classified pursuant to that

VOL 51 ISS 81 AP 28 1986 UMI

Executive order. However, EPA has promulgated rules which establish procedures for notifying an individual at his request if the system of records contains a record pertaining to him because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system. Requests for notification should be made in writing to the System Manager in accordance with EPA's regulations at 40 CFR Part 16.

RECORD ACCESS PROCEDURES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement. However, EPA has promulgated rules which establish procedures for notifying an individual at his request how he can gain access to a record in a system of records pertaining to him because, under certain circumstances, it might be appropriate for an individual to have access to all or a portion of his records in this system. Requests for access should be made in writing to the System Manager in accordance with EPA's regulations at 40 CFR Part 16.

CONTESTING RECORD PROCEDURES:

See Record Access Procedures section of this notice.

RECORD SOURCE CATEGORIES:

See Exemption section of this notice. EPA claims that the system is exempt from this requirement. However, EPA is publishing the following generic list of categories of sources of records in this system: the subjects of personnel security investigations; individuals with whom the subjects are associated (e.g., fellow workers, business associates, acquaintances, or relatives); Federal, State, local, or foreign investigatory or law enforcement agencies; other government agencies; confidential sources; former employers; references named by the subjects; credit agencies; educational institutions; and public source materials.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(k)(l), this system is exempt from the following provisions of the Privacy Act of 1974: 5 U.S.C. 552a (c)(3); (d); (e)(l), (4) (G), (H), and (I); and (f). Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in that subsection: 5 U.S.C. 552a (c)(3); (d); (e)(1), (4) (G), (H), and (I); and (f). Pursuant to 5 U.S.C. 552a(k)(5), this system is exempt from the following provisions of the Privacy Act of 1974, subject to the limitations set forth in that subsection: 5 U.S.C. 552a (c)(3); (d); (e)(1), (4) (H) and (I); and (f) (2) through (5). These exemptions were published as regulations in the **Federal Register**, in accordance with the requirements of 5 U.S.C. 553(b) (1), (2), and (3), (c), and (e). For additional information, contact the System Manager.

BILLING CODE 6560-50-M

[FRL 2988-1(c)]

Privacy Act of 1974; Proposed New System of Records

AGENCY: Environmental Protection Agency.

ACTION: Notice—Privacy Act of 1974, Proposed new system of records.

SUMMARY: Pursuant to the provision of the Privacy Act of 1974, (5 U.S.C. 552a) notice is hereby given that the U.S. Environmental Protection Agency (EPA) proposes to establish and maintain a new system of records. The proposed system is "Criminal Investigative Index and Files." Personnel of EPA's National Enforcement Investigation Center's Office of Criminal Investigation (OCI) will use the records to aid the criminal investigations of violations of federal environmental statute and regulations.

In the Proposed Rules section to today's **Federal Register**, EPA proposes to exempt the system from various provision of 5 U.S.C. 552a, including the access provision of subsection (d). The Privacy Act provides that Congress and the Office of Management and Budget (OMB) be notified of proposed systems of records and that the public be given a 30-day period in which to comment on the routine uses of the system. In addition, OMB requires a 60-day period in which to review the system before it is implemented. Therefore, the Congress, the public and OMB are invited to submit written comments on this system.

DATES: This notice will become effective without further notice on June 27, 1986, unless EPA receives written comments which would result in a contrary determination.

For Further information and to submit comments contact: John M. Lattimer, Enforcement Specialist Office, National Enforcement Investigations Center, U.S. Environmental Protection Agency, Denver Federal Center, Building 53, Box 25227, Denver, Colorado 80225, Telephone: 303-236-5128.

Dated: April 17, 1986.

Lee M. Thomas,

Administrator.

NEIC Office of Criminal Investigations, San Francisco Resident Office, EPA-Region IX, 215 Fremont Street, San Francisco, CA 94105.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals included in the system are those on whom data has been collected by criminal investigators of the National Enforcement Investigation Center's (NEIC) Office of Criminal Investigations (OCI) and assembled in the form of investigative reports in the course of investigations conducted concerning violations of federal environmental

statutes and regulations. Such individuals may be actual subjects of the investigation, or persons associated with the subject (e.g. relatives, business partners, acquaintances) or witnesses. Names of the OCI criminal investigators who participate in the subject investigation also appear in the system.

CATEGORIES OF RECORDS IN SYSTEM:

a. *Index.* The computer enhanced index system contains selected information from the criminal investigative file. Such information includes, but is not limited, to personal data (e.g. name, address, telephone number); prior/secondary residences; vehicle information; associated persons (name and role); driver licenses/aliases; associated companies (name and role); identifying numbers (number type, number and brief description); corporate data (company name, address, telephone number); corporate vehicle information; associated persons and companies; corporate identifying numbers; case information (e.g. case opened, date referred to EPA); criminal investigator's comments; criminal investigator's name and office; dissemination information (e.g. agency requesting information); and other related investigative information.

b. *Hard Copy File* The hard copy file contains all information relating to an investigative matter. In addition to the information contained in the computer enhanced index system, the hard copy files contain, but are not limited to, correspondence (case coordination reports, memos of conversations, and other records of communication relating to theinvestigation); interviews (witness interviews and statements generated by either an OCI agent or another agency or person); regulatory history (permits and reports generated as a result of normal program activity); technical support (program reports generated as a result of the investigation); investigative notes; electronic monitoring (reports requesting permission and use, transcripts of tapes); Records check (personal history police information, fingerprint cards); photographs; property reports (property obtained and retained by OCI including documents, personal property and physical evidence); manifests; and other related investigative information.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9604; Resource Conservation and Recovery Act, 42 U.S.C. 6927; Federal Water Pollution Control Act, 33 U.S.C. 1318; Toxic Substances Control Act, 15 U.S.C. 2610; Clean Air Act, 42 U.S.C. 7414; Federal Insecticide, Fungicide and Rodenticide Act, 7 U.S.C. 136g; Safe Drinking Water Act, 42 U.S.C. § 300j-4; Noise Control Act of 1972, 42 U.S.C. 4912; and Title 28, U.S. Code, Section 533 with appointment letter from Civiletti, Attorney General to Costle, Administrator EPA dated January 16, 1981.

PURPOSE(S):

Records maintained in the system will be used by OCI criminal investigators for the purpose of supporting and furthering their investigations of persons or firms who allegedly knowingly or willfully violated any environmental statute or regulation.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

1. Information in this system may be disclosed as a routine use to any Federal, State or local government agency directly engaged n the criminal justice process where access is related to a law enforcement function of the recipient agency in connection with the tracking, identification and prosecution of persons or companies believed to have knowingly or willfully violated any environmental statute or regulation.

2. In the event the Agency deems it desirable or necessary, in determining whether particular records are required to be disclosed under the Freedom of Information Act, disclosure may be made to the Department of Justice for the purpose of obtaining its advice.

3. Where federal agencies having the power to subpoena other federal agencies' records, such as the Internal Revenue Service or the Civil Rights Commission, issue a subpoena to the Agency for records in this system of records, the agency will make such records available.

4. A record may be disclosed to the Department of Justice when (1) the EPA, or any component thereof; or (2) any employee of the EPA in his or her official capacity, or (3) any employee of the EPA in his or her individual capacity, where the Department of Justice has agreed or is considering a request to represent the employee; or (4) the United States, where the EPA determines that litigation is likely to affect the EPA or any of its components, is a party to litigation or has an interest in such litigation, and the EPA determines that the use of such records by the Department of Justice is relevant and necesary to the litigation; provided, however, that in each case, the EPA determines that disclosure of the records to the Department of Justice is a use of the information contained in the records that is compatible with the purpose for which the records were collected.

5. Also see Prefatory Statement of General Routine Uses, 41 FR 39689 (September 15, 1976) for other routine uses applicable to this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The system is maintained in hard-copy files with selected portions also stored in computer disks.

RETRIEVABILITY:

Hard copy files are maintained in the chronological order of the case file number assigned to it and retrieved by case file number. Information on individuals may be accessed by cross referencing with computer index.

The computer enhanced index system is retrievable by case file number or case title, the name of an individual, company name, drivers license, vehicle tag or vehicle identification number, identifying number (EPA permit number) agent name and freestyle (string of letters from one to forty letters long).

SAFEGUARDS:

Only OCI employees and employees of NEIC's Enforcement Specialist Office are authorized to access the system. Hard copy files, when not in the possession of an authorized individual, are maintained in a locked cabinet. The computer index is protected from access by a unique identifier password known only to the authorized persons. The index system also maintains a user log which identifies and records who uses the system. Both the computer and cabinets are in locked rooms in a building with restricted access.

RETENTION AND DISPOSAL:

All investigative files are maintained in accordance with the provisions of the pending EPA Records Control Schedule for Regional Enforcement records (Appendix D, Schedule 4, Item 16).

SYSTEM MANAGER AND ADDRESS:

Assistant Director for Criminal Investigations, Environmental Protection Agency, NEIC, Box 25227, Denver, Colorado 80225.

NOTIFICATION PROCEDURE:

Requests for notification should be made in writing and be addressed to the System Manager. The requester should include his full name, complete address, date of birth, and a notarized statement that the requestor is the individual to

VOL 51 ISS 81 AP 28 1986 UMI

whom the pertains and that be understands it is a misdemeanor to knowingly and willfully seek to obtain access to records about another individual under false pretenses. The request should also include the general subject matter of the record or records in question or the record file number along with any other known information which may assist EPA in searching for the records. Additional information or requirements, if any, will be provided by the System Manager.

RECORD ACCESS PROCEDURE:

Same as Notification Procedures.

CONTESTING RECORD PROCEDURES:

Same as Access Procedure. In addition, the requester should state the corrective action sought and supporting justification for the correction.

RECORD SOURCE CATEGORIES:

Information is obtained from other government agencies, law enforcement agencies, the general public, subjects of investigation, informants, witnesses, public source materials, and other persons and entities with information potentially relevant to an investigation.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

Pursuant to 5 U.S.C. 552a(j)(2) this system is exempt from the following provisions of the Privacy Act: 5 U.S.C. 552a(c) (3) and (4); (d); (e) (1), (2), (3), (4) (G), (H), and (I), (5) and (8); (f); and (g). Pursuant to 5 U.S.C. 552a(k)(2), this system is exempt from the following provisions of the Privacy Act: 5 U.S.C. 552a(c)(3); (d), (e)(1), (4)(G), (H) and (I); and (f) of the Privacy Act. Regulations have been promulgated and published in the Federal Register concurrent with this Notice in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e). These exemptions will only be used to the extent necessary to ensure the effectiveness of EPA's criminal enforcement program.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Extension of 3067-0116.

Title: Procurement Solicitations Issued by FEMA.

Abstract: FEMA, Acquisition Management's information collection requirements continue to be necessary under the Federal Procurement Regulations (FPR), superceded by the Federal Acquisition Regulations, and modifications to FPR contracts. The number of information requirements under FPR contracts decreases as FPR contracts are completed.

Type of Respondents: State or Local Governments, Businesses or other for-profit, Federal agencies or employees, Non-profit institutions, Small businesses or organizations.

Number of Respondents: 1.

Burden Hours: 23,588.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646-2624, 500 C Street SW., Washington, D.C. 20472.

Comments should be directed to Mike Weinstein, Desk Officer for FEMA, Office of Information and Regulatory Affairs, OMB, Rm. 3235, New Executive Office Building, Washington, DC 20503.

Walter A. Girstantas,

Director, Administrative Support.

BILLING CODE 6718-01

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 021-003079-007.

Title: Tampa Port Authority Lease Agreement.

Parties:

Tampa Port Authority
Eller & Company, Inc.

Synopsis: The proposed amendment would modify the agreement to provide for the lease of an additional 1.280 acres of bare land for a period of 25 years.

Agreement No.: 224-003985-005.

Title: Port of Seattle Terminal Agreement.

Parties:

Port of Seattle (Port)
Seacon Terminals, Inc. (Lessee)

Synopsis: The proposed amendment would reduce the leased premises by 3.1811 acres which are superfluous to the Lessee's needs, but can be used in connection with other Port facilities.

Agreement No.: 024-004008-004.

Title: Port of Oakland and Marine Terminals Corporation Management Agreement.

Parties:

Port of Oakland (Port)
Marine Terminals Corporation (MTC)

Synopsis: The proposed amendment would modify the agreement to provide a constructed method of calculating container crane hours for purposes of the crane usage compensation quota of 3000 hours in a contract year and to allow an additional reimbursement credit to MTC for its cost for certain permanent improvments made to the assigned premises in the sun of $21,017.00.

Agreement No.: 202-007540-045.

Title: United States Atlantic and Gulf/Southeastern Caribbean Conference.

Parties:

Puerto Rico Maritime Shipping Authority
Sea-land Service, Inc.
Shipping Corporation of Trinidad and Tobago Ltd.

Synopsis: The proposed amendment would delete Barbados, Surinam and Guyana from the scope of the agreement and change the number of days that members have to respond to telephone and telex polls. The parties have requested a shortened review period.

Agreement No.: 202-010693-010.

Title: Florida/Caribbean Liner Association.

Parties:

Bernuth Lines Ltd.
Tecmarine Lines, Inc.
West Indies Shipping Corp.
Shipping Corporation of Trinidad and Tobago
Sea-Land Service, Inc.
Concorde Caribe Lines, Ltd.

Synopsis: The proposed amendment would modify the agreement to provide that a party may take independent action effective upon one (1) calendar day's notice in lieu of seven (7) calendar days' notice to the Association Executive Director. The parties have requested a shortened review period.

Agreement No.: 224-010915

Title: Port of Portland Terminal Agreement

Parties:

Port of Portland (Port)
Nippon Yusen Kaisha, Ltd. (Lines)
Showa Line, Ltd. (Lines)

Synopsis: The proposed amendment would provide for the preferential use by the Lines of 7 acres of container yard and 2 container cranes. The preferential berthing period shall be for a fixed 48-hour period each week. The Port will perform all terminal stevedore services, vessel stevedoring, and services required in the movement of containers and cargo on or over the premises. The Lines agree to pay for these services in accordance with Port of Portland Terminal Tariff. The Lines will compensate the Port at a minimum annual fee of $500,000, for the first year and escalating on an annual basis thereafter. Revenue from dockage, wharfage, wharf demurrage, and storage paid by the Lines on their vessels and cargoes will be applied against the minimum annual guarantee. Revenues are to be shared between the Port and the Lines according to a formula set forth in the agreement. The term of the agreement is two years with renewal periods of one year each.

Agreement No.: 228-010916.

Title: Global Equipment Management Agreement.

Parties:

The East Asiatic Co. Ltd. A/S
Johnson Line AB
Rederiaktiebolaget Transatlantic
Wilh. Wilhelmsen Limited A/S
Barber Blue Sea
EAC-PNSL Service Ltd.
EAC Lines Trans Pacific Service Ltd.
Johnson Scanstar
Pacific Australia Direct Line
Rederiaktiebolaget Transocean

Synopsis: The proposed agreement would authorize the parties to be shareholders in an organization incorporated under the name Global Equipment Management Limited for purposes of the worldwide management and control of empty containers, and other equipment used in connection therewith, utilized by the parties. The parties have requested a shortened review period.

Agreement No.: 224-010917.

Title: Port of Vancouver Terminal Agreement.

Parties:

The Port of Vancouver (Port)
Hoegh Lines (Hoegh)

Synopsis: The proposed agreement would provide for the sharing of terminal revenues as a result of Hoegh's agreement to designate the Post as its Columbia River port of call. The agreement would be effective for an initial period of one year with an option for a year's extension.

By order of the Federal Maritime Commission.

Dated: April 23, 1986.

Licensing of Ocean Freight Forwarders; Filing of Petition to Amend Rules

April 23, 1986.

Notice is hereby given that a petition has been filed by the National Customs Brokers & Forwarders Association of America, Inc. (the Association), requesting the Commission to amend its rules pertaining to the licensing of ocean freight forwarders (46 CFR Part 510).

Specifically, the Association seeks amendments to the requirements regarding changes in a licensee's organization (§510.19); provisions relating to forwarding by ocean common carriers, non-vessel operating common carriers, or an agent of either (§510.4), payment of compensation to freight forwarders; liability of freight forwarders for ocean freight charges; reduced forwarding fees (§510.22(i)); and provisions relating to disclosure of forwarder charges (§510.22(g)).

In order for the Commission to make a thorough evaluation of the petition, intersted persons are requested to submit views, arguments or data on the petition no later than May 30, 1986. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573, in an original and 15 copies. Responses shall also be served on counsel for the Association: Gerald H. Ullman, P.C., 40 Exchange Place, Suite 1300, New York New York 10005.

Copies of the petition are available for examination at the Washington, DC office of the Commission, 1100 L Street, NW., Room 11101.

FEDERAL MEDIATION AND CONCILIATION SERVICE

President's Advisory Committee on Mediation and Conciliation; Meeting

Pursuant to section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the President's Advisory Committee on Mediation and Conciliation will be held on May 13, 1986, from 9:00 a.m. to 5:00 p.m. in Room 538 of the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581.

The purpose of the meeting is to obtain the views of representatives of labor and management, and other qualified individuals, on the present state of arbitration in the resolution of labor-management disputes. A hearing procedure will be followed in which the views of witnesses will be transcribed for the record.

The meeting will be open to the public. Interested persons may file written statements with the Committee. Subject to reasonable Committee procedures, interested persons may also make oral statements on matters germane to subjects under consideration at the meeting.

Further information regarding this meeting can be obtained from Mr. Dennis R. Minshall, Executive Director, President's Advisory Committee on Mediation and Conciliation, Federal Mediation and Conciliation Service, 2100 K Street, NW., Washington, DC 20427, or call (202) 653-5290.

Dated: April 23, 1986.

FEDERAL RESERVE SYSTEM

Acquisition of Company Engaged in Permissible Nonbanking Activities; Citizens Financial Group, Inc.

The organization listed in this notice has applied under § 225.23(a) (2) or (f) of the Board's Regulation Y (12 CFR 225.23(a) (2) or (f)) for the Board's approval under section 4(c) (8) of the Bank Holding Company Act (12 U.S.C. 1843(c) (8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 19, 1986.

A. **Federal Reserve Bank of Boston** (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. **Citizens Financial Group, Inc.**, Providence, Rhode Island; to acquire Gulf States Mortgage Co., Inc., Atlanta, Georgia, and thereby engage in making, acquiring and servicing residential mortgage loans secured by first and second mortgages on residential real estate and commercial mortgage loans pursuant to § 225.25(b)(1) of Regulation Y. Company will also engage in the sale, as agent, of credit life, credit accident and health and credit disability insurance in connection with extensions of credit by Company pursuant to § 225.25(b)(8) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 22, 1986.
James McAfee,
Associate Secretary of the Board.

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; Espanola De Finanzas, S.A., et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their veiws in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 19, 1986.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Espanola De Finanzas, S.A.*, Barcelona, Spain; to become a bank holding company by acquiring 40 percent of the voting shares of Espanola De Finanzas Trust Company, Inc., Hato Rey, Puerto Rico.

B. **Federal Reserve Bank of Philadelphia** (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Susquehanna Bancshares, Inc.*, Litiz, Pennsylvania; to acquire 100 percent of the voting shares of Williamsport National Bank, Williamsport, Pennsylvania.

C. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Banterra Corp.*, Eldorado, Illinois; to acquire 100 percent of the voting shares of Norris City State Bank, Norris City, Illinois.

2. *Lakes Capital Corp.*, Water Valley, Mississippi; to become a bank holding company by acquiring at least 80 percent of the voting shares of Bank of Water Valley, Water Valley, Mississippi. Comments on this application must be received not later than May 21, 1986.

3. *Security Bancshares, Inc.*, Des Arc, Arkansas; to become a bank holding company by acquiring at least 80 percent of the voting shares of Farmers and Merchants Bank, Des Arc, Arkansas.

D. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222;

1. *Independent Community Financial Corporation*, Dallas, Texas; to acquire 100 percent of the voting shares of Coppell Financial Corporation, Dallas, Texas, and thereby indirectly acquire Independent Bank-Coppell, N.A., Coppell, Texas.

2. *Independent Community Financial Corporation*, Dallas, Texas, to acquire 100 percent of the voting shares of Independent Bank, N.A., Dallas, Texas.

Board of Governors of the Federal Reserve System, April 22, 1986.
James McAfee,
Associate Secretary of the Board.

Applications To Engage de novo in Permissible Nonbanking Activities; Firstbank Holding Co. of Colorado et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expressed to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 16, 1986.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First Bank Holding Company of Colorado*, Lakewood, Colorado; to engage directly in the activity of issuance and sale of variably denominated "official checks" or similar instruments with no limitation as to maximum face value. Applicant also proposes to issue domestic orders with a maximum face value of up to $10,000.

2. *Nebraska National Corporation*, Omaha, Nebraska; to engage directly in the sale of all lines of insurance except life insurance and annuities pursuant to

VOL 51 ISS 81 AP 28 1986 UMI

section 4(c)(8)(F) of the Bank Holding Company Act of 1956, as amended.

Board of Governors of the Federal Reserve System, April 22, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Alton Premium Feed Co.; Tylosin; Withdrawal of Approval

Correction

In FR Doc. 86-7359 begining on page 11481 in the issue of Thursday, April 3, 1986, make the following corrections:

1. On page 11481, in the third column, the **EFFECTIVE DATE** should read "April 14, 1986".

2. Under **SUPPLEMENTARY INFORMATION**, in the second paragraph, in the third line, "(21 U.S.C. 360(e))" should read "(21 U.S.C. 360b(e))".

3. In the same paragraph, in the last line, the date should read "April 14, 1986".

BILLING CODE 1505-01-M

Parke-Davis; Chloramphenicol Capsules; Withdrawal of Approval

Correction

In FR Doc. 86-7361 appearing on page 11482 in the issue of Thursday, April 3, 1986, the date "April 11, 1986" should read "April 14, 1986" in the two places it appears.

BILLING CODE 1505-01-M

[Docket No. 86E-0116]

Determination of Regulatory Review Period for Purposes of Patent Extension; Isovue

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Isovue and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Isovue, a diagnostic nonionic, radiopaque contrast medium indicated for angiography throughout the cardiovascular system. Following FDA's approval, Bracco Industria Chimica, s.p.a., filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 24, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Isovue represented the first commercial marketing or use of its active ingredient, iopamidol. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Isovue is 2,441 days. Of this time, 1,407 days occurred during the testing phase of the regulatory review period, while 1,034 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* April 28, 1979. FDA has verified that the investigational new drug application became effective on April 28, 1979 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)).

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* March 4, 1983. FDA has verified that the new drug application (NDA 18-735) was initially submitted on March 4, 1983.

3. *The date the application was approved:* December 31, 1985. FDA was verified that NDA 18-735 was approved on December 31, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 27, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 27, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 22, 1986.

Allen B. Duncan,

Deputy Associate Commissioner for Health Affairs.

BILLING CODE 4160-01-M

[Docket No. 86E-0128]

Determination of Regulatory Review Period for Purposes of Patent Extension; Orudis

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Orudis and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the intitial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B)

FDA recently approved for marketing the human drug product Orudis, a nonsteroidal anti-inflammatory drug. Following FDA's approval, Rhone-Poulenc, S.A., filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 27, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Orudis represented the first commercial marketing or use of its active ingredient, ketoprofen. Shortly, thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Orudis is 4,925 days. Of this time, 3,529 days occurred during the testing phase of the regulatory review period, while 1,396 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* July 18, 1972. FDA has verified that the investigational new drug application became effective on July 18, 1972 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)).

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* March 16, 1982. FDA has verified that the new drug application (NDA 18-754) was initially submitted on March 16, 1982.

3. *The date the application was approved:* January 9, 1986. FDA has verified that NDA 18-754 was approved on January 9, 1986.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 27, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 27, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 23, 1986.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

BILLING CODE 4160-01-M

VOL 51 ISS 81 AP 28 1986 UMI

[Docket No. 86E-0097]

Determination of Regulatory Review Period for Purposes of Patent Extension; Temovate

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Temovate and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims this human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael W. Cogan, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Temovate, a synthetic corticosteroid for topical dermatological use. Following FDA's approval, Glaxo Operations UK Limited filed a patent term restoration application with the U.S. Patent and Trademark Office, which then requested FDA's assistance in determining the patent's eligibility for patent term restoration. In a letter dated March 24, 1986, FDA advised the Patent Office that the product had undergone a regulatory review period and that Temovate represented the first commercial marketing or use of its active ingredient, clobetasol propionate. Shortly thereafter, the Patent Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Temovate is 1,368 days. Of this time, 883 days occurred during the testing phase of the regulatory review period, while 485 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* April 1, 1982. FDA has verified that the investigational new drug application became effective on April 1, 1982 (30 days after its receipt by the agency; see 21 CFR 312.1(b)(4)).

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* August 30, 1984. FDA has verified that the new drug application (NDA 19-322) was initially submitted on August 30, 1984.

3. *The date the application was approved:* December 27, 1985. FDA has verified that NDA 19-322 was approved on December 27, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 2 years of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 27, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 27, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 22, 1986.

BILLING CODE 4160-01-M

Advisory Committee; Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meeting: The following advisory committee meeting is announced:

Circulatory System Devices Panel

Date, time, and place. May 23, 8:30 a.m., Rms. 703-727A, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, 8:30 a.m. to 9:30 a.m.; open committee discussion, 10 a.m. to 2 p.m.; closed committee deliberations, 2 p.m. to 4 p.m.; Keith Lusted, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7594.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of medical devices currently in use and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the

committee contact person before May 13, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a percutaneous transluminal coronary angioplasty guideline, a premarket approval application (PMA) for a pulse generator system, and possibly a PMA for a steroid tip permanent pacing lead.

Closed committee deliberations. The committee may discuss trade secret or confidential commercial information regarding the PMA's listed above. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA-305), Rm. 4-62, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

The Commissioner, with the concurrence of the Chief Counsel, has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA), as amended by the Government in the Sunshine Act (Pub. L. 94-409), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commerical or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portion so FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; a new review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements of a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, notably deliberative sessions to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Publ. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: April 16, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

[FR Doc. 86-9365 Filed 4-25-86; 8:45 am]

BILLING CODE 4160-01-M

[Docket Nos. 84P-0304 and 84P-0305]

Helena Laboratories and Aviv Biomedical, Inc.; Neonatal Total and Unbound Bilirubin Test Systems; Panel Recommendation on Petitions for Reclassification

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment the recommendation of the Clinical Chemistry and Clinical Toxicology Devices Panel (formerly the Clinical Chemistry Section of the Clinical Chemistry and Hematology Devices Panel) that FDA reclassify the neonatal total and unbound bilirubin test system from class III (premarket approval) into class I (general controls). The Panel made this recommendation after review of reclassification petitions filed by Helena Laboratories (Docket No. 84P-0304) and by Aviv Biomedical, Inc. (Docket No. 84P-0305). FDA is also

VOL 51 ISS 81 AP 28 1986 UMI

issuing for public comment its tentative findings on the recommendation. After reviewing and public comments on the recommendation. After reviewing any public comments on the recomendation and FDA's tentative findings, FDA will approve or deny the reclassification petitions by order in the form of a letter to each petitioner. FDA's decisions on the petitions will be announced in the Federal Register.

DATE: Comments by May 28, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kaiser Aziz, Center for Devices and Radiological Health (HFZ–440), Food and Drug Administration, 8757 Georgia Ave., silver Spring, MD 20910, 301–427–7550.

SUPPLEMENTARY INFORMATION:

Introduction

Petition 84P–0304; Helena Laboratories

On December 20, 1982, Helena Laboratories, Beaumont, TX 77704, submitted to FDA under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c(f)(2)) a reclassification petition for a device the manufacturer called "The Helena Front Face Fluorometer (Bilirubinometer) and Bili-Assay System." The petitioner later submitted supplements to the petition dated August 30, 1983, and October 26, 1983. In its August 30, 1983 supplement, the manufacturer announced that the name of the device had been changed. The new name, which the petitioner intends to include on the device label as well as in all other labeling for the device, is "The Helena Laboratories Automated Bilirubin Binding Analyzer" (referred to in this notice as the "ABBAS Analyzer").

Petition 84P–0305; Aviv Biomedical, Inc.

On September 6, 1983, Aviv Biomedical, Inc., Lakewood, NJ 08701, submitted to FDA under section 513(f)(2) of the act a reclassification petition for a device the manufacturer called "The Aviv Bilirubin Hematofluorometer System (AVIV–BHS)." The petitioner later submitted supplements to the petition dated October 19, 1983, and May 21, 1984. In its May 21, 1984 supplement, the petitioner announced that the name of the device had been changed. The new name, which the petitioner intends to inlcude on the device label as well as in all other labeling for the device, is "Aviv Neonatal Bilirubin Hematofluorometer System" (referred to in this notice as the "AVIV–NBHS").

FDA is considering both petitions for reclassification (Docket Nos. 84P–0304 and 84P–0305) together because each test system utilizes fluorometers of similar design and each device employs hematofluorometry technology to determine parameters of total bilirubin and unbound bilirubin in the blood of neonates. The data obtained by each system are used in the clinical management of neonates with unconjugated hyperbilirubinemia and in the assessment of risk to the neonates of bilirubin-associated brain damage (kernicterus).

Background Information on Evaluating and Managing the Jaundiced Neonate

Bilirubin is a yellow "bile pigment" and a byproduct of red blood cell/hemoglobin metabolism. The two major forms of the byproduct are unconjugated bilirubin and conjugated bilirubin. The unconjugated form, also called indirect bilirubin, is not water soluble. It is converted into the conjugated, water soluble form by the liver. The water soluble bilirubin then passes into the circulation and is excreted by the kidneys.

The liver of neonates does not efficiently convert unconjugated bilirubin to the conjugated, water soluble form during the first 3 to 5 days postpartum. Increased levels of bilirubin in the serum produce yellowing of the skin and cornea, which is referred to as jaundice. In neonates, increased bilirubin levels in the serum can cause the clinical syndrome know as kernicterus (deposition of bile pigments into the brain and spinal cord). Kernicterus, also called bilirubin encephalopathy, can result in irreversible brain damage (Refs. 1a, 1b. 1f, 3h, 3i, and 3k). High serum bilirubin concentrations, however, do not always coincide with the development of kernicterus; for example, low body weight infants sometimes develop kernicterus at low bilirubin levels. For this reason, it is necessary to measure parameters other than serum bilirubin concentrations for assessing the likelihood of kernicterus development.

Bilirubin binds most strongly to the plasma protein albumin, with secondary binding on red cell membranes and other plasma proteins. The albumin binding of bilirubin appears to protect the central nervous system against bilirubin toxicity until the primary binding site has been saturated. It is difficult to determine a "safe" level of serum bilirubin, however, due to the variability in individual tolerances. The measurement of either bound bilirubin in blood or the reserve bilirubin-binding capacity of albumin provide additional indices for assessing the likelihood of kernicterus.

The clinical data obtained to date, and ongoing clinical studies, support the quantitation of the albumin-bound bilirubin and the reserve bilirubin-binding capacity of albumin as diagnostic tools in the assessment of neonate bilirubin levels. Over the past 20 years, many methods have been developed to estimate the reserve binding capacity of newborn sera. These tests range widely in complexity. Most of the methods are limited by one or more factors, including technical difficulty, equipment costs, imprecision, interferences, blood volume requirements, and inaccuracy in the presence of elevated conjugated bilirubin. The recent developments in the technique of "hematofluorometry" afford adequate diagnostic assays suitable for routine use in clinical laboratories (Ref. 1a).

The Statutory Scheme

Classification

Section 513(a) of the act establishes three classes of devices: class I (general controls), class II (performance standards), and class III (premarket approval). Classification of a device is determined by the level of regulatory control needed to provide reasonable assurance of the safety and effectiveness of the device. A class I device is a device for which the "general controls" authorized by or under various sections of the act are sufficient to provide reasonable assurance of the safety and effectiveness of a device. A class II device is a device for which general controls by themselves are insufficient to provide reasonable assurance of the safety and effectiveness of the device, for which there is sufficient information to establish a performance standard to provide such assurance, and for which it is therefore necessary to establish a performance standard to provide reasonable assurance of its safety and effectiveness. A class III device is a device that cannot be classified into class I or class II and that is purported or represented to be for use in supporting or sustaining human life or for a use which is of substantial importance in preventing impairment of human health, or that presents a potential unreasonable risk of illness or injury. Premarket approval obtained in accordance with section 515 of the act is required to provide reasonable assurance of the safety and effectiveness of a class III device.

Reclassification

The data on which any reclassification is based are required to consist of "valid scientific evidence," as defined in section 513(a)(3) of the act and 21 CFR 860.7 of the regulations. As specified in 21 CFR 860.123(a)(6), the valid scientific evidence of safety and effectiveness contained in a petition for reclassification must demonstrate (1) why the device should not be classified in its present classification and (2) how the proposed classification will provide reasonable assurance of safety and effectiveness of the device. For the purpose of reclassification, the valid scientific evidence upon which the agency relies may not be based on trade secret or confidential commercial information obtained by FDA under various sections of the act (see section 520(c) of the act (21 U.S.C. 360j(c), 21 CFR 860.5(e)) or on the detailed summaries of information respecting the safety and effectiveness of devices for which there are approved premarket approval applications or product development protocols that have been declared completed (see section 520(h)(3) of the act).

The Devices

Bell Laboratories, Murray Hill, NJ 07974, developed an instrument called the Bilirubin Hematofluorometer, which uses the technique of hematofluorometry in the assessment of neonate bilirubin levels. Bell Laboratories currently is neither manufacturing nor selling the instrument, but has made the technology of hematofluorometry available to interested instrument manufacturers.

The technology of hematofluorometry is based on the following chemical principles and instrument design. The assays provided by a hematofluorometer depend on the fluorescent proterties of unconjugated bilirubin. Although bilirubin absorbs blue light regardless of its environment, its subsequent green light emission (fluorescence) is critically dependent upon its molecular surroundings. A hematofluorometer takes advantage of the fact that in blood, essentially only the bilirubin bound to its primary binding site on albumin is fluorescent; bilirubin bound at secondary albumin sites, to other serum proteins, to red cells, and to any unbound bilirubin is essentially not fluorescent.

Thus, the concentration of albumin-bound bilirubin (primary site) is determined directly from the intensity of the green fluorescence of a whole blood specimen. The total albumin binding capacity is measured from the intensity of fluorescence of another aliquot of specimen after it is saturated with bilirubin. The reserve bilirubin-binding capacity of albumin is the difference between these two values. The hematofluorometer saturation index, which is proportional to the unbound bilirubin concentration, is defined as 10 times the ratio of the bound bilirubin to the reserve binding capacity (10 x B/R). This number approximates the value of apparent "unbound" bilirubin concentration (free bilirubin in solution).

A detergent can, within a few minutes, completely extract bilirubin from all binding sites in blood, including the red cells. Bilirubin is fluorescent when incoroporated into the detergent. Consequently, the total blood bilirubin is determined from the fluorescence of a third aliquot of blood promptly after adding a small amount of detergent to it.

The ABBAS Analyzer, described in the Helena Laboratories petition (Docket 84P–0304), is an unmodified version of the prototype instrument developed and evaluated by Bell Laboratories. It is a microprocessor-based, front-face fluorometer, which measures bound bilirubin, total bilirubin, and the reserve bilirubin-binding capacity of albumin in whole blood. It calculates the total minus the bound bilirubin, the ratio of bound bilirubin to reserve bilirubin-binding capacity, and a saturation index.

The ABBAS Analyzer has four sample compartments, which consist of a tray for holding a slide containing the samples for assay. Three samples are put on the slide: heparinizd whole blood plus ABBAS Lysing Reagent, unaltered heparinized whole blood, and heparinized whole blood plus sodium bilirubinate (AABAS Bilirubin Reagent). The fourth sample compartment serves as a blank. The slide is drawn into the instrument for excitation of the samples and fluorescence measurements. The device's microprocessor calculates the bound bilirubin (B), the total bilirubin (T), the total minus bound bilirubin (T–B), the unbound bilirubin (U), and the reserve bilirubin-binding capacity (R) in milligrams per deciliter (mg/dL) of plasma. The microprocessor also calculates the saturation index (SI) in nanomoles per liter, and bound bilirubin/reserve bilirubin-binding capacity as a ratio without units. Requests for data entries, data entries, and results of the assay appear on the display, or printout, or both.

The ABBAS Analyzer uses whole blood specimens, as necessary for the "front-surface" fluorescence mode employed. The device makes use of the bottom surfaces of the blood aliquots by viewing the surface through a glass slide on which the aliquots are placed. The ABBAS Analyzer requires a determination of the patients's hematocrit using a standard microhematocrit method as described in the procedure accompanying the reagents.

The AVIV-NBHS described in the Aviv Biomedical, Inc., petition (Docket 84P–0305), is a modified version of the prototype instrument developed and evaluated by Bell Laboratories. A built-in microprocessor controls the instrument functions and performs all data analyses; the system provides in less than 5 minutes an evaluation of a set of four blood bilirubin parameters (total blood bilirubin (T), albumin-bound bilirubin (B), reserve binding capacity (R), and a bilirubin-albumin saturation index (SI)). The AVIV–NBHS utilizes disposable assay kits containing premeasured reagents and ministirring bars. In addition, a uranium-glass "checker-slide" is supplied with each instrument to allow assessment of instrument performance. A reagent that allows preparation of an appropriate test blood speciment is also available for use in quality control of the entire protocol.

The AVIV–NBHS also uses whole blood specimens, as necessary for the "front-surface" fluorescence mode employed. Unlike the ABBAS Analyzer, however, the AVIV–NBHS makes use of the top surfaces of the blood aliquots. Also, the AVIV–NBHS uses a complete prepackaged disposable reagent kit and allows for total automation of the mixings and incubations. The AVIV–NBHS employs an automated hematocrit determination, requiring a fourth blood aliquot (performed as a separate task in the ABBAS Analyzer).

The ABBAS Analyzer and the AVIV–NBHS are automatically classified into class III under section 513(f)(1) of the act because they are not substantially equivalent to any preamendments device (i.e., a device that was in commercial distribution before May 28, 1976, the enactment date of the Medical Device Amendments of 1976 (Pub. L. 94–295)) or to a postamendments device that has been reclassified (i.e., a device that was not in commercial distribution before May 28, 1976, but that has been reclassified into class I or II).

Under section 515(a)(2) of the act (21 U.S.C. 360e(a)(2)), before a class III device may be marketed, it must either be reclassified under section 513(f)(2) of the act or have premarket approval under section 515 of the act. Neither the ABBAS Analyzer nor the AVIV–NBHS has premarket approval.

VOL 51 ISS 81 AP 28 1986 UMI

Panel Review

Section 513(f)(2) of the act requires FDA to refer a reclassification petition to the appropriate FDA advisory commitee and to receive a recommendation on whether to approve or deny the petition. Accordingly, FDA referred the petitions to the Clinical Chemistry and Clinical Toxicology Devices Panel for its consideration and a recommendation on the change in classification requested by the petitioners. As discussed under the section of this notice titled "Introduction," FDA referred both petitions together to the Panel because the ABBAS Analyzer and the AVIV–NBHS utilize fluorometers of similar design and each device employs hematofluorometry technology to determine parameters of total bilirubin and unbound bilirubin in the blood of neonates.

The Panel's Recommendation

During an open public meeting on February 28, 1984, the Panel considered the petitions. To determine the proper classification of the devices, the Panel considered the criteria specified in section 513(a)(1) of the act. The Panel recommended that FDA reclassify the generic type of device from class III into class I. (See 21 CFR 868.3(i) for a definition of the term "generic type of device.") The Panel also recommended that FDA assign to this generic type of device the name "total and unbound bilirubin in the neonate test system" and identify it as a device intended to measure the concentration of total and unbound bilirubin in the blood (serum) of newborn infants to aid in indicating the risk of bilirubin encephalopathy (kernicterus).

Summary of the Reasons for the Recommendation

The Panel gave the following reasons in support of its recommendation on reclassification:

1. The device is not an implant, is neither life-supporting nor life-sustaining, and does not present a potential unreasonable risk of illness or injury.

2. General controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

Summary of the Data Upon Which the Recommendation Is Based

The Panel based its recommendation that the ABBAS Analyzer and the AVIV-NBHS be reclassified from class III into Class I on data in petitions (Refs. 1 and 3) and on the published reports whose reprints are included in the petitions (Refs. 1a through 1g for 84P-0305 and Refs. 3a through 3k for 84P-0304). The studies discussed below in this notice showed the accuracy, precision (reproducibility), specificity, sensitivity, and clinical utility of the two devices.

Accuracy

ABBAS Analyzer

Cashore et al. (Ref. 3a), using the Bell Laboratories' Bilirubin Hematofluorometer prototype system, conducted a clinical study to compare the agreement among the fluorometric results with the device and those obtained by other analytical methodologies. In that study, values for total bilirubin (T) and total minus bound bilirubin (T–B) were determined fluorometrically on 35 blood samples collected from 28 jaundiced neonates. The infants in the study included jaundiced neonates without complications and jaundiced neonates with complications.

The following summary of the average values illustrates that measurement of either bound bilirubin or the reserve bilirubin-binding capacity of albumin provides indices for assessing the likelihood of various complications, including development of kernicterus. A comparison of "complications" with "no complications" neonates demonstrates that the measured fraction of bilirubin not bound to albumin (T–B) was significantly larger in "sick" infants.

SUMMARY OF AVERAGE VALUES IN JAUNDICED NEONATES

[Average ± Standard Deviation]

Bilirubin measurement	No complications	Complications
Total (T)	14.7±5.3 mg/dL	10.2±3.4 mg/dL
Total-bound (T–B)	1.2±0.4 mg/dL	2.3±0.6 mg/dL
Total-bound/total (T–B)/T	9±5 percent	23±8 percent
Total Binding Capacity (Bound+Reserve)	25.3±5.1 mg/dL	16.4±2.7 mg/dL

Cashore et al. compared data on the concentrations of total bilirubin, albumin-bound bilirubin, and the reserve and total bilirubin-binding capacities of the 35 neonatal blood samples, assayed by the Bell Laboratories' Bilirubin Hematofluorometer prototype system, to results of Ehrlices diazo reaction (diazo), gel filtration, and peroxidase-oxidation analytical methods. The accuracy of conventional diazo and peroxidase-oxidation methods has been established by studies giving analytical mean recoveries of 97 percent of pure bilirubin added to sera.

Total bilirubin concentrations determined by the hematofluorometer agreed well with the concentrations determined by the diazo assay (r=0.98, s=1.7 mg/dL). (The correlation coefficient (r), and the standard error (s), of the comparisons are statistical measures of the performance of the assay systems.) Likewise, albumin-bound bilirubin concentrations determined by the hematofluorometer also agreed well with the diazo assay values (r=0.95, s=1.9 mg/dL). The values for total bilirubin-binding capacity determined by the hematofluorometer agreed well with the results obtained for the same specimens by gel filtration (r=0.97, s=1.8 mg/dL) and by peroxidase-oxidation (r=0.77, s=1.7 mg/dL). The lower correlation coefficient for the peroxidase-oxidation method is due to the known lower effective binding of bilirubin in neonatal sera compared to adult sera using the peroxidase-oxidation method.

R. Wells et al. (Ref. 3c) conducted a study on the relationships of bilirubin-binding parameters using the Bell Laboratories' Bilirubin Hematofluorometer prototype system with bilirubin-binding parameters determined by the conventional peroxidase-oxidation method. The apparent unbound bilirubin concentration (U) determined by the peroxidase-oxidation method and the total unconjugated bilirubin in blood (T), albumin-bound bilirubin (B), and reserve bilirubin-binding capacity (R) by the hematofluorometer were measured in 164 clinical specimens from 98 neonates and in a series of "artifactual" specimens which were made by adding bilirubin to the blood of a single adult donor. These authors found linear correlations between U and B/R for both the artifactual specimens (r=0.99) and the clinical specimens (r=0.87). They observed an excellent linear correlation between U and T–B for the artifactual specimens (r=0.96) and found a significant linear correlation between U and T–B for the clinical neonate specimens (r=0.72). The correlation was less good for the clinical specimens because variability was introduced by the necessity to collect the data over a period of months and perturbations introduced by phototherapy are expected. A linear correlation between U and T–B supports the hypothesis that both the hematofluorometer and the peroxidase-oxidation methods provide valid measurements of bilirubin-binding status.

The study by R. Wells et al. also suggested that a saturation index (10 X B/R) of about 10 nanomoles per liter calculated by the Bell Laboratories' Bilirubin Hematofluorometer prototype system corresponds to a risk of bilirubin encephalopathy. A saturation index of about 20 corresponds to a high risk of the disease condition. Saturation indexes of 10 and 20 correspond to 50 and 67 percent saturation, respectively, of the primary albumin-binding sites.

The petitioner also provided unpublished studies conducted by A.A. Faranoff and the petitioner, designed to compare the ABBAS Analyzer with the Bell Laboratories' Bilirubin Hematofluorometer prototype system, using 39 patients' blood samples in a pediatric clinical laboratory setting. Also, 11 artificially elevated bilirubin whole blood specimens were analyzed on the ABBAS Analyzer and on the Bell Laboratories' Bilirubin Hematofluorometer prototype system. The petitioner submitted graphs and statistical summaries providing correlation coefficients of the combined clinical and analytical data obtained with both device systems. The correlation coefficients for reserve-binding capacity, albumin-bound bilirubin, and saturation index were 0.98, 0.94, and 0.96, respectively.

In other unpublished studies submitted with the petition, A.A. Faranoff assessed the accuracy of the ABBAS Analyzer using five artificially elevated whole blood bilirubin standards with constant bilirubin concentration (10 g/dL) and varied hematocrits (30, 40, 50, 60, 70 percent). The samples were assayed simultaneously on the ABBAS Analyzer and the Bell Laboratories' Bilirubin Hematofluorometer prototype system for total bilirubin, reserve bilirubin-binding capacity, and albumin-bound bilirubin. All three measures showed excellent linearity and a correlation coefficient of 0.99.

In summary, the results from the studies by Cashore et al., Wells et al, Faranoff, and the petitioner show that the ABBAS Analyzer and the Bell Laboratories' Bilirubin Hematofluorometer prototype system are statistically indistinguishable. Therefore, it can be concluded that the two fluorometric device systems are operationally equivalent. Further, the accuracies of assays by hematofluorometry with both instrument systems are comparable to those of established chemical determinations of total bilirubin and bilirubin-binding parameters.

AVIV–NBHS

R. Wells et al. (Ref. 1f) in a 5-month study using patients' blood samples in a pediatric clinical laboratory setting compared the accuracy of the AVIV–NBHS with that of the Bell Laboratories' Bilirubin Hematofluorometer prototype system. The specimen distribution covered a large clinical range of total blood bilirubin, albumin-bound bilirubin, reserve-binding capacity, and bilirubin-albumin saturation index values. The neonate population of 98 infants from which 164 specimens were obtained also covered a large range of clinical situations. The neonates included jaundiced but otherwise healthy full-term infants, low birth-weight premature infants who required exchange transfusion, and infants who received phototherapy. The petitioner supplied graphs of the data and a statistical summary of the data of the four hematofluorometer parameters (T, B, R, SI) obtained with the AVIV–NBHS compared with data obtained with the Bell Laboratories' Bilirubin Hematofluorometer prototype system.

The analytical results obtained with the two fluorometric device systems were statistically indistinguishable (r=0.90, s=1.83 mg/dL). Therefore, it can be concluded that the two systems are operationally equivalent.

R. Wells et al. also compared plasma total bilirubin values on 98 samples analyzed by the conventional diazo assay with corresponding T values obtained on the AVIV–NBHS. The results from the two methods for quantitating total bilirubin were entirely comparable (r=0.89). These authors also performed recovery studies in which they added increasing amounts of pure bilirubin to blood containing very low concentrations of bilirubin. They then determined T on 16 treated samples with the AVIV–NBHS and assayed the samples chemically for total bilirubin using the diazo assay. The results from the two methods for quantitating the added bilirubin compared very closely (r=0.99).

The petitioner also supplied graphs and a statistical summary comparing the data for B, R, and SI, on 98 neonatal blood samples obtained by R. Wells et al. with the AVIV–NBHS and with the Bell Laboratories' Bilirubin Hematofluorometer prototype system. The results for B from the two systems were statistically indistinguishable (r=0.93, s=1.32 mg/dL), demonstrating that the systems are operationally equivalent for assaying B. Likewise, for R, r was 0.91, s was 1.62 mg/dL; for SI, r was 0.96, s was 1.10 mg/dL. (In the AVIV–NBHS, SI is displayed rounded off to the nearest whole number. In the study, comparison whole number SI values were calculated in the same way from the B and R values obtained with the Bell Laboratories' Bilirubin Hematofluorometer prototype system.)

Cashore et al. (Ref. 1b) conducted comparative studies on 24 blood samples taken from low birth-weight premature infants with relatively severe hyperbilirubinemia. Although this study was directed primarily at testing the relationship between the values of SI obtained with the AVIV–NBHS and those of the unbound bilirubin as obtained by the conventional peroxidase-oxidation method, Cashore et al. also assayed the plasma total bilirubin in each of the samples by the conventional diazo assay. These authors concluded that the two methods for quantitating total bilirubin compared very well (r=0.94).

The petitioner provided an unpublished study by Ahlfors which compared the saturation index determined by the AVIV–NBHS on 27 neonatal blood samples with the unbound bilirubin levels in plasma determined by the peroxidase-oxidation method on the same samples. It is convenient to combine the statistical summary of the values of SI obtained with the AVIV–NBHS by Cashore et al. on 24 blood samples with the summary of the similar unpublished study conducted by Ahlfors at a different medical center. The results of the 2 studies were quite satisfactory for the 51 samples (combined r=0.91, s=2.1 millimoles bilirubin). The results are particularly useful because these data compare the performance of the AVIV–NBHS in determining saturation index with the conventional peroxidase-oxidation method of determining unbound bilirubin levels at two different medical centers.

In summary, the data from R. Wells et al., Cashore et al., and Ahlfors show that, in comparing the total blood bilirubin assay of the AVIV–NBHS to the conventional diazo assay for plasma total bilirubin, the AVIV–NBHS is operationally comparable to the Bell Laboratories' Bilirubin Hematofluorometer prototype system. Further, the accuracies of assays by hematofluorometry with both instrument systems are comparable to those of other established chemical determinations of total bilirubin.

Precision

The petitioners demonstrated the precision (reproducibility) of the devices as an integral part of the various studies discussed under "Accuracy." Information on precision was provided in the form of the conventional statistical term "coefficient of variation (C.V.)," expressed as a percentage. (The

VOL 51 ISS 81 AP 28 1986 UMI

coefficient of variation (C.V.)," expressed as a percentage. (The coefficient of variation is a measure of the dispersion of a group of values around an average; the smaller the coefficient of variation, the more precise is the analytical system.)

ABBAS Analyzer

Cashore et al. (Ref. 3a) assessed the precision of the Bell Laboratories' Bilirubin Hematofluorometer prototype system by calculating the coefficients of variation for three to seven repeated determinations on each of 35 blood samples assayed by the device. These authors reported the C.V.'s for determination of total bilirubin, bound bilirubin, reserve bilirubin-binding capacity, and total binding capacity (taken as the sum of the readouts for bound bilirubin and reserve bilirubin-binding capacity to be 8.4, 9.4, 12.6, and 6.5 percent respectively.

The apparent large C.V. for reserve bilirubin-binding capacity is attributable mainly to the fact that the Bell Laboratories Bilirubin Hematofluorometer prototype system displays reserve bilirubin-binding capacity to the nearest 1 mg/dL with 1 mg/dL digital precision. In addition, the value for reserve bilirubin-binding capacity is derived from measurements on two drops of blood and includes the variations in both drops. The observed 12.6 percent C.V. corresponds to a 1 mg/dL precision in the reserve bilirubin-binding capacity when the value is 8 mg/dL. Cashore et al. reported that the instrumental variations alone are smaller than the C.V.'s determined in their clinical setting—slightly less than 1 percent based on repeated measurements of a stable fluorescent standard.

R. Wells et al. (Ref. 3c) using the Bell Laboratories' Bilirubin Hematofluorometer prototype system determined the C.V. values for a series of 32 blood samples with albumin concentrations which ranged from 16 to 40 g/L, unconjugated bilirubin concentrations from 7 to 360 mg/L, and hematocrit concentrations from 39 to 44 percent. The samples were assayed for total bilirubin, bound bilirubin, and reserve bilirubin-binding capacity. The assays were run in duplicate and were averaged. These authors reported the C.V.'s for each of the parameters to be 5.4 percent, 4.2 percent, and 8.4 percent, respectively. The instrument variation was 0.8 percent, which indicated a very stable instrument.

In unpublished studies submitted with the petition, Faranoff and the petitioner compared the precision of the ABBAS Analyzer and the Bell Laboratories' Bilirubin Hematofluorometer prototype system using five artificially elevated whole blood bilirubin standards with constant bilirubin concentration (10 mg/dL) and varied hematocrits (30, 40, 50, 60, 70 percent). The following values were obtained:

	ABBAS analyzer (Percent)	Bell system (Percent)
Total blood bilirubin	10 C.V.	15 C.V.
Reserve binding capacity	15 C.V.	14 C.V.
Albumin-bound bilirubin	11 C.V.	10 C.V.

The petitioner also assessed the precision of the ABBAS Analyzer using either artificially elevated bilirubin whole blood or the ABBAS Bilirubin Reagent to evaluate the performance characteristics of the system. With-in run C.V.'s were less than 3 percent for total bilirubin and for bound bilirubin, and less than 7 percent for reserve bilirubin-binding capacity. Run-to-run C.V.'s were less than 5 percent for total bilirubin and for bound bilirubin, and less than 13 percent for reserve bilirubin-binding capacity.

In summary, the results of these precision studies show that the ABBAS Analyzer and the Bell Laboratories' Bilirubin Hematofluorometer prototype system are comparably precise (reproducible). Further, the precision results encompass additional data on the accuracy as compared with conventional assay methods. Thus, it is demonstrated that the two hematofluorometer systems are operationally equivalent both in reproducibility and in accuracy.

AVIV–NBHS

The precision of the Bell Laboratories' Bilirubin Hematofluorometer prototype system for quantitating T, B, R, and SI as determined by Wells et al. (Ref. 1f) was quite similar to that of the AVIV–NBHS as determined by Ahlfors in that author's unpublished study submitted with the petition. Therefore, it is convenient to report the statistical summaries of the C.V. values of both studies as follows:

Analytical system	Percent C.V.		
	T	B	R
AVIV–NBHS (Ahlfors data)	2.3	5.7	4.8
Bell prototype (Wells data)	4.2	5.4	8.4

The petitioner submitted additional unpublished precision data on the AVIV–NBHS. In a study involving duplicate determinations on each of 25 samples, Banagale obtained a C.V. of 5.2 percent for reserve binding capacity. This compares favorably with the C.V. of 4.8 percent for reserve binding capacity obtained by Ahlfors (see table above). These precision studies showed that the AVIV–NBHS and the Bell Laboratories' Bilirubin Hematofluorometer prototype system are comparably precise. Further, the precision results encompass additional data on the accuracy as compared with conventional assay methods. Thus, it is demonstrated that the two systems are operationally equivalent both in reproducibility and in accuracy.

The petitioner also reported on two evaluations of the precision of the AVIV–NBHS alone (independent of the disposable reagent components). In the first evaluation, the uranium-glass "checker-slide" supplied with the device showed a C.V. of 0.6 percent, a variation which indicates a very stable instrument. In the second evaluation, instrument C.V. was determined by multiple determinations of the fluorescence intensity associated with a stable solution. Two experiments of 100 runs each yielded C.V.'s of 2.3 percent on each run, an acceptable value.

Specificity

Two circumstances are known to cause erroneous bilirubin measurements by the ABBAS Analyzer and by the AVIV–NBHS.

First, about 10 percent of the circulating bilirubin in infants undergoing phototherapy may be in a chemically altered form that does not fluoresce when bound to albumin. Thus, albumin-bound bilirubin in specimens of blood from infants undergoing phototherapy may be underestimated by as much as 10 percent (Ref. 3j). This underestimate of albumin-bound bilirubin, however, is considered to be clinically insignificant (Ref. 3j). The total blood bilirubin is not affected by phototherapy.

Second, the ABBAS Analyzer and the AVIV–NBHS cannot differentiate between conjugated and unconjugated serum bilirubin. The devices are calibrated for unconjugated bilirubin. The relative fluorescence of conjugated and unconjugated bilirubin is such that the devices will read about 2.5 mg/dL for every 1 mg/dL of directly reacting bilirubin in the blood specimen. Thus, both devices err conservatively in that both give a consistently high reading of bilirubin concentrations. The direct reacting bilirubin levels have to be checked by a conventional assay method if there is any suspicion that conjugated bilirubin might be present in the blood specimen.

The petitioners also addressed the possible effects of drugs and intravenous nutritional therapy on the specificity of the devices. Helena Laboratories concluded that those drugs that are commonly administered to neonates and that contain a colored substance which may potentially interfere with the results are: ampicillin, gentamicin, phenobarbitol, indomethacin, and riboflavin. Helena Laboratories includes in the labeling for the ABBAS Analyzer cautions that some drugs, e.g., sulfonamides, and some fatty acids, e.g., intralipids, may affect the assay.

AVIV Biomedical, Inc., provided a detailed literature review of the known effects of drugs administered to neonates upon the results of assays performed with the AVIV–NBHS (Ref. 2). AVIV Biomedical, Inc., concluded from its review of the literature that the only substance administered to infants that is known to interfere with hematofluorometer assays for bilirubin is riboflavin and the interference observed is clinically insignificant. Drugs or metabolites that are not colored are not expected to cause interference. The most common drugs given to infants have been tested for interference with hematofluorometer assays and found not to interfere. Only extremely rare disease states give rise to fluorescent substances in blood other than bilirubin. AVIV Biomedical, Inc., includes in the labeling of the AVIV–NBHS pertinent portions of this literature review.

The specificity of the ABBAS Analyzer and the AVIV–NBHS measurements is shown to be adequate for their assays for unconjugated bilirubin and the status of the binding of bilirubin to plasma albumin in specimens of whole blood of neonates. The circumstances known to cause errors in hematofluorometry readings can be described and discussed in the device products' labeling.

Sensitivity

As discussed under the section of this notice titled "Introduction," accurate measurement of elevated levels of albumin-bound bilirubin and of the reserve binding capacity of albumin is necessary for the information to be useful in the clinical management of the jaundiced neonate. Thus, in evaluating the sensitivity of the ABBAS Analyzer and the AVIV–NBHS, it is more important that the devices measure elevated rather than low values of T, B, R, and SI. Accordingly, the petitioners designed and evaluated the devices based on the use of the devices in the management of neonates with hyperbilirubinemia, with the most stringent performance specifications centering on pathologic (high) values, rather than normal (low) values. The devices are adequately sensitive for the patients for whom they are intended.

Clinical Utility

In addition to other data and information, the petitioners provided a recent report by Lamola and Faranoff entitled, "Bilirubin Fluorescence and Prevention of Kernicterus" (Ref. 1g and 3k). Lamola and Faranoff present a useful summary of the clinical utility of the hematofluorometer saturation index as an indicator of the risk of kernicterus. Lamola and Faranoff conclude that if a hematofluorometer saturation index of 7.25 is taken as an "action threshold" for exchange transfusion, there is excellent clinical "specificity" as well as clinical "sensitivity," when hematofluorometry is compared against the treatment categories devised by Maisels for the clinical management of jaundiced neonates. Maisels' clinical scheme takes into consideration all accepted risk-modifying factors for kernicterus.

For the purpose of their study, Lamola and Faranoff defined specificity as the number of patients who do not require therapy based on the SI values for those patients as provided by a hematofluorometer, divided by the number of patients who do not require therapy when assessed by Maisels' protocol. These authors defined sensitivity as the number of patients who require therapy based on the SI value, divided by the number of patients who require therapy when assessed by Maisels' protocol. In the patients reported by Lamola and Faranoff, the clinical specificity of the technique of hemafluorometry was 0.95 (113/119); clinical sensitivity was 0.93 (13/14).

The paper emphasizes that both Maisels' protocol and the hematofluorometer saturation index must be used to contribute information to the clinician's decision process for the clinical management of jaundiced neonates.

Risks To Health

The Panel noted that failure of the device to perform its intended use may contribute to the risk of improper diagnosis of neonatal jaundice or improper treatmemt of newborn infants with unconjugated hyperbilirubinemia. The Panel noted further that if untreated, unconjugated hyperbilirubinemia may lead to neurologic damage in the infant due to kernicterus (bilirubin encephalopathy).

Additional Findings

The Panel recommended that for the ABBAS Analyzer or the AVIV–NBHS to be reclassified from class III into class I, the disposable assay reagents should be augmented to include with each device a blood-based quality control product for convenience in quality control of the entire protocol.

The Panel recommended further that each device's labeling should be revised and supplemented as follows:

(1) The labeling should include a clear statement concerning the difference in interpretation that is to be given to the instrument values for "bound bilirubin" and for "total minus bound bilirubin" for blood specimens obtained from newborn infants undergoing phototherapy for hyperbilirubinemia.

(2) The labeling should note the need for a separate determination of conjugated bilirubin by conventional assay methods.

(3) The labeling should include a discussion of the possible effects of drugs administered to neonates upon the accuracy of the results of assays performed with the device.

(4) The labeling should note that the hematofluorometry technique as employed by the device is restricted to neonatal blood samples.

(5) The labeling should include an adequate trouble-shooting protocol.

(6) The labeling should include typical precision data for each parameter measured by the device.

(7) The labeling should state that the analytical values obtained with the device are not to be considered necessarily interchangeable with values obtained by any other hematofluorometer device.

(8) The labeling should state that duplicate blood assays are recommended, when possible.

(9) The labeling should state that the results obtained with the device are not to be the sole factor in the clinician's decisions regarding diagnosis and treatment of neonatal jaundice.

(10) The labeling should instruct the operator to use a "check slide" or similar device to ensure that the system is functioning at a constant light intensity each time the unit is turned on. The labeling should also state that failure to perform such a check could lead to serious errors in the estimation of bilirubin concentration and/or binding capacity.

In accordance with 21 CFR 860.95, the Panel also recommended that the devices should not be exempted from the provisions of section 510 (registration, product listing, and premarket notification), 519 (records and reports on devices), or 520(f) (good manufacturing practice requirements) of the act (21 U.S.C. 360, 360i, 360j(f)).

VOL 51 ISS 81 AP 28 1986 UMI

FDA's Tentative Findings

FDA believes that the data provided by the petitioners are valid scientific evidence and show that class I (general controls is sufficient to provide reasonable assurance of the safety and effectiveness of the devices.
Accordingly, FDA tentatively agrees with the recommendation of the Panel that the generic type of device "total and unbound bilirubin in the neonate test system" be reclassified from class III into class I. Further, FDA tentatively agrees that the device should be identified as a test system for the quantitation of total and unbound bilirubin in the blood (serum) of newborn infants to aid in indicating the risk of bilirubin encephalopathy (kernicterus).

After considering the economic consequences of approving this reclassification, FDA certifies that this notice requires neither a regulatory impact analysis, as specified in Executive Order 12291, nor a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96–354). Approval of these petitions would not have significant economic impact on a substantial number of small entities. The petitioners, and all future manufacturers of the device, "total and unbound bilirubin in neonate test system," would be relieved of the costs of complying with the premarket approval requirements in section 515 of the act (21 U.S.C. 360e). There are no off-setting costs that the petitioner would incur from reclassification into class I.

The magnitude of the economic savings from approval of these petitions depends on the extent of premarket approval studies the petitioners would have conducted and the number of future competitors satisfying the same requirements. Neither of these parameters can be reliably calculated to permit quantification of the economic savings. Because of statutory deadlines (section 513(f)(2) of the act) and requirements in the regulations (21 CFR 860.134(b)(5)), FDA is required to publish this notice in the Federal Register as soon as practicable. As authorized by section 8(a)(2) of Executive Order 12291, FDA is publishing in the Federal Register this notice without clearance of the Director, Office of Management and Budget. As soon as practicable, FDA will notify that office of the publication of this notice.

Interested persons may, on or before May 28, 1986, submit to the Dockets Management Branch (address above) written comments on the Panel's recommendation or FDA's tentative findings. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the name of the device and the docket numbers found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 28, 1986.

M.D. Kinslow,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 86M–0132]

University Optical Products, Co.; Premarket Approval of the ALGES™ (Hefilcon A) Bifocal Contact Lens

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the supplemental application by University Optical Products Co., Largo, FL, for premarket approval, under the Medical Device Amendments of 1976, of the spherical ALGES™ (hefilcon A) Bifocal Contact Lens. After reviewing the recommendation of the Ophthalmic Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant of the approval of the application.

DATE: Petitions for administrative review by May 28, 1986.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: David M. Whipple, Center for Devices and Radiological Health (HFZ–460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301–427–7940.

SUPPLEMENTARY INFORMATION: On August 13, 1985, University Optical Products Co., Largo, FL 33543, submitted to CDRH a supplemetal application for premarket approval of the ALGES™ (hefilcon A) Bifocal Contact Lens. The ALGES™ (hefilcon A) Bifocal Contact Lens is intended for daily wear for the correction of visual acuity in not-aphakic persons with nondiseased eyes that are myopic presbyopic or hyperopic presbyopic. The lens may be worn by persons who exhibit corneal astigmatism of 2.00 diopters (D) or less that does not interfere with visual aucity. The lens ranges in powers from −10.00 D to +10.00 D with add powers ranging from 1.00 D to 5.00 D. The lens is to be disinfected using either a heat or chemical lens care system.

On January 24, 1986, the Ophthalmic Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On February 28, 1986, CDRH approved the application by a letter to the applicant from the Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact David M. Whipple (HFZ–460), address above.

The labeling of the approved ALGES ™ (hefilcon A) Bifocal Contact Lens states that the lens is to be used only with certain solutions for disinfection and others purposes. The restrictive labeling informs new users that they must avoid using certain products, such as solutions intended for use with hard contact lenses only. The restrictive labeling needs to be updated periodically, however, to refer to new lens solutions that CDRH approves for use with approved contact lenses made of polymers other than polymethylmethacrylate, to comply with the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 301 et seq.), and regulations thereunder, and with the Federal Trade Commission Act (15 U.S.C. 41–58), as amended. Accordingly, whenever CDRH publishes a notice in the Federal Register of approval of a new solution for use with an approved lens, the contact lens manufacturer of PMA holder shall correct its labeling to refer to the new solution at the next printing or at any other time CDRH prescribes by letter to the applicant.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the Federal Register. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before May 28, 1986, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554–555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: April 20, 1986.

John C. Villforth,

Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

Health Care Financing Administration

Medicaid Program; Hearing: Reconsideration of Disapproval of an Alaska State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on May 27, 1986 in Seattle, Washington to reconsider our decision to disapprove Alaska State Plan Amendment 84–6.

Closing Date: Requests to participate in the hearing as a party must be received by the Docket Clerk May 13, 1986.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Hearing Staff, Bureau of Eligibility, Reimbursement and Coverage, 365 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 594–8261.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove an Alaska State Plan Amendment.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid Agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins in accordance with the requirements contained in 45 CFR 213.15(c)(1)

VOL 51 ISS 81 AP 28 1986 UMI

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter is whether Alaska State Plan Amendment 84–6 which provides for disregarding, for purposes of Medicaid eligibility determinations, Alaska Longevity Bonus payments received by applicants and recipients who qualify for these payments on the basis of having less than 25 years continuous residency in the State, violates sections 1902(a)(10)(A)(ii), 1905(j) and 1616(c) of the Social Security Act, Federal regulations at 42 CFR 435.230, 435.231, 435.722 and 20 CFR 416.2025(c) and section 4–30–10B.2.e. of the Medical Assistance Manual.

Section 1902(a)(10)A)(ii) of the Act permits States, at their option, to provide Medicaid to individuals who are receiving State supplementary payments and to institutionalized individuals who are eligible under a special income level. Sections 1905(j) and 1616 of the Act further define State supplementary payments for purposes of title XIX and title XVI. Although the Medicaid statute (section 1905(j)) defines "State supplementary payment" without reference to the issue of disregards, the SSI statute (section 1616(c) provides that—

". . . any State . . . making supplementary payments . . . may disregard *amounts* of earned and unearned income in addition to other amounts which it is required or permitted to disregard under this section in determining such eligibility, and shall include a provision specifying the amount of any such income that will be disregarded." (Emphasis supplied.)

The preamble language to the final rule at 20 CFR 416.2025 (implementing section 1616(c) of the Act) made clear that, *in accordance with the Act*, States may provide for additional amounts of income in determining the amount of the supplementation payable, and not vary the exclusion based on the type (or source) of income.

The Social Security Act only permits the disregards for State supplementary payments to be greater in amount than those of the SSI program but does not permit them to vary by type or source of income. Therefore, HCFA has determined the Alaska State Plan Amendment violates sections 1902(a)(10)(A)(ii), 1905(j), 1616(c) of the Social Security Act and implementing regulations at 42 CFR 435.231, 435.722 and 20 CFR 416.2025(c). In addition, although the SSI regulation applies only to Federally administered State supplementary payments, in the context of the Medicaid program, the financial requirements of the State supplementary payments found in section 1616(c) of the Act also apply for purposes of qualifying for Medicaid. Section 1902(a)(17) of the Act requires that comparable standards be used to determine Medicaid eligibility for all groups of recipients. It would be inconsistent with section 1902(a)(17) to allow States to define income disregards differently based solely on Federal vs. State administration of the supplement programs.

Section 4–30–10B.2.e. of the Medical Assistance Mannual (published on June 29, 1976) provides that any more liberal disregards used in determining eligibility for State supplementary payment recipients must be applied as a set dollar amount or across-the-board percentage to be deducted from income of all persons who apply for the supplement. This instruction goes further to state that more liberal disregards may not be applied only to certain types of income (such as earned income, unearned income, increased income from Social Security, etc.).

For institutionalized individuals eligible under a special income test the SSI deductions or greater deductions may be used to determine eligibility, but any greater deductions are subject to the limitations described above. Therefore, HCFA has determined Alaska State Plan Amendment 84–6 violates section 4–30–10–B.2.e of the Medical Assistance Manual.

The notice to Alaska announcing an administrative hearing to reconsider our disapproval of its State plan amendment reads as follows:

Mr. John R. Pugh, Commissioner, State of Alaska
Department of Health and Rehabilitative Services, Pouch H01, Juneau, Alaska 99811.

Dear Mr. Pugh: This is to advise you that your request for reconsideration of the decision to disapprove Alaska State Plan Amendment 84–6 was received on March 28, 1986. This amendment would provide for disregarding, for purposes of Medicaid eligibility determinations, Alaska Longevity Bonus payments received by applicants and recipients who qualify for these payments on the basis of having less than 25 years continuous residency in the State.

You have requested reconsideration of whether these plan amendments conform to the requirements for approval under title XIX of the Social Security Act. The issue in this matter is whether Alaska's proposed plan violates section 1902(a)(10)(A)(ii), 1905(j), and 1616(c) of the Social Security Act implemented through regulations at 42 CFR 435.230, 435.231, 435.722 and 20 CFR 416.2025(c) and section 4–30–10 B.2.e. of the Medical Assistance Manual.

I am scheduling a hearing on your request to be held on May 27, 1986 at 10 a.m., in the Room 470–472, 2901 Third Avenue, Seattle, Washington. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Lawrence Ageloff as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication that may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (301) 504–8261.

Sincerely yours,
Henry R. Desmarais, M.D.,
Acting Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program)

Dated: April 22, 1986.

Henry R. Desmarais,
Acting Administrator, Health Care Financing Administration.

BILLING CODE 4120–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–86–1606]

Privacy Act of 1974; Proposed Amendment to a System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notification of a proposed amendment to an existing system of records.

SUMMARY: The Department is giving notice that it intends to amend the following Privacy Act system of records: HUD/DEPT–34, Pay and Leave Records of Employees.

EFFECTIVE DATE: This amendment shall become effective without further notice in 30 calendar days (May 28, 1986) unless comments are received on or before that date which would result in a contrary determination.

ADDRESS: Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, Southwest, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Arthur L. Stokes, Departmental Privacy Act Officer, Telephone (202) 755–6374. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Federal legislation, 42 U.S.C. 654–666, encourages States to insure the reciprocal enforcement of child and spousal support obligations. In anticipation of an increase in the number of requests for information contained in HUD/DEPT–34, this amendment adds a routine use which would expedite the release of information to Federal, State, and local Agencies responsible for the enforcement of child and spousal support obligations. The amended portion of the system notice is set forth below. Previously, the system and a prefatory statement containing the general Routine Uses applicable to most of the Department's systems of records were published in the "Federal Register Privacy Act Issuances, 1984 Compilation, Volume II." A report of the Department's intention to amend this system was filed with the Speaker of the House, the President of the Senate, and the Office of Management and Budget on February 25, 1986.

Authority: 5 U.S.C. 552a, 88 Stat. 1986; sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).

Issued at Washington, DC, April 10, 1986.

Judith L. Tardy,
Assistant Secretary for Administration.

HUD/DEPT–34

SYSTEM NAME:

Pay and Leave Records of Employees.

* * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

See Routine Uses paragraphs in prefatory statement. Other routine uses: Transmittal of data to U.S. Treasury to effect issuance of paychecks to employees and distribution of pay according to employee directions for savings bonds, allotments, financial institutions, and other authorized purposes. Annual reporting of W–2 statements to Internal Revenue Service, Social Security Administration, the individual, and taxing authorities of States, the District of Columbia, territories, possessions, and local governments, except social security numbers will be reported only to such authorities that have satisfied the requirements set forth in section 7(a)(2)(B) of the Privacy Act of 1974. To the Office of Personnel Management for matters concerned with pay, benefits, retirement deductions, and other information necessary for the Office to carry on its Government-wide personnel functions; to GAO—for audit and to resolve employee appeals on pay/leave decisions; to other Federal government agencies—to facilitate employee transfers; to State agencies—to verify workmen's compensation injury claims; time and attendance data to contractor for scanning, keying, producing error lists, and producing input media; to other Federal agencies for the purpose of collection debts owed to the Federal Government by administrator or salary offset; to Federal, State, and local agencies to assist in the enforcement of child and spousal support obligations.

[Docket No. N–86–1605]

Submission of Proposed Information Collections OMB

AGENCY: Office of Administration, HUD.

ACTION: Notices.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ACTION: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Fishman, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Reports Management Officer, Department of Housing and Urban Development, 481 7th Street SW., Washington, DC 20410, telephone (202) 755–6050. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notices list the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposals should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Title I Financial Statement

Office: Housing
Form Number: HUD–56142
Frequency of Submission: On occasion
Affected Public: Individuals or Households
Estimated burden hours: 575
Status: Extension
Contact: Patricia D. Schader, HUD, (202) 755–6857, Robert Fishman, OMB, (202) 395–6880

Dated: April 17, 1986.

Proposal: General Conditions

Office: Public and Indian Housing
Form number: HUD–5370
Frequency of Submission: On Occasion
Affected Public: State or Local Governments and Non-Profit Institutions
Estimated Burden Hours: 619
Status: New
Contat: Raymond W. Hamilton, HUD, (202) 426–0938, Robert Fishman, OMB, (202) 395–6880

Dated: April 17, 1986.

Proposal: Request for Refund of One Time Mortgage Insurance Premium (OTMIP)

Office: Administration
Form Number: HUD–27034
Frequency of Submission: On Occasion
Affected Public: Individuals or Households and Small Businesses or Organization
Estimated Burden Hours: 12,000
Status: New
Contact: Robert Wiggins, HUD, (202) 426–8980, Robert Fishman, OMB, (202) 395–6880

Dated: April 17, 1986.

Proposal: Housing Development Grant Application

Office: Housing
Form Number: HUD–90031
Frequency of Submission: On Occasion
Affected Public: State or Local Governments
Estimated Burden Hours: 16,400
Status: Reinstatement
Contact: Jessica Franklin, HUD (202) 755–6142, Robert Fishman, OMB, (202) 395–6880

VOL 51 ISS 81 AP 28 1986

Dated: April 17, 1986.

Proposal: Rental Rehabilitation Program Evaluation

[Docket No. D-86-817; FR-2233]

Amendment of Delegation of Procurement Authority to the Field

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Amendment of delegation of procurement authority to the Field.

SUMMARY: The Designations and Redelegations of Authority published in the **Federal Register** on January 19, 1976 (41 FR 2666), and amended on October 28, 1976 (41 FR 47279); October 16, 1979 (44 FR 59671); November 4, 1980 (45 FR 73141); and May 16, 1984 (49 Fr 20760); are further amended by revising the delegation of procurement authority to the Field to impose restrictions on the purchase of certain equipment and related software, unless prior approval has been received from the Office of Information Policies and Systems. The restrictions are required to standardize such equipment and software throughout the Department.

EFFECTIVE DATE: April 18, 1986.

FOR FURTHER INFORMATION CONTACT: Roosevelt Jones, Director, Office of Procurement and Contracts, Room 5260, 451 Seventh Street, SW., Washington, DC 20410, (202) 755-5290. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On May 16, 1984 (49 FR 20760), the Department published in the **Federal Register** a Redelegation of Contracting Authority that amended Sections C and D of the Designations and Redelegations of Authority published January 19, 1976 (41 FR 2666), and amended October 28, 1976 (41 FR 47279); October 16, 1979 (44 FR 59671); and November 4, 1980 (45 FR 73141). The purpose of this delegation is to expand the last paragraph of Section C to reflect restrictions imposed on the Field for the purchases of microcomputer and word processing equipment and related software, unless prior approval has been received from the Office of Information Policies and Systems. The restrictions are required in order to standardize such equipment and software throughout the Department.

Accordingly, the last paragraph of Section C of the Designation and Redelegation of Authority published May 16, 1984 (49 FR 20760), is revised to read as follows:

The Authority in this section C does not apply to purchases and contracts for the Acquire Property Program of the Office of Housing, as defined by HUDAR 2401.601-71, nor does it apply to the acquisition (purchase, lease, or rental) of microcomputer equipment, related software, or wood processing equipment, unless prior approval has been received from the Office of Information Policies and Systems (OIPS). Acquisition (purchase, lease, or rental) of such equipment and software, as part of training or other support provided by a contractor, is also prohibited without the prior approval of OIPS.

Authority: Delegation of Authority to Assistant Secretary for Administration, January 19, 1976 (41 FR 2666).

Dated: April 18, 1986.

Judith L. Tardy,
Assistant Secretary for Administration.

DEPARTMENT OF THE INTERIOR

National Strategic Materials and Minerals Program Advisory Committee; Renewal

Pursuant to Pub. L. 92-463, notice is hereby given of the renewal of the National Strategic Materials and Minerals Program Advisory Committee. Following consultation with the General Services Administration, the Secretary is renewing the Advisory Committee to advise the Secretary of the Interior with respect to his responsibilities for strategic materials and minerals issues.

Further information regarding the National Strategic Materials and Minerals Program Advisory Committee may be obtained from Gully Walter, Executive Director, Room 6950, U.S. Department of the Interior, 18th and C Streets, NW., Washington, DC 20240; (202) 343-2136.

The certification of renewal is published below.

Certification

I hereby certify that the renewal of the National Strategic Materials and Minerals Program Advisory Committee is necessary and in the public interest in connection with performance of duties imposed on the Department of the Interior by those statutory authorities listed in the Federal Land Policy and Management Act, the Mining and Minerals Policy Act of 1970, the National Materials and Minerals Policy Research and Development Act of 1980, the Defense Production Act of 1950, as amended, and the organic legislation of the Department and the several bureaus and agencies thereof.

Donald Paul Hodel,
Secretary of the Interior.

BILLING CODE 4310-10-M

Bureau of Land Management

Salem District Advisory Council; Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that a meeting of the Salem District Advisory Council will be held May 20, 1986, at 1:30 p.m. at the BLM District Office, 1717 Fabry Road SE., Salem, Oregon.

Agenda for the meeting will include:

1-Election of officers.
2-Table Rock Wilderness Management Plan-Information-follow-up.
3-Walker Creek Water Supply Project proposal-Information.
4-Grand Ronde Indian Reservation proposal-Information.
5-Yaquina Head Outstanding Natural Area Management Plan-Information.

The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager at the Salem District Office, 1717 Fabry Road SE., Salem, Oregon, 97302, by May 16, 1986. Written comments will also be received for the council's consideration. Summary minutes will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Dated: April 18, 1986.

Edward S. Lewis III,
District Manager.

Fish and Wildlife Service

Comprehensive Conservation Plan/ Environmental Statements; Arctic National Wildlife Refuge, AK; Correction

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Intent to Prepare a Comprehensive Conservation Plan/ Environmental Impact Statement, and Wilderness Suitability Assessment for the Arctic National Wildlife Refuge, Alaska, as well as Boundary Descriptions for the Management of the Ivishak, Wind, and Sheenjek Wild and Scenic Rivers; correction.

SUMMARY: This document corrects a notice of intent that appeared on page 5109 in the **Federal Register** of February 11, 1986, (51 FR 5109). This action is necessary to correct the date by which comments to the scoping process should be submitted.

FOR FURTHER INFORMATION CONTACT: Consuelo K. Wassink, Public Involvement Specialist, Refuge Planning, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503; telephone (907) 786-3496.

Text: The following correction is made in FR Doc. 86-28 appearing on page 5109:

On page 5109, column two, first paragraph, first sentence, "**DATES,**" is corrected to read "Formal, written comments should be received by June 15, 1986."

Dated: April 16, 1986.

Robert D. Jacobsen,
Acting Regional Director.

BILLING CODE 4310-55-M

Minerals Management Service

Request for Supplemental Information; Navarin Basin; Sale 107 (March 1988)

Purpose of Request

The Navarin Basin Outer Continental Shelf (OCS) Oil and Gas Lease Sale 107 tentatively planned for March 1988 is being reviewed to determine if the current level of industry interest warrants continuing with the presale process. The oil and gas industry is asked to assist in this process by providing up-to-date information on its interests in leasing and exploring within the proposed sale area. The Regional Director, Alaska OCS Region, Minerals Management Service, P.O. Box 101159, Anchorage, Alaska, 99510 (907 261-4010) will receive information on areas of interest by mail, telephone, or informal meeting. As part of this effort, the Regional Director may make direct telephone contact with companies which respond in writing.

Use of Information from Request

Responses will help to determine if and when a draft and final Environmental Impact Statement (EIS) and proposed and final Notices of Sale will be issued or if Sale 107 should be cancelled or deferred for consideration in a future 5-year schedule.

Description of the Area

The Navarin Basin Planning Area extends southwest from the juncture of approximately 63° N latitude at the U.S.-Russia Convention Line along that line to 180° longitude thence south to approximately 58° N latitude thence east to 174° W longitude thence north to approximately 63° N latitude thence west to the point of origin.

Previous Sale Activities

Sale 83 in April 1984 was the first Federal sale in this area. Of 5,036 blocks offered, 186 received bids, and 163 leases were issued with a primary term of 10 years, effective June 1, 1984. An additional 17 leases are being held in abeyance pending resolution of jurisdictional differences over the international boundary between the United States and the Soviet Union. The disputed area is the result of a United States claim of exclusive maritime resource jurisdiction over the area offered while the Soviet Union claims part of the area as well. The claims relate to differing depictions of the maritime boundary line established by the 1867 Convention between the United States and Russia that ceded Alaska to the United States. The United States describes the 1867 Convention Line by areas of great circles while the Soviet Union depicts it with rhumb lines.

Summary of Comments Received From the Call for Information

The Call for Information for Sale 107 was published in the **Federal Register** at 49 FR 17686 on April 24, 1984. The Call included 5,051 blocks (approximately 28.1 million acres) in the Navarin Basin Planning Area. The area lies from about 30 miles offshore of St. Matthew Island to about 280 miles offshore of the Yukon Delta in water depths from 230 feet to 9,200 feet.

Nine companies submitted nominations. One company expressed interest in the entire Call area. Three companies commented on the Call. Each requested a 10-year lease term. One stated preference for a fixed royalty

VOL 51 ISS 81 AP 28 1986 UMI

rate; another recommended a cash bonus of $189 per acre and a 12½ percent royalty. One indicated a preference for the standard 2,304 hectare block. Comments were also received from the State of Alaska, the National Oceanic and Atmospheric Administration (NOAA), the Whale Center of Oakland, California, the U.S. Fish and Wildlife Service, and the National Park Service. The State of Alaska requested that the size of the proposed sale area should be reduced to include only areas of high-to-moderate industry interest. the NOAA expressed concern for the marine mammals around St. Matthew and St. Lawrence Islands, particularly for bowhead whale overwintering areas and summer protection for the right whale.

On July 27, 1984, the Department of the Interior announced that the area to be analyzed in the EIS process included the entire Call area. This area covers approximately 28.1 million acres consisting of 5,051 blocks.

Instructions to Request for Supplemental Information

Information on industry interest may be provided by mail or telephone to the Regional Director at the address and telephone number stated in the first paragraph. Alternatively, companies are invited to meet with the Regional Director or his representative to personally convey specific information. Although individual indications of interest are considered privileged and proprietary information, the names of firms or persons submitting indications of interest will be a matter of public record.

Comments on this matter should be received within 45 days following publication of this request. It will be appreciated if envelopes containing responses to this request are marked "Request for Supplemental Information on Proposed Lease Sale 107."

Dated: April 21, 1986.

Wm. D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 4310-MR-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30813]

Norfolk and Western Railway Company; Trackage Rights; Consolidated Rail Corporation; Exemption

Consolidated Rail Corporation (Conrail) has agreed to grant overhead trackage rights to the Norfolk and Western Railway Company (NW) between NW's connection with Conrail at milepost 8.3, Delray Interlocking, and the west end of Conrail's Detroit River Tunnel Tracks, where they connect with tracks jointly owned by the Canadian National Railway Company and the Canadian Pacific Limited, a distance of 3.26 miles in Detroit, MI. The trackage rights were effective on April 15, 1986.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

As a condition to use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry. Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: April 22, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7 notice is hereby given that on April 15, 1986, a proposed consent decree in *United States* v. *Hess Mechanical Corporation and Ring Associates*, Civil Action No. 86-0129, was lodged with the United States District Court for the District of Columbia. The complaint filed by the United States alleged violations of the Clean Air Act and the National Emission Standards for Hazardous Air Pollutants (NESHAP) for asbestos. Specifically, the complaint alleged that the defendants failed to comply with the asbestos NESHAP during the removal of asbestos from a Ring Associates-owned building located at 1200 Eighteenth Street, NW., Washington, DC. The complaint sought injunctive relief to require the defendants to comply with the Clean Air Act and the NESHAP for asbestos and civil penalties for violations. The decree requires defendants to comply with the Clean Air Act and the NESHAP for asbestos in the future and imposes a $10,000 civil penalty for past violations of the Act and regulations.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC. 20530, and should refer to *United States* v. *Hess Mechanical Corporation and Ring Associates*, Department of Justice Reference #90-5-2-1-894.

Copies of the proposed consent decree may be examined at the following locations: Office of the United States Attorney, United States Courthouse, 3rd & Constitution Avenue, NW. Washington, DC 20001; the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1535, Ninth Street & Pennsylvania Ave., NW., Washington, DC 20530; and, Region III Office of the United States Environmental Protection Agency, 841 Chestnut Street, Philadelphia, Pa. 19107. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. When requesting a copy, please refer to *United States* v. *Hess Mechanical Corporation and Ring Associates*, Department of Justice Reference #90-5-2-1-894.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 86-9355 Filed 4-25-86; 8:45 am]

BILLING CODE 4410-01-M

Antitrust Division

Proposed Termination of Final Judgment; Toyota Motor Sales, U.S.A., Inc.

Notice is hereby given that Toyota Motor Sales, U.S.A., Inc. and its wholly-owned subsidiary, Toyota Motor Distributors, Inc., have filed with the United States District Court for the Northern District of California a motion to terminate the final judgment in *United States* v. *Toyota Motor Sales, U.S.A., Inc.*, Civil No. C-75-0473-SW; and the Department of Justice, in a stipulation also filed with the court, has consented to termination of the judgment, but has reserved the right to withdraw its consent for at least seventy (70) days after the publication of this notice. The complaint in this case (filed on March 12, 1975) alleged that the defendants had conspired to engage in resale price maintenance, and confine the sale of Toyota products by Toyota dealers to designated market areas. The judgment (entered on July 28, 1975) enjoined the defendants from engaging in resale price maintenance, or restricting the geographical areas in which or the people to whom Toyota dealers may sell or advertise Toyota products.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that termination of the judgment would serve the public interest. Copies of the complaint and final judgment, defendants' motion papers, the stipulation containing the Government's consent, the Department's memorandum, and all future papers filed with the court in connection with this motion will be available for inspection in the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, 10th Street and Pennsylvania Avenue, NW., Washington, DC 20530 (telephone 202-633-2418), and at the Office of the Clerk of the United States District Court for the Northern District of California, Federal Building, 450 Golden Gate Avenue, San Francisco, California 94102. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410-01-M

Immigration and Naturalization Service

Reimbursable Services; Excess Cost of Preclearance Operations

Notice is hereby given that pursuant to Immigration and Naturalization Service Regulations (8 CFR 235.5(c)), the biweekly reimbursable excess costs for each preclearance installation are determined as set forth below and will be effective with the pay period beginning April 27, 1986.

Installation	Biweekly excess cost
Montreal, Canada	$10,388.29
Toronto, Canada	15,845.84
Kindley Field, Bermuda	2,435.30
Freeport, Bahama Islands	9,857.28
Nassau, Bahama Islands	11,138.91
Calgary, Canada	3,992.12
Edmonton, Canada	3,837.13
Vancouver, Canada	8,091.77
Victoria, Canada	1,838.76
Winnipeg, Canada	2,082.64

These amounts will be in effect and billed biweekly until the first full pay period after the next notice of reimbursable biweekly excess costs is published in the Federal Register.

Dated: April 22, 1986.

Edwin J. Fost,

Deputy Comptroller.

BILLING CODE 4410-10-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-133]

Pacific Gas and Electric Co.; Availability of the Draft Environmental Statement for Decommissioning of Humboldt Bay Power Plant Unit No. 3

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Draft Environmental Statement (DES) (NUREG-1166) has been prepared by the Commission's Office of Nuclear Reactor Regulation related to the proposed decommissioning of the Humboldt Bay Power Plant Unit No. 3 in Humboldt County, California. The DES addresses the acquatic, terrestrial, radiological, social and economic impacts associated with decommissioning.

Copies of the DES are available for inspection by the public in the Commission's Public Document Room at 1717 H Street, NW. Washington, DC 20555, and at the Eureka-Humboldt County Library, 421 I Street (County Courthouse), Eureka, California. Upon written request to the Division of Technical Information and Document Control, Publication Services Section, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the extent available, since copies of the DES will be made available to interested persons without charge.

Interested persons may submit comments on this DES for the Commission's consideration. Federal, State, and specified local agencies are being provided with copies of the DES. Other local agencies may obtain these documents upon request.

Comments by Federal, State and local officials, or other members of the public received by the Commission will be made available for public inspection at the Commission's Public Document Room in Washington, DC and the Eureka-Humboldt County Library. Comments are due by June 16, 1986. After consideration of the comments submitted on the DES, the Commission's staff will prepare a Final Environmental Statement, the availability of which will be published in the Federal Register.

Comments on the DES from interested members of the public should be addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: John Philips, Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration, 4000 MNBB.

Dated at Bethesda, Maryland, this 23rd day of April, 1986.

For the Nuclear Regulatory Commission.

Herbert N. Berkow,

Director, Standardization and Special Projects Directorate, Division of PWR Licensing-B

BILLING CODE 7590-01-M

[Docket Nos. 50-338 and 50-339]

Virginia Electric and Power Co. et al.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 78 and 65 to Facility Operating License Nos. NFP-4 and NPF-7, issued to Virginia Electric and Power Company and Old Dominion Electric Cooperative (the licensee), which amended the Licenses for operation of the North Anna Power Station, Units 1 and 2 (the facility), located in Louisa County, Virginia. The amendments were effective as of the date of their issuance.

The amendments add a license condition to allow for receipt and storage of 500 spent fuel assemblies from the Surry Power Station, Unit Nos. 1 and 2.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Proposed Issuance of Amendments to Facility Operating Licenses in connection with this action was published in the Federal Register on September 22, 1982 (47 FR 41682).

Petitions to intervene were filed by Louisa County, Virginia and Board of Supervisors of Louisa County, Virginia, and by the Concerned Citizens of Louisa County, Virginia, dated October 22, 1982. By Order dated May 22, 1984, the Atomic Safety and Licensing Board

BEST COPY AVAILABLE

VOL 51 ISS 81 AP 28 1986

(ASLB) granted Louisa County's request to withdraw. By Order dated October 15, 1984, the ASLB admitted Concerned Citizens of Louisa County as a party to the proceeding. An evidentiary hearing was held May 21 and 22, 1985, in Charlottesville, Virginia. On September 3, 1985, the ASLB issued an Initial Decision which authorized the Director of Nuclear Reactor Regulation to amend the operating licenses for North Anna Units 1 and 2 to permit the receipt and storage of 500 spent fuel assemblies generated at Surry 1 and 2. On October 9, 1985, the Atomic Safety and Licensing Appeal Board (ASLAB) issued an order stating that it would be conducting its *sua sponte* review and that the Initial Decision of the ASLB would not be deemed final pending further order of the ASLAB. By Order dated November 1, 1985, the ASLAB, after *sua sponte* review, affirmed the ASLB decision of September 3, 1985. The ASLAB decision became final on December 11, 1985.

The Commission prepared an Environmental Assessment and Finding of No Significant Impact related to the action and concluded that an environmental impact statement is not warranted because there will be no environmental impact attributable to the action significantly beyond that which has been predicted and described in the Commission's Final Environmental Statement for the facility dated April 1973.

For further details with respect to the action see (1) the application for amendments dated July 13, 1982 as supplemented by letters dated October 21, 1982; June 16, July 19, July 25, September 13, October 28, November 10 and 23, and December 6, 1983; April 10, May 8, and May 16, 1984, (2) Amendment Nos. 76 and 65 to Facility Operating License Nos. NPF–4 and NPF–7, (3) the Commission's related Safety Evaluation issued July 2, 1984, and (4) the Environmental Assessment issued July 2, 1984. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing–A.

Dated at Bethesda, Maryland, this 21st day of April, 1986.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director PWR Project Directorate No. 2 Division of PWR Licensing–A.

BILLING CODE 7590–01–M

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review, the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission—new, revision, or extension: Extension
2. The title of the information collection: Reactor Operator and Senior Reactor Operator Licensing Training and Requalifications Programs
3. The form number if applicable: N/A
4. How often the collection is required: Semi-annually, annually and biennially
5. Who will be requred or asked to report: All reactor licensees and applicants for an operating license.
6. An estimate of the number of responses: 124 annually
7. An estimate of the total number of hours needed to complete the requirement or request: 1494 annually
8. Section 3504(h), Pub. L 96–511 does not apply.
9. Abstract: Requests copies of training and requalification material from reactor licensees/applicants. This training material will be used by appropriate NRC staff to develop operator and senior operator licensing and requalification examinations.

ADDRESSEES: Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

FOR FURTHER INFORMATION: Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 396–7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 20th day of May, 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

BILLING CODE 7590–01–M

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35)..

1. Type of submission, new revision or extension: New.
2. The title of the information collection: Emergency Response Data System Requirements Analysis, Site Surveys.
3. The form number if applicable: Not applicable.
4. How often the collection is required: Once.
5. Who will be required or asked to report: NRC power reactor licensees.
6. An estimate of the number of responses: 60.
7. An estimate of the total number of hours needed to complete the requirement or request: 2,060.
8. An indication of whether section 350(h), Pub. L. 96–511 applies: Not applicable.
9. Abstract: The proposed implementation of an Emergency Response Data System, which would provide nuclear power plant data to the NRC during an emergency, necessitates the NRC obtaining information on the design of emergency data systems used by NRC power reactor licensees.

Copies of the submittal may be inspected or obtained for a fee from NRC Public Document Room, 1717 H Street N.W., Washington, D.C. 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill (202) 395–7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492–8585.

Dated at Bethesda, Maryland, this 20th day of April 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

Coast Guard

[CGD 79–116 & 79–116a]

Towing Safety Advisory Committee, Tankerman Regulations Subcommittee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of Meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I), notice is hereby given of a meeting of the Tankerman Regulations Subcommittee of the Towing Safety Advisory Committee (TSAC). The subcommittee meeting will be held on 3 June 1986 in Room 1301 at U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC. The meeting will begin at 12:30 p.m. and end at 3:30 p.m. The agenda for the meeting consists of the following items:

1. Call to Order.
2. Discussion of the following topics:
(a) Definition of terms.
(b) Tankerman (Barge Watchman).
(c) Barges eligible for special barge requirements.
(d) Barge firefighting course.
(e) Barge product courses.
(f) Service requirements.
3. Adjournment.

Attendance is open to the interested public. Members of the public may present oral or written statements at the meeting. Additional information may be obtained from Captain R. F. Ingraham, Executive Director, Towing Safety Advisory Committee, U.S. Coast Guard (G–CMC/21), Washington, DC 20593 or by calling (202) 426–1477.

Dated: April 23, 1986.

R. F. Ingraham,

Captain, U.S. Coast Guard, Executive Director, Towing Safety Advisory Committee.

BILLING CODE 4910–14–M

Federal Aviation Administration

[Summary Notice No. PE–86–10]

Petitions for Exemption; Summary of Petitions Received Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before May 8, 1986.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules of Docket [AGC–204, Petition Docket No.], 800 Independence Avenue SW., Washington, DC 20591;

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on April 22, 1986.

Richard C. Beitel,

Acting Assistant Chief Counsel Regulations and Enforcement Division.

VOL 51 ISS 81 AP 28 1986 UMI

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
8429	Northern Air Cargo, Inc.	14 CFR §§ 91.39(b)	To allow petitioner to carry outsize cargo on C-82 restricted category aircraft within the State of Alaska. Also requested deletion of those provisions of Condition No. 2, which preclude operations with C-82 aircraft into airports within Alaska into which standard category aircraft can be operated with the same outsize cargo on board.

[FR Doc. 86-9350 Filed 4-25-86; 8:45 am]
BILLING CODE 4910-13-M

Federal Railroad Administration

Petitions for Exemption or Waiver

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that five railroads have petitioned the Federal Railroad Administration (FRA) for a waiver of compliance with the provisions of the Hours of Service Act (83 Stat. 464, Pub. L. 91-169, 45 U.S.C. 64a(e)).

The Hours of Service Act currently makes it unlawful for a railroad to require specified employees to remain on duty for a period in excess of twelve hours. However, the Hours of Service Act contains a provision that permits a railroad which employs not more than fifteen employees who are subject to the statute to seek an exemption from the twelve hour limitation.

Eureka Southern Railroad (EUKA)

FRA Waiver Petition Docket No. HS-86-2

The EUKA provides service between Willits and Eureka, California, a distance of 145 miles. The normal operation of the railroad calls for the operation of three trains per day, with work completed within the twelve hour limitation. This exemption, if granted would allow the carrier to function if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than fifteen employees and has demonstrated good cause for granting this exemption.

Central Montana Rail, Inc. (CMR)

FRA Waiver Petition Docket No. HS-86-3

The CMR provides service between Spring Creek Junction and Geraldine, Montana, a distance of 66 miles. Service is provided on an as needed basis, with work completed within the twelve hour limitation. This exemption, if granted would allow the carrier to function if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than fifteen employees and has demonstrated good cause for granting this exemption.

Chillicothe Southern Railroad (CS)

FRA Petition Docket No. HS-86-4

The CS provides service between Chillicothe and Brunswick, Missouri, a distance of 39 miles. The normal operation of the railroad calls for only one train per day, with work completed within the twelve hour limitation. This exemption, if granted would allow the carrier to function if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than fifteen employees and has demonstrated good cause for granting this exemption.

Huron and Eastern Railway Company (HERC)

FRA Waiver Petition Docket No. HS-86-5

The HERC plans to provide service on an 82-mile system from Bad Axe, Michigan, to Crosswell, Michigan, plus several small branch lines. The HERC states that because of additional maintenance required to restore these former Chesapeake and Ohio branch lines that the train crew will not be able to complete a trip within 12 hours, and therefore requests an exemption.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than fifteen employees and has demonstrated good cause for granting this exemption.

Allegheny Railroad (ALR)

FRA Waiver Petition Docket No. HS-86-6

The ALR provides service over a 150-mile long system. The ALR states that it is not their intention to employ a train crew over twelve (12) hours per day under normal operating conditions, but that this exemption, if granted, would help their operation if they encountered unusual operating conditions or circumstances.

The petitioner indicates that granting the exemption is in the public interest and will not adversely affect safety. Additionally, the petitioner asserts that it employs not more than fifteen employees and has demonstrated good cause for granting this exemption.

Interested persons are invited to participate in these proceedings by submitting written views and comments. FRA has not scheduled an opportunity for oral comment since the facts do not appear to warrant it. Communications concerning the proceeding should identify the docket number and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street SW., Washington, DC 20590.

Communications received before June 12, 1986 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All comments received will be available for examination both before and after the closing date for comments during regular business hours (9 a.m.-5 p.m.) in Room 8201, Nassif Building, 400 Seventh Street SW., Washington, DC 20590.

Issued in Washington, DC, on April 17, 1986.

J.W. Walsh,
Associate Administrator for Safety.

Application for Recordation of Trade Name: "CHRISTIAN KIM, INC."

ACTION: Notice of Application for Recordation of Trade Name.

SUMMARY: Application has been filed pursuant to § 133.12, Customs Regulations (19 CFR 133.12), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "CHRISTIAN KIM, INC." used by Christian Kim, Inc., a corporation organized under the laws of the State of California, located at 124 East Olympic Boulevard, Los Angeles, California 90015.

The application states that the trade name is used in connection with footwear, manufactured in Korea.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Notice of the action taken on the application for recordation of this trade name will be published in the **Federal Register.**

DATE: Comments must be received on or before June 27, 1986.

ADDRESS: Written comments should be addressed to the Commissioner of Customs, Attention: Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-5765).

Dated: April 24, 1986.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 12:10 p.m. on Wednesday, April 23, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to adopt: (1) A resolution (a) making funds available for the payment of insured deposits in Union County Bank, Maynardville, Tennessee, which had been closed by the Commissioner of Financial Institutions for the State of Tennessee on Tuesday, April 22, 1986, (b) accepting the bid of Commercial Bank of Claiborne County, Harrogate, Tennessee, an insured State nonmember bank, for the transfer of the insured and fully secured or preferred deposits of the closed bank, and (c) designating Commercial Bank of Claiborne County, Harrogate, Tennessee, as the agent for the Corporation for the payment of insured and fully secured or preferred deposits of the closed bank; and (2) an Order approving the application of Commercial Bank of Claiborne County, Harrogate, Tennessee, for consent to purchase certain assets of and assume the liability to pay certain deposits made in Union County Bank, Maynardville, Tennessee.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive) concurred in by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: April 24, 1986.

Federal Deposit Insurance Corporation.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 8:45 a.m. on Thursday, April 24, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider:

(A) Recommendations regarding the initiation of administrative enforcement proceedings against insured banks; and

(B) The application of Eaton National Bank & Trust Co., Eaton, Ohio, for consent to purchase certain assets of and assume the deposits made in The New Paris Loan and Building Co., New Paris, Ohio, a non-FDIC-insured institution.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director C.C. Hope, Jr. (Appointive), concurred in by Robert J. Herrmann, acting in the place and stead of Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Dated: April 24, 1986.

Federal Deposit Insurance Corporation.

POSTAL SERVICE BOARD OF GOVERNORS

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. section 552b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Tuesday, May 6, 1986, in the Benjamin Franklin Room, U.S. Postal Service Headquarters, 475 L'Enfant Plaza, SW., Washington, DC. The meeting is open to the public. The Board expects to disucss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268–4800.

There will also be a session of the Board on Monday, May 5, 1986, but it will consist entirely of briefings and not be open to the public.

Agenda

Tuesday Session

May 6, 1986—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, April 7–8, 1986.
2. Remarks of the Postmaster General.
3. Quarterly Report on Service Performance. (Mr. Coughlin, Senior Assistant Postmaster General, Operations Group, will present the quarterly summary on service performance.)
4. Report on INTELPOST. (Mr. Morison, Assistant Postmaster General, Marketing Department, will present an update report on INTELPOST operations.)
5. Report on Open Testing Program. (OPTEX). (Mr. Charters, Assistant Postmaster General, Employee Relations Department, will present a report on testing procedures for job applications.)
6. Capital Investment: (1) 497 Truck Tractors. (Mr. Coughlin, Senior Assistant Postmaster General, Operations Department, will present this item.)
8. Tentative agenda for June 2–3, 1986, meeting in Washington, DC.

David F. Harris,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of April 28, 1986:

A closed meeting will be held on Tuesday, April 29, 1986, at 2:30 p.m. An open meeting will be held on Wednesday, May 7, 1986, at 1:00 p.m., in Room 1C30.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendered matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Cox, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, April 29, 1986, at 2:30 p.m., will be:

Institution of administrative proceedings of an enforcement nature.

Settlement of administrative proceedings of an enforcement nature.

Institution of injunctive actions.

Chapter 11 proceeding.

Regulatory matter regarding financial institution.

Formal order of investigation.

The subject matter of the open meeting scheduled for Wednesday, May 7, 1986, at 1:00 p.m., will be:

Discussion with invited representatives from the financial community, the self-regulatory organizations, and state securities commissions on issues raised by the rapid growth of investment advisers, including financial planners. The issues to be addressed include, but will not be limted to, whether such growth has resulted or may result in problems, whether current regulation is effective, and whether new, cost-effective regulatory or legislative approaches are required. For further information, please contact Cecile Srodes at (202) 272–2500.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: David Mahaffey at (202) 272–2091.

Shirley E. Hollis,

Assistant Secretary.

Department of Health and Human Services

Office of Human Development Services

Grants Availability; Dependent Care Planning and Development; State Funds; Notice

VOL 51 ISS 81 AP 28 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Human Development Services

State Grants for Dependent Care Planning and Development

AGENCY: Office of Human Development Services, HHS.

ACTION: Notice of the availability of State grant funds for dependent care planning and development.

SUMMARY: FY 1986 funds are available for grants to States (including the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau). These grant funds may be used only for the planning, development, establishment, expansion, or improvement of (1) State and local dependent care resource and referral systems, and (2) programs to furnish school-age child care services before and after school in public or private school facilities or in community centers in communities where school facilities are not available.

This Notice sets forth the requirements and application process for these grants.

DATES: Applications must be received by June 27, 1986.

Address applications to: Dependent Care Grant Program, Paget W. Hinch, Associate Commissioner, Family and Youth Services Bureau, Administration for Children, Youth and Families, P.O. Box 1182, Washington, DC 20012.

FOR FURTHER INFORMATION CONTACT: Family and Youth Services Bureau (202) 755–7800.

SUPPLEMENTARY INFORMATION:

Background

Pub. L. 98–558, the Human Services Reauthorization Act of 1984 (98 Stat. 2880), was enacted October 30, 1984. Subchapter D of that Act is entitled "Grants to States for Planning and Development of Dependent Care Programs and for Other Purposes." We will refer to subchapter D as "the Act" in this Notice.

The purpose of this new program is to provide States with funds for activities in two specific areas: activities related to dependent care resource and referral systems and activities related to school-age child care services. In each of these two areas, funds may be used to assist in the planning, development, establishment, expansion, or improvement of services. However, funds may not be used for costs of operation of any resource and referral system or any before or after school child care program established, expanded, or improved under the Act; to make cash payments to intended recipients of services; to subsidize direct provision of services; to pay for construction or renovation; or to be used as matching funds for Federal funds. Forty percent of funds must be used for activities related to dependent care resource and referral systems and sixty percent for activities related to school-age child care services.

No funds are proposed for Dependent Care Planning Grants for FY 1987. Currently, States, at their option, fund such programs and activities under the social services block grant (SSBG) program, funded at $2.563 billion in FY 1986. Similar programs may continue to be funded through the Child Welfare Services program, proposed for funding at $200 million for FY 1987, and the SSBG, proposed to be increased to $2.7 billion in FY 1987. Decisions to fund such service programs are made at the State and local level.

Availability of Funds, Eligibility, Matching and Fiscal Requirements

The Department's FY 1986 appropriation bill, Pub. L. 99–178, appropriated $5 million to implement this program. Pub. L. 99–177, the Gramm-Rudman-Hollings legislation, reduces this appropriation to $4.785 million.

Funds are alloted to the States based on the formula in section 670B of the Act. States eligible for these grants are defined in section 670G(10) to mean the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virginia Islands, the Commonwealth of the Northern Mariana Islands, and the Republic of Palau (in place of the Trust Territory of the Pacific Islands in accordance with section 514 of Public Law 99–178). Each State shall receive an amount which bears the same ratio to the total amount appropriated as the population of the State bears to the population of all States, except that no State will receive less than $50,000. The $50,000 minimum does not apply to the eligible Territories and Insular Areas. State allotments appear in the table at the end of this notice.

Section 670D(e)(1) of the Act requires that the Federal share of any project supported under this program shall not exceed 75 percent, thus requiring 25 percent State matching funds.

These funds must be administered in compliance with 45 CFR Part 74, the Department's rule on administration of grant funds. These funds must be expended by September 30, 1987.

Summary of Requirements

This legislation contains many specific and detailed requirements, including cross references to definitions and requirements in a variety of other statutes. For ease of comprehension and administration, we have repeated the requirements here with appropriate statutory citations. (We note that section 670E(d) contains an erroneous cross-reference to section 1908(a)(1)–(5) of the Public Health Service Act. Only paragraphs (a)(1) and (a)(2) of section 1908 exist and are included here.

The chief executive officer of each State must designate an agency to administer these funds. If the agency designated is not a State or local education agency, the designated agency must have an agreement with the State or local education agency, the designated agency must have an agreement with the State or local education agency, institution of higher education, or community center to carry out certain specified requirements. (Section 670D(b)(2)(A).)

A. Definitions

(1) The term "community center" means facilities operated by non-profit community-based organizations for the provision of recreational, social or educational services to the general public (section 670G(1)).

(2) The term "dependent" means:

(a) An individual who has not attained the age of 17 years;

(b) An individual who has attained the age of 55 years; or

(c) A person with a developmental disability (section 670G(2)).

(3) The term "developmental disability" means a severe chronic disability of a person which—

(a) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(b) Is manifested before the person attains age 22;

(c) Is likely to continue indefinitely;

(d) Results in substantial functional limitations in three or more of the following areas of major life activity: (1) Self-care, (2) receptive and expressive language, (3) learning, (4) mobility, (5) self-direction, (6) capacity for independent living, and (7) economic self-sufficiency; and

(e) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

(Section 670G(3) of the Act and section 102(7) of the Developmental Disabilities Assistance and Bill of Rights Act.)

(4) The term "equipment" includes machinery, utilities, and building equipment and any necessary enclosure or structures to house them, and includes all other items necessary for the functioning of a particular facility as a facility for the provision of educational services, including items such as instructional equipment and necessary furniture; printed, published, and audio-visual instructional materials; and books, periodicals, documents, and other related materials. (Section 670G(4) of the Act and section 198(a)(8) of the Elementary and Secondary Education Act of 1965.)

(5) The term "institution of higher education" means an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which it awards a bachelor's degree or provides not less than a two-year program which is acceptable for full credit toward such a degree, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association, or if not so accredited, (A) is an institution with respect to which the Secretary has determined that there is satisfactory assurance, considering the resources available to the institution, the period of time, if any, during which it has operated, the effort it is making to meet accreditation standards, and the purpose for which this determination is being made, that the institution will meet the accreditation standards of such an agency or association within a reasonable time, or (B) is an institution whose credits are accepted, on transfer, by not less than three institutions which are so accredited, for credit on the same basis as if transferred from an institution so accredited. Such term also includes any school which provides not less than a one-year program of training to prepare students for gainful employment in a recognized occupation and which meets the provision of clauses (1), (2), (4), and (5). Such term also includes a public or nonprofit private educational institution in any State which, in lieu of the requirement in clause (1), admits as regular students persons who are beyond the age of compulsory school attendance in the State in which the institution is located and who have the ability to benefit from the training offered by the institution. For purposes of this definition, the Secretary (of the Department of Education) shall publish a list of nationally recognized accrediting agencies or associations which he determines to be reliable authority as to the quality of training offered. (Section 670G(5) of the Act and section 1201(a) of the Higher Education Act of 1965.)

(6) The term "local education agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term includes any other public institution or agency having administrative control and direction of a public elementary or secondary school. (Section 670G(6) of the Act and section 198(a)(10) of the Elementary and Secondary Education Act of 1965.)

(7) The term "school-age children" means children aged five through thirteen. (Section 670G(7) of the Act.)

(8) The term "school facilities" means classrooms and related facilities used for the provision of education. (Section 670G(8) of the Act.)

(9) The term "Secretary" means the Secretary of Health and Human Services. (Section 670G(9) of the Act.)

(10) The term "State educational agency" means the officer or agency primarily responsible for the State supervision of public elementary and secondary schools. (Section 670G(11) of the Act and section 198(a)(17) of the Elementary and Secondary Education Act of 1965.)

B. Use of Allotments

1. Information and Referral Systems

Subject to the limitations listed below, forty percent of the funds alloted to each State shall be available for the planning, development, establishment, expansion, or improvement, directly or by grant or contract with public or private entities, of State and local resource and referral systems to provide information concerning the availability, types, costs, and locations of dependent care services.

The information provided by any such system shall include—

(a) The types of dependent care services available, including services provided by individual home, religious organizations, community organizations, employers, private industry, and public and private institutions;

(b) The costs of available dependent care services;

(c) The locations in which dependent care services are provided;

(d) The forms of transportation available to such locations;

(e) The hours during which such dependent care services are available;

(f) The dependents eligible to enroll for such dependent care services; and

(g) Any resource and referral system planned, developed, established, expanded, or improved with amounts paid to a State under the Act.

In carrying out clause (g) of the previous sentence, no information shall be included with respect to any dependent care services which are not provided in compliance with the laws of the State and localities in which such services are provided. (Section 670D (a) and (c) of the Act.)

2. School-Age Child Day Care

Subject to the limitations listed below, sixty percent of the funds allocated to each State shall be available for the planning, development, establishment, expansion, or improvement by the States, directly, or by grant or contract with public agencies or private nonprofit organizations of programs to furnish school-age child care services before and after school in public or private school facilities or in community centers in communities where school facilities are not available. (Section 670D(b) and (c)(2) of the Act.)

3. Limitations on the Use of the Funds

A State may not use these funds to—

(1) Pay the costs of operation of any resource and referral system or before or after school child care program established, expanded, or improved with funds under the Act;

(2) Make cash payments to intended recipients of dependent care services including child care services;

(3) Subsidize the direct provision of dependent care services including child care services;

(4) Pay for construction or renovation; or

(5) Satisfy any requirement for the expenditure of non-Federal funds as a condition for the receipt of Federal funds. (Section 670(d) of the Act.)

4. Administrative Cost Limitation

Not more than 10 percent of each State's allotment may be used for the cost of administration. (Section 670D(e)(2) of the Act.)

VOL 51 ISS 81 APR 28 1986 UMI

5. Non-Duplication of Programs

Projects supported with funds under this program to plan, develop, establish, expand, or improve a State or local resource and referral system or before or after school child care program shall not duplicate any services which, prior to the date of enactment of the Act, are provided by the State or locality which will be served by such system. (Section 670D(f) of the Act.)

C. Application and Description of Activities; Requirements

In order to receive an allotment under section 670B, each State shall submit an annual application to the Office of Human Development Services at the address specified above. There is no application kit; the State's application may be in the format of its choice. It must, however, be signed by the chief executive officer of the State, and contain the following certifications, assurances, and information:

1. Certifications

a. The State agrees to use the funds allotted to it under section 670B in accordance with the requirements of the Act. (Section 670E(b)(1) of the Act.)

b. The State agrees that Federal funds made available under section 670C for any period will be so used as to supplement and increase the level of State, local, and other non-Federal funds that would, in the absence of such Federal funds, be made available for the programs and activities for which funds are provided under that section and will in no event supplant such State, local, and other non-Federal funds. (Section 670E(b)(2) of the Act.)

2. Assurances

a. In the case of an applicant that is not a State or local educational agency, the applicant for these funds has or will enter into an agreement with the State or local educational agency, institution of higher education or community center containing provisions for—

(i) the use of facilities for the provision of before or after school child care services (including such use during holidays and vacation periods),

(ii) the restrictions, if any, on the use of such space, and

(iii) the times when the space will be available for the use of the applicant. (Section 670D(b)(2)(A) of the Act.)

b. The parents of school-age children will be involved in the development and implementation of the program for which assistance is sought under the Act. (Section 670D(b)(2)(C) of the Act.)

c. The applicant is able and willing to seek to enroll racially, ethnically, and economically diverse as well as handicapped school-age children in the child care service program for which assistance is sought under the Act. (Section 670D(b)(2)(D) of the Act.)

d. The child care program is in compliance with State and local licensing laws and regulations governing day care services for school-age children to the extent that such regulations are appropriate to the age group served. (Section 670E(b)(2)(E) of the Act.)

e. Other assurances as the Governor may reasonably require to carry out the provisions of this Act. (Section 670D(b)(2)(F) of the Act.)

3. Information

a. An estimate of the costs of the establishment of the child care service program in the public or private school facilities or community centers. (Section 670D(b)(2)(B) of the Act.)

b. A description of the intended use of the payment the State will receive under section 670C including information on the programs and activities to be supported. (Section 670D(c) of the Act.)

D. Annual Report Requirements

Each State shall prepare and submit to the Secretary an annual report on its activities under this program. Such reports shall contain information so that the Secretary can:

(1) Determine whether funds were expended in accordance with the requirements of this statute;

(2) Secure a description of the projects, programs and services assisted by funds made available under section 670B, including a summary of the services which were provided, the providers of such services, and the individuals who received such services; and

(3) Secure a record of the purposes for which the funds were spent, of the recipients of such funds, and of the progress made toward achieving the purposes for which the funds were provided. (Section 1908(a)(1) of the Public Health Service Act.)

The annual report on the use of these FY 1986 funds is due to the Department of Health and Human Services, Office of Human Development Services by December 30, 1988.

E. Public Review Requirements

The description of the intended use of the State's allotment shall be made public within the State in such manner as to facilitate comment from any person (including any Federal or other public agency) during development of the description and after its transmittal. The description shall be revised (consistent with the provisions of the Act) until September 30, 1987, as may be necessary to reflect substantial changes in the programs and activities assisted by the State under this subchapter, and any revision shall be subject to the requirements of the preceding sentence. (Section 670E(c) of the Act.)

Copies of the annual report shall be provided, upon request, to any interested person (including any public agency). (Section 670E(d) of the Act and section 1908(a)(1) of the Public Health Service Act.)

Copies of the annual report and the audit shall be made available for public inspection within the State. (Section 670E(d) of the Act and section 1908(b)(4) of the Public Health Service Act.)

F. Additional Requirements and Provisions

1. Potential Reduction in State Allotments

The Secretary, at the request of a State, may reduce the amount of payments under section 670B by—

(i) The fair market value of any supplies or equipment furnished the State, and

(ii) The amount of the pay, allowances, and travel expenses of any officer or employee of the Government when detailed to the State and the amount of any other costs incurred in connection with the detail of such officer or employee, when the furnishing of supplies or equipment or the detail of an officer or employee is for the convenience of and at the request of the State and for the purpose of conducting activities described under the Act. The amount by which any payment is so reduced shall be available for payment by the Secretary of the costs incurred in furnishing the supplies or equipment or in detailing the personnel, on which the reduction of the payment is based, and the amount shall be deemed to be part of the payment and shall be deemed to have been paid to the State. (Section 670E(d) of the Act and section 1903(b) of the Public Health Service Act.)

2. Fiscal controls

Each State shall establish fiscal control and fund accounting procedures as may be necessary to assure the proper disbursal of and accounting for Federal funds paid to the State under section 670B. (Section 670E(d) of the Act and section 1908(b)(1) of the Public Health Services Act.)

3. Audits

Eact State shall conduct audits of this program in accordance with the provisions of the Single Audit Act of 1984, OMB Circular A-128, and 45 CFR Part 74.62. In general, audits must be conducted annually by independent auditors based on generally accepted government auditing standards. The audits or series of audits typically will cover the entire operations of a State and should be submitted to the HHS Regional Inspector General for Audit in the HHS region in which the State is located. (Section 670E(d) of the Act cross-references section 1908(b)(2) of the Public Health Service Act which has been superceded by the Single Audit Act of 1984.)

4. Repayment

Each State shall, after being provided by the Secretary with adequate notice and opportunity for a hearing within the State, repay to the United States amounts found not to have been expended in accordance with the requirements of this part or the certifications provided by the State under section 670E. If such repayment is not made, the Secretary shall, after providing the State with adequate notice and opportunity for a hearing within the State, offset such amounts against the amount of any allotment to which the State is or may become entitled under this program. (Section 670E(d) of the Act and Section 1908(b)(3) of the Public Health Service Act.)

5. Comptroller General Review

The Comptroller General of the United States shall from time to time, evaluate the expenditures by States of grants under this Act in order to assure that expenditures are consistent with the provisions of the Act. (Section 670E(d) of the Act and section 1908(b)(5) of the Public Health Service Act.)

6. Withholding

The Secretary shall, after adequate notice and an opportunity for a hearing conducted within the affected State, withhold funds from any State which does not use its allotment in accordance with the requirements of this part or the certifications provided under section 670E. The Secretary shall withhold such funds until the Secretary finds that the reason for the withholding has been removed and there is reasonable assurance that it will not recur.

The Secretary may not institute proceedings to withhold funds under this program unless the Secretary has conducted an investigation concerning whether the State has used its allotment in accordance with the requirements of this part or the certifications provided under section 670E. Investigations required by this paragraph shall be conducted within the affected State by qualified investigators.

The Secretary shall respond in an expeditious manner to complaints of a substantial or serious nature that a State has failed to use funds in accordance with the requirements of this part or certifications provided under section 670E.

The Secretary shall conduct in several States in each fiscal year investigations of the use of funds received by the States under the Act in order to evaluate compliance with the requirements of the Act.

The Secretary may not withhold funds under this program from a State for a minor failure to comply with the requirements of this part or certifications provided under section 670E.

The Comptroller General of the United States may conduct investigations of the use of funds received under this part by a State in order to insure compliance with the requirements of this part and certifications provided under section 670E.

Each State, and each entity which has received funds from an allotment made to a State under the Act, shall make appropriate books, documents, papers, and records available to the Secretary or the Comptroller General of the United States, or any of their duly authorized representatives, for examination, copying, or mechanical reproduction on or off the premises of the appropriate entity upon a reasonable request therefor.

In conducting any investigation in a State, the Secretary or the Comptroller General of the United States may not make a request for any information not readily available to such State or an entity which has received funds from an allotment made to the State under this part or make an unreasonable request for information to be compiled, collected, or transmitted in any form not readily available. The previous sentence does not apply to the collection, compilation, or transmittal of data in the course of a judicial proceeding. (Section 670E(d) of the Act and section 1907 of the Public Health Service Act.)

7. Nondiscrimination

(a)(1) For the purpose of applying the prohibitions against discrimination on the basis of age under the Age Discrimination Act of 1975, on the basis of handicap under section 504 of the Rehabilitation Act of 1973, on the basis of sex under title IX of the Education Amendments of 1972, or on the basis of race, color, or national origin under title VI of the Civil Rights Act of 1964, programs and activities funded in whole or in part with funds made available under this part are considered to be programs and activities receiving Federal financial assistance.

(2) No person shall on the ground of sex or religion be excluded from participation in, be denied the benefits of, or be subjected to discrimination under, any program or activity funded in whole or in part with funds made available under this part. (Section 670E(d) of the Act and section 1908 of the Public Health Service Act.)

(3) Each applicant is required to have on file with the Department of Health and Human Services an assurance of the requirements in paragraphs (a) (1) and (2) above before receiving Federal financial assistance under the Act.

(b) Whenever the Secretary finds that a State, or an entity that has received a payment from an allotment to a State under this program, has failed to comply with a provision of law referred to in paragraph (a)(1), with paragraph (a)(2) above, or with an applicable regulation (including one prescribed to carry out paragraph (a)(2), the Secretary shall notify the chief executive officer of the State and shall request him to secure compliance. If within a reasonable period of time, not to exceed sixty days, the chief executive officer fails or refuses to secure compliance, the Secretary may—

(1) Refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted,

(2) Exercise the powers and functions provided by title VI of the Civil Rights Act of 1964, the Age Discrimination Act of 1975, or section 504 of the Rehabilitation Act of 1973, as may be applicable, or

(3) Take such other action as may be provided by law.

(c) When a matter is referred to the Attorney General pursuant to paragraph (b)(1), or whenever he has reason to believe that a State or an entity is engaged in a pattern or practice in violation of a provision of law referred to in paragraph (a)(1) or in violation of paragraph (a)(2), the Attorney General may bring a civil action in any appropriate district court of the United States for such relief as may be appropriate, including injunctive relief. (Section 670E(d) of the Act and section 1908 of the Public Health Service Act.)

8. Criminal Penalty for False Statements

Whoever—

(a) Knowingly and willfully makes or causes to be made any false statement or representation of a material fact in connection with the furnishing of items or services for which payment may be

VOL 51 ISS 81 AP 28 1986 UMI

made by a State from funds allotted to the State under the Act or

(b) Having knowledge of the occurrence of any event affecting his initial or continued right to any such payment conceals or fails to disclose such event with an intent fraudulently to secure such payment either in a greater amount than is due or when no such payment is authorized, shall be fined not more than $25,000 or imprisoned for not more than five years or both. (Section 670E(d) of the Act and section 1909 of the Public Health Service Act.)

Notification Under Executive Order 12372

This program is covered under Executive Order 12372, "Intergovernmental Review of Federal Programs," for State plan consolidation and simplification only (45 CFR 100.12). The review and comment provisions of the Executive Order and Part 100 do not apply.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511), the application requirements contained in this notice have been approved by the Office of Management and Budget under control number 0980-0178.

Department of Commerce

Productivity, Technology, and Innovation; Study of Alternatives for Privatizing the National Technical Information Service; Notice and Request for Public Comment

VOL 51 ISS 81 AP 28 1986 UMI

DEPARTMENT OF COMMERCE

[Docket No. 60352-6052]

Productivity, Technology, and Innovation; Study of Alternatives for Privatizing the National Technical Information Service

AGENCY: National Technical Information Service, Commerce.

ACTION: Notice and request for public comment.

SUMMARY: The Department of Commerce is conducting a study of alternatives for privatizing the National Technical Information Service (NTIS). Various alternatives are being considered under which all or part of the National Technical Information Service would be operated by the private sector. This notice requests information and comments from all interested parties on those alternatives and on some associated policy issues. The Department of Commerce will draw on the information and comments in developing its recommendations and in proposing any legislation which might be required.

A change in the basic structure or operation of NTIS could affect several classes of persons and organizations. Comments are particularly, but not exclusively, invited from these classes, including: Customers for whom NTIS products and services provide access to U.S. and foreign government scientific and technical information; source organizations for which NTIS serves as a vehicle for the dissemination of research results; private sector organizations that derive revenue from products or services sold to, through or in conjunction with NTIS; private sector organizations interested in operating all or part of NTIS; and any other persons or organizations whose activities have been affected by current NTIS operations or might be affected by a change in those operations.

DATE: Comments must be received on or before May 28, 1986.

ADDRESS: Comments may be sent to the Assistant Secretary for Productivity, Technology and Innovation c/o Joseph Clark, Room 4824, U.S. Department of Commerce, Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Joseph Clark, Deputy Director, NTIS (703) 487-4612.

This notice is divided into three parts: (1) A description of the operations of the National Technical Information Service; (2) a listing of privatization alternatives; and (3) a listing of issues.

Description of the National Technical Information Service

The National Technical Information Service (NTIS) operates under the authority of Title 15 U.S.C. 1151-1157, as amended, which authorizes the Secretary of Commerce to establish a clearinghouse for the collection and dissemination of scientific, technical and engineering information. Operating under this authority, the NTIS operation has evolved to include the following elements:

- Acquisition and dissemination of reports describing the results of research done primarily by Federal agencies, their contractors and grantees, but also including similar reports from state and local governments, colleges and universities, and professional associations.
- Acquisition (limited), translation and dissemination of foreign technical information.
- Acquisition and distribution of Federally-produced computer programs and computerized data bases.
- Operation of the Federal Research in Progress (FEDRIP) program which, as successor to the Smithsonian Scientific Information Exchange, provides information describing on-going Federally-funded research projects in the physical, engineering and life sciences.
- Operation of the Center for the Utilization of Federal Technology as called for in the Stevenson-Wydler Technology Innovation Act (Pub. L. 96-480).
- Assistance to state and local governments in furthering their technology transfer programs.
- Acquisition and licensing of government-owned patents with significant commercial potential.
- Provision of accounting and production services to Federal agencies, and technical assistance for the Agency for International Development's efforts to transfer U.S. scientific and technical information to developing countries.

The first four elements make up the clearinghouse program, the largest part of the NTIS operation. Through agreements with Federal agencies or with foreign firms and governments, NTIS acquires the reports, software programs and data bases; prepares bibliographies which describe and announce their availability; and sells the reports, programs, data bases and bibliographic materials.

Complete text reports are sold on an ad hoc or subscription basis, and are available in paper or microform. Software and data base tapes are sold on an ad hoc basis. Bibliographic material is sold as: A biweekly and an annual index to all reports; a weekly newsletter covering reports in each of 26 subject categories; an on-line data base; and ad hoc published and on-line searches.

The NTIS collection includes over 1.6 million titles. Because NTIS provides archival storage for reports entering its system, all are permanently available for sale, either as shelf stock or as a print from paper or microform master.

There is no legal or regulatory requirement for Federal agencies to place their reports in the NTIS system. In many cases, NTIS serves as a secondary distributor. Because of its secondary distribution role, and because of the highly technical nature of its reports, the current NTIS audience is limited; on average, NTIS sells less than 10 copies of each report it acquires.

Approximately 2,000 sources, both U.S. and foreign, place reports in the NTIS system. For FY 1985, the major sources were the Department of Defense (approximately 23% of all titles acquired), the National Aeronautics and Space Administration (4%), the Department of Energy (23%), foreign sources (25%, more than half of which enters NTIS through arrangements with DoE and NASA); and all other (25%).

Customers can purchase NTIS products on an ad hoc or annual subscription basis. Methods of payment include check, money order, credit card or invoice billing. Most regular customers establish deposit accounts at NTIS, drawing down on these accounts as necessary to purchase specific products. Major exceptions to these arrangements are: The services provided to other agencies (handled as reimbursables); patent licensing (partially funded by appropriations); and the bibliographic data bases (leased directly to major users, and leased to commercial vendors for third party, i.e., public, use).

Many regular customers purchase one or more bibliographic products and use these products to identify specific reports they need. Infrequent or one-time customers typically learn of the availability of a report through announcements in trade press or through customer-initiated contact with NTIS sales personnel.

Over the past 18 months, NTIS has sold its products to some 40,000 individuals, firms, schools, libraries and governments, both foreign and domestic. Approximately 75% of NTIS customers are small businesses. In the past year, NTIS has shipped over 4.5 million documents and microforms, an average of 18,000 each day. Approximately 15% of NTIS sales are to foreign customers.

NTIS operations are located in Springfield, Virginia, in the Washington, D.C. metropolitan area. Customer orders come in by mail, phone, (limited) in person sale, and on-line. With the exception of limited pick-up orders from local customers, all document orders are shipped via United States Postal Service, United Parcel Service or similar carriers. Most foreign sales are handled through independent, in-country dealers who take orders from and make local distribution of products to final customers.

Marketing to NTIS customers is done primarily through direct mail, supplemented in small part by exhibits at appropriate conventions/meetings and by alerting the trade press to the availability of specific reports. Liaison with source agencies, encouraging them to place documents in the NTIS system, is done primarily through direct personal contact.

As of March 14, 1986 the NTIS staff numbered 333 employees:

Executive and policy direction	5
International affairs, including foreign acquisition and AID support	11
Product management, domestic acquisition and source agency liaison	26
Marketing, sales and customer service	43
Center for the Utilization of Federal Technology, state/local government assistance and patent licensing	13
Order processing, inventory control, warehousing and order fulfillment	66
Document (input) processing, bibliographic activities and preparation (excluding printing) of publications	54
Budget, customer accounting, financial management, administrative services and computer programming	93
Total	333

Printing and microform reproduction services are provided by a non-NTIS Department of Commerce publications unit, by the Government Printing Office and by GPO contractors. Billings to NTIS for these services in FY 1985 were $4.5 million. Personnel services and computer hardware services are provided by the Department of Commerce, with FY 1985 billings of $275,000 and $1.2 million respectively.

Except for some $500,000 in budgetary appropriations for the patent licensing program, NTIS activities are funded from revenues earned from the sale of products and services. In FY 1985, earned revenues were $21.3 million. Approximately 58% of this amount was from the sale of full text reports; 19% from bibliographic and announcement products; 14% from services provided to other agencies; 7% from software and data tapes; and 2% from patent licensing fees.

Interested parties may call or write to the Deputy Director of the National Technical Information Service, at the address or telephone number shown above, for a package of materials which provides detailed information about the agency's activities, costs, sales volume, products, and source agencies.

Privatization Alternatives

The Department of Commerce has tentatively identified a number of alternatives for privatizing NTIS operations, some of which would require legislation:

- Discontinuing NTIS operations and allowing the private sector to pursue whatever opportunities that discontinuation offers;
- Selling the entire NTIS operation to one or more private organizations;
- Selling portions of NTIS, e.g., marketing and order fulfillment, while retaining the rest as a government activity;
- Contracting with a private organization for the conduct of all or portions of the NTIS activity; or
- Establishing NTIS as a government corporation, nonprofit corporation or some other form of public or private special-purpose organization.

Interested parties are invited to discuss their views as to the advantages and disadvantages of these alternatives.

They are also invited to identify and discuss other alternatives for privatization of NTIS.

Privatization Issues

The Department of Commerce has identified a number of key issues which must be addressed in the course of evaluating these and other privatization alternatives. These issues are described below, and public comment is invited on them.

1. Federal agencies are under no obligation to place their reports in the NTIS system. This raises several issues: (a) If the Department of Commerce could not assure that Federal source agencies would continue to place their reports in a privatized system, would any private organization be willing to undertake the operation of the present NTIS? (b) If not, should any legislative change incident to the privatization of NTIS include a requirement that agencies place their reports in the system? and (c) In the absence of any such requirement, what incentives could a private organization offer to ensure that current agencies would continue to place their reports in a private system?

2. Most NTIS agreements for the acquisition of foreign technical information are developed on a government-to-government basis providing for mutual exchange. How might these arrangements be continued in a private system?

3. Resolution of issues 1 and 2 might involve an arrangement in which the acquisition of source agency reports remained a governmental activity, with all costs reimbursed by the private sector, but all other NTIS functions are performed by a private organization. Under such an arrangement, what influence would the private organization expect to have to ensure that the government operated acquisition activity is responsive to the private organization's business objectives?

4. NTIS ensures the permanent availability of all documents entering its system. Many of these documents sell in very limited numbers, literally in the single digits. Would a private organization operating the NTIS system be willing to continue this policy of permanent availability? Should it be required to do so?

5. Generally, Federal reports entering the NTIS system cannot be copyrighted. Should legislation conferring copyright protection be included in the privatization proposal?

6. NTIS source agencies often make a primary distribution before placing a report in the NTIS system. Would continuation of this practice have a substantial adverse impact on a privatized NTIS system, or render that system uneconomic?

7. If the NTIS operation was sold to the private sector, should it be sold on an exclusive basis to only a single organization, or on a non-exclusive basis to several organizations? Should the government exercise come control over prices charged for products? How?

8. The NTIS system has served as a one-stop source for the sale of much of the Federal government's scientific and technical information. If the system was sold to several private organizations, this one-stop feature of sufficient value to warrant some special arrangement to ensure its continuation? What form might this special arrangement take?

9. To what extent, if any, and in what specific ways has the existence of NTIS affected private organizations in the information industry? How has this, in turn, affected the dissemination of Federal scientific and technical information? How might these effects change as a result of privatizing the NTIS system?

10. Privatizing NTIS raises a number of other issues dealing with:

- The effect of such proposed action on matters of broad national interest, i.e., national defense, U.S. scientific and technological competitiveness, and the national economy;

VOL 51 ISS 81 AP 28 1986

• The rights of U.S. citizens to have access to the results of Federally-funded research and development; and

• The interests of the U.S. information industry, especially those firms that might wish to participate in those activities resulting from the privatization of NTIS.

Interested parties are invited to identify and discuss these and any other specific issues that should be considered in the course of evaluating alternatives for the privatization of NTIS.

Expressions of Interest

Organizations that might be interested in operating all or part of NTIS are invited to make their interest known, and to describe the terms and conditions under which they would be interested. This is an informal request for such expressions of interest. A final decision on the nature and extent of privatization for NTIS operations will be followed, if appropriate, by a formal request for proposals and/or bids.

Procedures

Requests for additional information, and comments, should be directed to Joseph Clark at the address or telephone number shown above.

Dated: April 24, 1986.

D. Bruce Merrifield,

Assistant Secretary for Productivity, Technology, and Innovation.

LIST OF PUBLIC LAWS

Last list April 24, 1986.

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws"), from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

S.J. Res. 315/Pub. L. 99–377

Designating May 1986 as "Older Americans Month." (Apr. 23, 1986; 100 Stat. 396, 1 page) Price: $1.00

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783–3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 82
Tuesday, April 29, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 417

[Docket No. 0081A]

Sugarcane Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Sugarcane Crop Insurance Regulations (7 CFR Part 417), effective for the 1987 and succeeding crop years. The intended effect of this rule is to: (1) Change to mandatory "Actual Production History" (APH) basis by removing the Premium Adjustment Table and Providing for cancellation for not furnishing records; (2) clarify that acreage will not be insured when planted with another crop; (3) change the method of calculating the insureds share of any indemnity on crops transferred before harvest; (4) add a provision to insure acreage cut for seed by written agreement; (5) add a provision to insure by written agreement acreage grown for a third or succeeding year from stubble; (6) change the method of computing indemnities when acreage, share, or practice is underreported; (7) provide continuous protection for stubbler cane; (8) change the notice of loss provision to make it more applicable to seed cane; (9) shorten the length of time an insured has to give notice when claiming an indemnity; (10) change the unit of measure for sugarcane; (11) clarify the method of appraising stubble acreage; (12) add a definition of "Loss ratio"; (13) change the filing date for contract changes; and (14) delete the definition for "Standard sugarcane." The authority for the promulgation of this rule is contained in the Federal Crop Insurance Act, as amended.

EFFECTIVE DATE: May 31, 1986.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Departmental of Agriculture, Washington, DC, 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established by Department Regulation No. 1512-1. This action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under those procedures. The sunset review date established for these regulations is December 1, 1990.

Merritt W. Sprague, Manager, FCIC, (1) has determined that this action is not a major rule as defined by Executive Order 12291 because it will not result in: (a) An annual effect on the economy of $100 million or more; (b) major increases in costs or prices for consumers, individual industries, federal, State, or local governments, or a geographical region; or (c) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets; and (2) certifies that this action will not increase the federal paperwork burden for individuals, small businesses, and other persons.

This action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Flexibility Analysis was prepared.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.450.

This program is not subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. See the Notice related to 7 CFR 3015, Subpart V, published at 48 FR 29115, June 24, 1983.

This action is not expected to have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

On Thursday, February 13, 1986, FCIC published a Notice of Proposed Rulemaking in the Federal Register at 51 FR 5341, to revise and reissue the Sugarcane Crop Insurance Regulations (7 CFR Part 417), effective for the 1987 and succeeding crop years. The public was given 60 days in which to submit written comments on the proposed rule but none were received. The Notice of Proposed Rulemaking defined "County" to include all land identified by an ASCS farm serial number for the county but physically located in another county. This definition was in error and, therefore, the final rule retains the present definition. The Notice of Proposed rulemaking also defined "ASCS". Since the "County" definition is unchanged, there is no need for the "ASCS" definition and it has been removed.

Therefore, with the exception of minor changes in language and format, the proposed rule, as discussed above, is adopted as a final rule. The principal changes in the sugarcane policy are:

1. Section 2.—Add a clause to change the method of calculating the insured's share of an indemnity on crops transferred before harvest. This limits indemnities to the insurable interest at the time of loss.

Specify that insurance will apply on seed cane cut for seed, if FCIC agrees, in writing, to insure such acreage.

Add a provision that acreage grown for a third or succeeding year from stubble is not insured unless FCIC agrees in writing to insure such acreage.

Specify that acreage will not be insured when planted with another crop. This change is made to be consistent with other crop policies.

2. Section 5.—Remove the Premium Adjustment Table. The crop will be insured on an actual production history (APH) basis, and coverages will, therefore, reflect the actual production history of the crop on the unit. Insureds with good loss experience who are now receiving a premium discount are protected since they may retain a discount under the present schedule through the 1991 crop year or until their loss experience causes them to lose the advantage, whichever is earlier.

Remove the provisions for the transfer of insurance experience and for premium computation when participation has not been continuous. Deletion of the Premium Adjustment

VOL 51 ISS 82 AP 29 1986 UMI

Table eliminates the need for these provisions.

3. Section 7.—add a provision to provide continuous protection for stubble cane.

4. Section 8.—Change the "notice of probable loss" provision to make it applicable to seed cane.

Shorten from 30 days to 10 days the time an insured has to give notice of loss when claiming an indemnity. This will allow FCIC to determine indemnities in a more timely fashion.

5. Section 9.—When acres are underreported, the production from all acres will count against the reported acres in calculating indemnities. This change will reduce the indemnities when acres are underreported and will reduce the complexity of calculations.

Change the unit of measure from "tons" to "pounds" to more closely conform to industry practice.

6. Section 15.—Add a clause to cancel the contract if production history is not furnished by the cancellation date. An exception will be allowed if the insured can show, prior to the cancellation date, that records are unavailable due to conditions beyond the insured's control. This clause is required by the change to mandatory APH.

7. Section 16.—Change the date for filing contract changes from May 31 to June 30.

8. Section 17.—Add a definition of "Loss ratio."

Delete the "Standard sugarcane" definition since it is no longer used in subsection 9.e.(2).

List of Subjects in 7 CFR Part 417

Crop insurance, Sugarcane.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Corp Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Sugarcane Crop Insurance Regulations (7 CFR Part 417), effective for the 1987 and succeeding crop years, to read as follows:

PART 417—SUGARCANE CROP INSURANCE REGULATIONS

Subpart—Regulations for the 1987 and Succeeding Crop Years

Sec.

417.1 Availability of sugarcane crop insurance.
417.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.
417.3 OMB control numbers.
417.4 Creditors.
417.5 Good faith reliance on misrepresentation.
417.6 The contract.
417.7 The application and policy.

Authority: Secs. 508, 516, Pub. L. 75-430, 52 Stat. 73, 77, as amended (7 U.S.C. 1508, 1516).

Subpart—Regulations for the 1987 and Succeeding Crop Years

§ 417.1 Availability of sugarcane crop insurance.

Insurance shall be offered under the provisions of this subpart on sugarcane in counties within the limits prescribed by and in accordance with the provisions of the Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation.

§ 417.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for sugarcane which will be included in the actuarial table on file in applicable service offices for the county and which may be changed from year to year.

(b) At the time the application for insurance is made, the applicant will elect a coverage level and price at which indemnities will be computed from among those levels and prices set by the actuarial table for the crop year.

§ 417.3 OMB control numbers.

OMB control numbers are contained in Subpart H of Part 400, Title 7 CFR.

§ 417.4 Creditors.

An interest of a person in an insured crop existing by virture of a lien, mortgage, garnishment, levy, execution, bankruptcy, involuntary transfer or other similar interest shall not entitle the holder of the interest to any benefit under the contract.

§ 417.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the sugarcane crop insurance contract, whenever:

(a) An insured under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation:

(1) Is indebted to the Corporation for additional premiums; or

(2) Has suffered a loss to a crop which is not insured or for which the insured is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured believed to be insured, or believed the terms of the insurance contract to have been complied with or waived; and

(b) The Board of Directors of the Corporation, or the Manager in cases involving not more than $100,000.00, finds that:

(1) An agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice;

(2) Said insured relied thereon in good faith; and

(3) To require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured shall be granted relief the same as if otherwise entitled thereto.

Requests for relief under this section must be submitted to the Corporation in writing.

§ 417.6 The contract.

The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance on a form prescribed by the Corporation. The contract shall cover the sugarcane crop as provided in the policy. The contract shall consist of the application, the policy, and the county actuarial table. Changes made in the contract shall not affect its continuity from year to year. The forms referred to in the contract are available at the applicable service offices.

§ 417.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation must be made by any person to cover such person's share in the sugarcane crop as landlord, owner-operator, or tenant if the person wishes to participate in the program. The application shall be submitted to the Corporation at the service office on or before the applicable sales closing date on file in the service office.

(b) The Corporation may discontinue the acceptance of any application or applications in any county upon its determination that the insurance risk is excessive. The Manager of the Corporation is authorized in any crop year to extend the sales closing date for submitting applications in any county, by placing the extended date on file in the applicable service offices and publishing a notice in the **Federal Register** upon the Manager's determination that no adverse selectivity will result during the extended period. However, if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) In accordance with the provisions governing changes in the contract contained in previous policies and regulations issued by FCIC, a contract in the form provided for in this subpart will come into effect as a continuation of a sugarcane contract issued under such prior regulations, without the filing of a new application.

(d) The application for the 1987 and succeeding crop years is found at Subpart D of Part 400—General Administrative Regulations (7 CFR 400.37, 400.38) and may be amended from time to time for subsequent crop years. The provisions of the Sugarcane Crop Insurance Policy for the 1987 and succeeding crop years are as follows:

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Sugarcane—Crop Insurance Policy

(This is a continuous contract. Refer to Section 15.)

AGREEMENT TO INSURE: We will provide the insurance described in this policy in return for the premium and your compliance with all applicable provisions.

Throughout this policy, "you" and "your" refer to the insured shown on the accepted Application and "we," "us," and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss.

a. The insurance provided is against unavoidable loss of production resulting from the following causes occurring within the insurance period:

(1) Adverse weather conditions;
(2) Fire;
(3) Insects;
(4) Plant disease;
(5) Wildlife;
(6) Earthquake;
(7) Volcanic eruption; or
(8) If applicable, failure of the irrigation water supply due to an unavoidable cause occurring after insurance attaches;

unless those causes are excepted, excluded, or limited by the actuarial table or subsection 9.e.(7).

b. We will not insure against any loss of production due to:

(1) The neglect, mismanagement, or wrongdoing of you, any member of your household, your tenants, or employees;

(2) The failure to follow recognized good sugarcane farming practices;

(3) The failure or breakdown of irrigation equipment or facilities;

(4) The failure to follow recognized good sugarcane irrigation practices;

(5) The impoundment of water by any governmental, public, or private dam or reservoir project; or

(6) Any cause not specified in subsection 1.a. as an insured loss.

2. Crop, acreage, and share insured.

a. The crop insured will be sugarcane grown for processing for sugar, grown on insured acreage, and for which a guarantee and premium rate are set by the actuarial table.

b. The acreage insured for each crop year will be plant and stubble cane grown on insurable acreage as designated by the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we elect.

c. The insured share is your share as landlord, owner-operator, or tenant in the insured sugarcane at the time insurance attaches. However, only for the purpose of determining the amount of indemnity, your share will not exceed your share on the earlier of:

(1) The time of loss; or
(2) The beginning of harvest.

d. We do not insure any acreage:

(1) Cut for seed unless we agree, in writing, to insure such acreage;

(2) If the farming practices carried out are not in accordance with the farming practices for which the premium rates have been established;

(3) Which is irrigated and an irrigated practice is not provided by the actuarial table unless you elect to insure the acreage as nonirrigated by reporting it as insurable under section 3;

(4) Which is destroyed, it is practical to replant to sugarcane, and such acreage is not replanted;

(5) Initially planted after the final planting date set by the actuarial table;

(6) Planted to a type or variety of sugarcane not established as adapted to the area or excluded by the actuarial table; or

(7) Planted with another crop.

e. If insurance is provided for an irrigated practice, you must report as irrigated only the acreage for which you have adequate facilities and water, at the time insurance attaches, to carry out a good sugarcane irrigation practice.

f. Acreage which is planted for the development or production of hybrid seed or for experimental purposes is not insured unless we agree, in writing, to insure such acreage.

g. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to the time insurance attaches.

3. Report of acreage, share, and practice.

You must report on our form:

a. All the acreage of sugarcane in the county in which you have a share;

b. The practice; and

c. Your share at the time insurance attaches.

You must designate separately any acreage that is not insurable. You must report if you do not have a share in any sugarcane in the county. This report must be submitted annually on or before the reporting date established by the actuarial table. All indemnities may be determined on the basis of information you submit on this report. If you do not submit this report by the reporting date, we may elect to determine, by unit, the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Production guarantees, coverage levels, ans prices for computing indemnities.

a. The production guarantees, coverage levels, and prices for computing indemnities are contained in the actuarial table.

b. Coverage level 2 will apply if you do not elect a coverage level.

c. You may change the coverage level and price election on or before the sales closing date set by the actuarial table for submitting applications for the crop year.

5. Annual premium.

a. The annual premium is earned and payable on the date insurance attaches. The amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time insurance attaches.

b. Interest will accrue at the rate of one and one-half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

c. If you are eligible for a premium reduction in excess of 5 percent based on your insuring experience through the 1985 crop year under the terms of the experience table contained in the sugarcane policy in effect for the 1986 crop year, you will continue to receive the benefit of that reduction subject to the following conditions:

(1) No premium reduction will be retained after the 1991 crop year;

(2) The premium reduction will not increase because of favorable experience;

(3) The premium reduction will decrease because of unfavorable experience in accordance with the terms of the policy in effect for the 1986 crop year;

(4) Once the loss ratio exceeds .80, no further premium reduction will apply; and

(5) Participation must be continuous.

6. Deductions for debt.

Any unpaid amount due us may be deducted from any indemnity payable to you or from any loan or payment due under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies.

7. Insurance period.

a. Insurance attaches on:

(1) Plant cane at the time of planting unless otherwise provided for by the actuarial table; and

(2) Stubble cane on the first day following harvest for the first or second crop year cane from stubble on the unit, except when stubble has been damaged by conditions occurring before harvest in the previous crop year and we notify you, in writing, by:

(a) January 31 following harvest in Louisiana; or

(b) April 30 following harvest in all other States.

b. Insurance ends at the earliest of:

(1) Total destruction of the surgarcane on the unit;

(2) Final harvest;

(3) Final adjustment of a loss; or

VOL 51 ISS 82 AP 29 1986 UMI

(4) The following dates immediately following the normal starting of harvest:

(a) Louisiana..... January 31;
(b) all other states..... April 30.

8. Notice of damage or loss.

a. In case of damage or probable loss:

(1) You must give us written notice if:

(a) During the period before harvest, the sugarcane on any unit is damaged and you decide not to further care for or harvest any part of it;

(b) You want our consent to put the acreage to another use; or

(c) After consent to put acreage to another use is given, additional damage occurs.

Insured acreage may not be put to another use until we have appraised the sugarcane and given written consent. You must notify us when such acreage is put to another use.

(2) You must give us notice of probable loss at least 15 days before the beginning of harvest:

(a) If you anticipate a loss on any unit; and

(b) For any acreage which is insured as seed cane.

(3) If probable loss is determined within 15 days prior to or during harvest, immediate notice must be given and a representative sample of the unharvested sugarcane (at least 10 feet wide and the entire length of the field) must remain unharvested for a period of 15 days from the date of notice, unless we give you written consent to harvest the sample.

(4) In addition to the notices required by this section, if you are going to claim an indemnity on any unit, you must give us notice not later than 10 days after the earliest of:

(a) Total destruction of the sugarcane on the unit;

(b) Harvest of the unit; or

(c) The calendar date for the end of the insurance period.

b. You must obtain written consent from us before you destroy any of the sugarcane which is not to be harvested.

c. If an indemnity is to be claimed on any unit, you must leave intact the stalks on unharvested acreage and the stubble on harvested acreage until inspected by us.

d. We may reject any claim for indemnity if you fail to comply with any of the requirements of this section or section 9.

9. Claim for indemnity

a. Any claim for indemnity on a unit must be submitted to us on our form not later than 60 days after the earliest of:

(1) Total destruction of the sugarcane on the unit;

(2) Harvest of the unit; or

(3) The calendar date for the end of the insurance period.

b. We will not pay any indemnity unless you:

(1) Establish the total production of sugar on the unit and that any loss of production has been directly caused by one or more of the insured causes during the insurance period; and

(2) Furnish all information we require concerning the loss.

c. The indemnity will be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of sugar to be counted (see subsection 9.e.);

(3) Multiplying the remainder by the price election; and

(4) Multiplying this result by your share.

d. If the information reported by you under section 3 of this policy results in a lower premium than the actual premium determined to be due, the production guarantee on the unit will be computed on the information reported, but all production from insurable acreage, whether or not reported as insurable, will count against the production guarantee.

e. The total production (in pounds of sugar) to be counted for a unit will include all harvested and appraised production.

(1) Sugar production to count from acreage damaged by freeze within the insurance period which adversely affects the boiling house operation and cannot be processed for sugar will be determined by dividing the dollar amount received from the mill for the damaged sugarcane by the price per pound of raw sugar. The applicable price of raw sugar will be the local market price on the earlier of:

(a) The day the loss is adjusted; or

(b) The day such sugar is sold.

(2) Appraised production to be counted will include:

(a) Any appraisal under subsection 9.e.(3) and 9.e.(4);

(b) Unharvested production on harvested acreage and potential production lost due to uninsured causes;

(c) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause; and

(d) Any appraised production on unharvested acreage.

Appraisals and harvested production not processed for sugar will be given in pounds of sugar.

(3) We may make an appraisal of not less than the production guarantee per acre on any harvested acreage on which the stubble is destroyed prior to our inspection.

(4) Except for acreage on which insurance attached the first day following harvest of the previous crop, an appraisal for inadequate stand will be made on any stubble acreage, at the time of inspection, if the product of the number of plants per acre multiplied by 2, multiplied by the factor (percentage of sugar) shown by the actuarial table does not equal the per acre guarantee. The per acre appraisal for inadequate stand will be the difference between the appraised production and the production guarantee.

(5) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use will be considered production to count unless such acreage is:

(a) Not put to another use before harvest of sugarcane becomes general in the county and reappraised by us;

(b) Further damaged by an insured cause and reappraised by us; or

(c) Harvested.

(6) The amount of production of any unharvested sugarcane may be determined on the basis of field appraisals conducted after the end of the insurance period.

(7) If you elect to exclude hail and fire as insured causes of loss and the sugarcane is damaged by hail or fire, appraisals will be made in accordance with Form FCI–78, "Request to Exclude Hail and Fire".

f. You must not abandon any acreage to us.

g. Any suit against us for an indemnity must be brought in accordance with the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial of the claim is received by you.

h. An indemnity will not be paid unless you comply with all policy provisions.

i. We have a policy of paying your indemnity within 30 days of our approval of your claim, or entry of a final judgment against us. We will, in no instance, be liable for the payment of damages, attorney's fees, or other charges in connection with any claim for indemnity, whether we approve or disapprove such claim. We will, however, pay simple interest computed on the net indemnity ultimately found to be due by us or by a final judgment from and including the 61st day after the date you sign, date, and submit to us the properly completed claim for indemnity form if the reason for our failure to timely pay is not due to your failure to provide information or other material necessary for the computation or payment of the indemnity. The interest rate will be that established by the Secretary of the Treasury under Section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611), and published in the **Federal Register** semiannually on or about January 1 and July 1. The interest rate to be paid on any indemnity will vary with the rate announced by the Secretary of the Treasury.

j. If you die, disappear, or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved after insurance attaches for any crop year, any indemnity will be paid to the persons determined to be beneficially entitled thereto.

k. If you have other fire insurance, fire damage occurs during the insurance period, and you have not elected to exclude fire insurance from this policy, we will be liable for loss due to fire only for the smaller of the amount:

(1) Of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) By which the loss from fire exceeds the indemnity paid or payable under such other insurance.

For the purpose of this section, the amount of loss from fire will be the difference between the fair market value of the production on the unit before the fire and after the fire.

10. Concealment or fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract. Such voidance will

be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of right to indemnity on insured share.

If you transfer any part of your share during the crop year, you may transfer your right to an indemnity. The transfer must be on our form and approved by us. We may collect the premium from either you or your transferee or both. The transferee will have all rights and responsibilities under the contract.

12. Assignment of indemnity.

You may assign to another party your right to an indemnity for the crop year, only on our form and with our approval. The assignee will have the right to submit the loss notices and forms required by the contract.

13. Subrogation. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us, you must do all you can to preserve any such right. If we pay you for your loss, then your right of recovery will at our option belong to us. If we recover more than we paid you plus our expenses, the excess will be paid to you.

14. Records and access to farm.

You must keep, for two years after the time of loss, records of the harvesting, storage, shipment, sale, or other disposition of all sugar produced on each unit, including separate records showing the same information for production from any uninsured acreage. Failure to keep and maintain such records may, at our option, result in cancellation of the contract prior to the crop year to which the records apply, assignment of production to units by us, or a determination that no indemnity is due. Any person designated by us will have access to such records and the farm for purposes related to the contract.

15. Life of contract: Cancellation and termination.

a. This contract will be in effect for the crop year specified on the application and may not be canceled by you for such crop year. Thereafter, the contract will continue in force for each succeeding crop year unless canceled or terminated as provided in this section.

b. This contract may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date preceding such crop year.

c. Prior to the cancellation date you must:

(1) Furnish to us satisfactory production records for the crop year or the contract will be canceled for the next crop year; or

(2) Show to our satisfaction that the records are not available because of conditions beyond your control, such as fire, flood or other natural disaster. (If this subsection (2) applies, the Field Actuarial Office may assign a yield for the year for which the records are unavailable.)

d. This contract will terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due if deducted from:

(1) An indemnity, will be the date you sign the claim; or

(2) Payment under another program administered by the United States Department of Agriculture, will be the date both such other payment and setoff are approved.

e. The cancellation and termination dates are September 30.

f. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract will terminate as of the date death, judicial declaration, or dissolution. If such event occurs after insurance attaches for any crop year, the contract will continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership will dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons will dissolve the joint entity.

g. The contract will terminate if no premium is earned for 5 consecutive years.

16. Contract changes.

We may change any terms and provisons of the contract from year to year. If your price election at which indemnities are computed is no longer offered, the actuarial table will provide the price election which you are deemed to have elected. All contract changes will be available at your service office by June 30 preceding the cancellation date. Acceptance of changes will be conclusively presumed in the absence of notice from you to cancel the contract.

17. Meaning of terms.

For the purpose of sugarcane crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, practices, insurable and uninsurable acreage, and related information regarding sugarcane insurance in the county.

b. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown by the actuarial table.

c. "Crop year" means the period from planting for plant cane and the day following harvest for stubble cane until the end of the insurance period and is designated by the calendar year in which the sugarcane harvest normally begins in the county.

d. "Harvest" means the cutting and removing of sugarcane from the field.

e. "Insurable acreage" means the land classified as insurable by us and shown as such by the actuarial table.

f. "Insured" means the person who submitted the application accepted by us.

g. "Loss ratio" means the ratio of indemnity to premium.

h. "Person" means an individual, partnership, association, corporation, estate, trust, or other legal entity, and wherever applicable, a State or a political subdivision or agency of a State.

i. "Plant cane" (see difinition of sugarcane).

j. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

k. "Stubble cane" (see definition of sugarcane).

l. "Sugarcane" means either:

(1) Sugarcane the initial year planted (plant cane); or

(2) Sugarcane growing from the stubble left to produce another crop from previously harvested sugarcane (stubble cane).

m. "Tenant" means a person who rents land from another person for a share of the sugarcane or a share of the proceeds therefrom.

n. "Unit" means all insurable acreage of sugarcane in the county on the date insurance attaches for the crop year:

(1) In which you have a 100 percent share; or

(2) Which is owned by one entity and operated by another entity on a share basis.

Land rented for cash, a fixed commodity payment, or any consideration other than a share in the sugarcane on such land will be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office. Units will be determined when the acreage is reported. Errors in reporting units may be corrected by us to conform to applicable guidelines when adjusting a loss. We may consider any acreage and share thereof reported by or for your spouse or child or any member of your household to be your bona fide share or the bona fide share of any other person having an interest therein.

18. Descriptive headings.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction of meaning of any of the provisions of the contract.

19. Determinations.

All determination required by the policy will be made by us. If you disagree with our determinations, you may obtain recondsideration of or appeal those determinations in accordance with the Appeal Regulations, (7 CFR Part 400—Subpart J).

20. Notices.

All notices required to be given by you must be in writing and received by your service office within the designated time unless otherwise provided by the notice requirement. Notices required to be given immediately may be by telephone or in person and confirmed in writing. Time of the notice will be determined by the time of our receipt of the written notice.

Done in Washington, DC, on April 15, 1986.

Edward Hews,

Acting Manager, Federal Crop Insurance Corporation.

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 505d

Information Collection Requirements; Correction

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule; technical correction.

SUMMARY: On January 2, 1985, the Federal Home Loan Bank Board ("Board") adopted a regulation relating to the information collection requirements contained in the Board's regulation regarding earnings-based accounts (50 FR 7). Because of a typographical error, the citation reference to the Board's earnings-based accounts regulation was incorrect. The amendment referred to 12 CFR 563.10. The correct reference should read 12 CFR 563.3–10. This action corrects that error. For the convenience of the public, the Board is republishing the entire text of section 505d.1(b), as amended by its action today.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Carol J. Rosa, Paralegal Specialist, Regulations and Legislation Division, Office of General Counsel, (202) 377–6464; or Colleen Devine, Chief, Management Analysis Staff, Administration Office, (202) 377–6025, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

Pursuant to 12 CFR 508.11 and 508.14, the Board finds that, because of the minor, technical nature of this corrective amendment, notice and public procedure are unnecessary, as is the 30-day delay of the effective date.

12 CFR Part 563

Net-Worth Requirements of Insured Institutions

Date: April 21, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC"), is amending § 563.13(b)(2) of its regulations to terminate the Board's delegation of authority to the Principal Supervisory Agents ("PSA"s) to permit "de novo" institutions whose accounts are insured by the FSLIC ("insured institutions") to change their net-worth requirements from the "de novo" requirement under § 563.13(b)(2) to the standard requirement imposed on all insured institutions by § 563.13(b)(1). The Board will exercise this authority on a case-by-case basis to ensure a uniform national policy consistent with the Board's continuing review of the industry's capital requirements and financial soundness.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: John F. Connolly, Attorney, Office of General Counsel, (202–377–6455), Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION: The Board initially adopted higher net-worth requirements for "de novo" insured institutions in the "de novo" regulation because of these institutions' lack of supervisory track records and their potential for excessive leverage of capital in order to exercise risky new asset powers. Board Res. No. 83–653, 48 FR 54320 (December 2, 1983) ("de novo regulation"). The net-worth regulation incorporated these higher requirements with little discussion. *See* Board Res. No. 85–79–B, 50 FR 6891 (February 19, 1985) ("net-worth regulation"). Section 563.13(b)(2)(i) requires most "de novo" institutions, those institutions applying for a Federal charter or Federal insurance whose businesses were not conducted previously under any charter, to have initial capital of $3 million and to maintain net worth in an amount equal to the institution's contingency factor (§ 563.13(g)(5)) plus seven percent of liabilities through its first full year, decreasing to six percent in the second year, and to five percent in the third year. Section 563.13(b)(2)(ii), however, provides that "de novo" institutions (1) whose applications for a Federal charter or Federal insurance were received prior to November 3, 1983, but not approved before December 2, 1983; (2) who choose to have their applications processed in accordance with § 571.6(a)(2); and (3) who do not additionally meet the community size (an area with a population of less than 50,000) and investment standards of § 571.6(a)(3), must maintain minimum net worth of at least seven percent of liabilities plus the contingency factor through their first three full years of operation.

Both § 563.13(b)(2)(i) and (b)(2)(ii), although requiring different levels of net worth for the first three years, provide that after that time:

> Upon the approval of the Principal Supervisory Agent pursuant to paragraph (b)(2)(iii) of this section, the minimum net worth [for "de novo" institutions] shall be equal to the amount specified by paragraph (b)(1) of this section.
> (50 FR at 6909.)

A "de novo" institution authorized by its PSA to convert to the standard net-worth calculation under paragraph (b)(1) of this section would combine its base factor computed on its level of liabilities at the end of the prior year, its contingency (also required for "de novo" institutions during their first three years), any amortization factor (generally inapplicable), plus its growth factor on new liabilities. An institution's base factor, as defined under § 563.13(g)(2), is the institution's minimum required amount of net worth calculated as of the last day of the preceding calendar year, excluding its contingency factor and before reduction for qualifying balances. Since a "de novo" institution's minimum required amount of net worth in its third year or later would be five or seven percent, its base factor would incorporate this capital requirement on existing liabilities. Such an institution would be required to continue to satisfy its contingency factor. The amortization factor would generally be inapplicable to such an institution since "de novo" institutions have never been authorized to use the five year averaging or twenty-year phase-in techniques. Finally, the most signficant change for such an institution would be that the sliding-scale growth factor of from 2.35 to 5 percent would apply to its marginal growth instead of a straight 5 or 7 percent of liabilities.

Board's Capitalization Concerns

The Board has been concerned for a number of years about the inadequate level of capital of insured institutions, particularly rapidly growing institutions. In the "de novo" regulation and the net-worth regulation, the Board also addressed the risks of excessive leverage of minimal capital and the scant protection afforded to depositors and to the FSLIC by such minimal capital. The Board also noted that the use of institutions' expanded asset powers to engage in higher risk/yield activities, which many "de novo" institutions could undertake from inception, requires reliance on adequate capital buffers. Furthermore, the Board has stressed that in addition to serving a loss absorption function, adequate capital helps to ensure prudent risk-taking activity by the owners and managers of insured institutions. If shareholders have significant levels of their own capital at risk, rather than simply looking to FSLIC deposit insurance to absorb the loss and rescue depositors, those stockholders have great incentive to carefully analyze management's risk-taking activity.

In light of the great value of adequate capital, the Board is continuing to study the adequacy of the industry's capital base and the industry's financial problems, particularly focusing on the rapid growth, high leverage, and diverse asset powers of insured institutions. The industry's ratio of net worth to total assets was 5.26 percent in December 1980, but fell to 3.86 percent under regulatory accounting principles by 1983. Adoption of the net-worth regulation plus the improved interest-rate environment helped to stop this slide and to increase the industry's ratio of regulatory net worth to total assets from 3.88 percent (as of January 1, 1985) to 4.38 percent (as of December 31, 1985). Nonetheless, the Board, particularly in light of the expiration of the current net-worth regulation on January 1, 1987, continues to study the industry's capital needs, credit risk, interest-rate risk, and overall financial health.

The Amended Regulation

The Board is hereby terminating its delegation of authority to the Principal Supervisory Agents under § 563.13(b)(2) and will exercise this authority directly in order to ensure a uniform national policy consistent with the Board's continuing review of the industry's capital requirements and financial soundness. This amendment eliminates the PSA level of review, which could be appealed to the FSLIC if the PSA refused to allow an institution to change to the § 563.13(b)(1) standard. It should be noted, however, that this PSA review process did not guarantee or presume that a PSA would permit a "de novo" institution to change to the computation method under § 563.13(b)(1). To the contrary the regulation expressly contemplated that PSA review would result in denial if, for example, the agent raised supervisory objections to the "probable effect of such reduction on the institution's safe and sound operating condition." 50 FR 6910. By its action today, the Board is simply centralizing this discretionary authority to facilitate a uniform national policy consistent with the Board's continuing review of the industry's capital requirements. The Board will evaluate each approval request based on its ongoing assessment of the industry's capital needs and its review of an individual "de novo" institution's net-worth level and supervisory record. The relatively low number and dispersed timing of the potential applications by "de novo" institutions to shift to the net-worth calculation method under § 563.13(b)(1) will prevent an excessive review burden for the Board or inordinate delay for applying institutions.

Pursuant to 12 CFR 508.11 and 508.14, the Board finds that because this amendment is a technical change regarding a rule of Board organization, procedure, or practice, notice and public procedure are unnecessary, as is the 30-day delay of the effective date.

List of Subjects in 12 CFR 563

Bank deposit insurance, Investments, Reporting and recordkeeping requirements, Savings and loan associations.

Accordingly, the Board hereby amends Part 563, Subchapter D, Chapter V, Title 12, *Code of Federal Regulations*, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

1. The authority citation for Part 563 is revised to read as follows:

Authority: Sec. 4, 80 Stat. 824, as amended (12 U.S.C. 1425b); sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1437); sec. 2, 48 Stat. 128, as amended (12 U.S.C. 1462); Sec. 5A, 47 Stat. 727, as amended by sec. 1, 64 Stat. 256, as amended, sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1464); sec. 5, 48 Stat. 132, as amended (12 U.S.C. 1464); sec. 202, 96 Stat. 1469; sec. 409, 94 Stat. 160; secs. 401–407, 48 Stat. 1255–1260, as amended (12 U.S.C. 1724–1730); sec. 408, 82 Stat. 5, as amended (12 U.S.C. 1730a); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp. p. 1071 unless otherwise noted.

2. Amend § 563.13 by revising paragraph (b)(2) to read as follows:

§ 563.13 Regulatory Net-Worth requirement.

* * * * *

(b) *minimum required amount*—(1)

* * *

(2) *Exceptions for de novo institutions.*

(i) The minimum net-worth requirement for "de novo" institutions shall be an amount equal to the sum of the contingency factor plus seven percent of liabilities of the institution, which shall decline by 100 basis points for each year following the beginning of the first full fiscal year until equal to five percent; thereafter, upon the approval of the Board, such a "de novo" institution's minimum net-worth shall be equal to the

VOL 51 ISS 82 AP 29 1986 UMI

amount specified by paragraph (b)(1) of this section.

(ii) "De novo" institutions which elect to have their applications for insurance of accounts processed in accordance with the policy set forth in § 571.6(a)(2) of this Subchapter but which do not additionally qualify under § 571.6(a)(3), shall have, for the period between commencement of operations and the beginning of the first full fiscal year and for three years following the beginning of the first full fiscal year, minimum net worth equal to the sum of the contingency factor plus seven percent of all liabilities; thereafter, upon the approval of the Board, such a "de novo" institution's minimum net worth shall be equal to the amount specified by paragraph (b)(1) of this section.

* * * * *

§ 563.13 [Amended]

3. Amend § 563.13 by removing the authority citation located at the end of this section.

By the Federal Home Loan Bank Board.

Jeff Sconyers,

Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 941

[Docket No. 40564-6008]

Fagatele Bay National Marine Sanctuary Regulations

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Final rule and notice of designation.

SUMMARY: This publication includes the final designation of the Fagatele Bay National Marine Sanctuary (Sanctuary) and the final regulations for the Sanctuary. The final designation includes description of: The effect of designation, the area, special characteristics of the area, scope of the regulations, relation of the designation to other regulatory programs, procedures for alterations to the designation and funding. The final regulations define which activities are allowed and which are prohibited within the Sanctuary, the procedures by which persons may obtain permission to conduct activities otherwise prohibited, and the penalties for committing prohibited acts without a permit. The purpose of designating the Sanctuary is to protect and preserve an example of a pristine tropical marine habitat and coral reef terrace ecosystem of exceptional biological productivity, to expand public awareness and understanding of tropical marine environments, to expand scientific knowledge of marine ecosystems; to improve resource management techniques, and to regulate uses within the Sanctuary to ensure the health and well-being of the ecosystem and its associated flora and fauna.

EFFECTIVE DATE: July 31, 1986. [The expiration of 60 days of continuous session of Congress from date of this publication—see discussion below].

FOR FURTHER INFORMATION CONTACT: Dr. Nancy Foster, Chief, or William Thomas, Assistant Project Manager, Sanctuary Programs Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 3300 Whitehaven Street, NW., Washington, D.C. 20235. (202/634-4236).

SUPPLEMENTARY INFORMATION: Title III of the Marine Protection, Research and Sanctuaries Act of 1972 has been amended twice—once in 1980 and once in 1984 (Pub. L. 92-532 as amended by Pub. L. 96-332 and Pub. L. 98-498, 16 U.S.C. 1431-1439, hereinafter referred to as to the Act). The Fagatele Bay National Marine Sanctuary was designated entirely under the process set forth in the 1980 amendments. Thus, initial references in this discussion will be to the current Act and the [bracketed] references to the 1980 provisions followed during the Fagatele Bay designation. Section 303(a) of the Act [section 302(a) of Pub. L. 96-332] authorizes the Secretary of Commerce to designate discrete areas of the marine environment as national marine sanctuaries for the purpose of protecting their conservation, recreational, historical, research, educational, or aesthetic qualities which give them national significance. Section 302(a) of the Act [section 302(f)(2) of Pub. L. 96-332] directs the Secretary to issue necessary and reasonable regulations to control any activities permitted within a designated marine sanctuary. The responsibility for administering the provisions of the Act and its authority has been delegated to the Assistant Administrator for Ocean Services and Coastal Zone Management within the National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce (the Assistant Administrator).

In March 1982, a proposal nominating Fagatele Bay, American Samoa, as a candidate for marine sanctuary designation, was submitted to the National Oceanic and Atmospheric Administration (NOAA). The recommendation submitted by Governor Peter T. Coleman of American Samoa cited, among other benefits of marine sanctuary designation, the development and implementation of a comprehensive management plan that would serve to: (1) Protect the Bay's natural resources and pristine character; (2) create and enhance public awareness and understanding of the need to protect marine resources; (3) expand scientific examination of marine ecosystems associated with the high islands found in the Pacific, especially coral reefs that have been infested by the crown-of-thorns starfish, and apply scientific knowledge to the development of improved resource management techniques; and (4) allow uses of the sanctuary that are compatible with the sanctuary designation, giving highest priority to nondestructive traditional and public recreational uses.

In April 1982, NOAA placed the nominated area on the List of Recommended Areas (LRA) and, after preliminary public and agency consultation, further declared the area an Active Candidate. After preparation and distribution of an Issue Paper by NOAA's Office of Coastal Zone Management in May 1982, a public workshop was held in American Samoa to solicit additional comments on the feasibility of further considering the site as a national marine sanctuary.

Based on the workshop results and in consultation with other Federal agencies and the American Samoa Government, a decision was made to proceed to the next step toward designation—development of a draft environmental impact statement and sanctuary management plan (DEIS) for the proposed sanctuary. The DEIS, which contained an analysis of the draft regulations, was distributed on October 27, 1983. A public hearing was held in American Samoa on January 18, 1984 to receive testimony on the DEIS. Comments on the DEIS were accepted until January 20, 1984. The major concern voiced by persons testifying at the public hearing was that the proposed boundary and restrictions on commercial fishing may adversely affect some commercial fishermen who use the outer portion of the bay to fish when other waters may be too rough. After consultation with the American Samoa Development Planning Office and the Office of Marine Resources, the boundary of the sanctuary was divided into zones, allowing commercial fishing in the outer half of the bay. These changes were reflected in the draft regulations. There were no other substantive written or verbal comments generated by the public hearing. Comments received by the NOAA on the DEIS were reviewed and, where appropriate, were incorporated into the final environmental impact statement and management plan (FEIS).

The draft regulations were published on December 4, 1984 (49 FR 47415) and comments were accepted until February 4, 1985. One reviewer noted the lack of definitions and suggested that certain definitions be added. Thus, the following terms have been included in the final regulations and defined: "benthic community", "commercial fishing", "cultural resources", "designation", "director", "the management plan", "permit", "permittee", "persons", "the Sanctuary", "sanctuary manager", and "Secretary". There were no other major comments.

Inasmuch as the Secretary was proposed under the Act as amended in 1980 (Pub. L. 96-332), Congress determined that it would not be necessary for these regulations and Notice of Designation to be transmitted to and reviewed by Congress under the new amendments to the Act (Pub. L. 98-498) (See House Report No. 98-167, 98th Congress, 1st Session, page 24; exempting from the new Congressional review procedures any proposed sanctuary for which the public comment period on the Draft Environmental Impact Statement has closed prior to the effective date of the 1984 amendments to the Act). Hence, the Congressional review provisions of the Act as amended in 1980, Pub. L. 96-332, apply to the designation of the Sanctuary.

Accordingly, these implementing regulations and Notice of Designation shall be transmitted to Congress, and to the Governor of American Samoa, and shall take effect on July 31, 1986, the expiration of a review period of sixty (60) days of continuous session of Congress beginning on April 30, 1986, unless the Governor of American Samoa certifies to the Secretary before the end of the 60-day period beginning from the date of this publication that the designation or any of its terms is unacceptable.

Although the 1980 amendments to the Act provided a procedure for Congressional disapproval of the regulations through adoption of a concurrent resolution by both Houses of Congress, the Supreme Court has since held that such disapproval procedures are unconstitutional (*INS v. Chada*, 462 U.S. 919, 103 S. Ct. 2764(1983)). NOAA will follow the ruling in *INS v. Chada* in this final rule making and treat the Congressional disapproval procedure of Pub. L. 96-332 as a "report and wait" provision. NOAA will publish a notice of the effective date of these final regulations on July 31, 1986.

Other Matters

(A) Classification Under Executive Order 12291

Executive Order 12291 (E.O. 12291) defines a "major rule" as "any regulation that is likely to result in: (1) An annual effect on the economy of $100,000,000 or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete in domestic or export markets." The major activities supported by the area within the proposed sanctuary consist of small-scale recreational and subsistence activities.

Most of the activities in the proposed sanctuary are not affected by sanctuary regulations; the economic impacts on affected activities are minor and the regulations do not restrict recreational activities. Because the impact of the regulations on economic interests is minor or because the activities are not regulated at all, the Assistant Administrator has determined that this is not a "major rule" under E.O. 12291.

(B) Regulatory Flexibility Act Analysis

A Regulatory Flexibility Analysis is not required for this notice of rulemaking. These regulations set forth which activities are allowed and which are prohibited in the proposed Fagatele Bay National Marine Sanctuary; the procedures by which persons may obtain permits for activities otherwise prohibited; and the penalties for committing prohibited acts without a permit. These rules do not directly affect "small government jurisdictions" as defined by Pub. L. 96-354, the Regulatory Flexibility Act, and the rules will have no effect on small business. For the same reasons, the General Counsel has certified to the Small Business Administration that the regulations will not have a significant economic impact on a substantial number of small entities within the area of the proposed sanctuary under the Regulatory Flexibility Act.

(C) Paperwork Reduction Act of 1980 (Pub. L. 96-511)

This rule contains a collection of information requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). The collection has been approved by the Office of Management and Budget under control number 0648-0141.

The Designation Document

The Act and NOAA's general marine sanctuary regulations (15 CFR Part 922, 44 *FR* 44831, July 31, 1979) provide that the management system for a marine sanctuary will be established by two documents, a Designation Document and the regulations issued pursuant to sections 303(a) and 304 of the Act. The Designation Document will serve as a constitution for the Sanctuary, establishing among other things the purposes of the Sanctuary, the types of activities that may be subject to regulation within it, and the extent to which other regulatory programs will continue to be effective. Thus the Desighation Document for the Fagatele Bay National Marine Sanctuary as published in the Final Environmental Impact Statement (Notice of Availability, 49 FR 28613, 6/13/84) is as follows:

Final Designation Document

Designation of the Fagatele Bay National Marine Sanctuary

Preamble

Under the authority of the Marine Protection, Research and Sanctuaries Act of 1972, Pub. L. 92-532, (the Act) certain waters off American Samoa are hereby designated a National Marine Sanctuary for the purposes of preserving and protecting this unique and fragile ecosystem.

Article 1. Effect of Designation

The designation of the Fagatele Bay National Marine Sanctuary (the Sanctuary) described in Article 2, establishes the basis for cooperative management of the area by the Territory of American Samoa (Territory) and the National Oceanic and Atmospheric Administration (NOAA).

Within the area designated as the Sanctuary, the Act authorizes promulgation of such regulations as are reasonable and necessary to protect the values of the Sanctuary. Article 4 of the Designation lists those activities which may require regulation, but the listing of any activity does not by itself prohibit or restrict it. Restrictions or prohibitions may be accomplished only through

VOL 51 ISS 82 AP 29 1986 UMI

regulation, and additional activities may be regulated only by amending Article 4.

Article 2. Description of the Area

The Sanctuary consists of 163 acres. (.25 square miles) of bay area off the southwest coast of Tutuila Island, American Samoa. The precise boundaries are defined by regulations.

Article 3. Special Characteristics of the Area

The Sanctuary contains a unique and vast array of tropical marine organisms, including corals and a diverse tropical reef ecosystem with endangered and threatened species, such as the hawksbill and green sea turtles, and marine mammals like the Pacific bottlenose dolphin. The area provides exceptional scientific value as an ecological, recreational, and aesthetic resource and unique educational and recreational experiences.

Article 4. Scope of Regulation

Section 1. *Activities Subject to Regulation.* In order to protect the distinctive values of the Sanctuary, the following activities may be regulated within the Sanctuary to the extent necessary to ensure the protection and preservation of the coral and other marine values of the area:

a. Taking or otherwise damaging natural resources.
b. Discharging or depositing any substance.
c. Disturbing the benthic community.
d. Removing or otherwise harming cultural or historical resources.

Section 2. *Consistency with International Law.* The regulations governing the activities listed in Section 1 of this Article will apply to foreign flag vessels and persons not citizens of the United States only to the extent consistent with recognized principles of international law, including treaties and international agreements to which the United States is signatory.

Section 3. *Emergency Regulations.* Where essential to prevent immediate, serious, and irreversible damage to the ecosystem of the area, activities other than those listed in Section 1 may be regulated within the limits of the Act on an emergency basis for an interim period not to exceed 120 days, during which an appropriate amendment of this Article will be proposed in accordance with the procedures specified in Article 6.

Article 5. Relation to Other Regulatory Programs

Section 1. *Other Programs.* (a) NOAA may adopt all regulatory programs pertaining to fishing, including any regulations promulgated by the American Samoa Government and all permits, licenses, and other authorizations issued pursuant thereto under the following conditions:

(1) No alteration or modification of any Sanctuary regulation shall become effective without the written concurrence of both the Territory and NOAA; and

(2) The Territory shall be responsible for enforcing all Sanctuary regulations to ensure protection for the values of the Sanctuary. NOAA will engage in enforcement activities only if requested by the Territory or if there has been significant failure to provide adequate enforcement as determined under this Section.

(b) Where the Territory shall propose any alteration or modification of the regulations described in Article 4, such alteration or modification shall be submitted to NOAA for agreement and simultaneous proposal in the Federal Register. Such alteration or modification shall be finally adopted unless, based on the comments received on the Federal Register notice and after consultation with the Territory, NOAA determines that the regulations with the proposed amendments do not provide reasonable and necessary protection for the values of the Sanctuary.

(c) Should NOAA preliminary determine that there has been significant failure to provide adequate enforcement, it shall notify the Territory of this deficiency and suggest appropriate remedial action. If, after consultation, NOAA and the Territory are unable to agree that a deficiency exists or on an appropriate remedial action, NOAA may issue a final determination in writing specifying the deficiency and the appropriate action together with the reasons therefore. No less than sixty (60) days prior to issuing a final determination that calls for NOAA to take enforcement action, NOAA shall submit the proposed determination to the Governor of American Samoa. If the Governor finds that NOAA enforcement is unnecessary to protect the values of the Sanctuary, the Governor shall inform NOAA of his objections within thirty (30) days after receipt of the proposed determinations and NOAA shall give such finding presumptive weight in making its final determination.

(d) All applicable regulatory programs will remain in effect, and all permits, licenses, and other authorizations issued pursuant thereto will be valid within the Sanctuary unless inconsistent with any regulation implementing Article 4. The Sanctuary regulations will set forth any certification procedures.

Section 2. *Defense Activities.* The regulation of those activities listed in Article 4 shall not prohibit any activity conducted by the Department of Defense that is essential for national defense or because of emergency. Such activities shall be conducted consistently with such regulations to the maximum extent practicable. All other activities of the Department of Defense are subject to Article 4.

Article 6. Alteration to this Designation

(a) This designation may be altered only in accordance with the same procedures by which it has been made, including public hearings, consultation with interested Federal and Territorial agencies and the Western Pacific Regional Fishery Management Council, and approval by the Governor of American Samoa and the President of the United States.

Article 7. Funding

In the event that a reduction in the funds available to administer the Sanctuary necessitates a reduction in the level of enforcement provided by the Territory, the resulting reduced level of enforcement shall not, by itself, constitute a basis for finding deficiency under Article 5, Section 1.

[End of Designation Document]

Before any additional activities may be regulated on other than an emergency basis, the Designation must be amended through the entire designation procedure including public hearings.

List of Subjects in 15 CFR Part 941

Administrative practice and procedure, Environmental protection, Marine resources, Natural resources.

Dated: April 23, 1986.

Paul M. Wolff,

Assistant Administrator for Ocean Services and Coastal Zone Management.

Federal Domestic Assistance Catalog Number 11.429, Marine Sanctuary Program

Accordingly, 15 CFR Part 941 is added as follows:

PART 941—FAGATELE BAY NATIONAL MARINE SANCTUARY REGULATIONS

Sec.
941.1 Authority.
941.2 Purpose.
941.3 Scope of regulations.
941.4 Boundaries.
941.5 Definitions.

Sec.
941.6 Management and enforcement.
941.7 Allowed activities.
941.8 Activitives prohibited or controlled.
941.9 Other authorities.
941.10 Penalties for commission of prohibited acts.
941.11 Permit procedures and criteria.
941.12 Appeal of permit action.

Authority: Title III of Pub. L. 98-498, 16 U.S.C. 1431-1439. (Pub. L. 92-532 as amended by Pub. L. 96-332 and Pub. L. 98-498)

§ 941.1 Authority.

The Sanctuary has been designated by the Secretary of Commerce pursuant to the authority of section 303(a) of the Marine Protection, Research and Sanctuaries Act of 1972, (the Act), 16 U.S.C. 1433; (Pub. L. 98-498). The following regulations are issued pursuant to Title III of the Act.

§ 941.2 Purpose.

The purpose of designating the Fagatele Bay National Marine Sanctuary is to protect a unique deepwater terrace formation and a coral reef ecosystem representative of the warm water tropical Pacific Islands in its natural state and to regulate uses within the Sanctuary to ensure the health and integrity of the ecosystem and its associated flora and fauna.

§ 941.3 Scope of regulations.

The provisions of this Part apply only to the area defined by regulation as the Fagatele Bay National Marine Sanctuary (the Sanctuary). Neither these provisions nor any permit issued under its authority shall be construed to relieve a person from any other requirements imposed by statute or regulation of the Territory of American Samoa or of the United States. In addition, no statute or regulation of the Territory of American Samoa shall be construed to relieve a person from the restrictions, conditions, and requirements contained in this Part.

§ 941.4 Boundaries.

The Sanctuary is a 163-acre (.25 sq. mi.) coastal embayment formed by a collapsed volcanic crater on the island of Tutuila, American Samoa. The site is divided into two Subzones, *A* and *B*, and includes Fagatele Bay in its entirety up to mean high high water (MHHW). The seaward boundaries are defined by straight lines between the following points, as approved by the NOAA Charting Services Branch, and the American Samoa Department of Public Works:

Point	Pt. No.	Subzone	Latitude	Longitude
Fagatele Point	1-1	A	14°22'15" S.	170°46'5" W
Matautuloa Benchmark	1-2	A	14°22'15" S.	170°45'35" W
Fagatele Point	2-1	B	14°22'15" S.	170°46'5" W
Steps Point	2-2	B	14°22'44" S.	170°45'27" W

§ 941.5 Definitions.

(a) "Administrator" means the Administrator of the National Oceanic and Atmospheric Administration (NOAA).

(b) "Assistant Administrator" means the Assistant Administrator for Ocean Services and Coastal Zone Management, National Ocean Service, National Oceanic and Atmospheric Administration, or his or her successor, or designee.

(c) "Benthic Community" means the assemblage of organisms, substrate, and structural formations found at or near the bottom that is periodically or permanently covered by water.

(d) "Commercial Fishing" means any activity that results in the sale or trade for intended profit of fish, shellfish, algae, or corals.

(e) "Cultural Resources" means any historical or cultural feature, including archaeological sites, historic structures, shipwrecks, and artifacts.

(f) "Designation" means the action taken by the Secretary of Commerce, to prescribe, through a Designation Document and implementing rules and regulations, the terms for establishing the Sanctuary.

(g) "Director" means Director of the Development Planning Office, Territory of American Samoa or the head of any successor agency.

(h) "The Management Plan" means the document that outlines the day-to-day operations of the Fagatele Bay National Marine Sanctuary and includes but is not limited to provisions for Research, Interpretation, Surveillance and Enforcement, and Administration.

(i) "Permit" means any document issued under Federal or territorial authority, signed by an authorized official, and specifying the permitted actions.

(j) "Permittee" means any person issued a valid permit as defined in (i) above and pursuant to the requirements of these regulations.

(k) "Persons" means any private individual, partnership, corporation, or other entity; or any officer, employee, agent, department, agency or instrumentality of the Federal Government, or any State or local unit of government.

(l) "The Sanctuary" means the Fagatele Bay National Marine Sanctuary.

(m) "Sanctuary Manager" means the person hired by NOAA to manage and operate the Sanctuary.

(n) "Secretary" means the Secretary of Commerce, or his or her successor or designee.

§ 941.6 Management and enforcement.

The National Oceanic and Atmospheric Administration (NOAA) has primary responsibility for the management of the Sanctuary pursuant to the Act. The American Samoa Development Planning Office (DPO) will assist NOAA in the administration of the Sanctuary, and act as the lead agency, in conformance with the Designation Document, these regulations, and the terms and provisions of any grant or cooperative agreement. In accordance with § 922.32(b) of the National Marine Sanctuary Program Regulations, 15 CFR Part 922, NOAA may act to deputize enforcement agents of the American Samoa Government (ASG) to enforce these regulations. If NOAA chooses to exercise this provision, a memorandum of understanding shall be executed between NOAA and the ASG or the person(s) or entity authorized to act on their behalf. Prosecution of violations will be carried out by NOAA in accordance with § 941.10 of these regulations.

§ 941.7 Allowed activities.

All activities except those specifically prohibited by § 941.8 may be carried out within the Sanctuary subject to all prohibitions, restrictions, and conditions imposed by other authorities.

§ 941.8 Activities prohibited or controlled.

(a) Unless permitted by the Assistant Administrator in accordance with § 941.11, or as may be necessary for national defense, or to respond to an emergency threatening life, property or the environment, the following activities are prohibited or controlled in *Subzones A* and *B* of the Sanctuary. All prohibitions and controls will be applied consistently with international law. Refer to § 941.10 for penalties for commission of prohibited acts.

(1) *Taking and Damaging Natural Resources.* (i) No person shall gather, take, break, cut, damage, destroy, or possess any invertebrate, coral, bottom formation, or marine plant.

VOL 51 ISS 82 AP 29 1986 UMI

(ii) No person shall take, gather, cut, damage, destroy, or possess any crown-of-thorns starfish (*Acanthaster planci*).

(iii) No person shall possess or use poisons, electrical charges, explosives, or similar environmentally destructive methods.

(iv) No person shall posses or use spearguns, including such devices known as Hawaiian slings, pole spears, arbalettes, pneumatic and spring-loaded spearguns, bows and arrows, bang sticks, or any similar taking device.

(v) No person shall possess or use seines, trammel nets, or any fixed net.

(vi) There shall be a rebuttable presumption that any items listed in these paragraphs found in the possession of a person within the Sanctuary have been used, collected, or removed from within the Sanctuary.

(2) *Operation of Vessels.* (i) No vessel shall approach closer than 200 feet to a vessel displaying a dive flag except at a maximum speed of three knots.

(ii) All vessels from which diving operations are being conducted shall fly in a conspicuous manner the international code flag alpha "A."

(iii) All vessels shall be operated to avoid striking or otherwise causing damage to the natural features of the Sanctuary.

(3) *Discharges.* No person shall litter, deposit, or discharge any materials or substances of any kind into the waters of the Sanctuary.

(4) *Disturbance of the Benthic Community.* Disturbance of the benthic community by dredging, filling, dynamiting, bottom trawling, or any alteration of the seabed shall be prohibited.

(5) *Removing or Damaging Cultural Resources.* No person shall remove, damage, or tamper with any historical or cultural resource within the boundaries of the Sanctuary.

(6) *Taking of Sea Turtles.* No person shall ensnare, entrap, or fish any sea turtle while it is listed as a threatened or endangered species as defined by the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 *et seq.*

(7) *Use of Dangerous Weapons.* Except for law enforcement purposes, no person shall use or discharge explosives or weapons of any description within the Sanctuary boundaries. Distress signaling devices, necessary and proper for safe vessel operation, and knives generally used by fishermen and swimmers are not considered weapons for purposes of this subsection.

(8) *Other Prohibitions.* No person shall mark, deface, or damage in any way, or displace or remove or tamper with any signs, notices, or placards, whether temporary or permanent, or with any monuments, stakes, posts, or other boundary markers related to the Sanctuary.

(b) In addition to those activities prohibited or controlled in accordance with § 941.8(a), the following activities are prohibited or controlled in *Subzone A:*

(1) *Taking and Damaging Natural Resources.* (i) No person shall possess or use fishing poles, handlines, or trawls.

(ii) Commercial fishing shall be prohibited.

(c) The prohibitions in this section are not based on any claim of territoriality and will be applied to foreign persons and vessels only in accordance with recognized principles of international law, including treaties, conventions, and other international agreements to which the United States is signatory.

§ 941.9 Other Authorities.

No license, permit or other authorization issued pursuant to any other authority may validly authorize any activity prohibited by § 941.8 unless such activity meets the criteria stated in § 941.11(a), (c) and (d), and is specifically authorized by the Assistant Administrator.

§ 941.10 Penalties for commission of prohibited acts.

Section 307 of the Act, 16 U.S.C. 1437, authorizes the assessment of a civil penalty of not more than $50,000.00 for each violation of any regulation issued pursuant to the Act, and further authorizes a proceeding *in rem* against any vessel used in violation of any such regulation. NOAA will apply to all enforcement matters under the Act the consolidated civil procedure regulations set forth at 15 CFR Part 904.

§ 941.11 Permit procedures and criteria.

(a) Under special circumstances an activity otherwise prohibited by § 941.8 of these regulations may be allowed by permit. The activity must be conducted for research or educational purposes designed to enhance understanding of the Sanctuary environment or to improve resource management decisionmaking. The activity must also be judged not to cause long-term or irreparable harm to the resources of the Sanctuary. A permit may be granted by the Assistant Administrator of NOAA in consultation with the Development and Planning Office.

(b) Any person in possession of a valid permit issued by the Assistant Administrator in accordance with this section may conduct the specified activity in the Sanctuary if such activity is:

(1) Related to research involving Sanctuary resources;

(2) To further the educational value of the Sanctuary; or

(3) For salvage or recovery operations.

(c) Permit applications shall be addressed to the Assistant Administrator for Ocean Services and Coastal Zone Management, ATTN: Sanctuary Programs Division, National Ocean Service, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, NW., Washington, D.C. 20235. An application shall include a description of all proposed activities, the equipment, methods, and personnel involved, and a timetable for completion of the proposed activity. Copies of all other required licenses or permits shall be attached.

(This information collection has been approved by the Office of Management and Budget under control number 0648-0141)

(d) In considering whether to grant a permit, the Assistant Administrator shall evaluate such matters as:

(1) The general professional and financial responsibility of the applicant;

(2) The appropriateness of the methods being proposed for the purpose(s) of the activity;

(3) The extent to which the conduct of any permitted activity may diminish or enhance the value of the Sanctuary as a source of recreation, education, or scientific information; and

(4) The end value of the activity.

(e) In addition to meeting the criteria in § 941.11(a) and (c), the applicant also must demonstrate to the Assistant Administrator that:

(1) The activity shall be conducted with adequate safeguards for the environment; and

(2) The environment shall be returned to, or will regenerate to, the condition which existed before the activity occurred.

(f) In considering an application submitted pursuant to this Section, the Assistant Administrator shall seek and consider the views of the Sanctuary Manager and Director. The Assistant Administrator also may seek and consider the views of any other person or entity, within or outside of the Territorial Government, and may hold a public hearing, as he or she deems appropriate.

(g) The Assistant Administrator may, at his or her discretion, grant a permit which has been applied for pursuant to this section, in whole or in part, and subject the permit to such condition(s) as the Assistant Administrator deems necessary. A permit granted for research related to the Sanctuary may include, but is not limited to, the following conditions:

(1) The Assistant Administrator, Director, or their designated representatives may observe any activity permitted by this section;

(2) Any information obtained in the research site shall be made available to the public; and

(3) The submission of one or more reports of the status of such research activity may be required.

(h) A permit granted pursuant to this section is non-transferrable.

(i) The Assistant Administrator may amend, suspend, or revoke a permit granted pursuant to this section, in whole or in part, temporarily or indefinitely if, in his/her view, the permittee has acted in violation of the terms of the permit or regulations, or for other good cause shown. Any such action shall be communicated in writing to the applicant or permit holder and shall set forth the reason(s) for the action taken. The permittee in relation to whom such action has been taken may appeal the action to the Administrator as provided for in § 941.12.

§ 941.12 Appeal of permit action.

(a) Except for permit actions which are imposed for enforcement reasons and covered by the procedures at Subpart D of 15 CFR Part 904, an applicant for a permit, the permittee, or any other interested person (hereafter Appellant) may appeal the granting, denial, conditioning or suspension of any permit under § 941.11 to the Administrator of NOAA. In order to be considered by the Administrator, such appeal must be in writing, must state the action(s) appealed and the reason(s) therefor, and must be submitted within 30 days of the action(s) by the Assistant Administrator. The Appellant may request an informal hearing on the appeal.

(b) Upon receipt of an appeal authorized by this section, the Administrator may request the Appellant to submit such additional information and in such form as will allow action upon the appeal. The Administrator shall decide the appeal using the criteria set out in § 941.11 (a), (c) and (d) and any information relative to the application on file, any information provided by the Appellant, and such other consideration as is deemed appropriate. The Administrator shall notify the Appellant of the final decision and the reason(s) therefor in writing, normally within 30 days of the date of the receipt of adequate information required to make the decision.

(c) If a hearing is requested, or if the Administrator determines that one is appropriate, the Administrator may grant an informal hearing before a Hearing Officer appointed for that purpose. The Appellant and any other interested persons may appear personally or by counsel at the hearing and submit material and present arguments as determined appropriate by the Hearing Officer. Within 30 days of the last day of the hearing, the Hearing Officer shall recommend a decision in writing to the Administrator.

(d) The Administrator may adopt the Hearing Officer's recommended decision, in whole or in part, or may reject or modify it. In any event, the Administrator shall notify the interested persons of his or her decision, and the reason(s) therefor in writing within 30 days of receipt of the recommended decision of the Hearing Officer. The Administrator's decision shall constitute final action by NOAA for purposes of the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*

(e) Any time limit prescribed in this Section may be extended by the Administrator for good cause for a period not to exceed 30 days, either upon his or her own motion or upon written request from the Appellant, permit applicant or permittee stating the reason(s) therefor.

Office of the Assistant Secretary for Housing, Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N-86-1599; FR-2221]

Mortgage Insurance; Changes to the Maximum Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum mortgage limits for high-cost areas.

SUMMARY: This Notice amends the listing of areas eligible for "high-cost" mortgage limits under certain of HUD's insuring authorities under the National Housing Act by adding the limits of nineteen designated high-cost areas to the list. Mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

DATE: Effective Date: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: For single family: Brian Chappelle, Director, Single Family Development Division, Room 9270; telephone (202) 755-6720. For manufactured homes: Christopher Peterson, Director, Office of Title I Insured Loans, Room 9160; telephone (202) 755-6880; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.)

VOL 51 ISS 82 AP 29 1986 UMI

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act (NHA) (12 U.S.C. 1710–1749) authorizes HUD to insure mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and combination manufactured homes and lots. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, sections 2(b) and 214 of the NHA provide for special high-cost limits for insured mortgages in Alaska, Guam and Hawaii.

The Housing and Urban-Rural Recovery Act of 1983 (Pub. L. 98–181, November 30, 1983) (the 1983 Act) further amended HUD's insuring authority. Of particular interest here are: (1) The authorization to insure condominiums in high-cost areas at the same levels as the high-cost limits for one-family residences insured under section 203(b) of the National Housing Act; and (2) the authorization to increase maximum loan limits under the Title I loan insurance program for combination manufactured home and lot loans and for individual lot loans in high-cost areas, so long as the percentage increase in the maximum loan limit does not exceed the percentage increase made to a one-family residence in the area authorized under section 203(b) of the NHA.

The Department implemented these provisions of the 1983 Act in related documents published in the **Federal Register** on April 11, 1984 (see 49 FR 14332, 14335, 14336), effective May 22, 1984. These documents amended the Department's rules to codify the procedure of announcing high-cost mortgage limits for single-family residences, condominiums, combination manufactured homes and lots and manufactured home lots by notice in the **Federal Register** (see the April 11, 1984 documents, amending 24 CFR 201.1504, 203.18b, 203.29, 234.27, and 234.49). In addition, the documents codified the procedure whereby a party may request an alternative mortgage limit (see the same sections cited above).

On May 22, 1984, the Department published a revised list of areas eligible for "high-cost" mortgage limits, which contained several new features (see 49 FR 21520). First, there was no separate listing for condominium units, since these limits are now the same as those for other one-family residences. Second, the listing included instructions on how to compute the high-cost limits for combination manufactured homes and lots and individual lots, and specified the special high-cost amounts for manufactured homes, combination manufactured homes and lots and individual lots insured in Alaska, Guam and Hawaii. And, third, it made changes to the list based on a new definition of "metropolitan area".

On December 6, 1984 (49 FR 47657), May 8, 1985 (50 FR 19341), July 24, 1985 (50 FR 30154), November 6, 1985 (50 FR 45993), January 7, 1986 (51 FR 598), and January 10, 1986 (51 FR 1248), the Department published amendments to the "high-cost" mortgage amounts that added additional areas and further increased the limits of several previously designated high-cost areas.

This Document

Today's document adds Hartford County, Connecticut; Chittenden County, New Hampshire; Rockingham County, New Hampshire; Broward County, Florida; the Knoxville, Tennessee MSA, which includes the Counties of Anderson, Blount, Grainger, Knox, Jefferson, Sevier, and Union; and the Nashville, Tennessee MSA, which includes the Counties of Cheatham, Davison, Dickson, Robertson, Rutherford, Summer, Williamson, and Wilson to the list of high-cost areas.

These amendments to the high-cost areas appear in two parts. Part I explains high-cost limits for mortgages insured under Title I of the National Housing Act. Part II lists any changes for single family residences insured under sections 203(b), and 234(c) of the National Housing Act.

Accordingly, the Commissioner hereby amends the list of high-cost mortgage limits by adding the limits for Hartford County, Connecticut; Chittenden County, New Hampshire; Rockingham County, New Hampshire; Broward County, Florida; the Knoxville, Tennessee MSA, which includes the Counties of Anderson, Blount, Grainger, Knox, Jefferson, Sevier, and Union; and the Nashville, Tennessee MSA, which includes the Counties of Cheatham, Davison, Dickson, Robertson, Rutherford, Summer, Williamson, and Wilson, as set forth in Part II of the following Table:

National Housing Act High Cost Mortgage Limits

I. Title I: Method of Computing Limits

A. *Section 2(b)(1)(D). Combination manufactured home and lot (excluding Alaska, Guam and Hawaii):* To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example Hartford County, Connecticut, has a one-family limit of $90,000. The combination home and lot loan limit for Hartford County is $90,000 × .80, or $72,000.

B. *Section 2(b)(1)(E):* Lot only (excluding Alaska, Guam and Hawaii): To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Hartford County, Connecticut, has a one-family limit of $90,000. The lot only loan limit for Hartford County, is $90,000 × .20, or $18,000.

C. *Section 2(b)(2). Alaska, Guam and Hawaii limits:* The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam, and Hawaii are as follows:

1. For manufactured homes: $56,700. ($40,500 × 140%).

2. For combination manufactured homes and lots: $75,600. ($54,000 × 140%).

3. For lots only: $16,900. ($13,500 × 140%).

BILLING CODE 4210-27-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 51

[AD FRL 2927-9]

Air Quality Implementation Plans; Stack Height Regulations; Petitions Denied

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of denial of petitions for reconsideration.

SUMMARY: On July 8, 1985 (50 FR 27892), EPA published revisions to rules required under section 123 of the Clean Air Act (Act) to ensure that the degree of emission limitation required for the control of any air pollutant under an applicable State implementation plan (SIP) is not affected by that portion of any stack height which exceeds good engineering practice (GEP) height, or by any other dispersion technique. The American Electric Power Service Corporation (AEP), the Consolidation Coal Company (Consol), and the Ormet Corporation (Ormet) have petitioned the Administrator to reconsider certain portions of the stack height regulations pertaining to the Kammer power plant in West Virginia. The EPA is denying the petitions on the grounds that the petitioners did not submit any new information warranting reconsideration of the rules, and that EPA's previous decisions were correct.

DATE: This determination is effective April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Eric Ginsburg, MD–15, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5540.

SUPPLEMENTARY INFORMATION:

Docket Statement

The petitions for reconsideration, EPA's detailed responses, provided in a support document for this notice, and all pertinent information concerning the development of the stack height rules have been filed in Docket No. A–83–49. The docket is open for inspection by the public between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, at the EPA Central Docket Section (LE–131), West Tower Lobby, Gallery One, 401 M Street, SW., Washington, DC 20460. Background documents normally available to the public, such as **Federal Register** notices and Congressional Committee reports, are not included in the docket. A reasonable fee may be charged for copying documents.

Background

Section 123 of the Act requires EPA to promulgate rules to assure that the degree of emission limitation required for the control of any air pollutant under an applicable SIP is not affected by stack heights exceeding GEP height or by any other dispersion technique.

The EPA originally promulgated regulations to implement section 123 requirements on February 8, 1982, at 47 FR 5864. Those regulations were challenged by the Sierra Club Legal Defense Fund, Inc.; the Natural Resources Defense Council, Inc.; and the Commonwealth of Pennsylvania; and on October 11, 1983, the U.S. Court of Appeals for the D.C. Circuit remanded portions of the regulations for reconsideration, reversing two portions, and unholding certain others [*Sierra Club* v. *EPA*, 719 F.2d 436 (1983)]. The EPA proposed revisions to the stack height rules on November 9, 1984 (49 FR 44878). A public hearing was held on January 8, 1985, after which EPA provided several additional opportunities for supplemental and rebuttal comments. The EPA promulgated final revisions to the rules on July 8, 1985 (50 FR 27892). The final rules contain changes made in response to comments submitted on the proposal.

In September 1985, Ormet, AEP, and Consol filed petitions for reconsideration of these rules. The petition from Ormet and AEP were submitted pursuant to section 307(d)(7)(B) of the Act.[1] However, in the event that EPA found that the rules were not covered by section 307(d), the petitioners requested that EPA treat their petitions as petitions for amendment, repeal, or revision under the Administrative Procedure Act, 5 U.S.C. section 553(e). Consol did not identify a statutory basis for its petition.

Section 307(d) applies only to certain enumerated EPA actions, which do not include the promulgation of regulations under section 123. *See section 307(d)(1).* Therefore, EPA has decided to treat the petitions as petitions for revision of a rule under section 3(e) of the Administrative Procedure Act, 5 U.S.C. 553(e), which establishes a general right to petition for issuance, amendment or repeal of an agency rule. The standard of review for a petition for revision is whether the petitioner has presented new information that warrants reconsideration of the rule. *See generally Oljato Chapter of Navajo Tribes* v. *Train*, 515 F.2d 654 (D.C. Cir. 1975). Under this standard, EPA has concluded that these petitioners have presented no new information warranting revision of the stack height rules.

Petitions for Reconsideration

None of the petitions present new factual information. Instead, the petitioners object to certain provisions of the rules, and to modifications thereto, which were made in response to public comments addressing the notice of proposed rulemaking. Particularly, the petitioners object to the application of these provisions to the Kammer power plant in West Virginia, a facility that is owned by the Ohio Power Company, a subsidiary of AEP. In essence, petitioners are challenging EPA's decision to adopt certain parts of its proposed rules and to change others without providing additional opportunity to comment.

The EPA is not required to reconsider its rules in light of such claims. If petitions for revision were to be granted on such grounds, EPA would be required to repropose its rules every time it modified a proposal in response to comments. The Administrative Procedure Act does not require such a result.

[1] Section 307(d)(7)(B) provides that the Administrator shall convene a proceeding to reconsider certain actions enumerated in section 307(d)(1) if a person raising an objection can demonstrate that (1) it was impracticable to raise such objection during the comment period or that grounds for the objection arose after the comment period, and (2) the objection is of central relevance to the rule.

VOL 51 ISS 82 AP 29 1986 UMI

Moreover, in this rulemaking EPA provided a 30-day extension of the initial comment period and an additional 75-day period for submission of supplemental and rebuttal comments on the proposal. The purpose of this supplemental period was to allow members of the public to address issues raised by other commenters during the comment period and at the public hearing on January 6, 1985. Accordingly, EPA believes that petitioners have had ample opportunity to respond to all comments on the proposal, including the comments that persuaded EPA to modify certain parts of the proposal. With the exception of Ormet, which did not comment on the proposed revisions, the petitioners have presented essentially the same comments that were provided during the public comment period.

Nevertheless, EPA has examined the merits of the petitions and has concluded that petitioners' arguments do not warrant reconsideration of this rulemaking. All of the modifications cited by petitioners are logical outgrowths of comments submitted during the comment period on the proposal. None were based on any new factual information that had not been subject to public scrutiny.

A summary of the petitioners' objections and EPA's responses is provided below. Additionally, EPA has prepared a support document containing responses to petitioners' major contentions. This document has been placed in Docket A–83–49. Copies can be obtained from the Central Docket Section or by writing to Mr. Eric Ginsburg at the address given above.

Presumptive Emission Limit for Credit Exceeding Formula GEP

The final regulations require that sources undertake demonstrations to justify credit for stack height exceeding the height determined by formulae provided in 40 CFR 51.1(ii)(2). In so doing, the sources are required to meet an emission limit that is equivalent to the new source performance standards (NSPS), unless demonstrated to be infeasible on a case-by-case basis. Further discussion of the basis for this requirement is contained in the preamble to the regulations and in the response to comments document contained in Docket A–83–49.

The petitioners argue that the presumptive NSPS emission limit should be eliminated on the following grounds:

—No authority is provided under section 123 to adopt such a limit,

—The limit was not subject to adequate public notice and opportunity for comment, and

—The EPA has not properly considered the retroactivity analysis prescribed by the court in *Sierra Club* v. *EPA* in applying the limit retroactively.

The EPA disagrees with all three of these arguments. While specifying an emission limit such as the presumptive NSPS limit is not required by the Act in so many words, its adoption is consistent with and pursuant to the instructions from the U.S. Court of Appeals in its decision to remand the definition of "excessive concentrations" to EPA. The use of a technology-based emission limit, specifically including NSPS, in fluid modeling demonstrations was, in fact, discussed in the November 9, 1984, proposal. While that notice proposed the use of several alternative emission rates, comments received during the initial and supplemental comment periods convinced EPA that there were serious flaws in two of the three alternatives. Comments were received during the comment periods which addressed the use of NSPS as a prerequisite emission control requirement for credit above formula GEP, and which either supported or opposed the use of minimum emission control requirements as a general prerequisite for stack height credit. Finally, EPA has previously described the basis for its decision to apply the presumptive NSPS limit retroactively in both the preamble to the regulations and in the response to comments document, and the petitioners have introduced no additional information that was not presented during the comment periods.

Definition of "Nearby" Applied to Terrain.

In response to the court decision, EPA adopted a definition of the term "nearby" which restricted the amount of downwash credit that may be obtained based on the effects of upwind terrain features. This definition was first proposed on November 9, 1984, and was adopted in the final rule without change.

Petitioners have argued that EPA has misinterpreted the court decision on this subject and has ignored the factual record concerning terrain-induced downwash in adopting its restriction. These objections merely repeat arguments made during the initial and supplemental comment periods, providing no additional information that would lead EPA to conclude that revision of the regulations is warranted.

The petitioners have interpreted the "nearby" definition to be a technical term that was intended by the court and Congress to grant credit for any significant downwash. In fact, both the legislative history of section 123 and the court decision clearly show that "nearby" was to be strictly construed to limit the extent to which credit for objects far away from the source might frustrate congressional intent to control air pollution through constant emission controls rather than increased dispersion.

Conclusion

For the reasons described above, I have determined that the petitions for reconsideration filed by Ormet, AEP, and Consol present no new information warranting the reopening of stack height rule revisions promulgated on July 8, 1985. Accordingly, the petitions are denied.

Although the requirements of section 307(d) do not apply, under section 307(b)(1) of the Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the District of Columbia Circuit within 60 days of today's date.

Dated: April 21, 1986.

Lee M. Thomas,

Administrator.

40 CFR Parts 60 and 61

[A-3-FRL-3000-5; Docket No. AM705MD]

New Source Performance Standards and National Emissions Standards for Hazardous Air Pollutants, Revision of the State of Maryland's Delegation of Authority

AGENCY: Environmental Protection Agency.

ACTION: Delegation of Authority.

SUMMARY: This Notice changes the Maryland Air Management Administration's (AMA) Delegation of Authority for NSPS and NESHAP. On May 10, 1985, EPA delegated to the AMA the authority to receive delegation of future NSPS and NESHAP standards upon promulgation in the Federal Register. Maryland will now automatically receive delegation of authority to implement and enforce any future NSPS or NESHAP standards on the effective date as published in the *Maryland Register* for that standard.

EFFECTIVE DATE: January 23, 1986.

ADDRESSES: Information relating to this Information Notice can be obtained at the following office:

U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, PA 19107, Attn: Esther Steinberg (3AM21).

FOR FURTHER INFORMATION CONTACT: Michael Giuranna of EPA, Region III, Air Programs Branch, at (215) 597–9189.

SUPPLEMENTARY INFORMATION: The Maryland AMA was originally delegated authority to implement and enforce the NSPS program on September 15, 1978 (44 FR 69362) and the NESHAP program on January 28, 1980 (45 FR 13192). Those delegations required the AMA to submit a new request for delegation for any standard not included in the original delegation. On May 10, 1985 (50 FR 34140), EPA revise Maryland's delegation so that the AMA would receive automatic delegation of future NSPS and NESHAP standards upon promulgation of such standards in the Federal Register. However, this caused a delay in implementing and enforcing new NSPS or NESHAP standards because a new standard would not be enforceable by Maryland until the standard was promulgated in the *Maryland Register*, the effective date of the standard being 60 days after publication. Furthermore, State pomulgation could be up to a year after promulgation in the Federal Register. On January 9, 1986, EPA sent a letter to the Maryland AMA informing them that we intended to revise their NSPS/NESHAP delegation so that they would automatically receive delegation of NSPS and NESHAP standards upon promulgation in the *Maryland Register*. Maryland replied in a letter of January 23, 1986, that a regulation does not become enforceable by them until the effective date published in the *Maryland Register*. Therefore, they suggested we revise their delegation to enable Maryland to receive delegation on the effective date.

This Notice informs the public that as of January 23, 1986, Maryland's delegated authority to enforce NSPS and NESHASP standards has been revised. Recognizing Maryland's regulatory adoption procedures, delegation to Maryland will now occur automatically on the effective date for specific NSPS and NESHAP regulations as published in the *Maryland Register*.

The Office of Management and Budget has exempted this Information Notice from the requirements of section 3 of Executive Order 12291.

Authority: Sections 111(c) and 112(d), Clean Air Act (42 U.S.C. 7411(c) and 7412(d)).

Dated: April 9, 1986.

James M. Seif,

Regional Administrator.

40 CFR Part 261

[SW-FRL-3009-9]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste

AGENCY: U.S. Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) today is granting final exclusions for the solid wastes generated at three particular generating facilities from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32, as well as denying an exclusion to a petitioner for the waste generated at his particular facility. This action responds to delisting petitions received by the Agency under 40 CFR 260.20 and 260.22 to exclude wastes on a "generator-specific" basis from the hazardous waste lists. The effect of this action is to exclude certain wastes generated at these facilities from listing as hazardous wastes under 40 CFR Part 261.

EFFECTIVE DATE: April 29, 1986.

ADDRESSES: The public docket for these final exclusions and the final denial is located in Room S–212, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC, 20460, and is available for public viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA/Superfund Hotline, toll-free at (800) 424–9346, or (202) 382–3000. For technical information, contact Lori DeRose, Office of Solid Waste (WH–562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382–5096.

SUPPLEMENTARY INFORMATION: On November 27, 1985, EPA proposed to exclude specific wastes generated by several facilities, including: (1) Arco Chemical Company, located in Miami, Florida (see 50 FR 48928); (2) Dover Corporation, Norris Division, located in Tulsa, Oklahoma (see 50 FR 48932); and (3) United Technologies Automotive, Inc. located in Jeffersonville, Indiana (see 50 FR 48941). In addition, EPA proposed to deny the petition submitted by General Motors Corporation, located in Saginaw, Michigan (see 50 FR 48924).[1] These actions were taken in response to petitions submitted by these companies (pursuant to 40 CFR 260.20 and 260.22) to exclude their wastes from hazardous waste control. In their petitions, these companies have argued that certain of their wastes were non-hazardous based upon the criteria for which the waste was listed. The petitioners have also provided information which has enabled the Agency to determine whether any other toxicants are present in the wastes at levels of regulatory convern. The purpose of today's actions is to make final those proposals and to make our decisions effective immediately. More specifically, today's rule allows three of these facilities to manage their petitioned wastes as non-hazardous. The exclusions remain in effect unless the waste varies from that originally described in the petition (*i.e.*, the waste is altered as a result of changes in the manufacturing or treatment process).[2] In addition, generators still are obliged to determine whether these wastes exhibit any of the characteristics of hazardous waste.

The Agency notes that the petitioners granted final exclusions in today's Federal Register have been reviewed for both the listed and non-listed criteria. As required by the Hazardous and Solid Waste Amendments of 1984, the Agency evaluated the wastes for the listed constituents of concern as well as for all other factors (including additional constituents) for which there was a reasonable basis to believe that they could cause the wastes to be hazardous. These petitioners have demonstrated through submission of raw materials data, EP toxicity test data for all EP toxic metals, and test data on the four hazardous waste characteristics that their wastes do not exhibit any of the hazardous waste characteristics, and do not contain any other toxicants at levels of regulatory concern.

EPA also proposed to deny an exclusion for specific wastes generated by General Motors Corporation, located

---

[1] In the same Federal Register notice, the Agency also proposed to exclude specific wastes generated by: (1) American Cyanamid Company, Hannibal, Missouri (see 50 *FR* 48912); (2) Continental Can Company, Milwaukee, Wisconsin (see 50 *FR* 48915); (3) General Motors Corporation, Fisher Body Division, Elyria, Ohio (see 50 *FR* 48917); (4) Keymark Corporation, Fonda, New York (see 50 *FR* 48922; (5) Bommer Industries Incorporated, Landrum, South Carolina (see 50 *FR* 48930); (6) Star Expansion Company Mountainville, New York (see 50 *FR* 48934); (7) Texas Eastman Company, Longview, Texas (see 50 *FR* 48937); (8) Eli Lilly and Company, Clinton, Indiana, (see 50 *FR* 48945); (9) General Electric Company, Shreveport, Louisiana (see 50 *FR* 48940); and (10) Waterloo Industries, Pocahontas, Arkansas (50 *FR* 48951). The Agency will address these proposed decisions in a later Federal Register notice.

[2] The current exclusions apply only to the processes covered by the original demonstrations. A facility may file a new petition if it alters its process. The facility must treat its waste as hazardous, however, until a new exclusion is granted.

VOL 51 ISS 82 AP 29 1986 UMI

in Saginaw, Michigan. In today's notice, this denial is being made final, since the levels of cadmium, chromium, and lead in the waste may present a substantial hazard to human health or the environment, if improperly managed. Futhermore, no information concerning the additional constituents (other than those for which the waste was listed) was received by the Agency. The Agency, therefore, could not fully evaluate the characteristics of the petitioned waste.

Limited Effect of Federal Exclusion

States are allowed to impose requirements that are more stringent than EPA's pursuant to section 3009 of RCRA. State programs thus need not include those Federal provisions which exempt persons from certain regulatory requirements. For example, States are not required to provide a delisting mechanism to obtain final authorization. If the State program does include a delisting mechanism, however, that mechanism must be no less stringent than that of the Federal program for the State to obtain and keep final authorization.

As a result of enactment of the Hazardous and Solid Waste Amendments of 1984, no State delisting programs are presently authorized. Any states which had delisting programs prior to the Amendments must become reauthorized under the new provisions.[3] The final exclusions granted today, therefore, are issued under the Federal program. States, however, can still decide whether to exclude these wastes under their State (non-RCRA) program. Since a petitioner's waste may be regulated by a dual system (*i.e.*, both Federal (RCRA) and State (non-RCRA) programs), petitioners are urged to contact their State regulatory authority to determine the current status of their wastes under State law.

The exclusions made final here involve the following petitioners:

Arco Chemical Company, Miami, Florida;
Dover Corporation, Norris Division, Tulsa, Oklahoma;
United Technologies Automotive, Inc., Jeffersonville, Indiana.

The denial made final today is for the following petitioner:

General Motors Corporation, Saginaw, Michigan.

I. Arco Chemical Company

A. Proposed Exclusion

The Arco Chemical Company (Arco) has petitioned the Agency to exclude its wastewater treatment sludge (filter press sludge) from EPA Hazardous Waste No. FO19, based upon the reduction and immobilization of the listed constitutents of this waste. Data submitted by Arco substantiate their claim that the listed constituents of concern are either not present in the waste at levels of regulatory concern or are present in essentially an immobile form. Furthermore, additional data provided by Arco indicate that no other hazardous constituents are present in the waste, and that this waste does not exhibit any of the characteristics of hazardous waste. (See 50 FR 46928–46930, November 27, 1985, for a more detailed explanation of why EPA proposed to grant Arco's petition.)

B. Agency Response to Public Comments

The Agency did not receive any public comments regarding its decision to grant an exclusion to Arco for the waste identified in its petition.

C. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that the filter press sludge is non-hazardous and as such should be excluded from hazardous waste control. The Agency, therefore, is granting a final exclusion to Arco Chemical Company for its dewatered wastewater treatment sludge (filter press sludge) resulting from the chemical conversion coating of aluminum, listed as EPA Hazardous Waste No. FO19, generated at its Opa Locka facility in Miami, Florida.

II. Dover Corporation/Norris Division

A. Proposed Exclusion

Dover Corporation/Norris Division (Dover) has petitioned the Agency to exclude its dewatered wastewater treatment sludge (centrifuge sludge) from EPA Hazardous Waste No. FO06 based on the absence or immobilization of the listed constituents of this waste. Data submitted by Dover substantiate their claim that the listed constituents of concern are either not present in the waste at levels of regulatory concern or are present in essentially an immobile form. Furthermore, additional data provided by Dover indicate that no other hazardous constituents are present in this waste, and that the waste does not exhibit any of the characteristics of hazardous waste. (See 50 FR 46932–46934, November 27, 1985, for a more detailed explanation of why EPA proposed to grant Dover's petition.)

B. Agency Response to Public Comments

The Agency did not receive any public comments regarding its decision to grant an exclusion to Dover for the waste identified in its petition.

C. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that this waste is non-hazardous and as such should be excluded from hazardous waste control. The Agency, therefore, is granting a final exclusion to Dover Corporation/Norris Division for its dewatered wastewater treatment sludge (centrifuge sludge) resulting from electroplating operations listed as EPA Hazardous Waste No. FO06 generated at its Tulsa, Oklahoma facility.

III. United Technologies Automotive, Inc.

A. Proposed Exclusion

United Technologies Automotive, Inc. (United) has petitioned the Agency to exclude its dewatered wastewater treatment sludge (filter cake) from EPA hazardous Waste No. FO19 based upon the absence, reduction, or immobilization of the listed constituents of this waste. Data submitted by United substantiate their claim that the listed constituents of concern are either not present in the waste at levels of regulatory concern or are present in essentially an immobile form. Furthermore, additional data provided by United indicate that no other hazardous constituents are present in the waste, and that the waste does not exhibit any of the characteristics of hazardous waste. (See 50 FR 46941–46942, November 27, 1985, for a more detailed explanation of why EPA proposed to grant United's petition.)

B. Agency Response to Public Comments

The Agency did not receive any public comments regarding its decision to grant an exclusion to United for the waste identified in its petition.

C. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that this waste is non-hazardous and as such should be excluded from hazardous waste control. The Agency, therefore, is granting a final exclusion to United Technologies Automotive, Inc. for its dewatered wastewater treatment sludge (filter cake) resulting from the chemical conversion coating of aluminum listed as EPA Hazardous Waste No. FO19 generated at its Jeffersonville, Indiana facility.

IV. General Motors Corporation

A. Proposed Denial

The General Motors Corporation (GMC) has petitioned the Agency to exclude its wastewater treatment sludge (dissolved air flotation sludge) from EPA Hazardous Waste No. FO06, based on the reduction and immobilization of the listed constituents of this waste. Data submitted by GMC, however, fails to substantiate their claim that the listed constituents of concern are present in an immobile form. Furthermore, GMC did not respond to Agency requests for additional information regarding factors (including additional constitutents) other than those for which the waste was listed which may cause the waste to be hazardous. The Agency, therefore, cannot fully evaluate GMC's petition to determine the characteristics of the petitioned waste. (See 50 FR 46924–46926, November 27, 1985, for a more detailed explanation of why EPA proposed to deny GMC's petition.)

B. Agency Response to Public Comments

The Agency did not receive any comments regarding its decision to deny an exclusion to GMC for the waste identified in its petition.

C. Final Agency Decision

For the reasons stated in the proposal, the Agency believes that the waste generated by the manufacturing processes at the GMC Saginaw Steering Gear facility (for which the petition was submitted) are not rendered non-hazardous by the wastewater treatment system currently in use. The analysis of the sludge, using the VHS model, indicates the potential of the sludge to leach several toxic heavy metals (cadmium, chromium, and lead) and contaminate ground water. Furthermore, the Agency has not received requested information necessary to determine whether or not additional toxicants (other than those for which the waste was listed) are present in the waste at levels of regulatory concern. The Agency, therefore, is denying this petition for exclusion of the wastewater treatment sludge EPA Hazardous Waste No. F006, produced by GMC at its Holland Road complex in Saginaw, Michigan.[4]

V. Effective Date

This rule is effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six month period to come into compliance. That is the case here since this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on the petitioners by an effective date six months after promulgation, and the fact that such a deadline is not necessary to achieve the purpose of section 3010, we believe that these rules should be effective immediately. As for the denial, GMC already should be in compliance; thus no additional time should be necessary. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

VI. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This grant of exclusions is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at specific facilities from EPA's lists of hazardous wastes, thereby enabling these facilities to treat their wastes as non-hazardous. Although the Agency is also proposing to deny a petition for one waste, our decision does not trigger a Regulatory Impact Analysis, since the waste is already being handled as hazardous.

VII. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effects will be to reduce the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this final regulation will not have a significant economic impact on a substantial number of small entities.

This regulation, therefore, does not require a regulatory flexibility analysis.

Dated: April 22, 1986.

J.W. McGraw,

Acting Assistant Administrator, Office of Solid Waste and Emergency Response.

List of Subjects in 40 CFR Part 261

Hazardous wastes, Recycling.

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for Part 261 continues to read as follows:

Authority: Sections 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922].

2. In Appendix IX, add the following wastestreams in alphabetical order to Table 1 as indicated:

TABLE 1—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
Arco Chemical Co.	Miami, FL	Dewatered wastewater treatment sludge (EPA Hazardous Waste No. FO19) generated from the chemical conversion coating of aluminum after April 29, 1986.
Dover Corp., Norris Div.	Tulsa, OK	Dewatered wastewater treatment sludge (EPA Hazardous Waste No. FO06) generated from their electroplating operations after April 29, 1986.
•	•	•
United Technologies Automotive, Inc.	Jefferson-ville, IN.	Dewatered wastewater treatment sludge (EPA Hazardous Waste No. FO19) generated from the chemical conversion of aluminum after April 29, 1986.

[3] RCRA Reauthorization Statutory Interpretation #4: Effect of Hazardous and Solid Waste Amendments of 1984 on State Delisting Decisions, May 10, 1984. Jack W. McGraw, Acting Assistant Administrator for the Office of Solid Waste and Emergency Response.

[4] The Agency notified GMC in a letter dated July 23, 1985, that the Office of Solid Waste would recommend to the Assistant Administrator for Solid Waste and Emergency Response that GMC's petition be denied. GMC declined to exercise its option to withdraw the petition. See 50 FR 46925, n. 46, November 27, 1985.

VOL 51 ISS 82 AP 29 1986 UMI

DEPARTMENT OF THE INTERIOR
Bureau of Land Management

43 CFR Part 8560

[Circular No. 2561]

Designated Wilderness Areas; Procedures for Management; Amendment Providing a Review Process for Mining Plans of Operation

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking establishes procedures for reviewing plans of operations and continuing operations on unpatented mining claims within designated wilderness areas administered by the Bureau of Land Management. The final rulemaking is based on the Bureau's Wilderness Management Policy, published in the Federal Register on September 24, 1981 (46 FR 47180).

EFFECTIVE DATE: May 29, 1986.

ADDRESS: Inquiries or suggestions should be sent to: Director (340), Bureau of Land Management, Room 2661, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: David E. Porter, (202) 343–6064.

SUPPLEMENTARY INFORMATION: On February 25, 1985, the Department of the Interior published in the Federal Register (50 FR 5504) a final rulemaking providing procedures for the administration of wilderness areas on public lands under the jurisdiction of the Bureau of Land Management. By a notice published in the Federal Register on March 27, 1985 (50 FR 12020), the Department of the Interior withdrew section 8560.4–6(j) of that final rulemaking, which stated the requirements for approving plans of operations for unpatented mining claims existing before the date on which the wilderness areas were withdrawn from appropriation under the mining laws. Except for that provision, the final rulemaking for 43 CFR Part 8560 went into effect on March 27, 1985.

A proposed rulemaking establishing requirements to be met before the authorized officer of the Bureau of Land Management (BLM) can approve a plan of operations for a mining claim or allow previously approved operations to continue was published in the Federal Register on August 6, 1985 (50 FR 31734). Comments were invited for a period of 30 days ending September 5, 1985, during which period a total of 14 comments were received, with 4 from associations, 2 from business establishments, 4 from individuals, and 4 from Federal agency offices or personnel. All of the comments have been given careful consideration during the decisionmaking process on this final rulemaking.

Several of the comments addressed the proposed rulemaking in general terms, opposing mining in designated wilderness areas, opposing restrictions on mining in wilderness, or opposing regulations alleged to impair the property interests of miners in mining claims. Others criticized the single paragraph of the proposed rulemaking in detail; these will be analyzed in the same manner in this Supplementary Information.

One comment requested clarification of the first sentence of paragraph (j), pointing out that the final phrase "at the time operations are proposed" appears inconsistent as a condition for "allowing previously approved operations to continue." To resolve this inconsistency, the final phrase, which is unnecessary and confusing, has been removed in the final rulemaking.

Minor amendments were made in the final rulemaking in response to comments. The following paragraphs discuss all of the comments submitted and explain why they did or did not result in any change in the language of the final regulation.

One comment urged that there be public participation in the review of plans of operation in wilderness areas. The Bureau of Land Management notifies affected and interested members of the public when plans of operations are submitted for mining claims in wilderness areas. This practice is required by the operating instructions of the Bureau. Such internal procedures are not proper matters for regulations.

One comment stated that the proposed regulation is too inflexible and would provoke continuing controversy. The comment stated that the Federal Land Policy and Management Act of 1976 (FLPMA) affords sufficient authority to assure reclamation of mined out areas, that plans not meeting reclamation requirements can be disapproved, and that section 8560.4–6(j)(2) requires a mineral examination to be carried out if wilderness values might be impaired. The comment misinterpreted section 8560.4–6(j)(2), which allows performance of annual assessment work under a plan of operations pending the contest outcome even if the mineral examination report concludes that the claim is invalid. Reclamation under FLPMA or any other authority is not directed to preserving wilderness character, but rather to restoring it. The existence of a reclamation requirement does not eliminate the need to protect the wilderness character of the land to the maximum extent possible, at all stages before reclamation, consistent with protecting the legal rights of the miner. The Wilderness Act requires preservation of the wilderness character of lands in the wilderness preservation system, and allows mining only on valid claims existing at the time the area was withdrawn from the operation of the mining law.

Another comment opposed the provision allowing the miner to gather evidence of claim validity or perform assessment work, even if only insignificant surface disturbance would be caused. While the miner may not prospect for a discovery, claims must be properly located and recorded, and contain a discovery of a valuable mineral deposit. Collecting samples may be the only way to confirm a discovery, if samples from the time before designation of the land as wilderness are not available or cannot be demonstrated to be from the claim being examined. If sample collection were to be prohibited by the regulation, the miner would be presented with the untenable situation of having no way to prove that samples collected before a wilderness was designated are from that wilderness area, and no ability to collect them afterward. This legal principle has been consistently adhered to by the Department in cases involving both executive and legislative withdrawals made subject to valid existing rights. See *United States v. Harlan H. Foresyth*, 15 IBLA 43 (1974) and *United States v. Chappell*, 42 IBLA 74 (1979).

One comment stated that it is inconsistent with the Wilderness Act to allow significant surface disturbance if that is the minimum disturbance necessary to remove mineral samples to confirm valuable mineral exposures, and that wilderness values may not be degraded except on claims already determined to have valid rights. A claim can be valid in fact without having been administratively determined to be valid, and, as mentioned above, the Department has consistently recognized that the holder of a claim has the right to establish the validity of his discovery. Under some circumstances, surface disturbance exceeding the insignificant level may be necessary to collect such evidence, but the regulation requires the disturbance to be minimized. On the other hand, the miner does not have the right to prospect to make a discovery.

One comment urged that the miner be allowed the opportunity to assess his discovery, so that an informed decision can be made as to whether the mineral

discovery is of greater relative value to the public than preserving the land as wilderness. Section 8560.4–6(j) does not prohibit gatherinig samples as evidence of discovery; it specifically permits it. Decisions are not made by comparing the value of the mineral with the value of the wilderness area, but on the basis of whether the miner has an established right based on a valid mining claim.

One comment pointed out that exploration can be carried out with very little surface disturbance, using helicopters, tunnels, and so forth, and that the rulemaking should allow mineral deposits to be assessed individually. It concluded that the rulemaking would make assessment work impossible. The law and this rulemaking specifically permit annual assessment work and gathering samples to provide evidence of claim validity. If such work is done with the minimal surface disturbance described in the comment, the miner may be able to demonstrate that any surface disturbance he might cause would be insignificant, and his plan of operations that proposes use of helicopters or tunnels may be approved for purposes of doing assessment work and gathering evidence of claim validity. Use of helicopters under this subpart requires a plan of operations.

One comment objected to the provision allowing operations on producing mines to continue pending determination of claim validity. This exemption was created because producing mines were presumed to be economically producing, and therefore to meet the prudent man test. Although it might seem to impair the property interest of the miner to interrupt economic production, after consideration of the comment objecting to the provision, the Department of the Interior has concluded that the exemption for producing mines should be removed. The issue of whether the exemption is needed is likely to be academic because few producing mines will be found in designated Wilderness areas. For mining claims to be producing in a newly designated Wilderness Area, they are required to meet either of two circumstances: the claims were located and had discoveries prior to the enactment of the Federal Land Policy and Management Act so that operations are not subject to the non-impairment standard because they are valid existing rights, or the claimant is operating to the same "manner and degree" as at the time of the passage of the Act and thus has "grandfathered rights." BLM will be able to confirm quickly that a producing mine is in fact valid without suspending producing operations for a significant period of time because, normally, a USGS/Bureau of Mines mineral survey is prepared prior to designation. In order to assure that this amendment will not shut down operation on claims that have previously been determined to be valid, the section has been amended to apply only to proposed operations or previously approved operations occurring on mining claims for which there exists no approved, current BLM mineral examination report concluding that the claim is valid. This will ensure that a producing mine, or any other operation, located on an unpatented mining claim previously found valid by a mineral examination, is not temporarily shut down pending a new mineral examination after wilderness designation.

In the usual case, a producing operation will have been in a Wilderness Study Area prior to Wilderness designation, and BLM will have already prepared a mineral report confirming validity of the claim. This is because, under 43 CFR Subpart 3802, a determination of valid existing rights is required to be made while reviewing a plan of operations for a mining claim.

Several comments objected to the provision applying the time limitations imposed on the authorized officer by 43 CFR 3809.1–6, stating that BLM could not meet the 30-day deadline for reviewing plans of operations if mineral examinations were included in the review. The 30-day review period is generally sufficient to perform the mineral examination. However, 43 CFR 3809.1–6 does provide for extension of the deadline for 60 days when notice is provided of the circumstances justifying the additional time for review. In addition, periods when the area of operations is inaccessible for inspection do not count against the 60 days.

One comment also stated that section 3809.1–6 imposes a less rigorous standard on the miner than that Wilderness Act requires, and that that section should not be referred to at all in managing wilderness areas. The Wilderness Act standards are stated in 43 CFR 8560.4–6 (e) and (h). The plan of operations provided for in section 3809.1–6 is the mechanism used to apply these standards to performing assessment work and gathering evidence of claim validity in wilderness areas. The miner is required under 43 CFR 8560.4–6 (e) and (h) to comply with stipulations to protect the wilderness character of the area. These are imposed by the authorized officer as part of the approved plan of operations under section 3809.1–6.

Several comments stated that the proposed rulemaking arbitrarily infringes on the property rights of miners in their claims by requiring the Bureau to deny a plan of operations on the basis of mineral examiner's report alone, and that the rulemaking should be revised to require completion of a contest and exhaustion of appeals before a plan can be disapproved. This rulemaking has been carefully written to reach a fair balance between the property interests of mining claimants and the preservation policy enunciated in the Wilderness Act. The Wilderness Act protects valid rights existing on the date a wilderness is designated. For wilderness administered by BLM, this date is usually the date the specific wilderness designation legislation is enacted. Claims do not have to be adjudicated and found valid in order to be valid, but if on examination a mineral examiner has reason to doubt the validity of the claim, the public interest in wilderness protection expressed in the Wilderness Act justifies disapproval of the plan of operations or termination of an ongoing operation, so that the matter can be promptly and conclusively resolved in a contest proceeding. At the same time, the miner's property right in the claim requires that he have a fair opportunity to supply proof of its validity by gathering samples, mitigated by the requirement that surface disturbance be the minimum necessary. The rulemaking does not state that the mineral examiner will invalidate a claim, but only that the examiner will disapprove the plan of operations and initiate a contest to determine the status of the claim conclusively. No operations may proceed except under the authority of this rulemaking until the contest is concluded.

One comment stated that the provision for terminating a previously approved plan of operations if the mineral examiner finds no discovery is inconsistent with the provision allowing producing mines to continue in operation. If a mine is producing in quantity, the likelihood is greatly reduced that examination will disclose a failure to discover a valuable mineral deposit. The final rulemaking does not provide for delays in reviewing ongoing operations, but recognizes that there is little likelihood that review will result in shutting down the mines.

One comment objected that this rulemaking treats the plan of operations as a minerals management tool rather than a surface management tool. Congress has determined that wilderness shall be preserved against all

VOL 51 ISS 82 AP 29 1986 UMI

mining except what is carried on under valid existing rights. Review of the plan of operations under 43 CFR 3809.1–6 is the most reasonable stage of the process at which validity can be determined.

One comment objected that an examination that determines the validity of a claim based upon the marketability of a mineral at any given time or period of time may unfairly determine a claim invalid because of temporarily depressed markets for the mineral, and urged that the prudent man test be applied in judging validity of discoveries. The prudent man test requires that the "present marketability" of the mineral deposit be considered in determining whether the claim was valid at the time the wilderness area was withdrawn from the operation of the mining law and continues to be valid. The determination of "present marketability" has never comprised the examination of either cost or price factors as of a specific, finite moment of time, without reference to other economic factors. Rather, the question of whether something is "presently marketable at a profit" simply means that a mining claimant must show that, as a present fact, considering historic price and cost factors and assuming that they will continue, there is a reasonable likelihood that a paying mine can be developed. *Pacific Coast Molybdenum Co.*, 90 I.D. 352 (1983). If a mineral market is depressed, the mineral examiner will take into account the possibility of market resurgence, based upon the history of that market, in projecting marketability and determining the validity or invalidity of a discovery. At the same time, the mineral examiner will recognize that a trend may be considered sufficiently long-term to be permanent, in cases where there is little or no foreseeable demand for the mineral, despite past marketability.

One comment stated that BLM lacks the expertise to determine whether a valuable mineral discovery has been made, and that this would lead to a great amount of costly litigation. The authority of the Secretary of the Interior to contest mining claims stated in *Cameron v. United States*, 252 U.S. 450 (1920), has been delegated by the Secretary to the Director, Bureau of Land Management. Every State office of the Bureau has qualified mineral examiners whose responsibility it is to evaluate the validity of mining claims.

One comment stated that although BLM does not issue mitigating measures for a plan of operations that is denied, the rulemaking allows some operations to be conducted. The comment questions how mitigating measures can be applied to a nonexistent plan. The comment also questions how environmental protection can be assured without imposing mitigation stipulations. The comment apparently assumes that if a proposed plan of operations is denied, there will be no plan of operations at all, and then asks how BLM will ensure environmental protection. This final rulemaking prohibits the authorized officer from disallowing a plan of operations, either before contest proceedings begin or while they are pending, because of adverse conclusions in the mineral report, to the extent that the plan proposes assessment work or gathering proof of claim validity. In addition, the regulations at 43 CFR 3809.1–6 and 8560.1–2 do not allow the miner to proceed with work that disturbs the surface even insignificantly without a plan of operations, if mechanized earth-moving equipment or landing of aircraft is involved. Thus, a plan of operations is required for those activities. By allowing mining activities on such claims for the two named purposes and requiring a plan of operations, the rulemaking affords the authorized officer the opportunity to impose on these plans stipulations to protect the environment, in accordance with 43 CFR 3809.1–6 and the Wilderness Act, pending the outcome of contest proceedings.

One comment questioned why the rulemaking limits the claimant to reliance upon physically exposed minerals to prove claim validity. Because the Wilderness Act requires the claim to be valid on the date the land is withdrawn for wilderness, prospecting to make a discovery under the mining laws is not allowed in wilderness areas. To be discovered, a mineral has to be exposed. Geologic inference alone is insufficient to establish a discovery.

Another comment requested that the rulemaking use a physical exposure of mineralization as sufficient proof of a valuable discovery, stating that there is no readily available definition of "valuable mineral deposit." The term suggested by the comment, "physical exposure of mineralization," is vague. It implies that an exposure of a mineral in trace amounts, which may be far from economic, would be sufficient to support a discovery. The prudent man test will be applied by the mineral examiner to determine whether there has been a discovery of a valuable mineral deposit. This has long been the procedure for evaluating claims.

One comment stated that the rulemaking should include assessment work options and procedures for obtaining patents. These matters are covered in 43 CFR Parts 3850 and 3860.

Several comments suggested relating the term "insignificant surface disturbance" to the term "casual use." The terms relate to different issues. "Casual use" is used in 43 CFR Subpart 3809 to describe activities that may be carried on without an approved plan of operations. "Insignificant surface disturbance" refers to the degree of disturbance an activity performed under a plan of operations may cause. This rulemaking is designed to protect the wilderness character of the land, allowing assessment work or gathering of evidence to support a discovery existing before the wilderness was withdrawn only if it will cause insignificant surface disturbance under a plan of operations, except in the special circumstances provided for where surface disturbance exceeding the insignificant level is the minimum necessary to confirm preexisting exposures of a valuable mineral.

One comment suggested that the final sentence of the section be amended to except required reclamation work from the requirement that all operations shall cease once a final administrative decision is rendered declaring a claim to be invalid. This suggestion has been adopted in the final rulemaking.

The principal author of this final rulemaking is David E. Porter, Division of Recreation, Cultural, and Wilderness Resources, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The rulemaking favors no demographic group, and applies equally to all users, regardless of size, operating or planning to operate a mine in any wilderness area administered by the Bureau. Information is required from the public for certain uses and activities in wilderness areas in accordance with existing procedures found in 43 CFR Parts 2800, 2880, 2920, 3045, 3205, 3809, 4100 and 8372. The information collection requirements of those procedures referred to in this rule have been approved by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

List of Subjects in 43 CFR Part 8560

Grazing land, Livestock, National Wilderness Preservation System, Oil and gas exploration, Penalties, Public lands-mineral resources, Public lands-recreation, Recreation.

Under the authority of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701) and the Wilderness Act of 1964 (16 U.S.C. 1131), Group 8500, Subchaper H, Chapter II, Title 43 of the Code of Federal Regulations is amended as set forth below.

Dated: April 11, 1986.

J. Steven Griles,

Assistant Secretary of the Interior.

GROUP 8500—WILDERNESS MANAGEMENT

PART 8560—WILDERNESS AREAS

1. The authority citation for Part 8560 continues to read as follows:

Authority: 43 U.S.C. 1701 et seq., 16 U.S.C. 1131 et seq.

2. Section 8560.4–6 is amended by adding paragraph (j) to read as follows:

§ 8560.4–6 Mining law administration.

* * * * *

(j) Where there exists no current approved mineral examination report concluding that unpatented mining claims are valid, prior to approving plans of operations or allowing previously approved operations to continue on unpatented mining claims after the date on which the lands were withdrawn from appropriation under the mining laws, the authorized officer shall cause a mineral examination of the unpatented mining claim to be conducted by a Bureau of Land Management mineral examiner to determine whether or not the claim was valid prior to the withdrawal and remains valid. If the approved mineral examination report concludes that the claim lacks a discovery of a valuable mineral deposit, or is invalid for any other reason, the authorized officer shall either deny the plan of operation or, in the case of an existing approved operation, issue a notice ordering the cessation of operations and shall promptly initiate contest proceedings to determine the status of the claim conclusively. However, neither the adverse conclusions of an approved mineral examination report nor the pendency of contest proceedings shall constitute grounds to disallow a plan of operations to the extent the plan proposes operations that will cause only insignificant surface disturbance and are for the purpose of: (1) Taking samples or gathering other evidence of claim validity to confirm and corroborate mineral exposures which are physically disclosed and existing on the claim prior to the withdrawal date, or (2) performing the minimum necessary annual assessment work as required by subsection 3851.1 of this title. Surface disturbance exceeding the insignificant level is permissible only when it is the minimum disturbance necessary to remove mineral samples to confirm and corroborate preexisting exposures of a valuable mineral deposit discovered prior to the withdrawal. The requirement in this subsection for a mineral examination shall not cause a suspension of the time limitations governing approval of operating plans contained in subsection 3809.1–6 of this title. Once a final administrative decision is rendered declaring a claim to be null and void, all operations, except required reclamation work, shall be disallowed and shall cease unless and until such decision is reversed in a judicial review action.

BILLING CODE 4310–84–M

LEGAL SERVICES CORPORATION

45 CFR Part 1625

Procedures Governing Denial of Refunding

AGENCY: Legal Services Corporation.

ACTION: Final rule.

SUMMARY: This final rule revises the Corporation's regulations governing denial of an application for the refunding of a grant. Some of these revisions are required to comply with the provisions of the Corporation's appropriations acts for 1984, 1985, and 1986 (Pub. L. 98–166, 98–411, and 99–180). Other revisions are designed to improve the procedures and to ensure that they comply fully with the provisions of the Legal Services Corporation Act, as amended (42 U.S.C. 2996 et seq.) (the Act) and the cited appropriations acts, all of which require procedures which provide for a "timely, full, and fair" hearing. This rule (1) specifies new and more detailed procedures for denial of refunding, (2) establishes new and generally shorter time limits within which procedural steps in denying refunding must be taken, and (3) changes the burden of proof in denial of refunding proceedings. The regulations, as revised, are fully consistent with the requirements of both the Act and the appropriations acts.

EFFECTIVE DATE: This regulation is effective May 29, 1986.

FOR FURTHER INFORMATION CONTACT: John H. Bayly, Jr. General Counsel (202) 863–1820.

SUPPLEMENTARY INFORMATION:

Background

The Corporation has discovered that amendments to this part which were published as a final rule in the **Federal Register** of July 29, 1985 (50 FR 30714) were not properly adopted. Since this rulemaking proceeding covers the same areas, the amendments made in the July 29, 1985 publication are revoked through this final rule.

Pub. L. 98–166, which appropriated the Corporation's funding for the fiscal year ending on September 30, 1984, provided for revision of the Corporation's procedures under section 1011(2) of the Act. This requirement has been continued in appropriations acts for subsequent years. The appropriations acts provide that the proceedings must be in the form of a hearing to show cause, that the recipient has the burden of proof, and that all denial of refunding proceedings must be completed within 90 days, of which 30 days are allowed for the recipient to request a hearing, 30 days for completion of the hearing, and 30 days for rendering of the final decision.

Changes, including several deadline changes, have been necessitated by the acts. These changes are concentrated in §§ 1625.4, 1625.5, 1625.6, 1625.7, 1625.8, 1625.9, 1625.10, 1625.11, and 1625.12. Additional changes have been made to conform other sections to these revisions and to simplify, expedite, and ensure the fairness of the proceeding. The entire part, as revised, is republished for clarity and ease of use.

Notice of Proposed Rulemaking

Proposed new procedures were published in the **Federal Register** on February 7, 1986 (51 FR 4882) and opportunity for comment provided until March 10, 1986. Sixty-two timely comments were received. Several late comments were also received. In addition, oral comments were received directly by the Operations and Regulations Committee of the Board of Directors (Board) at its meeting in Tampa, Fla., February 20, 1986, and again in Jackson, Miss., March 12, 1986. All timely comments were considered in the development of the final rule. Late comments were also reviewed and no new or unforseen issues were raised.

VOL 51 ISS 82 AP 29 1986 UMI

Numerous changes, substantive and technical, were made as a result of our consideration of the comments.

Comments

The most comprehensive comments were made by Allen W. Houseman of the Center for Law and Social Policy, for the Project Advisory Group (PAG). Mr. Houseman made his comments in a series of proposed changes and analyses and in oral comments before the Corporation and the Board. Some forty grant recipients made individual comments. Some specifically endorsed the PAG comments. Generally, however, they repeated one or more of the PAG comments and suggestions. A number of bar groups commented. Generally, they also identified one or more of the points made by the comprehensive PAG comment. Four of the comments, one of which was a grant recipient, favored the proposal.

The issues which drew the most interest were:

1. The placing of the burden of going forward and the burden of ultimate persuasion on the recipient (§ 1625.9), (38 comments);

2. The use of written testimony exclusively to put on the direct case and the use of the hearing for cross-examination and rebuttal testimony only (§ 1625.8(d)) (20 comments);

3. Application of the attorney-client privilege (§ 1625.8(f)) redesignated (a) (50 comments);

4. The criteria to be used in applying the standards set out in §§ 1625.3 and 1625.9, particularly §§ 1625.3(d) and 1625.9(d) in connection with the selection of another organization to serve the clients (28 comments); and

5. The potential for conflict in personally involving the President of the Corporation prior to final decision and for ex parte contacts with the hearing examiner (§ 1625.4(f)) (21 comments).

General Issues

Several comments suggested that many of the requirements were not necessary to comply with the appropriations acts and that these requirements should be dropped. We believe that the provisions are necessary to comply with the Act, which requires hearings under these proceedings to be "timely, full, and fair" (section 1011(2); 42 U.S.C. 2996) and the appropriations acts which, more specifically, require the proceedings to be completed within no more than 90 days (divided into three periods of no more than 30 days each). Since several previous denial of refunding proceedings have lasted an unreasonably long time, during which provision of legal services to eligible clients was adversely affected, it is reasonable for us to interpret "timely" in the Act to be consistent with the Congressional determination that the proceedings should be completed in no more than 90 days. Clients should not be left for more than one-fourth of a year with a legal services provider whose future is uncertain because of serious doubts as to its ability to provide quality legal services in an effective manner within the law. We believe that the procedures adopted by this part provide full and fair procedures for recipients, eligible clients, and taxpayers.

Many commenters were concerned about the propriety of having the Corporation President involved in a defunding proceeding prior to final decision, particularly under § 1625.4(f). They were also concerned about the fact that the hearing examiner would be selected before the recipient is notified (§ 1625.4(d)(1)), and that he could be asked *ex parte* to issue an order under § 1625.4(f). One of the remedies proposed was that the hearing examiner not be selected until after the recipient is notified under § 1625.4(d). It was also suggested that the hearing examiner be authorized to limit or quash a § 1625.4(f) requirement. In addition, it was noted, generally in connection with comments under § 1625.9, that the recipient should be able to challenge any law, regulation or guideline of the Corporation and that this is desirable to make the doctrine of exhaustion of administrative remedies applicable.

We respond to all four comments. The provisions giving a role to the President or to the hearing examiner, prior to the service of notice, have been revised to eliminate such a role for either. In addition, it is specifically provided that the hearing examiner may rule on a motion to limit or quash a requirement under § 1625.4(f), and challenges to any relevant law, regulation, or guideline may be made and briefed under § 1625.8(g)(2); this provision specifically implements the doctrine of exhaustion of administrative remedies by stating that an argument not timely made in the proceeding is waived unless recipient can show that it could not have made the argument prior to that time.

Concern was also raised that the Corporation could go back indefinitely in pursuing a matter and that there should be some time limit. One comment suggested 30 days from the date the Corporation has knowledge of the basis for its action. Another noted that its state statute of limitations on contract proceedings was 6 years. If an event occurs during a fiscal year, is questioned during a monitoring trip the following year, and the investigation completed and a proceeding initiated the year after that, this would not be an unlikely sequence of events and would take 3 years. There is also the possibility that there could be a deliberate covering up of an event so that it is not discovered for some time. Accordingly, under § 1625.3(b) we have provided for a six-year notice limitation for failure to comply with any rule, regulation, guideline, or instruction of the Corporation, or a term or condition of a current or former grant or contract. Some commentors were concerned that failure to comply at a time when a requirement was not in effect may be the basis for denial of refunding. We provide specifically that it will not.

A new paragraph (3) of § 1625.8(e) was considered initially by the Board at its Tampa, Fla., meeting, February 19–21, 1986. As part of the process of assuring openness and avoiding surprise, it provides that a recipient cannot use a witness or evidence in a proceeding where it failed to comply with its obligations (under, e.g., 42 U.S.C. 2996f(d), 2996g(b)) to provide the evidence or witness to the Corporation on request prior to the initiation of the proceeding, unless it is able to show good cause for its failure to comply at an earlier date. One comment suggested that the paragraph should be published for comment, citing cases. We found the cases supported the decision to adopt the provision. The key case cited was *Air Transport Association of America* v. *CAB*, 732 F.2d 219 (D.C. Cir. 1984). In that case, the Court ruled that the published proposal was sufficiently descriptive of the subject and issues involved that interested parties could offer informed criticism and comments. The critical elements of the proposal did not change and the final rule was a logical outgrowth of the proposed rule. Here, we add a provision designed to spur disclosure and avoid surprise. Given the need to combine adequacy of hearing and compliance with deadlines, such a proviso is very clearly a logical outgrowth of the proposed rule.

Sections 1625.3 and 1625.4

It was proposed that the Corporation's notice to a recipient in § 1625.4(a) be tied specifically to the four grounds for denial specified in § 1625.3. In effect, the substance of § 1625.3 would be repeated in § 1625.4(a). We do not believe the inclusion would improve clarity. Instead, we expanded § 1625.4(c) to spell out clearly that the Corporation must provide a detailed memorandum of points and authorities to apply the facts recited under § 1625.4(b) to the specific grounds for denial under § 1625.3. It should be noted that the recipient's obligation under § 1625.5(d) to submit its memorandum of points and authorities, is not spelled out in identical language to that of the Corporation under § 1625.4(c). That does not mean that its obligations do not match those of the Corporation—they do. Any issue of fact or law not joined is considered admitted.

It was also suggested that, where another organization is identified in a statement under § 1625.4(a) as being better able to serve the clients, relevant information about that organization, its staff, officers and board, its experience, and the basis for our finding, should be included in the § 1625.4(a) statement. A prima facie case will include all needed information about the organization and its principal officials, as well as provide a factual basis for the allegation that it is better able to serve the clients. In addition, the language of §§ 1625.5(e) and 1625.7(d), dealing with the ability of the recipient to secure production of documents or witnesses of the Corporation, is revised to make clear that an organization identified under § 1625.4(a)(2) as being better able to serve the client community may be required to produce a document or employee, subject to the sanctions set forth in § 1625.8(e).

It was suggested that when we name the hearing examiner under § 1625.4(d), we provide a résumé and the information on which we made our determination under § 1625.6(a). We think it would be helpful to include a summary of the hearing examiner's professional qualifications, his or her current business address and phone number, and a statement that he or she supports the purposes of the Act.

It was suggested that the provisions of former § 1625.4(c) advising the recipient of its right to interim and termination funding under §§ 1625.15 and 1625.16 be preserved in a new § 1625.4(g). We think this is unnecessary since under § 1625.4(e) we send all of Part 1625 to the recipient with the show cause order.

Section 1625.5

Under § 1625.5(c), it was suggested that we strike the provision that the recipient may not rest on mere allegations or denials, but must recite specific facts to assure that a genuine issue of fact is involved. There is apparent concern that there may be situations where a recipient can only deny. For example, comments suggested that if the Corporation alleged that a recipient engaged in lobbying by mailing a specific letter and in fact the recipient had not mailed the letter, it could only deny the allegation. We shortened the language of the provision, eliminating the reference to mere allegations and denials, but retained the requirement that the recipient must provide sworn evidence of specific facts showing there is a genuine issue of material fact at issue. We think the official responsible for the denial must sign an affidavit on personal knowledge that he has checked records and done what is possible to find evidence in order to put a material fact in issue and to avoid issuance of an adverse summary judgment.

It was suggested that a recipient should be able to request the hearing examiner to add parties under § 1625.5(e). We do not agree. Where an organization is alleged to be better able to serve eligible clients, it should be identified pursuant to § 1625.4(a)(2) (as we noted above), and adverse inferences should be available if it refuses to make its documents or employees available for the hearing (§§ 1625.5(e), 1625.7(d) and 1625.8(e)(1)). But, we see no reason why it should be a party. With respect to other persons, we fail to see how they could be involved as parties, although many could be witnesses, and we do not think that witness availability may be solved in this fashion. Certainly, denial of refunding will have indirect impact on other persons (the recipient's clients, employees, landlord, suppliers, contractors, and grantees may all incur at least some costs of adjustment to a possible denial of refunding either the particular organization that is alleged to be better for the clients or some other or new recipient chosen after appropriate competition may gain by receiving the grant funds that the original provider would have received if it had been refunded). None of these persons must be present as a party for resolution of the only question at issue during a proceeding under this part: If the Corporation has presented a prima facie case for denial of refunding, can the existing recipient show cause why refunding should be granted? Accordingly, we have clarified language in § 1625.7(d)(3) regarding the obligation of an organization identified under § 1625.3(d) to produce documents and employees; and we have added a new § 1625.7(c)(5) limiting the proceeding to the Corporation and the recipient, except that a state support center which is a subgrantee or a subrecipient when this regulation becomes effective, may be included as a party, but only during the term of the subgrant that is in force at the time the regulation becomes effective. This will provide adequate time for state support centers now funded through recipients to seek to become direct recipients if they so desire.

It was also suggested under § 1625.5(e) that the recipient should be able to require the Corporation or another party to produce a board member or another person, other than a current employee, as a witness. Congress, however, has given the Corporation no power to subpoena third parties, including board members. We believe that both parties should bear the consequences under § 1625.8(e) if their current employees are unavailable without good cause, but that no adverse inferences may be made from a party's failure to do what it has no power to do. Certainly, either party may be sanctioned for its efforts to persuade witnesses to refuse to cooperate with the other party or for failure to produce information in its possession, custody, or control which may assist the other party to locate favorable witnesses or evidence.

Section 1625.6

It was also suggested that the period of time to object to the hearing examiner under § 1625.6(b), be extended from 5 to 20 days. It is claimed that the recipient needs the time to make the objection, yet no actual problems are cited as having resulted from the existing provision. The proposal would leave only seventeen (17) days to dispose of the objection, choose another examiner, if necessary, and allow the new examiner to prepare for the prehearing conference. Meanwhile, there would not be a hearing examiner available to rule on the recipient's request to limit or quash the Corporation's requirement for production of documents or witnesses (§ 1625.4(f) or to dismiss the proceeding (§ 1625.7(a)(1)) before the recipient has to make a detailed response. We believe that a more practical approach would be to give the recipient an additional five (5) days (for a total of 10) upon written request, provided it gives the basis of its objection and explains why, despite due diligence, it is unable to make its objection without the extension. This will give the recipient time to ascertain if there is a problem and then to prepare an adequate objection; at the same time, the Corporation will be on notice at an early date that it may need to locate another hearing examiner.

Section 1625.7

It was suggested that the examiner be authorized under § 1625.7(a)(2) to extend the original 30-day period within which the recipient must request a hearing to protest a denial of refunding, or be deemed to have waived its right to it.

VOL 51 ISS 82 AP 29 1986 UMI

Since Congress has indicated that this is an adequate amount of time, we do not think it necessary to make such a change. There may be circumstances where the record shows that a recipient did try to request a hearing and, through extraordinary circumstances, such as an act of God, was unable to do so until a day or two after the 30th day, although extraordinary efforts were made to overcome the adverse circumstances, inform the Corporation of its desire for a hearing, and comply as much as possible with the requirements of § 1625.5. Under such unusual circumstances, constructive notice and service could be found a day or two late, where the record shows good faith, absence of intent to delay, and the Corporation is not prejudiced. No change is needed to permit this.

It is suggested that summary judgment under § 1625.7(a)(3) be limited to the grounds specified in § 1625.3 (a) and (b). Several comments took the view that the grounds specified in paragraphs (c) and (d) of the section were too complex to be the subject of a summary judgment proceeding. We disagree. The summary judgment language is taken from F.R. Civ. P. 56 and is generally applicable to all litigation, although in practice some kinds of claims may only rarely be subject to actual imposition of summary judgment. "[I]t cannot be stated too strongly that no type of action or issue is immune from a summary adjudication and that there will be instances when the rendition of a summary judgment is clearly called for, although the particular action or issue is one which does not lend itself to a summary adjudication as a general proposition." (6 Moore's Federal Practice ¶ 56.17[1]). The suggestion is rejected.

It is suggested that we change the proviso at the end of § 1625.7(d)(2), limiting the opportunity to make a delayed request that the opponent produce a document or a witness. Such a delay request is permitted only in situations which could not be anticipated and where failure to permit it would result in a manifest injustice. It is suggested that we strike the manifest injustice standard and that we permit delayed requests where the situation could not be anticipated, or the request is in response to new witnesses, testimony, or documents. We cannot accept the proposal. The whole purpose of the obligations spelled out in §§ 1625.4 and 1625.5 is to avoid surprise. It must be remembered that recipients will not be forced to wait until the witnesses testify to react to the Corporation's case. They will have it six weeks in advance of the hearing. They will have it a month before they must answer.

Sections 1625.7 and 1625.8

It is suggested in §§ 1625.7 and 1625.8 that direct testimony be permitted because it may be necessary or desirable later. We have revised §§ 1625.7 (b) and (c) and § 1625.8(d) to allow either party to choose to present direct testimony from its witnesses. The testimony will be limited to the scope of the witness' affidavit and the party will, of course, be required to make these direct witnesses available at that time for a complete cross-examination on both the written and oral testimony. The time used by a party for its witnesses will include the other party's cross-examination of them and will reduce the amount of time available to call the affiant of the other party or make other use of the time allotted for its use during the hearing. Therefore, neither party is likely to make excessive use of the opportunity to present direct testimony.

Each party will be required pursuant to § 1625.7(c)(6) to arrange for the testimony of the witnesses it will rely on and bear the associated expenses. This includes witnesses associated with the other party, except that each party must produce its own affiants for cross-examination. In addition, the hearing examiner may require either party to produce a document or a witness and to bear the expense thereof. He has 7 days to rule on motions regarding requests for documents or witnesses.

Section 1625.8

It was suggested that we strike the provision in § 1625.8(b) (now (a)) that the hearing will normally be held in or near a city with a commercial airport and a U.S. District Court. The concern is that a program could be burdened if a location were chosen that is substantially more inconvenient for the recipient than another location where both locations have an airport and a federal court. Another concern was that a location with an airport and a federal court would be less convenient than the recipient's headquarters. Choice of venue must balance the convenience of witnesses, counsel for both parties, and the hearing examiner. The Corporation would probably prefer Washington, D.C., and the recipients' lawyers would probably prefer their own community. We have revised the proposed provision to eliminate the requirement that the hearing be held at a city with a federal court and to clarify that the hearing will be held at a place in or near a city with a commercial airport that is convenient to the Corporation, the recipient, the community served, and the witnesses.

It is suggested that § 1625.8(f) (renumbered (e)) be revised to provide that if the Corporation fails to produce a witness or document from an organization determined under § 1625.3(d) to be better able to serve the client community, or if it fails to produce one or more members of a monitoring team where it relies on the team report and produces only those team members it needs, the proceeding should be dismissed. We provide in § 1625.8(f) that technical rules of evidence do not apply. While we have not changed this section and no one has commented directly on it, we think it requires discussion here in connection with this proposal and the availability of monitoring reports and monitors. Administrative proceedings subject to the Administrative Procedure Act (APA) often contain hearsay in the documents submitted. This is generally not considered harmful, however, as the hearing examiner is considered competent to give appropriate weight to, or disregard, such evidence. Thus, the Attorney General's Manual on the APA at p. 76, quotes from the Committee Reports on the APA as follows:

> "[T]he mere admission of evidence is not to be taken as prejudicial error (there being no jury to be protected from improper influence) although irrelevant, immaterial, and unduly repetitious evidence is useless and is to be excluded as a matter of efficiency and good practice" H.R. Rep. p. 36, Sen. Rep. p. 22 (Sen. Doc. pp. 270, 208).

It is also stated in the Manual that agency action must be supported by "reliable, probative, and substantial evidence" and that "[T]hese are standards or principles usually applied tacitly and resting mainly upon common sense which people engaged in the conduct of responsible affairs instinctively understand". H.R. Rep. p. 36, Sen. Rep. p. 22 (Sen. Doc. pp. 270, 208). In our situation, where a monitoring report contains input from 5 monitors, only 3 of whom are called by the Corporation, it could have some heresay, and it would be the examiner's responsibility to give such heresay the weight it deserves, or no weight at all, as appropriate.

With respect to access to witnesses, § 1625.8(e) (as renumbered) gives the examiner the power to draw the adverse inference which is in proportion to the loss. We do not see how adverse inferences can be drawn where a party does not use someone as a witness. Presumably, it does not need that person for its case. Similarly, where there are no subpoena powers, and a party asks that the opponent produce a person not under its control, such as a board member, former employee, or former consultant, it cannot be assumed that that person is under the control of the opponent. Consequently, no adverse inferences can be drawn.

The dismissal proposal is far to broad and is rejected. For clarification, however, we added specific language, in new paragraph (4) of § 1625.8(e), that no adverse inference can be drawn for failure to produce a document or witness not under the actual control of the party, (or, in the case of the Corporation, an organization identified under § 1625.4(a)(2)). In addition, we provide in § 1625.8(k) that the APA and the Federal Rules of Civil Procedure are to be used as guides where relevant. While the APA does not, per se, apply to the Legal Services Corporation, because we are not an agency of the Federal Government (42 U.S.C. 2996d(e)(1)), we must have suitable guidelines and, since we are a creature of Federal law and are federally funded, we believe that the APA and the Federal Rules of Civil Procedure are the appropriate guides to the extent that they are relevant. Their use for such guidance should eliminate many of the concerns of commenters concerning various details of the procedures, fill in any missing details in the procedures, and provide reliable precedents for the interpretation of the many provisions in this part which have been adapted from these sources.

It is suggested that we strike the provisions in § 1625.8(f) (now (e)) permitting the examiner to review the exercise of the attorney-client privilege. A full and fair hearing before an independent hearing examiner implies that the hearing examiner—like a judge or an administrative law judge—will have the power to rule on questions of privilege and to issue appropriate protective orders. The statutory provision that prohibits the Corporation from having access to reports or records subject to the attorney-client privilege (section 1009(d) of the Act, 42 U.S.C. 2996h(d)) does not apply to the hearing examiner since the statute also requires that the hearing examiner be independent of the Corporation (section 1011(2), 42 U.S.C. 2996j(2)). There have been instances during monitoring where the privilege has been invoked under circumstances where it seemed frivolous, a sham, or an excuse. Yet, we are expected to monitor "to insure that the provisions of [the Act] and the bylaws of the Corporation and applicable rules, regulations, and guidelines promulgated pursuant to [the Act] are carried out" (42 U.S.C. 2996f(d)). Obviously, there must be an adequate balancing of interests to achieve legislative purposes, assure fiduciary accountability, and protect taxpayer dollars.

The Corporation is not in an adversary relationship with the recipients' clients. We seek nothing from or about individual persons represented by the recipients. We do not want to know their secrets or confidences. We do not see how they can be harmed by provisions that prevent recipients' attorneys from attempting to use the privilege as a shield to make selective presentations under the guise of full disclosure. The privilege, of course, is intended for the protection of the client, not for the attorney.

We provide that the hearing examiner may look at the document with the privileged matter expunged and, if he thinks exercise of the privilege is in bad faith or in error, he can ask to see the document for *in camera* inspection, and may issue such finding or order as the facts may warrant, but he may not disclose any of this privileged information to the President. In addition, authority is given the examiner to issue such protective orders as necessary to protect client confidences and to prohibit unjusitifed dissemination of evidence [§ 1625.7(c)(3)].

Several commenters were particularly concerned about the provision permitting the hearing examiner to require a good faith effort by the attorney to get the client to waive the privilege. Several referred to the American Bar Association Ethics Committee Informal Opinion No. 1287 (June 7, 1974) (apparently inadvertently cited as No. 1287).

The Corporation considered clarifying language to incorporate the language of Informal Opinion No. 1287 because we think our purpose was misunderstood. Some recipients, for example, have refused access by Corporation auditors to the accounting records regarding the client trust accounts on the ground their records contain client names. It is plausible that many clients would be happy to sign a waiver limited to that necessary for the Corporation to ascertain, *inter alia*, if all funds to which they may be entitled have been paid promptly to them and that all the funds have been accounted for properly. A recipients' assertion of the privilege in such circumstances and refusal to offer the client the opportunity to waive—fully consistent with relevant ABA opinions—would appear highly questionable. However, because of the importance and sensitivity of the privilege and to avoid any possible semblance that clients of recipients are entitled to any less confidentiality and dignity than any other clients, we deleted all reference to efforts to obtain a waiver.

Sections 1625.8 and 1625.9

It is suggested that § 1625.8 and § 1625.9 be revised to provide that the Corporation will proceed first. We think that the Corporation should put on its entire case, in writing, with its show cause order. If it cannot do that, it should not initiate the proceeding. If it fails to make a prima facie case, the recipient should not have to make a detailed response. A specific provision has been added to permit the recipient to challenge a prima facie case (§ 1625.7(a)(1)) and if it makes timely request and prevails it can avoid having to make a response under § 1625.5. The recipient's response will reduce the disagreement to specific issues of fact, or argument as to whether the facts constitute a lawful basis for denial of refunding. The rule clearly specifies that, after the recipient has applied for refunding, the initial burden of going forward is placed on the Corporation, and only if the Corporation makes a prima facie case in its initial affidavits and other submissions does the burden shift to the recipient to show cause why it should receive refunding. Then, the Corporation has an opportunity to rebut and the recipient has the opportunity for sur-rebuttal. Accordingly, § 1625.9 is revised to omit the reference to the burden of going forward.

Section 1625.9

It is suggested that under § 1625.9 the Corporation shall have the burden of going forward to establish a prima facie case by a preponderance of admissible evidence. Perhaps no other provision of the regulations, with the possible exception of the comments on attorney-client privilege, drew more comments. Most argued that a show cause proceeding does not shift the burden of proof, while ignoring the statements of Senators Hatch and Rudman (Cong. Rec. Oct. 21, 1983, P. S14446) that Congress intended to shift the burden of proof to the recipient. The only House exchange, between Congressmen Morrison and Smith, is fully consistent with this interpretation (Cong. Rec. Nov. 9, 1983, P. H9562). We recognize that there are state court decisions which state that a show cause proceeding does not always shift the burden of proof (i.e., persuasion), although it may shift the burden of going forward where a prima facie case is made at the time of issuance of the show cause order. We must recognize here, however, that it was the Congressional intent that the burden be shifted, even though many

VOL 51 ISS 82 AP 29 1986 UMI

commenters may have disagreed with the method used. In light of the legislative record, the suggestion must be rejected. As noted above, however, the reference to the burden of going forward is deleted.

A great many comments also addressed the way we explained the recipient's burden of proof under each of the four standards set out in § 1625.9. The descriptive language used in § 1625.9 is the reverse of that used in § 1625.3. For example, where § 1625.3(b) provides that there can be a denial of refunding where there has been "significant *failure* (emphasis supplied) by a recipient to comply" with the cited sections of the Act and the regulations, § 1625.9(b) provides that the recipient must show "by a preponderance of admissible evidence . . . that it has *complied*" (emphasis supplied) with those cited sections of the Act and the regulations. The comments suggested that the Corporation's burden as well as that of the recipient should be spelled out under each ground. We do not think it is necessary to do this.

The new § 1625.9(c) standard is different from the standard in old § 1625.3(c). We have conformed § 1625.3(c) to that of § 1625.9(c) to insure that the standards under both sections as revised are fully consistent. The conforming change is as follows: Under old (c), except in "unusual circumstances", a recipient which had had a significant failure to provide adequate service had to receive notice and opportunity to take corrective action before formal proceedings could be commenced. Under the new standard, the recipient cannot claim that it was not notified and given an opportunity to take corrective action unless it could not reasonably be expected to have prevented or corrected its failure without such notice and opportunity to correct. We think this a considerable improvement in the regulations. The old requirement could be used repeatedly by a neglectful or incompetent recipient to buy time and avoid a formal proceeding. In effect, the Corporation would be responsible for continuous current awareness of all recipients' compliance with this requirement at all times—an impossible obligation. Under the new standard, a recipient will be able to claim it should have been given notice and opportunity to take corrective action only where without such notice it could not reasonably have been expected to have prevented or corrected the failure. Thus, recipients are expected to maintain adequate self-appraisal procedures and standards and to take necessary corrective action on their own, and cannot wait until the Corporation makes a monitoring trip or receives a complaint, knowing they will have an opportunity to correct before a formal action can be taken. Clients deserve better than that.

Section 1625.11

It is recommended that, on review by the President under § 1625.11, the examiner's decision shall be modified or reversed only if there was abuse of discretion or clear error of law. We do not think the President can limit his review in this fashion. This is the standard for court review of a final agency action and the examiner's action is not final. On review of an initial decision of an administrative law judge, an agency subject to the Administrative Procedure Act generally has all the powers it would have had in making the initial decision. *See* 5 U.S.C. 557(b). The analogy is persuasive and the suggestion is rejected.

Other Matters

1. One comment complained about the rewording of the statement of purpose. We believe we reflect Congressional intent in the Act and the appropriations riders as accurately as practicable. We have not changed it.

2. Several comments reargued the changes made in 1983 when denial of refunding procedures (Part 1625) were split from termination actions (Part 1606). Those suggested changes were discussed and considered in full at that time. We think it is unnecessary to reargue them. Accordingly, we will not discuss suggestions concerning the 1983 changes any further. However, we did accept the suggestions that challenges to Corporation rules may be made in proceedings under this part, but required that the challenges be made no later than the request for a hearing or that they be waived.

3. Various changes were made to conform sections and to provide a consistent and coherent set of procedures. These changes include the following:

a. The title "presiding officer" was changed to "hearing examiner" throughout to reflect the language of the Act and appropriations riders.

b. The earliest date on which the Corporation can require a recipient's employee to testify under § 1625.4(f) will be after the date on which the recipient requests a hearing under § 1625.4(d).

c. Depositions, if available, and relevant papers and parts of papers, must accompany affidavits under § 1625.4(b) and § 1625.5(c).

d. Each party will give a list of all its witnesses, including its own and opponents' affiants and all others who are to testify, to one another and to the hearing examiner, 24 hours before the prehearing conference under § 1625.7(b). They will indicate whether they want the witness for cross-examination or direct testimony, and, if they expect the opponent to produce the witness, they will explain the basis for this expectation.

e. Under § 1625.7(c)(4), the hearing examiner may not go into matters not necessary for his or her decision. For example, it would be improper to allow explanation of the Corporation's exercise of investigative or prosecutorial discretion in bringing the action against the particular recipient rather than whether the facts found justify refunding under applicable legal standards.

f. Section 1625.10(b) has been revised to more comprehensively spell out what the initial decision will contain. It will be a part of the record, and will have a statement of findings and conclusions, and the reasons or basis for them, on all material issues of fact, law or discretion presented. The last sentence of old paragraph (b) is made into a new paragraph (c).

g. Section 1625.11 has been revised to reduce from 10 to 7 days, the time within which

(1) The Corporation or the recipient can ask for review of the hearing examiner's decision,

(2) an initial decision becomes final, and

(3) The President must make his decision.

h. Section 1625.12 has been revised to conform the provisions dealing with time to the new statutory requirements. Thus, any extensions of time must not prevent completion of the hearing within 60 days of the receipt by the recipient of the notice under § 1625.4, or prevent the President from reaching a final decision (including time to consider a request for review) within 90 days of the notice, unless extraordinary circumstances require an extension to prevent a manifest injustice.

The time computation language of paragraph (a) of the section is taken from Rule 6 of the Federal Rules of Civil Procedure. By mutual agreement any time period may be shortened. In addition, former paragraph (a) of § 1625.15 has been transferred to the section as new paragraph (d). We believe it is more appropriate here since it relates to time requirements. Paragraph (e) of the section permits waiver or modification of any provision except paragraph (b) of section 12 which deals with enlargement of time.

List of Subjects in 45 CFR Part 1625

Administrative practice and procedure, Legal Services.

For the reasons set out above, 45 CFR Part 1625 is revised to read as follows:

PART 1625—DENIAL OF REFUNDING

Sec.

1625.1 Purpose.
1625.2 Definitions.
1625.3 Grounds for denial of refunding.
1625.4 Notice.
1625.5 Request for hearing.
1625.6 Hearing examiner.
1625.7 Pre-hearing procedures.
1625.8 Conduct of the hearing.
1625.9 Burden of persuasion.
1625.10 Initial decision.
1625.11 Final decision.
1625.12 Time and waiver.
1625.13 Right to counsel.
1625.14 Reimbursement.
1625.15 Interim funding.
1625.16 Termination funding.

Authority: Sec. 1006(b)(1) and (3), 1007(a)(1), (3) and (9), 1007(d) and (e), 1008(e), and 1011(2) of the Legal Services Corporation Act, as amended. (42 U.S.C. 2996e(b)(1) and (3), 2996f (a)(1), (3) and (9), 2996f(d) and (e), 2996g(e) and 2996(j); Pub. L. 98–166, 97 Stat. 1071; Pub. L. 98–411, 98 Stat. 1545; Pub. L. 99–180, 99 Stat. 1136.

§ 1625.1 Purpose.

This part is intended to provide timely, full, fair, and impartial procedures for allowing a recipient to show cause why its funding should be continued when the Corporation has made a preliminary determination that an application for refunding of a grant or contract should be denied. This part is further intended to provide for completion of these procedures in a timely manner so that funding issues are expeditiously resolved so as to avoid unnecessary and protracted disruption in the delivery of legal services to eligible clients.

§ 1625.2 Definitions.

"Denial of refunding" means a decision that, after the expiration of a grant or contract, a recipient:

(a) Will not be provided financial assistance; or

(b) Will have its annual level of financial support reduced to an extent that is not required either by a change of law, or a reduction in the Corporation's appropriation that is apportioned among all recipients of the same class in proportion to their current level of funding, or by the uniform application of a statistical formula for the reallocation of funding among the members of the same class, and is more than 10 percent below the recipient's annual level of financial assistance under its current grant or contract.

§ 1625.3 Grounds for denial of refunding.

Refunding may be denied when:

(a) Denial is required by, or will implement, a provision of law, a Corporation rule, regulation, guideline, or instruction that is generally applicable to all recipients of the same class, or a funding policy, standard, or criterion approved by the Board; or

(b) There has been significant failure by a recipient to comply with a provision of law, or a rule, regulation, guideline, or instruction issued by the Corporation, or a term or condition of a current or prior grant from or contract with the Corporation; provided, however, that a recipient's failure to comply with any of the requirements in this paragraph at a time when the requirement was not in effect or at a time more than 6 years prior to the date the recipient receives notice of the failure pursuant to § 1625.4 shall not be a basis for denial of refunding; or

(c) There has been significant failure by a recipient to use its resources to provide economical and effective legal assistance of highly quality as measured by generally accepted professional standards, the provisions of the act, or a rule, regulation, or guideline issued by the Corporation. If the recipient could not reasonably be expected to have prevented or corrected its failure without notice from the Corporation and an opportunity to have taken effective corrective action, refunding shall not be denied for this cause unless the Corporation has given the recipient such notice and opportunity; or

(d) The Corporation finds that another organization, whether a current recipient or not, could better serve eligible clients in the recipient's service area.

§ 1625.4 Notice.

When there is reason to believe that refunding should be denied, the Corporation shall serve a written notice upon the recipient, and the Chairperson of its governing board, which shall include:

(a)(1) A short and plain statement, in numbered paragraphs, the contents of each of which shall be limited as far as practicable to a single set of circumstances, of the factual grounds for the denial of refunding;

(2) If the ground specified in § 1625.3(d) is asserted, the statement shall identify the other organization and specify the basis for the Corporation's assertion that it could better and more economically serve eligible clients;

(b) An affidavit or affidavits covering the direct testimony of each witness upon whom Corporation's counsel relies; such affidavit(s) shall be made on personal knowledge, shall set forth such facts as would be admissible in evidence, and shall show affirmatively that the affiant is competent to testify to the matters stated therein; sworn or certified copies of all papers or parts thereof referred to in an affidavit shall be appended thereto; depositions, if available, shall be included;

(c) A memorandum of points of law and authorities showing with particularity:

(1) that the affidavit(s), paper(s), and deposition testimony specified in paragraph (b) of this section constitute evidence of such discrete factual allegations as were identified in paragraph (a)(1) of this section and as are sufficient under applicable law to support denial of refunding;

(2) the legal standards, rulings, statutes, regulations, or decisional law upon which the Corporation relies in advancing its theories or arguments in support of denial of refunding with particularized reference and adequate citation to competent authority; and

(3) as proximately as reasonably possible, the logical nexus and points of reference among (i) affidavit(s), paper(s), and deposition testimony specified in paragraph (b) of this section, (ii) the factual grounds as identified in enumerated paragraphs specified by paragraph (a)(1) of this section, and (iii) the legal theories or arguments advanced by the Corporation to justify denial of refunding.

(d) A directive to show cause, signed by an official of the Corporation other than the President, which shall inform the recipient that, if within 30 days of the recipient's receipt of this notice the Corporation receives a request for a hearing as specified in § 1625.5 of this part and accompanied or preceded by all documents specified by paragraph (f) of this section, a hearing will be held; the directive shall identify;

(1) The name, business address, telephone number, and brief summary of professional qualifications of the hearing examiner and a statement that the examiner supports the purposes of the Act;

(2) The name, address, and phone number of the Corporation's counsel;

(3) The time and place of the pre-hearing conference and the last date upon which it may be held, which date shall be no more than 37 days after the date of the notice; and

(4) The time and place of the hearing and the last date on which it can start, which date shall be no more than 44 days after the date of the notice;

(e) A copy of these procedures as contained in Part 1625.

VOL 51 ISS 82 AP 29 1986 UMI

(f) A requirement, signed by an official of the Corporation other than the President, may be included that the recipient produce a specific document or documents in its possession, custody, or control no later than the time the recipient requests a hearing or produce a person in its employ to testify in a pre-hearing deposition at a date (subsequent to the recipient's request for a hearing), place, and time to be specified in the requirement or to be available to testify at the show cause hearing; provided, however, that the recipient may serve a motion within 10 days of its receipt of the notice, for the hearing examiner to limit or quash the requirement; the hearing examiner shall rule on such motion within 7 days; if an objection to the hearing examiner, filed pursuant to § 1625.6(b) has delayed such ruling, the hearing examiner shall promptly rule when the objection is resolved.

§ 1625.5 Request for hearing.

Within 30 days of receipt of the notice, the recipient shall serve upon the Corporation a request for a hearing, which must include:

(a) A short and plain statement in numbered paragraphs, that is either an admission or a denial of each of the numbered paragraphs in the notice; any averment in the notice which is not specifically denied is deemed admitted;

(b) A short and plain statement, in numbered paragraphs, the contents of each of which shall be limited as far as practicable to a single set of circumstances, of all factual grounds on which the recipient will rely to show cause why refunding should not be denied;

(c) An affidavit or affidavits covering the direct testimony of each witness upon whom recipient's counsel relies and appending all exhibits to such testimony; such affidavit(s) shall be made on personal knowledge, shall set forth such facts as would be admissible in evidence, and shall show affirmatively that the affiant is competent to testify to the matters stated therein; sworn or certified copies of all papers or parts thereof referred to in an affidavit shall be appended thereto; depositions, if available, shall be included; the recipient must set forth by affidavit, sworn or certified copies of papers, and depositions, specific facts showing that there is a genuine issue of material fact for a show cause hearing;

(d) A memorandum of points and authorities showing that the Corporation has failed to provide affidavits or other evidence sufficient to deny refunding or that the affidavit(s) specified in paragraph (c) of this section constitute evidence of facts necessary to show cause why refunding should not be denied under applicable legal standards.

(e) The recipient may serve a request on the hearing examiner that the Corporation be required, upon sufficient notice, to produce a specific document or documents in the possession, custody, or control of the Corporation or of another organization identified under § 1625.4(a)(2) or produce a person in its employ (or that of such other organization) to testify in a pre-hearing deposition at a date, place, and time to be specified in the requirement or to be available to testify at the show cause hearing.

§ 1625.6 Hearing examiner.

(a) The hearing examiner shall be appointed by the President, and shall be a person who is familiar with legal services and supportive of the purposes of the Act, who is independent, and who is not an employee of the Corporation.

(b) Within 5 days of receipt of notice of the name of the hearing examiner, the recipient may file a written notice that it objects to the hearing examiner on the basis that this person does not fit the criteria of paragraph (a) of this section or has made statements or taken actions indicating personal bias against the recipient. The recipient will be granted a 5-day extension for presenting the basis of its objection if it files a timely notice of objection and a statement as to why it is unable with due diligence to present the basis of its objection without the extension.

(c) The President shall consider the recipient's objection(s) with any supporting documentation and, within 10 days thereafter, issue a written notice of a decision either to retain or replace the hearing examiner.

(d) No objection to the appointment of a hearing examiner may be made unless presented in the manner specified in this section.

§ 1625.7 Pre-hearing procedures.

(a)(1) On or before the date it requests a hearing, the recipient may serve a motion for an interim decision that the notice fails to state an adequate basis for the denial of its application for refunding. The hearing examiner shall rule on such motion within 7 days and shall grant the motion if he or she finds that the facts sworn to in the notice do not provide an adequate basis to deny the application for refunding.

(2) If the recipient fails to make a request for hearing in such a timely fashion that it is received by the Corporation within 30 days of receipt of the notice by the recipient, the recipient shall be deemed to have waived its right to a hearing and a final decision shall be entered by the President.

(3) If the recipient makes timely request for a hearing, the hearing examiner may, *sua sponte* or on the motion of a party, review the notice, the request for a hearing, and all documents submitted by the recipient pursuant to requirement(s) issued pursuant to § 1625.4(f) to determine before the date set for the hearing whether there is any genuine issue as to any material fact and whether a party is entitled to summary judgment or partial summary judgment as a matter of law. If, considering the papers in the light most favorable to the opposing party, the hearing examiner finds that the parties' submissions, admissions on file, affidavits, and any other matter on the record show that there is no genuine issues as to any material fact and that either party is entitled to summary judgment as a matter of law, the hearing examiner shall issue to the President a written initial decision pursuant to § 1625.10(b). If such a decision with a partial summary judgment should become final pursuant to § 1625.11, the hearing examiner may exclude further evidence relevant only to an issue or issues resolved by such decision.

(b) If the recipient makes a timely request for a hearing, a pre-hearing conference shall be held within 7 days. At least 24 hours prior to the pre-hearing conference, each party shall cause to be delivered in person to the hearing examiner and counsel for the opposing party a list including all its affiants it intends to call for direct testimony, all the other party's affiants it will require the party to produce for cross-examination, and all other persons who are to testify on direct or cross-examination. For each person on its list, the party will indicate whether the person will be called for direct testimony or for cross-examination and whether the party will require the opposing party to produce the witness (and, if so, the basis). At the pre-hearing conference, the matters to be considered shall include:

(1) Whether summary judgment or partial summary judgment ought to be issued;

(2) Proposals to define and narrow the issues;

(3) Efforts to stipulate the facts, in whole or in part;

(4) The order of presentation of exhibits and witnesses, along with their number and identity;

(5) The possibility of presenting the case on written submission or oral argument;

(6) Any necessary variation in the date, time, and place of the hearing;

(7) The possibility of settlement; and

(8) Such other matters as may be appropriate.

(c) (1) The hearing examiner may establish specific procedures consistent with this part for conduct of the show cause hearing.

(2) The hearing examiner may require or permit written submission of additional statements discussing any matter described in paragraph (b) of this section as well as any other arguments and supporting material at any time prior to completion of the show cause hearing.

(3) The hearing examiner may issue appropriate protective orders to prohibit the parties from disseminating evidence to other than specifically named individuals or such other restrictions as may be necessary to protect client confidences.

(4) The hearing examiner may not consider any issue not necessary for a determination of whether the recipient's refunding application will be denied.

(5) The only two parties to the proceeding will be the Corporation and the recipient; provided, however, that a state support center which is a subgrantee or a subrecipient as of the time of the effective date of this regulation may be joined as a party by the hearing examiner but only during the remaining term of such existing subgrant or other agreement.

(6) The hearing examiner shall require each party to make arrangements for the testimony and cross-examination of the witnesses and affiants it will rely upon and bear the expenses associated with the testimony.

(d) (1) The hearing examiner may, at any time prior to the completion of the hearing, require either party, upon sufficient notice, to produce a relevant document in its possession, custody or control; the hearing examiner may require either party to produce a person in its employ to testify at the hearing.

(2) The hearing examiner shall not issue such requirements at the request of the Corporation's counsel if request is not made within seven days of the Corporation's receipt of the request for a hearing, or at the request of the recipient, if request is not made at or before the time it makes a request for a hearing, unless the requesting party can show that it could not have anticipated its need to request the requirement and failure to issue the requirement would cause a manifest injustice.

(3) In proceedings under § 1625.3(d) the hearing examiner may likewise require the Corporation to produce a document in the possession, custody or control of another organization identified pursuant to § 1625.4(a)(2) or a person in the employ of such other organization, subject to the sanctions set forth in § 1625.8(f).

(4) The hearing examiner shall rule on motions respecting requirements for the production of documents or witnesses within 7 days.

§ 1625.8 Conduct of the hearing.

(a) The show cause hearing shall be held within 7 days after the pre-hearing conference in or near a city having an airport with regularly scheduled airline service and convenient to the Corporation, to the recipient, the community it serves, and to witnesses determined by the hearing examiner to be necessary for the show cause hearing.

(b) The hearing examiner shall preside over the show cause hearing, avoid delay, maintain order, conduct a full and fair show cause hearing, and insure that an adequate record of the facts and issues is made.

(c) The show cause hearing shall be open to the public, unless, in the interests of justice or maintaining order, the hearing examiner shall determine otherwise.

(d) (1) Since each party will have presented the direct testimony of its witnesses by their affidavits, the show cause hearing will be limited, except as hereinafter provided, to cross-examination of the other party's affiants, examination of those employee(s) of the other party from whom the party was unable, despite due diligence, to obtain affidavit(s) or pre-hearing deposition(s), and rebuttal testimony (if allowed).

(2) The recipient will proceed first and will be allowed a total of up to 7 days to cross-examine the Corporation's affiant(s) or to present testimony from the Corporation's or the other organization's employee(s).

(3) The Corporation will then be allowed a total of up to 7 days to cross-examine the recipient's affiant(s), to present testimony from the recipient's employee(s), or to adduce rebuttal testimony.

(4) The recipient will then be allowed a total of up to one day of sur-rebuttal testimony.

(5) During the time allotted to a party, it may present its affiant(s) for direct testimony limited to the scope of the respective affidavits(s) and for cross-examination by the opposing party at that time.

(6) The hearing examiner will allow a total of up to one day divided evenly between the parties for closing arguments.

(e) (1) If either party fails, without good cause, to produce a person or document required to be produced under §§ 1625.4(f), 1625.5(e), or 1625.7(d), the hearing examiner may make a finding adverse to the party or any lesser determination.

(2) If a document is withheld on the basis of privilege, the hearing examiner may require the party to provide a version of the document that does not contain privileged information, explain the basis of the withholding, and, if it appears that the privilege is not asserted in good faith or is asserted in error, require production of the document for *in camera* inspection. After such inspection, the hearing examiner may issue such finding or order as the facts may warrant. The hearing examiner shall not disclose to the President of the Corporation information on which a claim of privilege or confidentiality is made.

(3) A recipient may neither introduce into the record nor rely upon any statement by a witness, any document, or other evidence if the Corporation, subsequent to the effective date of this regulation, had requested the recipient to arrange for that witness to cooperate in an interview or to produce the document or other evidence prior to issuance of the notice, unless the recipient is able to show good cause for its failure to comply with the request at an earlier date than it did.

(4) No adverse inference may be made if a party fails to produce a document which is not in the party's possession, custody, or control or that of another organization that is actually controlled by the party (or, for the Corporation, another organization identified under § 1625.4(a)(2)); no adverse inference may be made if a party fails to produce a witness that is not an employee of the party or of another organization that is actually controlled by the party or, for the Corporation, another organization identified under § 1625.4(a)(2).

(f) Technical rules of evidence shall not apply. The hearing examiner shall make any procedural or evidentiary ruling that may help to insure full disclosure of the facts, to maintain order, or to avoid delay. Irrelevant, immaterial, repetitious or unduly prejudicial matter may be excluded.

(g) (1) Official notice may be taken of published policies, rules, regulations, guidelines, and instructions of the Corporation, of any matter of which judicial notice may be taken in Federal court, or of any other matter whose existence, authenticity, or accuracy is not open to serious question.

VOL 51 ISS 82 AP 29 1986 UMI

(2) The validity of rules, regulations, guidelines and instructions duly published under § 2008(a) of the Act may be challenged only in a complete brief served no later than the request for a hearing; no argument which could have been included in such a brief, but was not, may be raised at a later time.

(h) The hearing will be recorded at Corporation expense. The Corporation will send one copy of the transcript to the recipient and the hearing examiner as soon as it is received.

(i) At the discretion of the hearing examiner, the recipient and the Corporation may be required or allowed to submit post-hearing briefs or proposed findings and conclusions. The recipient's brief shall be served within 5 days of the close of the hearing and the Corporation's 4 days thereafter. Either party should note any relevant transcript errors in an addendum to its post-hearing brief (or if no brief will be submitted, in a letter submitted within the time limit set for a brief; if the transcript or a part of the transcript is not received 4 or more days before the time set for its brief, errors must be noted within 4 days of receipt of the transcript or part of the transcript).

(j) The transcript and any post-hearing briefs or letters will become part of the record.

(k) The Federal Rules of Civil Procedure and the Administrative Procedure Act shall provide guidance for all actions under this part when relevant procedures or rules therein are not inconsistent with the provisions of this part or of relevant laws specifically applicable to such an action.

§ 1625.9 Burden of persuasion.

The recipient shall have the ultimate burden of persuasion by a preponderance of the evidence on the record that the application for refunding should not be denied. If the Corporation has asserted, as a ground for the denial of the application for refunding, the grounds specified in:

(a) Section 1625.3(e), the recipient must establish by a preponderance of the evidence on the record that it is not in a class of recipients affected by the law, the Corporation's rule, regulation, guideline, or instruction, or a funding policy, standard, or criterion approved by the Board or that the proposed action is not required by or will not implement such policy;

(b) Section 1625.3(b), the recipient must establish by a preponderance of the evidence on the record that:

(1) It has complied during the specified period of time in all respects with each specified provision of law, with each specified provision of the Corporation's rules, regulations, guidelines, and instructions, and with each specified term and condition of current or prior grants from, or contracts with, the Corporation as specified in the notice; or

(2) All of its violations are merely minor, technical or insignificant;

(c) Section 1625.3(c), the recipient must establish by a preponderance of the evidence on the record that:

(1) It has provided economical and effective legal assistance of high quality as measured by generally accepted professional standards, the provisions of the act, or a rule, regulation, or guideline issued by the Corporation; or

(2) The Corporation has not given the recipient prior notice of its failure and an opportunity to take effective corrective action and the recipient could not reasonably be expected to have prevented or corrected its failure without notice from the Corporation and an opportunity to have taken effective corrective action before it received the notice specified in § 1625.4 of this part;

(d) Section 1625.3(d), the recipient must establish by a preponderance of the evidence on the record that it could serve eligible clients in its service area better and more economically than the other organization specified in the notice.

§ 1625.10 Initial decision.

(a) Within 10 days of the completion of the hearing, the hearing examiner shall cause an initial decision to be served upon the parties:

(1) Granting refunding; or

(2) Granting refunding subject to any modification or condition that may appear necessary and appropriate on the basis of information disclosed at the hearing or adduced from the record; or

(3) Denying refunding.

(b) The initial decision shall be a part of the record and shall include a statement of findings and conclusions, and the reasons or basis therefor, on all the material issues of fact, law, or discretion presented on the record.

(c) Findings of fact shall be based solely on evidence disclosed at the hearing or adduced from the record or on matters of which official notice is taken.

§ 1625.11 Final decision.

(a) If neither the Corporation's counsel nor the recipient requests review by the President, the initial decision shall become final 7 days after receipt by the recipient.

(b) The recipient or the Corporation's counsel may seek review by the President of the initial decision. A request shall be made in writing to the President and the other party shall be served within 7 days of receipt by the party of the initial decision, and shall state in detail the reasons for seeking review.

(c) Within 7 days after receipt of a request for review of the initial decision, the President shall adopt, modify or reverse the initial decision, or shall direct further consideration of the matter. In the event of modification or reversal, the President's decision shall conform to the requirements of § 1625.10(b).

(d) A decision by the President shall become final upon service on the recipient.

§ 1625.12 Time and waiver.

(a) *Computation of time.* In computing any period of time prescribed or allowed by this part or by order of the President or the hearing examiner, the day of the act, event or default from which the designated period of time begins to run shall not be included. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a legal holiday, in which event the period runs until the end of the next day which is not a Saturday, a Sunday, or a legal holiday. All periods shall otherwise include Saturdays, Sundays, and legal holidays. A deadline for a party or the hearing examiner to submit a document is met only if the document is actually received by counsel for the other party and by the hearing examiner by the end of the relevant time period.

(b) *Enlargement of time.* The President or the hearing examiner may enlarge any period of time on agreement of the parties if, and only if, the President or the hearing examiner makes a determination in writing or on the record either that:

(1) The enlargement will not prevent completion of the hearing within 60 days from receipt of the notice by the recipient or prevent the President from reaching a final decision—with at least 7 days to consider the request for review—within 90 days from receipt of notice by the recipient; or

(2) The existence of extraordinary circumstances require the enlargement of time to prevent manifest injustice.

(c) *Reduction of time.* On agreement of the parties and the hearing examiner, any period of time may be shortened.

(d) *Failure* by the Corporation to meet a time requirement of this part shall not entitle a recipient to refunding of its grant or contract.

(e) Any provision of the rules in this part, excepting those in § 1625.12(b), may be waived or modified:

(1) By the hearing examiner with the assent of the recipient and counsel for the Corporation; or

(2) By the President for good cause shown.

§ 1625.13 Right to counsel.

At a hearing under § 1625.8, the Corporation and the recipient each shall be entitled to be represented by counsel, or by an employee.

§ 1625.14 Reimbursement.

If refunding is granted after a notice has been issued under § 1625.4, a recipient shall be entitled to receive reimbursement from the Corporation for reasonable and actual expenses including attorney's fees up to the hourly equivalent of the rate of level V of the executive schedule specified in Section 5316, of Title 5, United States Code, that were required in connection with proceedings under this part, to the extent it has prevailed and where the hearing examiner finds the Corporation's position to have been substantially without merit.

§ 1625.15 Interim funding.

Pending a final determination under this part, the Corporation shall provide the recipient with interim funding necessary to maintain its current level of legal assistance activities for eligible clients under the Act.

§ 1625.16 Termination funding.

After a final decision to deny refunding, and without regard to whether a hearing has occurred, the Corporation may authorize temporary funding if necessary to enable a recipient to close or transfer current matters in a manner consistent with the professional responsibility of the recipient and the recipient's attorneys to their present clients.

Dated: April 24, 1986.

John H. Bayly, Jr.,

General Counsel.

[FR Doc. 86-9492 Filed 4-28-86; 8:45 am]

BILLING CODE 6820-35-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of Endangered Status for Hibiscadelphus Distans (Kauai Hau Kuahiwi)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines *Hibiscadelphus distans* (Kauai hau kuahiwi) to be an endangered species, under the authority contained in the Endangered Species Act of 1973, as amended (Act). Only ten individuals of this endemic tree remain in the wild, occurring in the State-owned Pu'u Ka Pele Forest Reserve, on the island of Kauai, Hawaii. Imminent threats to this species and its habitat exist from feral goat browsing, fire, competition with exotic species, and human disturbance. This determination that *Hibiscadelphus distans* is an endangered species implements the protection provided under the Act.

DATE: The effective date of this rule is May 29, 1986.

ADDRESS: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, at the above address (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

Hibiscadelphus distans was discovered by L. Earl Bishop and Derral Herbst in 1972 and was described by them as a new species the following year (Bishop and Herbst 1973). It likely was more abundant and more widely distributed at one time, but today only ten individuals are known to exist. It occurs on State-owned land within the Pu'u Ka Pele Forest Reserve, Koai'e Valley, Waimea Canyon, island and county of Kauai, Hawaii.

This species is a small tree, up to 5.5 meters (18 feet) tall, with green, heart-shaped leaves and smooth bark. Its flowers are approximately 2.5 centimeters (1 inch) long and are greenish yellow, turning maroon with age. The plants live within an area of approximately 0.02 hectares (2,000 square feet) on a steep rock bluff at an elevation of about 300 meters (1,000 feet). This area is a remnant of a native, open, dryland forest and receives approximately 150 centimeters (60 inches) of rain annually. The area's yearly mean temperature ranges from 18.5 to 25.7 degrees Centigrade (65 to 78 degrees Fahrenheit). Associated species include *Sapindus oahuensis* (lonomea), *Erythrina sandwicensis* (wiliwili), *Diospyros ferrea*, (lama), and *Melia azedarach* (chinaberry). The ground cover is sparse and consists chiefly of exotic grasses and forbs (Herbst 1978).

Although goats are not known to browse on the present plant population, browsing by an existing large feral goat population probably was responsible for the species' decline and could threaten the continued existence of the remaining plants. Other threats come from fire, competition with exotic species, and human disturbance. A cooperative effort between Federal and State agencies is needed to protect the remaining plants and to provide for species' recovery.

The Secretary of the Smithsonian Institution, as directed by section 12 of the Endangered Species Act of 1973 (Act), prepared a report on those plants considered to be endangered, threatened, or extinct in the United States. This report (House Document No. 94-51) was presented to Congress on January 9, 1975. On July 1, 1975, the Fish and Wildlife Service published a notice in the Federal Register (40 FR 27823) accepting this report as a petition within the context of section 4(c)(2) of the Act (petition acceptance provisions are now contained in section 4(b)(3)(A)), and giving notice of its intention to review the status of the plant taxa named therein, including *Hibiscadelphus distans*. As a result of this review, on June 16, 1976, the Service published a proposed rule in the Federal Register (41 FR 24523) to determine approximately 1,700 vascular plant species, including *Hibiscadelphus distans*, to be endangered pursuant to section 4 of the Act. In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice in the Federal Register (44 FR 70796) of the withdrawal of that portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired. The Service published an updated notice of review for plants on December 15, 1980 (45 FR 82480), including *Hibiscadelphus distans*. On October 13, 1983, and October 12, 1984, findings were made that listing *Hibiscadelphus distans* was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. A proposal, constituting a final finding that the petitioned action was warranted, was published on July 16, 1985 (50 FR 28873), based on information available in 1976 and gathered after that time and summarized in a detailed status report prepared by the Service (Herbst 1978). The Service now

determines *Hibiscadelphus distans* to be an endangered species with the publication of this final rule.

Summary of Comments and Recommendations

In the July 16, 1985, proposed rule (50 FR 28673) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice that invited general public comment was published in *The Garden Island* on August 16, 1985, and in the *Honolulu Star Bulletin* and the *Honolulu Advertiser* on August 21, 1985. Four letters of comment were received and are discussed below. A public hearing was requested and held in Lihue, Kauai, Hawaii on November 7, 1985. The comment period was reopened following the public hearing, closing again December 9, 1985 (50 FR 42196). One person testified at the hearing; his testimony is included in the following summary.

Comments were received from the Governor of the State of Hawaii, the Western Regional Office of the National Audubon Society, and a Professor of Botany at the University of Hawaii. Testimony at the public hearing was presented by the Administrator of the Division of Forestry and Wildlife of the State Department of Land and Natural Resources. All comments and testimony supported the listing of *Hibiscadelphus distans* as an endangered species. The Governor further stated that the trees had been identified in the State Threatened and Endangered Species Plan as among the ten highest Kauai district priorities for protection, and that the State intends to request funding to fence the plants. The University Professor expressed reservations over the Service's failure to propose designation of critical habitat for this species. The Service continues to believe that threats of collecting and vandalism would be exacerbated by such designation and that designation of critical habitat is therefore not prudent.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Hibiscadelphus distans* should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Hibiscadelphus distans* Bishop and Herbst (Kauai hau kuahiwi) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The habitat of *Hibiscadelphus distans* is subject to disturbance from several sources. Large herds of feral goats browse within the canyon and have destroyed surrounding vegetation. Goats may also dislodge stones from the ledges above the species, potentially damaging the trees and destroying seedlings (Herbst 1978). The presence of large goat herds results from specific game-management practices aimed at maintaining high goat population levels for hunting.

Human disturbance also presents a serious threat to the species. A hiking trail passes below the ledge where *Hibiscadelphus distans* is found, and activity by hikers straying off this path may impact the species by dislodging stones and increasing erosion of the friable soil. Trees may suffer additional damage by being used as "hand-holds" by hikers scaling the steep embankment.

The habitat disturbances created by people and feral goats have favored the introduction and spread of exotic vegetation. Today, small pockets of native plants can be found, but much of the canyon has been taken over by exotic species. Competition with exotic species and environmental changes brought about by changes in the vegetation have had a serious impact on many of the area's native species of plants and animals.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* The area where *Hibiscadelphus distans* exists is easily accessible to people and has already experienced incidents of unauthorized collecting and vandalism. When the Hawaii State Department of Forestry and Wildlife labeled other native plants along the trail system adjacent to the species' habitat, many of the labeled plants were dug up or damaged by people using the trail. Removal of or damage to any of the few remaining individuals of *Hibiscadelphus distans* could seriously jeopardize the chances of the species' survival.

C. *Disease or Predation.* Browsing by feral goats upon *Hibiscadelphus distans* is probably responsible for the species' currently depleted status. Although the remaining plants apparently are free from browsing pressure, the situation is still precarious. Should this pressure increase, through either environmental changes or game management practices, goats may be driven into areas they usually avoid, imperiling the few remaining trees.

D. *The inadequacy of existing regulatory mechanisms. Hibiscadelphus distans* is found in an area within the State-owned Pu'u Ka Pele Forest Reserve. State regulations prohibit the removal, destruction, or damage of plants found on State forest land. However, these regulations are difficult to enforce due to limited personnel. The Endangered Species Act will offer additional protection to this species.

E. *Other natural or manmade factors affecting its continued existence.* The small extant population (10 individuals) remaining makes *Hibiscadelphus distans* vulnerable to any catastrophe, natural or man-caused, that may impact the area. Reduction of the gene pool and genetic variability, resulting from a small population size, could have detrimental effects on the continued existence of the species. The presence of a trail rest shelter with a small fire pit near this lone population adds a potential threat of destruction by fire during the dry season.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Hibiscadelphus distans* as endangered. Only 10 individuals remain in the wild, and these face threats from feral goats, fire, competition with exotic species, and human disturbance. Given these circumstances, the determination of endangered status seems warranted. The following "Critical Habitat" section discusses the reasons for which critical habitat is not being designated at this time.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for *Hibiscadelphus distans* at this time. As discussed under Factor "B" in the "Summary of Factors Affecting the Species," this species potentially is subject to taking and vandalism. Other native plants along a trail near the area where the species occurs have already experienced incidents of unauthorized taking and vandalism. Publication of a critical habitat description in the **Federal Register** would subject the few remaining individuals of *H. distans* to an increased risk of taking and vandalism. Since the plant is only known to occur on State land, and the State of Hawaii is aware of its status, the value of critical habitat as a notification to Federal agencies would not be great enough to offset the potential risk, and thus no net benefit would accrue to the species from the designation of critical habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below:

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402 and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. No Federal activities are known or expected to affect *Hibiscadelphus distans*.

The Act and its implementing regulations, found at 50 CFR 17.61, 17.62, and 17.63, set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell it or offer it for sale in interstate or foreign commerce, or remove it from areas under Federal jurisdiction and reduce it to possession. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Due to the numerous threats to *H. distans* and its depleted state in the wild, it may be necessary to propagate this species in nurseries. Several specimens are presently found in cultivation and seeds have been sent to Dr. P. Fryxell at Texas A&M University. Requests for trade permits for scientific purposes and for enhancing the propagation of the species, allowed under § 17.62, may result if an artificial propagation plan is pursued. Otherwise, it is anticipated that few trade permits would ever be sought or issued, since the species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235-1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

BILLING CODE 4310-55-M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Determination of *Tumamoca Macdougalii* To Be Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Service determines a plant, *Tumamoca macdougalii* (Tumamoc globe-berry), to be an endangered species under the authority contained in the Endangered Species Act of 1973 (Act), as amended. This monotypic genus is known from northern Sonora, Mexico, and from Arizona where it occurs on Federal, State, Indian, Pima County, City of Tucson, and private lands. The species is threatened with habitat destruction from increased agricultural development, urbanization, a proposed Central Arizona Project (CAP) aqueduct, grazing, and collection. This action implements the protection provided by the Act.

DATE: The effective date of this rule is May 29, 1986.

ADDRESS: The complete file for this rule is available for public inspection during normal business hours, by appointment, at the Service's Regional Office of Endangered Species, 500 Gold Avenue SW., Room 4000, Albuquerque, New Mexico.

FOR FURTHER INFORMATION CONTACT: Peggy Olwell, Endangered Species Botanist, Office of Endangered Species, PO Box 1306, Albuquerque, New Mexico 87103 (505/766-3972 or FTS 474-3972).

SUPPLEMENTARY INFORMATION:

Background

Tumamoca macdougalii was first collected on July 31, 1908, by D.J. Macdougal, a scientist at the Carnegie Desert Laboratory, on Tumamoc Hill, west of Tucson, Arizona. The specimen was sent to J.N. Rose, a botanist at the U.S. National Herbarium, who described it as a new genus and species in honor of the type locality and its collector (Rose 1912). This plant is a delicate perennial vine in the gourd family. It grows from a tuberous root and has slender herbaceous stems (Toolin 1982). Its thin leaves have three main lobes, each divided into narrow segments. The plant bears small, yellow, male and female flowers and produces small, red, watermelon-like fruits. Flowering begins before the summer rains, with female flowers either being aborted or not produced until after rains later in the season; fruit set normally occurs in August and September. The population biology and ecological requirements are poorly understood (Toolin 1982), and additional studies are needed.

Historically, *Tumamoca macdougalii* has been found in 16 very scattered populations from Pima County, Arizona to northern Sonora, Mexico. Toolin (1982) searched known localities in Mexico and was unable to relocate any Mexican populations. However, in October 1985, a reconnaissance of the historic Mexican localities identified 5 populations with approximately 60 plants. There were no large numbers of juveniles found in these populations (Reichenbacher, F.W. Reichenbacher and Assoc., Tucson, pers. comm., 1985). Reichenbacher (1984) reported 10 U.S. populations containing a total of 38 adults, 11 juveniles and 126 seedlings. Extensive field surveys of 53,500 acres in Avra Valley conducted from August to November, 1984, increased the known U.S. populations to 30, containing 290 reproducing adults, 65 probable adults, and 1,627 juveniles (Reichenbacher 1985a; Boyd, Tierra Madre Consultants, Riverside, California, pers. comm., 1984). Continued surveying in the summer of 1985 increased the total known U.S. individuals to 2,300 of which 433 are adults (Reichenbacher, pers. comm., 1985).

These populations occur on private, Federal, State, Indian, Pima County, and City of Tucson lands.

Tumamoca macdougalii occurs in the Arizona Upland Subdivision of the Desert Scrub Formation at elevations of 450–795 meters (1,476–2,608 feet) in rocky to gravelly, sandy, silty, and clayey soils derived from granite, basalt, and rhyolite. The vegetation is palo-verde/cactus shrub and creosote bush/bursage desert scrub. Dominant associate species are creosote bush (*Larrea divaricata*), palo-verde (*Cercidium* spp.), white thorn acacia (*Acacia constricta*), saguaro cactus (*Carnegia gigantea*), prickly pear (*Opuntia phaeacantha*), cane cholla (*Opuntia versicolor*), mesquite (*Prosopis juliflora*), ironwood (*Olneya tesota*), and triangle leaf bursage (*Ambrosia deltoidea*). No symbiotic relationship is known for the Tumamoc globe-berry; however, it is usually found under trees and shrubs (nurse plants), which provide shade and protection, as well as support for the vine. The nurse plants for *Tumamoca macdougalii* include creosote bush, triangle leaf bursage, white thorn acacia, all-scale, palo-verde, and pencil cholla (Reichenbacher 1984).

In the **Federal Register** of December 15, 1980 (45 FR 82480), the Service published a notice of review covering plants being considered for classification as endangered or threatened. In that notice, *Tumamoca macdougalii* was included in category 1. That category comprises taxa for which the Service has sufficient biological information to support the appropriateness of their being proposed to be listed as endangered or threatened species.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. The species covered in the December 15, 1980, notice of review were considered to be petitioned, and the deadline for a finding on those species, including *Tumamoca macdougalii*, was October 13, 1983. On October 13, 1983, and again on October 12, 1984, the petition finding was made that listing *Tumamoca macdougalii* was warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires a recycling of the petition, pursuant to section 4(b)(3)(C)(i) of the Act. A proposed rule published May 20, 1985 (50 FR 20806), constituted the next required finding that the petitioned action was warranted in accordance with section 4(b)(3)(B)(ii) of the Act.

A survey of the Papago Indian Reservation (Reichenbacher 1985b) and field investigations carried out during the summer and fall of 1985 by F.W. Reichenbacher and Associates have provided new biological data that are included in this final rule. These new data include documentation of present threats and further information on the population status of the species.

Summary of Comments and Recommendations

In the May 20, 1985, proposed rule (50 FR 20806) and associated notifications, all interested parties were requested to submit factual reports or information that might contribute to the development of a final rule. Appropriate State agencies, county governments, Federal agencies, scientific organizations, and other interested parties were contacted and requested to comment. A newspaper notice was published in the *Arizona Daily Star* on Tuesday, June 18, 1985, which invited general public comment. Twelve letters were received in support of the proposal and five commentors provided information but expressed neither support nor opposition. These seventeen written comments on the proposal, together with the Service's responses, are summarized and discussed below. No public hearing was requested or held.

Support for the proposal was received from the International Union for Conservation of Nature and Natural Resources, Smithsonian Institution National Museum of Natural History, and World Wildlife Fund—TRAFFIC (U.S.A.). The Arizona Game and Fish Department commented that the proposal is ". . . an accurate reflection of the distributional status of the species."

The Bureau of Indian Affairs (BIA), Papago Agency, provided the legal discription for the locality on the Papago Indian Reservation which was discovered in the summer of 1984. The BIA indicated it has no idea what the size of the population is but would be available to assist the Service in taking a census. The Service is developing plans to conduct a census of the population on the Papago Reservation in 1986 and appreciates the cooperative efforts of the BIA.

The National Park Service (NPS) supports the proposal for listing *Tumamoca macdougalii* as endangered and supports the decision not to declare critical habitat for the species. In addition, NPS informed the Service of a locality on Saguaro National Monument. The Service is aware of this population and had included it in the population numbers in the proposal. The NPS also stated that Organ Pipe Cactus National Monument had been searched in 1984 for *Tumamoca macdougalii* but the plant population formerly known there was not relocated.

The U.S.D.A. Forest Service (FS) supports the proposal and states that project clearance surveys need to be conducted during June to December. The Service realizes the importance of field survey timing and will assume the responsibility of informing all agencies of the necessity to survey for this species during the summer and early fall. The FS also discussed several recovery measures for the species and recommended additional surveys. This information will be addressed in the recovery plan which will be written for the species following listing.

The Arizona Wildlife Federation (AWF) supports the proposal and states that "any projects on Federal lands should be planned so as to offer the least or no disturbance to the species." In addition, AWF also suggested that plants should be moved to protected areas of the Muleshoe Ranch or Buenos Aires Refuge. It is the policy of the Service to protect species within their natural habitat and not to introduce species out of their historic range. The Muleshoe Ranch is outside the known historic range of the species and the Buenos Aires Refuge is in the Semidesert Grassland Biotic Community, which is a different biotic community than the one in which *Tumamoca macdougalii* has been found. However, both Buenos Aires and the Cabeza Prieta Wildlife Refuges will be surveyed for the plant.

Dr. D.H. Wright, of the University of Georgia and a member of F.W. Reichenbacher and Associates field survey team, supports the proposal. However, he feels that the critical number reported in the proposal is the 355 adults, and that the 1,627 juveniles should not be included as part of the viable population estimate because only a small fraction of the juveniles are likely to become adults. Dr. Wright also points out that the species has a tenuous hold on population maintenance because of predation and the lack of a dispersal mechanism. In addition, Dr. Wright discusses the potential value of *Tumamoca macdougalii* as a genetic resource in breeding or genetic engineering, for example, conferring drought tolerance, fruit characteristics, tuber production or pest and disease resistance to domestic cucurbit species. Dr. Wright suggests an active management course be taken for this species. The Service realizes that *Tumamoca macdougalii* has a high rate of seedling mortality and has included this information in this final rule. Also, the Service uses the number of adults as the critical number when considering the status of the species. The Service intends to implement an active management course for *Tumamoca macdougalii* and will address this in the recovery plan which will be written following listing.

Ms. Linda Leigh, botanist and member of F.W. Reichenbacher and Associates field survey team, supports the proposal, and comments that the proposal contained incorrect information on the flowering period, which actually begins before the summer rains. This information has been incorporated into the final rule. Ms. Leigh also noted that a 100 percent survey of the CAP corridor has not been done in the Avra Valley and that the number of plants impacted by CAP is most probably understated. The Service is aware of this and will take it into consideration when working with the Bureau of Reclamation (BR) on CAP impacts to *Tumamoca macdougalii*.

Mr. Scott Wilson, member of F.W. Reichenbacher and Associates field survey team, supports the proposal and comments that most known populations occur in small washes and water drainages, and that if development in the vicinity of these populations is allowed, existing drainage patterns may be altered. He points out that ". . . more than just the immediate area surrounding these populations should be considered in future protection or development plans." The Service takes into consideration both direct and indirect impacts of any Federal project which may affect a listed species. Wilson notes that evidence of successful reproduction (i.e. fruits) was not found for most of the adult individuals and additional information on reproduction by adults is necessary. The Service will incorporate requirements for population biology and ecological studies into the recovery plan which will be developed following the listing of the species. In addition, Mr. Wilson also indicated a similar concern as that of Ms. Leigh, that a complete survey of *Tumamoca macdougalii* along the CAP route has not been done, and the number of plants along the route as presently indicated is an underestimate.

Ms. M.H. Wilkins, botanist and member of F.W. Reichenbacher and Associates field survey team, supports the proposal and submits the following comments: The vining habit and nature of the foliage make it difficult for *Tumamoca macdougalii* to survive in the early growth stages. Ms. Wilkins suggested we ". . . transplant any known populations from areas in

VOL 51 ISS 82 AP 29 1986 UMI

question to parks, gardens, museums . . . which can accommodate and cultivate them . . ." It is the policy of the Service to protect the species in its natural habitat. However, if the Service finds it necessary to move plants, scientific and educational facilities would be contacted.

Dr. T.F. Daniel, Curator, Arizona State University Herbarium, supports the proposal and submits the following comments based on his knowledge of the species and review of the most recent comprehensive field survey of *Tumamoca macdougalii* (Reichenbacher 1985a): Dr. Daniel contends that though the study, "The Status and Distribution of the Tumamoc Globe-Berry (Reichenbacher 1985) . . . comprised an admirable amount of field surveys, many of its conclusions are highly speculative and misleading." In particular, Dr. Daniel believes the extrapolated estimate of 46,971 live plants of *Tumamoca macdougalii* in 783 populations is misleading and not supported by the surveys cited in the study. The Service is aware of the method used to arrive at the estimates and in making its decision to list it is using only those numbers of observed plants. The Service will take this into consideration in working with BR on CAP impacts to the species. Dr. Daniel points out that additional inventories are necessary in western Pima County, Arizona, and eastern Sonora, Mexico, in order to make a biologically meaningful assessment of the status of *Tumamoca macdougalii*. Dr. Daniel believes it is especially important to note that the preferred route of the CAP would bisect the largest known population of *Tumamoca macdougalii* and because we know virtually nothing of the effects of transplanting individuals on the population dynamics of the species, the most beneficial conservation measure for the species would be for the CAP to avoid the largest population. The Service is cognizant of the lack of data on the effect of transplantation and is considering this in cooperating with BR on the CAP.

Dr. H.S. Gentry, Research Director, Desert Botanical Garden (DBG), supports the proposal and indicates the Desert Botantical Garden's continued interest in cooperating with the Service on threatened and endangered plants. The Service appreciates the active interest of the DBG and we will keep DBG informed of the status of this and other plant species we are working with.

The Soil Conservation Service (SCS) informed the Service of a population they discovered on the Papago Indian Reservation while conducting a soil and range survey for BIA. The SCS observed predation on the plants in the area by javelina (a pig-like mammal). The SCS also indicated that the people working on the soil survey are aware of the species and will be looking for it while out in the field. The Service is aware of the population and appreciates being kept informed of any new localities.

The Bureau of Reclamation (BR) commented that salvage may be necessary for *Tumamoca* plants in the CAP construction corridor. The Service will work with the BR to minimize impacts to *Tumamoca* and to the CAP project. Transplantation (salvage) of plants to avoid conflict is not the most desirable method for resolving species/project conflicts, but can be considered along with other alternatives. BR and the Service are working closely on the CAP to minimize impacts to the *Tumamoca* and all species which may be affected. The BR also provided Reichenbacher's (1985) extrapolated population estimates. As stated earlier, the Service bases its decisions to list on known observed population estimates. Rare species usually do not occur uniformly or continuously throughout the habitat types that they occupy. Therefore, extrapolated numbers rarely reflect accurate estimates where rare species are concerned. The Service will base its recommendations to BR on known observed population numbers. BR also provided Reichenbacher's (1985) data on *Tumamoca's* preferred habitat type, javelina predation, nurse plant association and diversity, and geographical distribution. This information has been incorporated into the final rule. The Service will continue to work closely with BR to provide protection for the *Tumamoca* and to achieve proper planning for the CAP.

Summary of Factors Affecting the Species

After a thorough review and consideration of all information available, the Service has determined that *Tumamoca macdougalii* should be classified as an endangered species. Procedures found at section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) were followed. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Tumamoca macdougalii* J.N. Rose (Tumamoc globe-berry) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The historic range of the Tumamoc globe-berry extended about 193 kilometers (120 miles) west of Tucson, Arizona, to Gunsight, Arizona, and approximately 483 kilometers (300 miles) south to Guaymas, Sonora, Mexico. Much of the former range of *Tumamoca macdougalii* is presently being modified by agricultural development (near Carbo, Sonora, and in the Avra Valley, Pima County, Arizona) and urban expansion (on the west side of Tucson, Arizona). The formerly known population at Organ Pipe Cactus National Monument has not been relocated.

Presently, there are 30 known U.S. populations containing approximately 433 adults and 1,667 juveniles. Nine populations of *Tumamoca macdougalii* occur on private land; eight on city, county, State, and university administered land; and 13 are under Federal administration. Seventy-five percent of the plants occupy habitat on non-Federal land and modification of the habitat could occur and result in destruction or damage to these populations. During 1984, 53,500 acres of land in Avra Valley were surveyed for *Tumamoca macdougalii* and Reichenbacher (1985a) believes there is little chance of any other large populations being found in Avra Valley.

The State of Arizona has applied for the transfer to State ownership of 2,540 hectares (6,274 acres) of Bureau of Land Management (BLM) administered land in the Avra Valley. Some of this land has already been transferred to the State, including portions of two sections that contain two populations of *Tumamoca macdougalii*. All lands obtained under the State indemnity land selections are subject to disposal to generate revenue for the State. Thus, these lands are expected to undergo development; however, before the State leases to anyone with the intention of disturbing the surface, a botanical review is done by the Arizona Agriculture and Horticulture Commission (Randy Brenner, Arizona State Land Department, pers. comm., 1984).

The city of Tucson owns a parcel of land containing 31 plants of *Tumamoca macdougalii*. The land is administered by the Tucson Parks and Recreation Department and is scheduled to become a Native District Park by March, 1986. The Tucson Parks and Recreation Department (TPRD) is aware of the species and indicates it will be taken into consideration in the park planning process (Glen Dixon, TPRD, pers. comm., 1985). Development of this park will affect the species' habitat through an increase in number of people using the area.

Currently, 22 adult plants and 71 juveniles are scattered throughout developed and undeveloped areas of the West Campus of Pima Community College. Erosion threatens some of the plants located on an embankment adjacent to the school's firing range. With the continuing growth of the Tucson area and the anticipated growth of the Community College, development of this *Tumamoca macdougalii* habitat could occur.

The Pan Quemado population of *Tumamoca macdougalii* on BLM administered land is in the vicinity of a land imprinting and seeding project on the Aqua Blanco Ranch. The project will avoid drainage areas; however, it will imprint the creosote-bush areas between the drainages. Suitable habitat for the globe-berry exists throughout the sections of land proposed for the project (Mary Butterwick, BLM, pers. comm., 1984). An inventory of 122 hectares (301 acres) disclosed a population of 33 plants on this BLM administered habitat (Reichenbacher 1985a). Five plants excavated and eaten by animals, presumably javelina, were also observed at the Pan Quemado site.

The FS identified a small population, 9 adults and 32 juveniles, on the Coronado National Forest, east of the Santa Cruz River. This population occurs in the middle of a picnic area which, fortunately, receives little use in the summer and fall when the plants are growing (Reichenbacher 1985a).

An additional threat to *Tumamoca macdougalii* and its habitat is the proposed construction of the CAP aqueduct, a BR water diversion project. Six adult plants were found in the proposed alignment during a 1983 field survey (Reichenbacher 1984). Intensive field surveys were conducted August–November of 1984 and 1985 to search the project area where the 6 adults were found in 1983. These surveys located a total of 736 plants with 102 adults (the largest known population) on land to be impacted by the CAP (Reichenbacher, pers. comm. 1985).

On the San Xavier and Papago Indian Reservations, habitat is also being lost to agricultural and housing development. The CAP includes allocation of water to farm 1,215 hectares (3,000 acres) on the Papago Reservation and 4,453 hectares (11,000 acres) on the San Xavier Reservation (Tom Gatz, BR, pers. comm. 1983).

The Papago Indian Tribe contracted with Franzoy Corey Engineers, Phoenix, Arizona to survey 28,000 acres for *Tumamoca macdougalii* in 1984. Three populations, consisting of 8 adults and 51 juveniles were found in the area planned for agricultural and, possibly, housing development (Reichenbacher 1985b).

Tumamoc Hill, the type locality of *Tumamoca macdougalii*, is a natural resource site administered by the University of Arizona. There are 35 adult plants and 143 juveniles on this property (Reichenbacher 1985a). This population was thought to be the most secure because the site was designated a National Historic Landmark in 1975, a National Environmental Study Area in 1976, and a State Scientific and Educational Natural Area in 1981 (Tumamoc Hill Planning Committee 1982). However, people have excavated plants from this site (Reichenbacher 1985a). In addition, with the population of the surrounding area growing, so too will the adverse impacts. Damage from dogs and four-wheel drive vehicles has been minor in the past, but with an increasing number of people in the area the damage may intensify.

B. *Overutilization for commercial, recreational, scientific, or educational purposes. Tumamoca macdougalii* is not known to be sought for commercial, recreational or educational purposes; however, the species is sought for scientific purposes. Several plants as well as a large number of seeds have been collected. To date, this has not been shown to be a significant problem but the potential problem is great. This species is very vulnerable because of low plant numbers and any taking would be detrimental to the populations. Due to its easily accessible locations, vandalism poses an additional threat to *Tumamoca macdougalli*.

C. *Disease or predation.* It has been observed that antelope jackrabbits (*Lepus alleni*) clip the stems, leaves, flowers, and fruits of *Tumamoca macdougalli* (Reichenbacher 1984). Although not observed, rodents are also suspected to browsing the plant (Toolin 1982). Reichenbacher (1985a) identified 54 plants excavated by javelina during the 1984 field survey. Javelina foraging pressure varies from population to population. During an August, 1985, general reconnaissance of an area on the Papago Indian Reservation south of Gu Komelik, javelina foraging was observed to be causing extensive mortality to the *Tumamoca macdougalli* population. This population occurs in an area that BIA included in a riparian management program in 1980. The intent of this program was to increase grasses along the Santa Rosa Wash by chaining (Bob Klink, BIA, pers. comm. 1985). Undoubtedly, this changed the local vegetational composition and it is speculated that the change favored javelina. The javelina population in the area has expanded and is putting considerable pressure on the *Tumamoca macdougalli* population.

Livestock grazing may not directly affect the Tumamoc globe-berry; however, livestock take shelter under trees on warm days and could possibly trample plants which are located in the shade of trees or shrubs.

D. *The inadequacy of existing regulatory mechanisms.* Presently, there is no Federal or Arizona State law protecting *Tumamoca macdougalii*. The Tumamoc globe-berry is on the BLM Sensitive Species List and it is BLM policy to include Federal candidate species for consideration in its environmental assessments. Existing Federal regulations in 36 CFR 261.9 prohibit taking of this species in the Coronado National Forest. The Endangered Species Act would provide additional protection for this plant through section 7 (interagency cooperation) requirements and through section 9, which prohibits removal and reduction to possession of endangered species on Federal lands.

E. *Other natural or manmade factors affecting its continued existence.* The low number (493 adult plants and 1,667 juveniles) and limited distribution of *Tumamoca macdougalii* increase the species' vulnerability to natural or man-caused stresses. Although the reproductive biology is not fully understood, survival of all seedlings to maturity is doubtful, because the absence of well-developed root systems on young plants makes them vulnerable to periodic droughts common in the species' range (Toolin 1982). This seedling mortality is well illustrated by the present ratio of adults to seedlings.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to make this rule final. Based on this evaluation, the preferred action is to list *Tumamoca macdougalii* as endangered without critical habitat. Endangered status is appropriate because all populations except one are facing imminent threat from urban and agricultural expansion. Thus, *Tumamoca macdougalii* is in danger of extinction throughout a significant portion of its range and may soon disappear unless appropriate protection is extended. The reasons for not designating critical habitat are discussed below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent

VOL 51 ISS 82 AP 29 1986 UMI

prudent and determinable, the Secretary designate critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for *Tumamoca macdougalii* because its restricted distribution and accessibility make it vulnerable to threats from taking. Publication of critical habitat descriptions and maps would call attention to this species, making it more vulnerable to taking and vandalism. Therefore, it would not be prudent to determine critical habitat for *Tumamoca macdougalii* at this time. The location of populations of this plant have been brought to the attention of appropriate agencies and other involved parties through regular communication. No benefit would accrue from designating critical habitat for this species.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. The usual results of section 7 consultation, if jeopardy is found, are modification and not cancellation of a proposed action.

The CAP—Tucson Aqueduct Phase B Alignment will affect the Tumamoc globe-berry. The preferred route of the CAP aqueduct would cross the largest known population of *Tumamoca*. This population contains 192 adult and 634 juvenile plants. Of the 192 adult plants, 42 are in the aqueduct right-of-way, 29 are below the right-of-way, 11 are in the inundation zone and 30 are above the inundation zone. Juveniles in the population would receive the same impacts as the nearby adults. The BR is working with the Service to determine the status of *Tumamoca macdougalii* on the CAP route. The known population as well as potential habitat on BLM administered lands may be impacted by the land imprinting and seeding project or by the possibility of land transfers from BLM to State or private interests. Adequate surveys at appropriate times of the year need to be conducted prior to transfer of land from BLM to non-Federal interests. Urban and agricultural development on the Papago Indian Reservation could possibly impact 310 plants. Surveys have been conducted on the reservation. The BIA, BLM, and BR are all aware of the species on their lands and are actively planning for it. No other Federal activities are known or expected to affect this species.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Tumamoca macdougalii*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell or offer for sale this species in interstate or foreign commerce, or to remove and reduce to possession the species from areas under Federal jurisdiction. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. International and interstate commercial trade in *Tumamoca macdougalii* is not known to exist. It is anticipated that few permits would ever be sought or issued since the species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Regulation Promulgation

PART 17—[AMENDED]

Accordingly, Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, is amended as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 95 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. Amend § 17.12(h) by adding the following, in alphabetical order under the family Cucurbitaceae to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

(h) * * *

Species		Historic range	Status	When listed	Critical habitat	Special rules
Scientific name	Common name					
Cucurbitaceae—Gourd family:						
Tumamoca macdougalii	Tumamoc globe-berry	U.S.A. (AZ), Mexico (Sonora)	E	226	NA	NA

Dated: April 3, 1986.

Susan Recce,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

[FR Doc. 86–9527 Filed 4–28–86; 8:45 am]

Proposed Rules

Federal Register
Vol. 51, No. 82
Tuesday, April 29, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 212

Documentary Requirements for Nonimmigrants; Waivers for Certain Inadmissable Aliens

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Proposed rule.

SUMMARY: This rule would revise § 212.3 to provide that approval of a 212(c) wavier may be granted for a five-year period. The waiver would be in effect only for the specific grounds of exclusion or deportation listed in the application. This rule change would reduce the paperwork burden for frequent travelers and the number of applications requiring adjudication by the Service.

DATE: Comments must be received on or before June 30, 1986.

ADDRESS: Please submit written comments in duplicate to the Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Room 2011, Washington, DC 20536.

FOR FURTHER INFORMATION CONTACT:

For General Information: Loretta J. Shogren, Director, Policy Directive and Instructions, Immigration and Naturalization Service, 425 I Street, NW. Washington, D.C. 20536, Telephone: (202) 633–3048.

For Specific Information: Margaret M. Smitherman, Immigration Examiner, Immigration and Naturalization Service, 425 I Street, NW., Washington, D.C. 20536, Telephone: (202) 633–3320.

SUPPLEMENTARY INFORMATION: Section 212(c) of the Immigration and Nationality Act of 1952, as amended, evolved from the seventh proviso to section 13 of the 1917 Immigration Act, which provided exclusionary relief, to include relief from deportation. The section provides that aliens lawfully admitted for permanent residence who temporarily proceed abroad voluntarily and not under an order of deportation, and who are returning to a lawful unrelinquished domicile of seven consecutive years, may be admitted in the discretion of the Attorney General without regrad to the exclusionary provisions of paragraphs (1) through (25) and paragraphs (30) and (31) of section 212(a) of the Act. These permanent residents, despite their inadmissibility, may submit Form I–191, Application for Advance Permission to Return to Unreliquished Domicile, to the Service office having jurisdiction over their place of residence for a wavier of the ground of excludability.

The waiver of excludability has generally been granted only for single entry unless the grant was sufficiently broad to cover future entries. *Matter of Wolf*, 12 I & N Dec. 736 (BIA 1968), held that waiver must be somewhat limited in time, and can not be for an indefinite period, but set no specific time limit. The Service proposes to grant 212(c) waivers in increments of up to five years. It believes that this is not inconsistent with *Matter of Wolf* and would reduce the need for repeated readjudication of 212(c) applications for travellers who frequently go abroad for business or personal reasons and are eligible for these waivers.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. This rule would not be a major rule within the meaning of section 1(b) of E.O. 12291.

List of Subject in 8 CFR Part 212

Aliens, Exclusion, Waivers of Inadmissibility.

Accordingly, it is proposed to amend Chapter I of Title 8 of the Code of Federal Regulations as follows:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

1. The authority citation for Part 212 continues to read as follows:

Authority: Secs. 101, 103, 212, 214, 235, 236, 238 and 242 of the Immigration and Nationality Act, as amended (8 U.S.C. 1101, 1103, 1182, 1184, 1225, 1226, 1228, 1252, 1182b and 1182c).

2. Section 212.3 would be revised to read as follows:

§ 212.3 Application for the exercise of discretion under section 212(c).

(a) *Jurisdiction.* An application for the exercise of discretion under section 212(c) of the Act shall be submitted on Form I–191, Application for Advance Permission to Return to Unrelinquished Domicile, to the district director in charge of the area in which the applicant's intended or actual place of residence in the United States is located prior to, at the time of, or at any time subsequent to the applicant's arrival in the United States.

(b) *Validity.* The approval of an application may, in the discretion of the district director, be granted for a period not to exceed five years. The approval is intended to cover only the specific grounds of exclusion or deportability contained in the application. If the applicant subsequently becomes excludable or deportable under the same or a new ground, a new application must be filed with the appropriate district director.

(c) *Decision.* The applicant shall be notified of the decision and, if the application is denied, of the reason therefore and of the right to appeal to the Board within 15 days after the mailing of the notification of decision in accordance with the provisions of Part 3 of this chapter. If denied, the denial shall be without prejudice to renewal of the application in the course of proceedings before an immigration judge under section 235, 236, and 242 of the Act and this chapter. An application for the exercise of discretion under section 212(c) of the Act may be submitted by the applicant to an immigration judge in the course of proceedings under sections 235, 236, and 242 of the Act and this chapter, and shall be adjudicated by the immigration judge in such proceedings, regardless of whether the applicant has made such application previously to the district director. When an appeal may not be taken from a decision of an immigration judge excluding an alien but the alien has applied for the exercise of discretion under section 212(c) of the Act, the alien may appeal to the Board from a denial of such application in accordance with the provisions of § 236.5(b) of this chapter.

Dated: April 17, 1986.

Richard E. Norton,

Associate Commissioner, Examinations, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 86–049]

Importation of Certain Pork Hams

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Reopening of comment period for proposed rule.

SUMMARY: This document reopens the comment period for a proposed rule which proposed to amend the regulations concerning the importation into the United States of certain pork hams. This action is needed to allow industry representatives and other interested persons adequate time in which to prepare comments.

DATE: Written comments must be received on or before May 29, 1986.

ADDRESS: Written comments should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to Docket Number 84–095. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. Mark Dulin, Import-Expert Animals and Products Staff, VS, APHIS, USDA, Room 841, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8695.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR Part 94 (referred to below as the regulations), among other things, regulate the importation into the United States of pork and pork products in order to prevent the introduction into the United States of rinderpest, foot-and-mouth disease, African swine fever, hog cholera, and swine vesicular disease.

The Parma Ham Consortium in Italy requested that the regulations be amended to allow the importation into the United States of pork hams processed in accordance with certain procedures used by the Consortium. Under the current regulations, such hams are not allowed to be imported into the United States from Italy because of foot-and-mouth disease, African swine fever, hog cholera, and swine vesicular disease.

The Department considered this request and conducted research concerning the procedures used by the Parma Ham Consortium. Further, the Department developed provisions which are designed to allow the importation of such pork hams from countries where foot-and-mouth disease, African swine fever, hog cholera, or swine vesicular disease exist, without presenting a significant risk of introducing these diseases. These provisions were published as a proposal in the Federal Register on February 18, 1986 (51 FR 5716–5720).

The proposed rule provided for receipt of comments on or before April 21, 1986. An industry representative has requested additional time to review the proposal and offer substantive comments. It has been determined that additional time is needed to allow industry representatives and other interested persons adequate time in which to prepare comments. Therefore, the comment period is reopened for an additional 30 days. Accordingly, any additional written comments must be received on or before May 29, 1986.

Any comments received between the original closing date for the receipt of comments and the publication of this notice will also be considered in determining what action to take concerning the proposal.

Done at Washington, D.C., this 24th day of April 1986.

B.G. Johnson,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 86-9554 Filed 4-28-86; 8:45 am]

BILLING CODE 3410-34-M

9 CFR Parts 161 and 162

[Docket No. 84–114]

Standards for Accredited Veterinarians

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the regulations concerning accreditation of veterinarians and the suspension or revocation of such accreditation. It is proposed to amend the regulations to add a statement of purpose; to clarify that accreditation of veterinarians is on a State-by-State basis; to require that, as a condition for being accredited or reaccredited, a veterinarian must be licensed to practice without supervision in the State in which he or she wishes to be accredited; and to require that veterinarians pass an examination administered by the Animal and Plant Health Inspection Service, as a condition for obtaining accreditation within five years prior to applying for accreditation in the State in which he or she wishes to be accredited. These proposed amendments appear to be necessary to clarify the regulations, and to help ensure that veterinarians acting as accredited veterinarians are qualified to perform their duties.

DATE: Written comments must be received on or before June 30, 1986.

ADDRESSES: Written comments concerning this proposed rule should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments should state that they are in response to docket number 84–114. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. William T. Hubbert, Professional Development Staff, VS, APHIS, USDA, Room 800, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–7849.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR Subchapter I (referred to below as the regulations) contain provisions concerning the accreditation of veterinarians and the suspension or revocation of such accreditation.

Statement of Purpose

It is proposed to add a "Statement of Purpose" to the regulations to read as follows:

This subchapter concerns a program administered by the Service [Veterinary Services, Animal and Plant Health Inspection Service] to accredit veterinarians and thereby authorize them to perform, on behalf of the Service, certain activities specified in this chapter. This program is intended to ensure that an adequate number of qualified veterinarians are available in the United States to perform such activities.

Accreditation

Section 161.1(a) of the regulations sets forth the criteria for the accreditation of veterinarians, and § 161.1(b) of the regulations sets forth corresponding criteria for the reaccreditation of

VOL 51 ISS 82 AP 29 1986 UMI

veterinarians whose accreditation has been revoked.

Section 161.1(a) of the regulations currently provides as follows:

(a) The Deputy Administrator is hereby authorized to accredit a veterinarian when he determines that such veterinarian (1) is a graduate of a college of veterinary medicine; (2) is licensed to practice veterinary medicine in the State in which he wishes to be accredited; (3) has made formal application for accreditation on Form 1–36A, "Application for Veterinary Accreditation"; (4) has passed an examination administered by the Service; and (5) has been jointly recommended by the State Animal Health Official and the Veterinarian-in-Charge for the State in which the veterinarian is licensed and wishes to be accredited.

As indicated in item (2) above, veterinarians are not accredited on a nationwide basis, but instead are accredited on a State-by-State basis. Consistent with this concept, it is intended that an accredited veterinarian perform official duties as an accredited veterinarian only in the State or States in which the veterinarian is accredited. The regulations would be changed in various places to reflect this intent.

As noted above, as a condition of being designated as an accredited veterinarian, an individual, among other things, must be "licensed to practice veterinary medicine." The same condition must be met for a veterinarian to be reaccredited. Some States grant temporary licenses to allow graduates of veterinary medical schools to practice under the supervision of another veterinarian. Normally such licenses are valid until the next Veterinary Board examinations are given in the State. The term "accredited veterinarian" was intended to include only veterinarians who are licensed to practice without supervision in the State in which the veterinarian wishes to be accredited. It appears that this status is a necessary condition to help ensure that veterinarians acting as accredited veterinarians are fully qualified to perform their duties. Therefore, it is proposed to amend the regulations to require, as a condition for being accredited or reaccredited, that a veterinarian must be licensed to practice without supervision in the State in which he or she wishes to be accredited.

In addition, as noted above, as a condition of being designated as an accredited veterinarian, an individual must also pass an examination administered by the Service. The examination tests a veterinarian's skills and knowledge of procedures relevant to his or her functions as an accredited veterinarian. In order to ensure that the test is relevant concerning the applicant's current skills and knowledge of procedures, it is proposed to provide that the applicant must have passed an examination administered by the Service within five years prior to applying for accreditation in the State in which he or she wishes to be accredited.

Executive Order and Regulatory Flexibility Act

This proposed rule is issued in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this proposed rule would not have a significant annual effect on the economy; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would have no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It appears that the proposed requirements contained in this document are consistent with the current practices of the vast majority of accredited veterinarians and applicants for accreditation.

Under the circumstances explained above, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with section 3507 of the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the information collection provisions that are included in this rule have been approved by the Office of Management and Budget (OMB) and have been given the OMB control number 0579–0032.

List of Subjects in 9 CFR Parts 161 and 162

Administrative practice and procedures, Veterinarians.

PART 161—REQUIREMENTS AND STANDARDS FOR ACCREDITED VETERINARIANS AND SUSPENSION OR REVOCATION OF SUCH ACCREDITATION

1. The authority citation for Part 161 would continue to read as follows:

Authority: 15 U.S.C. 1828; 21 U.S.C. 105, 111–114, 114a, 114a–1, 115, 120, 121, 125, 134b and 134f; 7 CFR 2.17, 2.51, and 371.2(d).

2. Sections 161.1, 161.2, and 161.3 would be redesignated as §§ 161.2, 161.3 and 161.4, and a new § 161.1 would be added to read as follows:

§ 161.1 Statement of purpose.

This subchapter concerns a program administered by the Service to accredit veterinarians and thereby authorize them to perform, on behalf of the Service, certain activities specified in this chapter. This program is intended to ensure that an adequate number of qualified veterinarians are available in the United States to perform such activities.

3. In redesignated § 161.2, paragraphs (a) and (b) would be revised to read as follows:

§ 161.2 Requirements for accreditation.

(a) The Deputy Administrator is hereby authorized to accredit a veterinarian in a given State when he or she determines that such veterinarian: (1) is a graduate of a college of veterinary medicine; (2) is licensed to practice veterinary medicine without supervision in the State in which he or she wishes to be accredited; (3) has made formal application for accreditation on Form 1–36A, "Application for Veterinary Accreditation"; (4) within five years prior to applying for accreditation, has passed an examination administered by the Service for the State in which he or she wishes to be accredited; and (5) has been jointly recommended by the State Animal Health Official and Veterinarian in Charge for the State in which the veterinarian is licensed and wishes to be accredited.

(b) The Deputy Administrator is hereby authorized to reaccredit a veterinarian whose accreditation has been revoked when the revocation has been in effect for not less than two years and he or she determines that such veterinarian (1) is licensed to practice veterinary medicine without supervision in the State in which he or she wishes to be accredited; (2) has made formal application for accreditation on Form 1–36A, "Application for Veterinary Accreditation"; (3) has been jointly recommended by the State Animal Health Official and the Veterinarian-in-Charge for the State in which the veterinarian is licensed and wishes to be accredited; (4) has furnished adequate assurance that he or she will faithfully fulfill the duties of an accredited veterinarian in the future; and (5) has passed an examination administered by the Service for the State in which he or she wishes to be accredited.

* * * * *

4. In redesignated § 161.3, the introductory portion of the section would be revised to read as follows:

§ 161.3 Standards for accredited veterinarians.

An accredited veterinarian shall perform the functions of an accredited veterinarian only in the State or States in which such veterinarian is accredited. An accredited veterinarian shall perform the functions of an accredited veterinarian subject to the supervision and direction of the Veterinarian-in-Charge and the State Animal Health Official and shall observe the following specific standards:

* * * * *

§ 161.4 [Amended.]

5. In paragraph (a) of redesignated § 161.4, the reference to "§ 161.2" would be changed to "§ 161.3".

PART 162—RULES OF PRACTICE GOVERNING REVOCATION OF SUSPENSION OF VETERINARIANS' ACCREDITATION

6. The authority for Part 162 would continue to read as follows:

Authority: 15 U.S.C. 1828; 21 U.S.C. 105, 111, 114a–1, 115, 116, 120, 121, 125, and 134f; 7 CFR 2.17, 2.51, and 371.2(d).

§ 162.10 [Amended.]

7. In § 162.10, the reference to "9 CFR 161.2" would be changed to "§ 161.3 of this chapter".

§ 162.11 [Amended.]

8. In § 162.11, the reference to "9 CFR 161.2" would be changed to "§ 161.3 of this chapter".

Done at Washington, D.C., this 23rd day of April 1986.

B.G. Johnson,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 86–9555 Filed 4–28–86; 8:45 am]

BILLING CODE 3410–34–M

FEDERAL ELECTION COMMISSION

11 CFR Ch. 1

[NOTICE 1986–1]

Rulemaking Petition; Notice of Disposition

AGENCY: Federal Election Commission.

ACTION: Notice of Disposition of Rulemaking Petition.

SUMMARY: The Federal Election Commission announces its denial of a Petition for Rulemaking filed on November 6, 1984 by Common Cause. 50 FR 477 (Jan. 4, 1985). The petition requested that the Commission revise several regulatory provisions to address the alleged improper use of "soft money", particularly funds ostensibly raised for use in state and local elections, to influence federal elections.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel 999 E Street, NW., Washington, DC 20463, (202) 376–5690 or toll-free (800) 424–9530.

SUPPLEMENTARY INFORMATION: On November 4, 1984, Common Cause filed a petition for rulemaking with the Commission. The petition requested that the Commission initiate a rulemaking to address the alleged improper use of "soft money", purportedly raised for use in nonfederal elections, to influence federal elections. The Commission has made several efforts to solicit comments on the petition. First, the Commission invited public comment on the petition by issuing a Notice of Availability. 50 FR 477 (Jan. 4, 1985). Five written comments were received in response to the notice, including a supplementary statement from Common Cause that contained proposed rules.

The Commission also issued a Notice of Inquiry seeking further comment on the broad range of factual and legal questions presented by the assertions that have been made by Common Cause and others concerning the use of "soft money" to influence federal elections. 50 FR 51535 (Dec. 18, 1985). The Commission sent copies of the notice to election officials in all 50 states, national party committees and previous commentors on the petition. Seventeen submissions were received from 15 commentors. In addition, a public hearing was held on January 29, 1986 at which testimony from three witnesses was presented.

After reviewing the comments on the petition and evaluating the implications of the proposed revisions, the Commission has decided to deny Common Cause's petition for rulemaking. Common Cause has not presented evidence of instances in which "soft money" has been used to influence federal elections sufficient to justify the stringent rules proposed in its petition. Most of the examples it cites to support its allegations consist of anecdotal and boastful comments of party committee officials and campaign staff that have been quoted in the press. These statements do not constitute concrete evidence demonstrating that the Commission's regulations have been abused so that funds purportedly raised for use in nonfederal elections have in fact been transferred to the state and local level with the intent that they be used to influence federal elections. Indeed, other evidence presented during this proceeding indicates that many transfers to the state and local levels were made from federal funds and were reported to the Commission.

Therefore, at its open meeting of April 17, 1986, the Commission voted to deny the petition for rulemaking filed by Common Cause. Copies of the General Council's recommendation on which the Commission's decision was based are available for public inspection and copying in the Commission's Public Records Office, 999 E Street NW., Washington, DC 20463, (202) 376–3140 or toll-free (800) 424–9530.

Dated: April 17, 1986.

Joan D. Aikens,

Chairman, Federal Election Commission.

[EE-86-85]

Income, Excise, and Estate and Gift Taxes; Effective Dates and Other Issues Arising Under the Employee Benefit Provisions of the Tax Reform Act of 1984; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to effective dates and certain other issues arising under the employee benefit provisions of the Tax Reform Act of 1984.

DATES: The public hearing will be held on Thursday, June 26, 1986, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Thursday, June 12, 1986.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE-86-85), Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Faye Easley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC 20224, telephone 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 72, 79, 125, 133, 162, 402, 404, 419, 419A, 461(h), 463, 505, 512, 1042, 2039, 4976, 4978, and 7701(a)(46) of the Internal Revenue Code of 1954. The proposed regulations appeared in the Federal Register for Tuesday, February 4, 1986 (51 FR 4391).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, June 12, 1986, an outline of oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

James J. McGovern,

Director, Employee Plans and Exempt Organizations Division.

BILLING CODE: 1505-01-M

40 CFR Part 261

[SW-FRL-3010-1]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposal to Deny Petitions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to deny the petitions submitted by 16 petitioners and revoke 2 temporary exclusions to exclude their waste from the hazardous waste lists. This action responds to delisting petitions submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists.

Based on an initial review of the petitions submitted by the generating facilities, additional information has been requested to enable the Agency to determine if permanent exclusions should be granted. Most of these petitioners have not provided the requested additional information. For those facilities that provided some information, the Agency has determined that the additional information submitted is insufficient to make a final decision. Our basis, therefore, for denying these petitions is that all of these petitions are incomplete (*i.e.*, the Agency does not have sufficient information to determine the hazardous or non-hazardous nature of the waste). The effect of this action, if promulgated, would be to deny the petitions to exclude certain wastes generated at particular facilities from being listed as hazardous wastes under 40 CFR Part 261. Thus, all of the petitioned wastes would continue to be considered hazardous.

DATES: EPA will accept public comments on our tentative decision to deny these petitions and revoke these temporary exclusions until June 13, 1986. Any person may request a hearing on these decisions by filing a request with Eileen B. Claussen, whose address appears below, by May 14, 1986. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send two copies of your comments to EPA. One copy should be sent to the Docket Clerk, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. A second copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with this statement: "Section 3001—Delisting Petition; Proposed Mass Denial Published in the Federal Register on April 29, 1986."

Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

The public docket for these petitions (including the Agency's requests for additional information) is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and is available for public viewing from 9:00 a.m. to 4:00 p.m., Monay through Friday, excluding holidays

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information, contact Lori DeRose, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 382-5096.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit any of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure (EP) toxicity) or meet the criteria for listing contained in 40 CFR 261.11(a)(2) or 261.11(a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility, which meets the listing description, may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To be excluded, petitioners must show that a waste generated at their facility does not meet any of the criteria under which the waste was listed. (See 40 CFR 260.22(a) and the background documents for the listed wastes.) In addition, the Hazardous and Solid Waste Amendments of 1984 (HSWA) require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous.[1]

In evaluating these petitions, the Agency first determines whether the waste (for which the petition was submitted) is non-hazardous based on the criteria for which the waste was originally listed. If the Agency believes that the waste is still hazardous, it will propose to deny the petition. If the Agency agrees with the petitioner that the waste is non-hazardous with respect to the criteria for which the waste was listed, however, it will then evaluate the waste with respect to any other factors or criteria, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous.

In some instances, the Agency has already granted a temporary exclusion for certain of the petitioned wastes pursuant to 40 CFR 260.22(m) (no longer in effect, see 50 *FR* 28702, July 15, 1985). Temporary exclusions were granted whenever the petition review concluded that there was a substantial likelihood that the wastes were non-hazardous based on the criteria for which they were listed and that an exclusion eventually would be granted. The granting of a temporary exclusion did not relieve the petitioning facility from providing any additional information which may be required by the Agency to complete its evaluation of the petition and make a definitive determination to grant or deny the petition. The additional information required under section 222 of HSWA was generally requested from the petitioning facilities through written correspondence. (See the public docket for specific information requests.) The acquisition and analysis of this additional information by the Agency is necessary before a tentative determination (*i.e.*, a proposal to exclude or deny exclusion) can be made for the petitioned wastes. Two of the petitioners in today's proposed denial notice have temporary exclusions, which the Agency is also proposing to revoke.

In addition to those petitions for which temporary exclusions were granted, the Agency's Office of Solid Waste (OSW) evaluated two more petitions, using the pre-HSWA criteria, and made preliminary decisions to exclude their waste. These petitioners were given what became known as informal exclusions, and were notified by letter that their waste probably would be delisted some time in the near future. Specifically, the Office of Enforcement informed the Regional enforcement office and petitioners of OSW's findings. The letter requested that some discretion be exercised during the interim period until the Assistant Administrator for Solid Waste and Emergency Response (the official delegated delisting authority by the Administrator) exclusions to those facilities was never published. Instead, the Assistant Administrator for Solid Waste and Emergency Response decided not to grant these facilities a temporary exclusion due to the anticipated changes in delisting criteria

[1] In addition, residues from the treatment, storage, or disposal of listed hazardous wastes are eligible for exclusion. The substantive standard for delisting these wastes is the same as for excluding the listed wastes.

VOL 51 ISS 82 AP 29 1986 UMI

that were to be brought on by HSWA in 1984. Subsequently, these facilities were asked to submit the additional information, required under HSWA, to evaluate the petitions. Thus, these facilities never received temporary exclusions and their waste has always been considered a hazardous waste. A letter was sent in March 1986 to all the facilities having informal exclusions, withdrawing the informal exclusion and notifying them of the status of their petition. Two such petitions (*i.e.*, formerly having informal exclusions) are included in today's notice, which proposes to deny several petitions based on non-receipt of the needed information to complete their petitions. These two petitions are indicated by an asterisk on the list in today's notice of those petitions we are proposing to deny.

Basis for Denying Exclusion Petitions

The Agency has experienced lengthy delays in receiving the additional information requested from petitioning facilities, including those that have been granted temporary and informal exclusions for their wastes. The additional information has been requested because of the Hazardous and Solid Waste Amendments (*i.e.*, the Agency now must consider factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous). Such delays have disrupted the continuity of the petition review process and have created a backlog of petitions awaiting review. For example, in some instances the Agency has been waiting for years for petitioners to submit the additional information, and still the requested information has not been submitted. In other cases, some information was submitted to the Agency in response to our request for additional information; however, these responses were sufficient to enable the Agency to make a decision on whether or not to grant the exclusion.

To mitigate the problems that have been created by this situation, the Agency gave notice in two earlier Federal Register notices, stating that if a complete petition is not submitted within a reasonable period of time from the date that EPA first requests the additional information (including those petitions granted temporary exclusions, now subject to HSWA), the Agency will propose to deny the petition as incomplete. (See 50 *FR* 47764, November 20, 1985, and 51 *FR* 2528, January 17, 1986.) The Agency is therefore proposing today to deny petitions which have failed to provide all the additional information requested within a reasonable period of time.

In most of these cases, the Agency has made a number of requests for information from these facilities. The Agency made at least two written requests for information indicating the specific type of information the petitioner was to supply in order for the Agency to complete its valuation. In addition, the Agency published a notice in the Federal Register of its intent to collect this information (49 *FR* 4802–4803, February 9, 1984).

Some of these facilities were again informed individually in September 1985 that the additional information requested must be received by a certain date to permit complete petition processing and final determination (exclusion or exclusion denial) before the Congressionally mandated deadline of November 8, 1986.

The Agency believes that we have given these petitioners a reasonable period of time to provide this information. Since the necessary information has not been submitted, and the petitions remain incomplete (*i.e.*, the Agency does not have sufficient information to determine the hazardous or non-hazardous nature of the waste), thus, we are proposing to deny these petitions as incomplete. (See the RCRA docket for an explanation of why the information requested is required.)

Today's Proposal

The Agency intends to make final today's tenative decisions to deny these petitions, unless the petitioners provide the necessary information during the comment period (*i.e.*, the Agency then has a complete petition). The Agency, however, solicits comments on all aspects of today's proposal, including the reasonableness of the information requested.

EPA today proposed to deny the following petitions (two are temporarily excluded and are indicated by a dagger; two were informally excluded and are indicated by an asterisk):

Petition No. and Petitioner's Name

0220*—Imperial Clevite, Caldwell, OH
0274†—Hytec, Incorporated, Tumwater, WA
0297†—ACR Electronics, Inc., Hollywood, FL
0302*—American Chrome & Chemicals, Incorporated, Corpus Christi, TX
0343—Iowa Industries, Inc., Burlington, IA
0509—Ford Motor Company, Sterling Heights, MI
0511—Ford Motor Company, Norfolk, VA
0512—Ford Motor Company, Sandusky, OH
0513—Ford Motor Company, Louisville, KY
0514—Ford Motor Company, Lorain, OH
0515—Ford Motor Company, Indianapolis, IN
0516—Ford Motor Company, Brookpark, OH
0517—Ford Motor Company, Avon Lake, OH
0519—Ford Motor Company, Chicago, IL
0521—Ford Motor Company, Romeo, MI
0527—Ford Motor Company, Wixom, MI

These petitions are being proposed for denial because the Agency has not received the additional information that was requested. This information has been outstanding for over one year. The Agency has previously stated its intention to deny petitions that have exceeded this one-year limit. (See 50 *FR* 47763, November 20, 1985, and 51 *FR* 2528, January 17, 1986.)

Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and, therefore, subject to the requirement of a Regulatory Impact Analysis. This proposal, which would revoke temporary exclusions and would deny the exclusion petitions submitted by certain facilities, is not major. The affect of this proposal would increase the overall costs for the facilities which currently have a temporary exclusion. The actual costs to these companies, however, would not be significant. In particular, in calculating the amount of waste that is generated by the 2 facilities that currently have temporary exclusions and considering a disposal cost of $300/ton, the incseased cost to these facilities is approximately $3,650, well under the $100 million level constituting a major regulation. In addition these companies are large and, therefore, the impact of this rule will be relatively small. This proposal is not a major regulation, therefore, no Regulatory Impact Analysis is required.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effect will not change the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this proposed regulation will not have a significant impact on a substantial number of small entities.

This regulations, therefore, does not require a regulatory flexibility analysis.

BILLING CODE 6560–50–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

42 CFR Part 7

Distribution of Reference Biological Standards and Biological Preparations; Proposed User Charge

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Public Health Service is proposing to develop new regulations governing the distribution of reference biological standards and biological preparations by the Centers for Disease Control (CDC). In this program, private entities would be assessed a charge to cover the cost to CDC of producing and distributing the products.

DATE: Comments on the proposed rule must be received on or before May 29, 1986.

ADDRESS: Comments should be addressed in writing to the Centers for Disease Control, Building 1, Room 6013, 1600 Clifton Road, Atlanta, Georgia 30333. Comments will be available for public inspection between 9 a.m. and 4 p.m., Monday through Friday (except holidays). All relevant comments received during the comment period will be considered in developing the final rule.

FOR FURTHER INFORMATION CONTACT: William Knox Harrell, Ph.D., Biological Products Program, Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, Atlanta, Georgia 30333, telephone (404) 329–3352, or FTS 236–3352.

SUPPLEMENTARY INFORMATION: CDC has been delegated the authority under section 352 of the Public Health Service (PHS) Act (42 U.S.C. 263), as amended, to produce and distribute biological products in the conduct of its functional responsibilities. We are proposing that a new Part 7 be added to Title 42 of the Code of Federal Regulations to initiate a program that would impose a user charge upon private entities which request reference biological standards or biological preparations for their own comparative performance tests. The user charge would be assessed to cover the cost to CDC of developing and distributing the products.

Statutory Authority for User Charge

Under Title V of the Independent Offices Appropriation Act (IOAA) of 1952, 31 U.S.C. 9701 (formerly 31 U.S.C. 483a), a Federal agency may charge for the services it provides when such services confer a special benefit upon an identifiable recipient. The head of each agency is authorized to prescribe regulations establishing charges for such services.

Applicability of User Charges to CDC Activities

CDC has examined the applicability of user charges to activities performed under section 352 of the PHS Act and concluded that a user charge is appropriate. This notice proposes only that charges be imposed on private entities to cover the cost to CDC of producing and distributing reference biological standards and biological preparations.

The precedent for charging private entities and not charging public entities is set in section 311(b) of the Public Health Service Act (42 U.S.C. 243). Under this provision, the Secretary is authorized to train personnel for State and local health work but may charge only private entities reasonable fees for training their personnel.

Proposed User Charge

CDC is proposing to develop regulations governing the distribution of biological products (42 CFR Part 7) by imposing a user charge for these services to private entities. Based on the same level of services as in the past, these user charges would be expected to generate about $95,000 annually toward the cost of producing and distributing reference biological standards and biological preparations. CDC has estimated that currently it costs an average of $24 to produce and distribute a unit of reagents to these agencies.

Under the IOAA, a user charge is appropriate if an identifiable individual obtains a specific benefit. The benefit accruing to a private entity is that a national standard for microbiological and immunological in vitro diagnostic products is available for comparing the product with this standard.

User charges for CDC's production and distribution of reference material have been under consideration for some time. For example, a 1982 General Accounting Office report entitled "Centers for Disease Control Should Charge Fees for Various Diagnostic Laboratory Services" (GAO/HRD–82–70) urged that user charges be instituted. Upon consideration of the policy issues and legal questions presented by user charges, CDC has concluded that implementation of a program of user charges would be appropriate and consistent with applicable law.

Computation of User Charge

Under the IOAA, each identifiable recipient may be assessed a reasonable charge for a measurable unit of Government service from which it derives a special benefit.

1. *Program cost.* The cost to CDC for producing and distributing reference biological standards and biological preparations to private entities is estimated to be $95,000 in Fiscal Year 1985. This cost includes both direct costs such as salaries and equipment, and indirect costs such as rent, telephone service, and a proportionate share of management and supervisory costs.

2. *Computation of user charge.* In this program, CDC is attempting to generate, through a user charge, a sum equal to the $95,000 in program costs. CDC receives requests from private entities for approximately 4,000 units of reference biological standards and biological preparations each year. For purposes of this program, CDC is proposing to impose an average user charge of $24 per unit distributed. The cost will vary, depending upon the type of preparation requested.

Exemptions

CDC is not proposing to impose a user charge on State and local health departments, governmental institutions (e.g., State hospitals and universities), the World Health Organization, or ministries of health of foreign governments because these materials are provided to those agencies for public health reasons and not for the benefit of the requesters. CDC believes imposing a user charge on these public agencies would not be appropriate. The precedent for charging private entities and not charging public entities is set in section 311(b) of the Public Health Service Act (42 U.S.C. 243). Under this provision, the Secretary is authorized to train personnel for State and local health work but may charge only private entities reasonable fees for training their personnel.

Terms of Payment

CDC proposes to require a purchase order at the time the request for the

VOL 51 ISS 82 AP 29 1986 UMI

materials is received. The organization will be billed at the end of each month for materials distributed. If a requester fails to pay the charge, CDC would withhold future distribution of the reference material.

Economic Impact

The Secretary has determined that this proposed rule does not significantly impact on a substantial number of small entities and therefore does not require preparation of a regulatory flexibility analysis under the Regulatory Flexibility Act, Pub. L. 96-354.

The Secretary has also determined that this proposed rule is not a "major rule" under Executive Order 12291. Thus, a regulatory impact analysis is not required because it will not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Impose a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

(3) Result in significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 42 CFR Part 7

Administrative practice and procedure.

It is, therefore, proposed to amend Title 42 of the Code of Federal Regulations by adding a new Part 7 to Subchapter A as set forth below.

Dated: October 22, 1985.

James O. Mason,

Acting Assistant Secretary for Health.

Approved: March 4, 1986.

Otis R. Bowen,

Secretary.

PART 7—DISTRIBUTION OF REFERENCE BIOLOGICAL STANDARDS AND BIOLOGICAL PREPARATIONS

Sec.

7.1 Applicability.
7.2 Establishment of user charge.
7.3 Definitions.
7.4 Schedule of charges.
7.5 Payment procedures.
7.6 Exemptions.

Authority: Sec. 215, 58 Stat. 690, as amended (42 U.S.C. 216); Title V of the Independent Offices Appropriation Act of 1952 (31 U.S.C. 9701); and Sec. 352 of the Public Health Service Act, as amended (42 U.S.C. 263).

§ 7.1 Applicability.

The provisions of this Part are applicable to private entities requesting from the Centers for Disease Control (CDC) reference biological standards and biological preparations for use in their laboratories.

§ 7.2 Establishment of a user charge.

Except as otherwise provided in § 7.6, a user charge shall be imposed on private entities to cover the cost to CDC of producing and distributing reference biological standards and biological preparations.

§ 7.3 Definitions.

"Biological standards" means a uniform and stable reference biological substance which allows measurements of relative potency to be made and described in a common currency of international and national units of activity.

"Biological preparations" means a reference biological substance which may be used for a purpose similar to that of a standards, but which has been established without a full collaborative study, or where a collaborative study has shown that it is not appropriate to establish the preparation as an international standard.

§ 7.4 Schedule of charges.

The charges imposed in § 7.2 are based on the amount published in CDC's price list of available products. An up-to-date schedule of charges is available from the Biological Products Program, Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, Atlanta, Georgia 30333.

§ 7.5 Payment procedures.

The requester shall submit a purchase order when submitting the request for reference biological standards and preparations. The requester will be billed at the end of each month for materials distributed. Payment shall be made in the form of a check or money order payable to the "Centers of Disease Control," and mailed to the Financial Management Office, Buckhead Facility, Room 200, Centers for Disease Control, 1600 Clifton Road, Atlanta, Georgia 30333. If CDC does not receive full payment for the user charge, distribution of future products will be withheld.

§ 7.6 Exemptions.

State and local health departments, governmental institutions (e.g., State hospitals and universities), the World Health Organization, and ministries of health of foreign governments are exempt from paying user charges.

BILLING CODE 4160-18-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6709]

Proposed Flood Elevation Determinations; Arkansas et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: John L. Matticks, Acting Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-488)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The

community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The authority citation for Part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 et seq., Reorganization Plan No. 3 of 1978, E.O. 12127.

The proposed base (100-year) flood elevations for selected locations are:

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
ARKANSAS	
Clinton (City), Van Buren County	
South Fork Little Red River:	
At downstream corporate limits	*500
At confluence of Archey Creek Fork	*508
At upstream corporate limits	*534
Approximately 0.9 mile upstream of corporate limits	*537
Airport Branch:	
At confluence with South Fork Little Red River	*508
Approximately 150 feet upstream of State Route 16	*520
Approximately 1,500 feet upstream of State Route 16	*540
Archey Creek Fork:	
At confluence with South Fork Little Red River	*509
At confluence of Town Branch	*510
Approximately 60 feet upstream of U.S. Route 65	*522
At upstream corporate limits	*536
Approximately 650 feet upstream of upstream corporate limits	*537
Town Branch:	
At confluence with Archey Creek Fork	*510
Upstream side of Park Street	*518
Upstream side of U.S. Route 65	*518
Upstream side of City Street	*559
Approximately 0.44 feet upstream of City Street	*602
Big Branch:	
Upstream side of U.S. Route 65	*538
At downstream corporate limits	*581
Approximately 1,360 feet upstream of downstream corporate limits	*608

Maps available for inspection at 404 Main, Clinton, Arkansas.

Send comments to The Honorable Charles Bradley, Mayor of the City of Clinton, Van Buren County, P.O. Box 277, Clinton, Arkansas 72031.

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
COLORADO	
Chaffee (County)	
South Arkansas River: Approximately 100 feet upstream from the center of U.S. Highway 50 bridge	*7,016
Poncha Creek: At Town of Poncha Springs corporate limits, approximately 200 feet west of the intersection of County Road 195 and Pinyon Drive	*7,477
Chalk Creek: Immediately upstream of U.S. Highway 285 bridge	*7,685
Cottonwood Creek: Approximately 60 feet upstream from the center of County Road 361 bridge	*8,155

Maps are available for review at the County Administrator's Office, Chaffee County Courthouse, 139 Crestone, Salida, Colorado.

Send comments to The Honorable Edward Bradbury, Chairman, County Board of Commissioners, Box 699, Salida, Colorado 81201.

Larimer County

Big Thompson River: Approximately 25 feet upstream from center of Marys Lake Road bridge	*7,827
Fall River: Approximately 180 feet upstream from center of Fish Hatchery Road bridge	*8,010
Black Canyon Creek: Approximately 25 feet downstream from center of McGregor Avenue Bridge	*7,811

Maps are available for review at the Flood Plain Administrator's Office, 216 West Mountain Avenue, Fort Collins, Colorado.

Send comments to The Honorable Courtlyn W. Hotchkiss, Chairman, Larimer County Board of Commissioners, Box 1190, Fort Collins, Colorado 80522.

Poncha Springs (Town)

South Arkansas River: Approximately 60 feet upstream of the center of Highway 285	*7,448
Poncha Creek: Approximately 125 feet downstream of the center of Hot Springs Road	*7,470

Maps are available for review at the Mayor's Office, 330 Burnett Street, Poncha Springs, Colorado.

Send comments to The Honorable Steve Hall, Mayor, Town of Poncha Springs, Box 56, Poncha Spring, Colorado 81201.

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
FLORIDA	
Branford (Town), Suwannee County	
Suwannee River:	
About 1,280 feet downstream of U.S. Route 27	*36
About 2,080 feet upstream of U.S. Route 27	*37

Maps available for inspection at the City Clerk's Office, City Building, P.O. Box 622, Branford, Florida.

Send comments to The Honorable Gene Broome, Mayor, Town of Branford, City Building, P.O. Box 622, Branford, Florida 32008-0577.

Columbia County (Unincorporated Areas)

Suwannee River:	
About 3.3 miles downstream of State Road 136	*85
Just downstream of northern state boundary	*108

Maps available for inspection at the County Coordinator's Office, County Courthouse, Lake City, Florida.

Send comments to The Honorable Kenneth Will, Chairman, County Board of Commissioners, Columbia County, County Courthouse, P.O. Drawer 1529, Lake City, Florida 32056.

Eustis (City), Lake County

Lake Harmess: Within community	*74
Lake Joanna: Within community	*155
Lake Louise: Within community	*80
Lake Maggie: Within community	*155
Lake Nellie: Within community	*85
Ponding Area H52: Within community	*71
Lake Willie: Within community	*105
West Crooked Lake System (East and West Crooked Lakes): Within community	*74
Lake Woodward: Within community	*75
Lake Yale: Within community	*81

Maps available for inspection at the City Manager's Office, City Building, P.O. Box 68, Eustis, Florida.

Send comments to The Honorable Michael Steerman, City Manager, City of Eustis, City Building, P.O. Box 68, Eustis, Florida 32726.

Lafayette County (Unincorporated Areas)

Suwannee River:	
About 2.92 miles downstream of Simms Landing	*30
About 2.4 miles upstream of Norfolk Southern Railway	*80

Maps available for inspection at the County Clerk's Office, Lafayette County Courthouse, Mayo, Florida.

Send comments to The Honorable Norman Jackson, Chairman, County Commission, County Courthouse, P.O. Box 88, Mayo, Florida 32066.

Suwannee County (Unincorporated Areas)

Suwannee River:	
At confluence of Santa Fe River	*32
Just upstream of State Road 250	*59
About 3.5 miles upstream of Interstate 75	*95

Maps available for inspection at the County Coordinator's Office, Suwannee County Courthouse, Live Oak, Florida.

Send comments to The Honorable W.W. Jernigan, Chairman, County Commision, Suwannee County, County Courthouse, Live Oak, Florida 32060.

Source of flooding and location	#Depth in feet above ground. *Elevation in feet (NGVD)
GEORGIA	
Hinesville (City), Liberty County	
Mill Creek:	
About 1.1 miles downstream of confluence of Mill Creek Tributary No. 2	*72
About 0.9 mile upstream of confluence of Mill Creek Tributary No. 2	*77
Mill Creek Tributary No. 2:	
At mouth	*75
About 2,580 feet upstream of Rowland Avenue	*94
Peacock Creek:	
At confluence of Peacock Creek Tributary No. 1	*78
At northern corporate limits	*86

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. Elevation in feet (NGVD)
Peacock Creek Tributary No. 1:	
At confluence with Peacock Creek	*118
Just downstream of U.S. Route 82	*51
Maps available for inspection at the City Hall, 116 East South Street, Hinesville, Georgia.	
Send comments to The Honorable Carl Dykes, Mayor, City of Hinesville, City Hall, 116 East South Street, Hinesville, Georgia 31313.	
Richmond County (Unincorporated Areas)	
Savannah River:	
At downstream county boundary	*106
About 0.9 mile upstream of Sandbox Ferry Road	*140
Spirit Creek:	
At mouth	*125
Just downstream of Richmond Factory Pond Dam	*183
Just upstream of Richmond Factory Pond Dam	*192
About 0.5 mile upstream of Birdsnest Road	*246
Spirit Creek Tributary No. 1:	
At mouth	*158
About 1.25 miles upstream of McDade Farm Road	*204
Spirit Creek Horsepen Branch:	
At mouth	*217
Just downstream of Willis Foreman Road	*237
Just upstream of Willis Foreman Road	*242
About 1.0 mile upstream of Willis Foreman Road	*276
Butler Creek:	
About 1200 feet upstream of mouth	*119
Just downstream of dam for Fort Gordon Reservoir	*231
Just upstream of dam for Fort Gordon Reservoir	*256
Just downstream of Fort Gordon Highway	*275
Butler Creek Tributary No. 1:	
At mouth	*196
About 0.9 mile upstream of Morgan Road	*262
Butler Creek Tributary No. 2:	
At mouth	*263
Just downstream of Fort Gordon Highway	*273
Just upstream of Fort Gordon Highway	*281
Just downstream of Georgia Railroad	*285
Just upstream of Georgia Railroad	*294
Just downstream of dam	*310
About 400 feet upstream of dam	*328
Rocky Creek:	
At mouth	*121
Just downstream of Old Savannah Road	*134
Just upstream of Old Savannah Road	*138
Just downstream of Old McDuffie Road	*204
Just upstream of Old McDuffie Road	*213
Just downstream of Rosedale Dam	*220
Just upstream of Rosedale Dam	*240
Just downstream of Fort Gordon Highway	*287
Just upstream of Fort Gordon Highway	*294
Just downstream of Barton Chapel Road	*304
Just upstream of Barton Chapel Road	*311
Just downstream of Georgia Railroad	*318
Rocky Creek Tributary No. 1:	
At mouth	*122
About 2,200 feet upstream of Norfolk Southern Railway	*129
Rocky Creek Tributary No. 2:	
At mouth	*129
Just south of Nixon Road	*130
Rocky Creek Tributary No. 3:	
At mouth	*128
Just north of Nixon Road	*128
Rocky Creek Tributary No. 4:	
At mouth	*130
Just downstream of Windsor Spring Road	*162
Rocky Creek Tributary No. 5:	
At mouth	*136
About 1,100 feet upstream of Peach Orchard Road	*149
Rocky Creek Tributary No. 6:	
At mouth	*178
About 900 feet upstream of Fort Gordon Highway	*196

PROPOSED BASE (100-YEAR) FLOOD ELEVATIONS—Continued

Source of flooding and location	#Depth in feet above ground. Elevation in feet (NGVD)

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-144; FCC 86-159]

Broadcast Services; Review of Technical Parameters For FM Allocations Rules

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to review certain FM technical rules. Specifically, the Commission proposes to clarify the power and antenna height requirements for the different classes of stations, allow other classes of station to operate on the reserved Class A channels, let the community listed in the FM Table of Allotments be the determining factor for a station's class, and add more precision to the method for predicting coverage. In short, this proceeding is intended to review and simplify the FM allocation rules.

DATES: Comments are due on or before June 12, 1986, and reply comments are due on or before June 27, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kathryn Hosford or Michael Lewis, Mass Media Bureau, (202) 632-6660.

SUPPLEMENTARY INFORMATION: This is a summary of Commission's *Notice of Proposed Rule Making* adopted April 11, 1986, and Released on April 21, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Docket Branch (Room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. This proceeding reviews various technical FM rules for stations operating in the commercial FM band (channels 221-300). A review of these rules is particularly appropriate in light of adoption of the *Report and Order* (*Report*) in BC Docket 80-90 (48 FR 29486, June 27, 1983; recon., 49 FR 10260, March 20, 1984) which revised the FM allotment scheme to permit an increase in the number of FM stations. However, some of these rule changes have resulted in station classification anomalies in the licensing process. Additionally, questions have arisen regarding the requirements applicable to stations that were licensed prior to the adoption of Docket 80-90. The purpose of the *Notice of Proposed Rule Making* (*Notice*) is to address such issues and simplify certain technical rules for licensing FM stations.

2. The FM rules originally contained definitive power and antenna height requirements for three classes or commercial FM station. However, after the *Report* doubled the number of classes from three to six, applications were received requesting certain combinations of powers and antenna heights which did not correspond to any station class. In response to this situation, the Commission proposes to replace the current method of defining the different station classes (by defining minimum and maximum power and antenna heights for each class) with a classification scheme based on a formula reflecting the maximum permitted distance to the expected service contour (1 mV/m) of each class. This proposal would clarify our station classification requirements and provide a continuous range of technical facilities for all classes of stations.

3. The *Notice* also proposes to increase flexibility by allowing any class of FM station on any commercial FM channel. Twenty channels are now reserved for Class A operation. These channels were reserved to assure a sufficient number of allotments for local FM service in small communities by eliminating the preclusionary effect of higher powered stations. However, the Commission has found that retention of the 20 reserved channels creates unnecessary restrictions on existing stations operating on these channels, that want to upgrade their facilities. Therefore, the *Notice* proposes to provide additional operating flexibility for those Class A stations operating in the reserved channels that want to increase their facilities, by lifting the restriction on these 20 channels.

4. Finally, the *Notice* proposes to determine an FM station's class by the location of the city of license, as opposed to its transmitter location. Station class for channels 221-300 is currently defined by the FM Table of Allotments (Table) found in § 73.202(b) of the Commission's Rules. The class listed in the Table of Allotments is generally based on the zone location of the community named in the allotment. However, § 73.208(c) inconsistently indicates that a station's class is to be determined by the location of the transmitter site. A discrepancy can arise when the transmitter site and the city of

VOL 51 ISS 82 AP 29 1986 UMI

allotment are located in different zones. The *Notice* proposes to resolve this anomaly by removing the transmitter site reference and requiring a station's class to conform with the class designated in the Table of Allotments. (Any existing discrepancis would be grandfathered.

5. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's Rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

6. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 603, the *Notice* contains one proposal (to replace the minimum power and antenna height restrictions with equations that would represent a continuous range of facility options) that could have a minimal negative impact on 49 FM stations currently in the process of expanding their facilities to avoid the reclassification deadline of March 1, 1987, as detailed in Docket 80–90. This action is proposed to offset the confusion caused when certain combinations of power and antenna heights do not correspond to any of the station classes defined in Docket 80–90. Although the proposed solution could cause some stations to be designated in a less desirable station class than expected, the current conflict between these requirements and the classification scheme enacted in Docket 80–90 demands rectifying. The affected stations will, however, retain the classifications they originally anticipated. Therefore, this action will have no adverse impact. The Commission has evaluated both the positive and negative impacts this proposal could have on existing stations and believes that the proposed equations will minimize the possible negative effects of this modification, while still providing a satisfactory solution to the problem. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission complete decision.

7. As required by section 603 of the Regulatory Flexibility Act, the Commission has prepared an Initial Regulatory Flexibility Analysis (IRFA) of the expected impact on small entities of the proposals advanced in the *Notice*. Written public comments are requested on the IRFA. These comments must filed in accordance with the same filing deadlines as comments on the rest of the *Notice*, but they must have a separate and distinct heading designating them as responses to the Regulatory Flexibility Analysis. The Secretary shall cause a copy of the *Notice*, including the Initial Regulatory Flexibility Analysis, to be sent to the Chief Counsel for Advocacy of the Small Business Administration in accordance with section 603 (a) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 94 Stat. 1164, 5 U.S.C. Section 601 *et seq.*, (1981)).

8. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirement; and except for a small adjustment due to the additional applications expected to be received, the proposed rules would not increase or decrease burden hours imposed on the public.

9. Pursuant to applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's Rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before June 12, 1986, and reply comments on or before June 27, 1986.

All relevant and timely comment will be considered by the Commission before final action is taken in this proceeding.

10. It is proposed, pursuant to the authority contained in sections 4 and 303 of the Communications Act of 1934, as amended, that Part 73 of the Commission's Rules be amended as set forth at the end of this document.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

PART 73—[AMENDED]

It is proposed to amend Title 47 CFR Part 73 as follows:

11. The authority citation for Part 73 would continue to read as follows:

Authority: 47 U.S.C. 154 and 303.

§ 73.206 [Removed]

12. Section 73.206 would be removed.

§ 73.207 [Amended]

13. Section 73.207 would be amended by revising the fourth column of TABLE A entitled "10.6/10.8 MHz" which follows paragraph (b)(1) and the first column is republished to read as follows:

§ 73.207 Minimum distance seperation between stations.

* * * * *

(b) * * *

(1) * *

TABLE A—MINIMUM DISTANCE SEPARATION REQUIREMENTS IN KILOMETERS (MILES)

(no changes to these columns)	Relation			
	Co-channel	200 kHz	400/800 kHz	10.6/10.8 MHz
A to A				8 (5)
A to B1				12 (7)
A to B				16 (10)
A to C2				16 (9)
A to C1				23 (14)
A to C				32 (20)
B1 to B1				15 (9)
B1 to B				18 (11)
B1 to C2				18 (11)
B1 to C1				26 (16)
B1 to C				34 (21)
B to B				24 (15)
B to C2				22 (14)
B to C1				29 (18)
B to C				40 (25)
C2 to C2				22 (14)
C2 to C1				29 (18)
C2 to C				37 (23)
C1 to C1				37 (23)
C1 to C				45 (28)
C to C				48 (30)

* * * * *

14. Section 73.208 would be amended by revising the equations in paragraphs (c)(3) and (4) to read as follows:

§ 73.208 Reference points and distance computations.

* * * * *

(c) * * *

(3) * * *

$$LAT_k = 111.13209 - 0.56605 \cos(2LAT_m) + 0.00120 \cos(4LAT_m)$$

(4) * * *

$$LONG_k = 111.41513 \cos(LAT_m) - 0.09455 \cos(3LAT_m) + 0.00012 \cos(5LAT_m)$$

* * * * *

15. Section 73.211 would be revised to read as follows:

§ 73.211 Classes of stations; power and antenna height requirements.

(a) The rules applicable to a particular station, including minimum distance separations and maximum facility requirements, are determined by its class. The class permitted must conform with that designated in the Table of FM Allotments (see § 73.202). Stations designated as Class A, B1, and B may be authorized in Zones I and I–A. Classes A, C2, C1, and C may be authorized in Zone II.

(b) The minimum permitted effective radiated power is 0.1 kW. A station's power, index, or power/height combination must exceed the maximum of the next lower class for its zone of operation.

(c) The maximum effective radiated power (ERP) in any direction, the height above average terrain (HAAT) associated with those values of ERP, and the maximum index for the various classes of stations are listed below. Other combinations of ERP and HAAT are permitted if the ERP is less than the maximum and the maximum index is not exceeded.

MAXIMUMS

Class	ERP(kilowatts)	HAAT (meters)	Index
A	3	100	82
B1	25	100	60
B	50	150	66
C2	50	150	66
C1	100	299	77
C	100	600	95

(d) The station index is determined using the following formula. When an antenna height is less than 30 meters, a minimum of 30 meters must be assumed.

$I = 10 \log P + 23 \log H$

Where:
I=index rounded to nearest whole number,
P=effective radiated power in kilowatts, and
H=antenna height above average terrain in meters.

(e) In Puerto Rico and the Virgin Islands, the following maximums can be used as an option to those specified in paragraph (c) of this section. Other combinations of ERP and HAAT are permitted, if the ERP of the Class B1 and B station do not exceed 25 and 50 kW, respectively, and the index does not exceed its maximum.

MAXIMUMS

Class	ERP (kilowatts)	HAAT (meters)	Index
A	3	335	88
B1	5	335	65
B	25.5	600	79

(f) Stations authorized prior to March 1, 1984, with facilities in excess of those specified for station Classes A, B or C in this section may continue to operate as authorized. Changes to these stations would be permitted if they do not increase their effective radiated powers or extend their 1 mV/m field strength contour beyond their present authorization. NOTE: Authorized stations that do not conform to the requirements of this section, may continue as authorized until March 1, 1987. Thereupon, stations will be classified in accordance with the provisions of this section reflecting their authorized, or applied for, facilities.

16. Section 73.213 would be revised to read as follows:

§ 73.213 Stations at spacings below the minimum separations.

Stations authorized prior to November 16, 1964, at locations that do not meet the minimum distances specified in Section 73.207, may continue to operate as authorized. Changes to these stations would be permitted if they do not increase their effective radiated power or extend their 1 mV/m field strength contour beyond their present authorization.

17. Section 73.313 would be amended by revising paragraph (c)(2) to read as follows:

§ 73.313 Prediction of coverage.

* * * * *

(c) * * *

(2) To use the chart for other powers, the ordinate scale should be converted by the appropriate adjustment in dB. For example, the ordinate scale for a power of 50 kW (17 dB above 1 kW) should be adjusted by 17 dB and, therefore, a field strength of 40 dBu would be converted to 57 dBu. In predicting the distance to the field strength contours, the effective radiated power to be used is the maximum ERP of the main radiated lobe regardless or orientation, in the pertinent direction. In predicting other field strengths over areas not in horizontal plane, the effective radiated power to be used is the power in the direction of such areas; the appropriate vertical plane radiation pattern must, of course, be considered in determining this power.

* * * * *

§ 73.1030 [Amended]

18. Section 73.1030 would be amended by revising the phase "(in the vicinity of coordinates 40°07'50" N Latitude, 105°14'40" W Longitude)" of paragraph (b) to read "(within the area bounded by 40°09'10" N on the north, 105°13'31" W on the east, 40°07'05" N on the south, and 105°15'13" W on the west)".

19. Section 73.1690 would be amended by revising paragraph (c)(1) to read as follows:

§ 73.1690 Modification of transmission systems.

* * * * *

(c) * * *

(1) Replacement of a non-directional antenna with one of the same or different type or number of bays, provided that the height above ground of the center of radiation is within ± meters of that specified in the station authorization, the parameters are within that permitted by its class designation, and there is no change in the maximum effective radiated power.

* * * * *

Federal Communications Commission.
William J. Tricarico,
Secretary.

BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposal to Determine Penstemon Haydenii To Be an Endangered Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine *Penstemon haydenii* (blowout penstemon) to be an endangered species under the authority of the Endangered Species Act of 1973, as amended. The blowout penstemon is known from small populations in Cherry (230 individuals), Hooker (80 individuals), and Garden (660 individuals) Counties, Nebraska. Approximately 25 percent of the plants are located on private and State lands, and 75 percent are located on U.S. Fish and Wildlife Service lands. The stabilization of blowout complexes leads to declining numbers of the species. The low probabilities of seed fertilization, maturation, and dispersal and seedling establishment may also be contributing factors to the decline of the species. This proposal, if made final, would implement protection provided by the Endangered Species Act. The Service is requesting comments on this action.

DATES: Comments from all interested parties must be received by June 30, 1986. Public hearing requests must be received by June 13, 1986.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225. Comments and materials received will be available for public inspection, by appointment, during normal business hours of the Service's Regional Endangered Species Division at 134 Union Boulevard, fourth floor, Lakewood, Colorado.

FOR FURTHER INFORMATION CONTACT: Dr. James L. Miller, Regional Botanist, at the above address, (303/236–7398 or FTS 776–7398).

SUPPLEMENTARY INFORMATION:

Background

Penstemon haydenii (blowout penstemon) was described by Sereno Watson (1891), based on a collection by H.L. Webber near the Dismal River in Thomas County, Nebraska. The plant

VOL 51 ISS 82 AP 29 1986 UMI

was also found there in 1889 by Webber, and perhaps earlier by F.V. Hayden.

Penstemon haydenii is a member of the snapdragon family. It is a hairless perennial that grows 1 to 2 feet high. The stems are often decumbent, simple or branched, and very leafy. The stem leaves are linear to lanceolate, entire, 3 to 5 inches long by 1 to 3 inches wide, sessile and clasping. The inflorescence is a compactly crowded thyrse. Floral bracts are ovate to lanceolate, nearly equaling the flower. The corolla is blue and 1.5 to 2 inches long. *Penstemon haydenii* can be distinguished from *P. angustifolia* by its larger and lighter blue flowers. The species flowers from mid-May to late june. The flowers have a strong persistent fragrance that lures several kinds of bees and other pollinators.

Historically, *Penstemon haydenii* probably was widely scattered throughout the central part of the sandhills of Nebraska. All herbarium specimens and most literature citations indicate that it has never been collected outside of Nebraska. A purported Wyoming collection of Hayden was reported as being from Nebraska by Pennell (1935, p. 269), while reports of the species from Kansas are believed to be based on misidentifications (Craig Freeman, University of Connecticut, personal communication) and are not accepted in the *Atlas of the Flora of the Great Plains* (Barkley 1977).

The species is restricted to active blowouts in the sandhills of Cherry, Hooker, and Garden Counties Nebraska, and many historic locations do not support the species today because of elimination of the habitat due to stabilization of the sand dunes as a range-management practice.

The known sites of the blowout penstemon have population sizes that vary from 50 to 600 individuals. All the sites are well-developed blowouts in dune complexes with active sand and accompanying environmental extremes in wind, temperature, evapotranspiration, and soil moisture stress. *Penstemon haydenii* is found most frequently in microsites that are, or recently have been, zones of sand accumulation. The plant appears to be successional; it is not a primary invader and does not last when a blowout becomes completely vegetated (Pool 1914). The species survives burial in sand by sending off shoots at successively higher nodes. It withstands initial erosion, but does not have the rhizomatous system or extensive lateral roots to survive erosion that uncovers much more than a few inches of root length.

On December 15, 1980, Service published a notice of review for plants in the **Federal Register** (45 FR 82480); *Penstemon haydenii* was included. No comments on this species have been received in response to the notice. All taxa in the 1980 notice are treated as under petition (48 FR 53641). On February 15, 1983, the Service published a notice in the **Federal Register** (48 FR 6752) of its prior finding that the petitioned action on this species may be warranted in accord with section 4(b)(3)(A) of the Endangered Species Act of 1973 as amended (Act).

On October 13, 1983, October 12, 1984, and October 11, 1985, petition findings were made that listing *Penstemon haydenii* was warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires a recycling of the petition pursuant to a section 4(b)(3)(C)(i) of the Act. The Service now finds that the petitioned action is warranted and hereby publishes a proposed rule to implement the action, in accord with section 4(b)(3)(B)(ii) of the Act.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one of more of the five factors described in section 4(a)(1). These factors and their application to *Penstemon haydenii* S. Watson, blowout penstemon, are as follows:

A. *The present or threatened destruction, modfication, or curtailment of its habitat or range.* Successful control of unstable sand dunes has resulted in restriction of the required blowout habitats of *Penstemon haydenii*. The blowouts where the species grow are conical or irregularly shaped craters that are scooped out of sand by the swirling action of prevailing westerly winds. Because of successful dune stabilization programs that protect farmlands in the sandhills, the species does not have adequate habitat to invade. The decrease in extent of blowouts has also made dispersal of the species more difficult to the fewer remaining natural blowouts.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* The species is attractive and has been cultivated. Horticultural collecting is a potential threat for such a species known from so few individuals.

C. *Disease of predation.* None known.

D. *The inadequacy of existing regulatory mechanisms. Penstemon haydenii* is not protected by any State laws or regulations. Approximately 75 percent of known populations are found on Fish and Wildlife Service refuge land and 25 percent on State and private lands. The Service provides, under the provisions of 50 CFR Parts 25 through 28, some protection for the species on refuge lands. The species has no protection on State or private lands. The Endangered Species Act offers possibilities for protection of this species through section 7 (interagency cooperation) requirements and through section 9, which prohibits removal and reduction to possession of listed plants on areas under Federal jurisdiction.

E. *Other natural or manmade factors affecting its continued existence. Penstemon haydenii* comprises several small populations that consist of a total of approximately 950 individuals. The small population size makes the species vulnerable to localized environmental changes. In addition, the species occupies a successional niche in the development and eventual revegetation of blowout habitats. As the vegetational cover in these areas increases, *P. haydenii* undergoes local extirpation. Not only is the species rare, but it does not appear vigorous at the known localities, possibly because these blowouts have reached a stage of revegetation that exceeds the optimum for the species.

The Service has carefully assessed the best scientific information available regarding the past, present, and future threats faced this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Penstemon haydenii* as endangered. With only about 950 individuals known, and control of sand dunes occurring at the known locales, endangered status seems an accurate assessment of the species' condition.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. *P. haydenii* depends on early successional stages in the revegetation of sandhill blowouts for its habitat. Such blowouts are transient features of the sandhill topography, and a critical habitat designation reflecting the present habitat occupied by the species would quickly become inappropriate as present blowouts become stabilized and new ones develop. Even supposing that critical habitat could be kept in a state of revision to reflect the varying range of the species, such public identification of habitat would be inadvisable for such an attractive flowering plant, which could easily be exposed to vandalism or horticultural collecting. The Service thus concludes that designation of critical habitat for this species would be neither practical nor beneficial to its conservation and therefore is not prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibition against collecting are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Some management actions, such as stabilization of sand dunes by the U.S. Fish and Wildlife Service and the Soil Conservation Service, may adversely impact this species, since stabilization deprives the plant of suitable habitat on which to grow.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Penstemon haydenii,* all prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export any endangered plant, transport it in interstate or foreign commerce in the course of a commercial activity, sell it or offer it for sale in interstate or foreign commerce, or remove it from land under Federal jurisdiction and reduce it to possession. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few permits would ever be sought or issued since the species is not common in cultivation or in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Penstemon haydenii;*

(2) The location of any additional populations of *Penstemon haydenii* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on *Penstemon haydenii.*

Final promulgation of a regulation on *Penstemon haydenii* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

VOL 51 ISS 82 AP 29 1986

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.12(h) by adding the following in alphabetical order under the family Scrophulariaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

(h) * * *

Federal Register
Vol. 51, No. 82
Tuesday, April 29, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committees; Public Meetings

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409), we are giving notice of a joint meeting followed by separate and jointly held (described below) meetings of the CAC on the American Indian and Alaska Native Populations for the 1990 Census, CAC on the Asian and Pacific Islander Populations for the 1990 Census, CAC on the Black Population for the 1990 Census, and the CAC on the Hispanic Population for the 1990 Census. The joint meeting will convene on May 19 and 20, 1986, at the Westpark Hotel, 1900 North Fort Myer Drive, Arlington, Virginia 22209.

Each of these committees is composed of 9 members appointed by the Secretary of Commerce. They provide an organized and continuing channel of communications between the communities they represent and the Bureau of Census on the problems and opportunities of the 1990 Decennial Census.

The committees will draw on the knowledge and insight of their members to provide advice during the planning of the 1990 Census of Population and Housing on such elements as improving the accuracy of the population count, suggesting areas of research, recommending subject content and tabulations of particular use to the populations they represent, expanding the dissemination of census results among present and potential users of census data in their communities, and generally improving the usefulness of the census product.

The agenda for the May 19 combined meeting that will begin at 8:45 a.m. and end at 4 p.m. is: (1) Opening remarks by the Director, Bureau of the Census; (2) summary description of Census Bureau programs, including Census Bureau organization, demographic fields, field operations, economic fields, statistical standards and methodology, and management services; (3) overview of the 1980 census; (4) status and overview of 1990 census planning, including (a) the Address List Compilation Test, (b) 1985 tests in Jersey City, New Jersey and Tampa, Florida, (c) 1986 tests in Los Angeles County, California, and in Mississippi, (d) 1987 test in North Dakota, and (e) the 1988 dress rehearsal; (5) discussion of the 1990 census; (6) 1990 outreach plans; and (7) race and ethnicity testing program.

The agenda for the four committees in their separate meetings that will begin at 4:15 p.m. and end at 5 p.m. on May 19 is the election of chairpersons and chairpersons-elect, and identification of committee-specific issues.

The agenda for the May 20 combined meeting that will begin at 8:30 a.m. and end at 9 a.m. is committee reports.

The agenda for the four committees in their separate meetings that will begin at 9 a.m. and end at 12 noon are:

The CAC on the American Indian and Alaska Native Populations for the 1990 Census: (1) Enumeration plans for Reservation and urban Areas, (2) development and discussion of recommendations, and (3) plans and suggested agenda items for the next meeting.

The CAC on the Asian and Pacific Islander Populations for the 1990 Census: (1) Enumerating recent immigrants, (2) development and discussion of recommendations, and (3) plans and suggested agenda items for the next meeting.

The CAC on the Black Population for the 1990 Census: (1) Enumerating inner cities and the rural South, (2) development and discussion of recommendations, and (3) plans and suggested agenda items for the next meeting.

The CAC on the Hispanic Population for the 1990 Census: (1) Enumerating recent immigrants, (2) development and discussion of recommendations, and (3) plans and suggested agenda items for the next meeting.

The agenda for the combined meeting that will begin at 1:15 p.m. and adjourn at 3:30 p.m. is: (1) Discussion of the 1990 census, and (2) presentation and discussion of committees' recommendations.

All meetings are open to the public, and a brief period is set aside on May 20 for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Census Bureau official named below at least 3 days before the meeting.

Persons wishing additional information concerning these meetings or who wish to submit written statements may contact Mr. Russell L. Valentine, Assistant Chief for Outreach and Program Information, Decennial Planning Division, Bureau of the Census, Room 3637, Federal Building 3, Suitland, Maryland. (Mailing address: Washington, DC 20233). Telephone (301)763–4356.

Dated: April 24, 1986.

John G. Keane,

Director, Bureau of the Census.

Mirrors in Stock Sheet and Lehr End Sizes from Belgium; Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import, Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes (mirrors) from Belgium as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from Belgium materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will

VOL 51 ISS 82 AP 29 1986 UMI

make ours on or before September 8, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Belgium are being, or are likely to be, sold in United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors from Belgium and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether mirrors are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 8, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, classifiable in the Tariff Schedules of the United States Annotated (TSUSA) under item 544.5400 and made of any of the glass described in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioners based United States price on average unit values, f.o.b. origin, of U.S. imports of mirrors from Belgium derived from the Bureau of Census import statistics and price quotes obtained by U.S. manufacturers. Using prices quotes petitioners arrived at average unit values, f.o.b. origin of U.S. imports by subtracting estimated charges for ocean freight, U.S. dealer markup, insurance, customs duties and U.S. inland freight.

Petitioners based home market price on actual transaction prices delivered to Belgium wholesalers in the home market. Petitioners then compared home market price with the cost of production derived from the cost components of a Belgium mirror manufacturer. Home market prices were shown to be below cost. Therefore, petitioners have alleged sales below the cost of production. We will investigate this allegation. The petitioners, therefore, based foreign market value on a weighted-average constructed value equal to the cost of production, as derived from the Belgium manufacturer, plus eight percent profit.

Based on the comparison of these estimated values, petitioners allege average dumping margins for 1985 ranging from 19.96 percent to 39.83 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors from Belgium materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

Dated: April 21, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-428-603]

Mirrors in Stock Sheet and Lehr End Sizes from the Federal Republic of Germany: Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes from the Federal Republic of Germany (FRG), as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from the FRG materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will make ours on or before September 8, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirrow Manufacturers. The petition was filed on behalf of the United States industry producing mirrows in stock sheet and lehr end sizes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from the FRG are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the

Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegation necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors in stock sheet and lehr end sizes from the FRG and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 8, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, classifiable in the Tariff Schedule of the United States Annotated (TSUSA) under item 544.5400 and made of any of the glass described in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioner based U.S. price on actual sales or offers made by German producers to U.S. purchasers. Using this price data, the petitioner arrived at average unit values, f.o.b. origin, of U.S. imports by subtracting estimated charges for ocean freight, insurance, customs duties, and U.S. inland freight.

The petitioner based home market price on actual transaction prices, delivered to wholesalers in the FRG. The petitioner then compared home market price with an average German cost of production from the estimated cost components of German mirror producers. Since home market price was shown, on average, to be below the cost of production, there is an allegation of sales below the cost of production. We will investigate this allegation. The petitioner based foreign market value on constructed value equal to the cost of production plus eight percent profit.

Based on the comparison of these estimated values, petitioner alleges average dumping margins ranging from 12.77 percent to 47.06 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors in stock sheet and lehr end sizes from the FRG materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

April 21, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3501-DS

[A-475-602]

Mirrors in Stock Sheet and Lehr End Sizes From Italy: Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in a proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes (mirrors) from Italy as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from Italy materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will make ours on or before September 8, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1769.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Italy are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors from Italy and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether mirrors are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 8, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, classifiable in the Tariff Schedules of the United States

VOL 51 ISS 82 AP 29 1986 UMI

Annotated (TSUSA) under item 544.5400 and made of any of the glass described in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioners based United States price on average unit values, f.o.b. origin, of U.S. imports of mirrors from Italy derived from the Bureau of Census import statistics and price quotes obtained by U.S. manufacturers. Using price quotes petitioners arrived at average unit values, f.o.b. origin of U.S. imports by subtracting estimated charges for ocean freight, U.S. dealer markup, insurance, customs duties and U.S. inland freight.

Petitioners based home market price on price quotes for products delivered to Italian wholesalers in the home market. Petitioners then compared home market price with an average producer's cost of production derived from the cost components of an Italian mirror manufacturer. Home market price was shown to be below cost. Therefore, petitioners have alleged sales below the cost of production. We will investigate this allegation. The petitioners based foreign market value on weighted-average constructed value equal to the cost of production, as derived from an Italian manufacturer and European float glass producer, plus eight percent profit.

Based on the comparison of these estimated values, petitioners allege average dumping margins by quarters for 1985 ranging from 13.94 percent to 103 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors from Italy materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

BILLING CODE 3510-DS

[A-588-603]

Mirrors in Stock Sheet and Lehr End Sizes From Japan; Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes (mirrors) from Japan as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from Japan materially injure, or threaten material injury to, a United States industry. If the investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will make ours on or before September 8, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors from Japan and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether mirrors are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 8, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors, 15 feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling,entching, edging, or framing, classifiable in the Tariff Schedule of the United States Annotated (TSUSA) under item 544.5400 and made of any of the glass described in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioners based United States price on average unit values, f.o.b. origin, of United States imports of mirrors from Japan derived from the Bureau of Census, Import statistics.

The petitioners based foreign market value on average unit values of delivered home market prices. Petitioners also made comparisons basing foreign market value on weighted-average constructed value.

Based on the comparison of these estimated values, petitioners allege average dumping margins ranging from 24.39 percent to 70.05 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors from Japan materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

BILLING CODE 3510-DS-M

[A-471-601]

Mirrors in Stock Sheet and Lehr End Sizes From Portugal; Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes from Portugal as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from Portugal materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will make ours on or before September 8, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigation, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1759.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors in stock sheet and lehr end sizes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Portugal are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors in stock sheet and lehr end sizes from Portugal and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumpting duty investigation to determine whether mirrors in stock sheet and lehr end sizes are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 8, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, currently classifiable in the Tariff Schedules of the United States Annotated (TSUSA) under item 544.5400 and made of any of the glass decribed in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioner based United States price on average unit values, f.o.b. origin, of United States imports of mirrors from Portugal as derived from the Bureau of Census import statistics.

The petitioner based foreign market value on average unit values of import prices of European Economic Community mirrors as being representative of prices in the home market. Petitioner also made comparisons basing foreign market value on weighted-average constructed value.

Based on the comparison of these estimated values, the alleged average dumping margins range from 57.15 percent to 68.13 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986 whether there is a reasonable indication that imports of mirrors in stock sheet and lehr end sizes from Portugal materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 21, 1986.

[A-412-601]

Mirrors in Stock Sheet and Lehr End Sizes From the United Kingdom: Initiation of Antidumping Duty Investigation

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes from the United Kingdom (U.K), as described in the "Scope of Investigation" section of this notice, are being, or are likely to be, sold in the

VOL 51 ISS 82 AP 29 1986 UMI

United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of this action so that it may determine whether imports of the subject merchandise from the U.K materially injure, or threaten material injury to, a United States industry. If this investigation proceeds normally, the ITC will make its preliminary determination on or before May 16, 1986, and we will make ours on or before September 6, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone (202) 377-1769.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors in stock sheet and lehr end sizes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from the U.K. are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a United States industry.

Initiation of Investigation

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of an antidumping duty investigation and, further, whether it contains information reasonably available to the petitioner supporting the allegations.

We have examined the petition on mirrors in stock sheet and lehr end sizes from the U.K. and have found that it meets the requirements of section 732(b) of the Act. Therefore, in accordance with section 732 of the Act, we are initiating an antidumping duty investigation to determine whether mirrors in stock sheet and lehr end sizes are being, or are likely to be, sold in the United States at less than fair value. If our investigation proceeds normally, we will make our preliminary determination on or before September 6, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, classifiable in the Tariff Schedules of the United States Annotated (TSUSA) under item 544.5400 and made of any of the glass described in TSUS items 541.11 through 544.41.

United States Price and Foreign Market Value

The petitioner based U.S. price on actual sales or offers made by a U.K. producer to U.S. purchasers. Using this price data, the petitioner arrived at average unit values, f.o.b. origin, of U.S. imports by subtracting estimated charges for ocean freight, insurance, customs duties, and U.S. inland freight.

The petitioner based foreign market value on transaction prices, delivered to wholesalers in the United Kingdom.

Based on the comparison of these estimated values, the petitioner alleges average dumping margins ranging from 50.01 percent to 60.35 percent.

Notification of ITC

Section 732(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors in stock sheet and lehr end sizes from the U.K. materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise, it will proceed according to the statutory procedures.

April 23, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

[A-570-806]

Certain Small Diameter Welded Carbon Steel Pipes and Tubes From the People's Republic of China: Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that certain small diameter welded carbon steel pipes and tubes (pipes and tubes) from the People's Republic of China (PRC), are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of pipes and tubes from the PRC that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make a final determination by July 7, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Jess M. Bratton or John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230; telephone: (202) 377-1778, or (202) 377-3965.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that pipes and tubes from the PRC are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The margin preliminarily found for the company investigated is listed in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination by July 7, 1986.

Case History

On November 13, 1985, we received a petition filed in proper form from the Standard Pipe Subcommittee of the Committee on Pipe and Tube Imports and by each of the member companies which produces standard pipe and tube on behalf of the U.S. industry producing pipes and tubes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from the PRC are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673), and that these imports are materially injuring, or threatening material injury to, a U.S. industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We initiated the investigation on December 3, 1985 (50 FR 51274), and notified the ITC of our action.

On December 30, 1985, the ITC found that there is a reasonable indication that imports of pipes and tubes from the PRC are threatening material injury to a U.S. industry (U.S. ITC Pub. No. 1796, December, 1985).

On January 16, 1986 a questionnaire was sent to the China National Metals and Minerals Import and Export Corporation (Minmetals), which accounted for more than 80 percent of the exports of standard pipe and tube from the PRC during the period of investigation.

On February 21, 1986 and on April 9, 1986, Minmetals filed a response to our questionnaire.

Scope of Investigation

The products covered by this investigation are small diameter welded carbon steel pipes and tubes of circular cross-section, 0.375 inch or more but not over 16 inches in outside diameter, currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.3231 and 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258 and 610.4925. These products are commonly referred to in the industry as standard pipes or tubes produced to various ASTM specifications, most notably A-120, A-53 or A-135.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value. For foreign market value, we used best information available as required by section 776(b) of the Act.

United States Price

As provided in section 772 of the Act, we calculated the purchase price of pipes and tubes based on the C&F packed price to unrelated United States purchasers shown in the response submitted by Minmetals. We made a deduction for ocean freight.

Foreign Market Value

In accordance with section 773(c) of the Act, we used prices of pipes and tubes imported into the United States from Argentina as the basis for determining foreign market value.

Petitioners alleged that the PRC is a state-controlled-economy country and that sales of the subject merchandise in that country do not permit a determination of foreign market value under section 773(a). After an analysis of the PRC economy, and consideration of the briefs submitted by the parties, we concluded that the PRC is a state-controlled-economy country for the purpose of this investigation. Central to our decision on this issue is the fact that the central government of the PRC controls the prices and levels of production of pipes and tubes or steel products as well as the internal pricing of the factors of production.

As result, section 773(c) of the Act requires us to use either the prices of or the constructed value of such or similar merchandise in a non-state-controlled-economy country. Our regulations establish a preference for foreign market value based upon sales prices. They further stipulate that, to the extent possible, we should determine sales prices on the basis of prices in a non-state-controlled-economy country at a stage of economic development comparable to the state-controlled-economy country.

After an analysis of the economies of countries producing standard pipe and tube, we determined that Egypt, India, Indonesia, Morocco, Pakistan, the Philippines, Sri Lanka and Thailand were the countries at the most comparable stages of economic development, and it would, therefore, be appropriate to base foreign market value on prices of companies in these countries. The companies we sent questionnaires to in these countries have not responded.

Lacking price information from companies in countries at a level of economic development comparable to that of the PRC, we have based foreign market value on the prices of imports of the same class or kind of merchandise into the United States. Of the countries exporting pipe and tube to the United States, we chose Argentina since it was at the most comparable level of economic development to the PRC. We have based foreign market value on the weighted-average C&F price of pipe and tube from Argentina for export to unrelated purchasers in the United States. We gathered weighted-average price information from Special Summary Steel Invoice (SSSI) statistics, which was best information available and made a deduction for ocean freight. We made comparisons of merchandise of the same size and grade as that which the PRC exported to the United States.

In arriving at the decision to use the price of Argentine exports to the United States as the basis of foreign market value, we considered using the exports of several other countries. However, these other countries were signatories of voluntary restraint agreements (VRA) with the United States. Since under the terms of a VRA the amount of goods a country may export to the United States is limited, it is possible that these VRAs lead to an increase in the prices manufacturers in these countries charge. Therefore, we decided, for the purpose of this preliminary determination, not to base foreign market value on the value of goods from VRA countries.

We are continuing to review this issue realizing that of countries exporting to the United States, those considered most comparable to the state-controlled-economy countries under investigation may be covered by VRAs or, indeed, all countries exporting the goods under investigation to the United States may be covered by VRAs. In situations such as this, we have tried to use a country, such as Argentina in this case, which is not covered by a VRA but is an exporter of the goods under investigation and has the most comparable level of economic development to the country subject to the investigation. Because this issue is still under review, we invite all interested parties' comments on this matter as they relate to section 773(c) of the Act. Comments should be directed to the Deputy Assistant Secretary for Import Administration within 30 days of the date of publication of this notice.

Verification

As provided in section 776(a) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of pipes and tubes from the PRC that are entered, or withdrawn from warehouse, for consumption, on or after the date of

VOL 51 ISS 82 AP 29 1986 UMI

publication of this notice in the Federal Register. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Weighted-average margin percentage
Mitsubishi	17.97
All Others	17.97

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days after we make our final affirmative determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on May 28, 1986 at the United States Department of Commerce, Room 3708, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 21, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 22, 1986.

Certain Small Diameter Welded Carbon Steel Pipes and Tubes From the Philippines: Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that certain small diameter welded carbon steel pipes and tubes (pipes and tubes) from the Philippines, are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of pipes and tubes from the Philippines that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make a final determination by July 7, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Mary J. Jenkins or John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-1756, or (202) 377-3965.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that pipes and tubes from the Philippines are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The margin preliminarily found for the company investigated is listed in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination by July 7, 1986.

Case History

On November 13, 1985, we received a petition filed in proper form from the Standard Pipe Subcommittee on the Committee on Pipes and Tubes Imports and by each of the member companies who produce standard pipe and tube on behalf of the U.S. industry producing pipes and tubes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353:36), the petition alleges that imports of pipe and tube from the Philippines are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673), and that these imports are materially injuring, or threatening material injury to, a U.S. industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We initiated the investigation on December 3, 1985 (50 FR 51274), and notified the ITC of our action.

On December 30, 1985, the ITC found that there is a reasonable indication that imports of standard pipes and tubes from the Philippines are threatening material injury to a U.S. industry.

On February 3, 1986, a questionnaire was presented to Goodyear Steel Pipe Corporation (Goodyear) and on February 18, 1986, a questionnaire was sent to Mitsubishi International Corporation.

On March 18, 1986, Mitsubishi submitted a response to our questionnaire. On April 15, 1986, Mitsubishi submitted a supplemental response. We have not yet received a response from Goodyear, the Philippine producer of the majority of imports of pipes and tubes to the United States from the Philippines.

Scope of Investigation

The products covered by this investigation are small diameter welded carbon steel pipes and tubes of circular cross-section, 0.375 inch or more but not over 16 inches in outside diameter, currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 610.4925. These products are commonly referred to in the industry as standard pipes and tubes produced to various ASTM specifications, most notably A-120, A-53 or A-135.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value. For foreign market value we used the best information available as required by section 776(b) of the Act.

We made comparisons of virtually all of the sales of the pipe and tube exported to the United States during the period June 1, 1985 through November 30, 1985.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise imported by Mitsubishi, the U.S. importer, to represent the United States price because all elements of the merchandise were sold prior to the date of importation to unrelated purchasers in the United States.

Mitsubishi purchased raw material in Taiwan and had it shipped to Goodyear in the Philippines for processing. We took as the purchase price, the processing fee Goodyear charged Mitsubishi.

Foreign Market Value

In accordance with section 776(b) of the Act, we used best information available to determine foreign market value. We used the home market prices, reported by the petitioners, at which Goodyear sold or offered for sale its products in the home market during October 1985. From the home market price, we subtracted the cost of raw material as reported by Mitsubishi to arrive at a home market price for processing for both black plain ended and black coupled and threaded standard pipes and tubes.

Because we made fair value comparisons on the basis of processing charges in the home and U.S. markets, the resulting differences have been multiplied by a coefficient equalling the proportion for which processing accounts in the value of pipes and tubes delivered to Mitsubishi to arrive at the margins for individual sales.

Verification

If we receive a timely and adequate response from Goodyear, as provided in section 776(a) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of pipes and tubes from the Philippines that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the Federal Register. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect unitl further notice.

Manufacturer/producer/exporter	Weighted-average margin percentage
Goodyear steel pipe corporation	10.2
All others	10.2

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days after we make our final affirmative determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on May 26, 1986 at the United States Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 19, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with C.F.R. 353.46 within 30 days of this notice's publication, at the above address and in at least 10 copies.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

Certain Welded Carbon Steel Small Diameter and Light-Walled Rectangular Pipes and Tubes from Singapore: Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that certain welded carbon steel small diameter and light-walled rectangular pipes and tubes (small diameter and LWR pipes and tubes, respectively) from Singapore, are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determinations. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of small diameter and LWR pipes and tubes from Singapore that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margins as described in the "Suspension of Liquidation" section of this notice.

If these investigations proceed normally, we will make final determinations by July 7, 1986.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe or John Brinkmann, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230;

VOL 51 ISS 82 AP 29 1986 UMI

telephone: (202) 377-1758, or (202) 377-3965.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that small diameter and LWR pipes and tubes from Singapore are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The margins preliminarily found for the company investigated are listed in the "Suspension of Liquidation" section of this notice. If these investigations proceed normally, we will make our final determinations by July 7, 1986.

Case History

On November 13, 1985, we received a petition filed in proper form from the Standard Pipe and Tube Subcommittee of the Committee on Pipe and Tube Imports (CPTI) and by each of the individual manufacturers of these products that are members of each respective subcommittee on behalf of the U.S. industry producing small diameter, LWR and heavy-walled rectangular pipes and tubes. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of small diameter, LWR and heavy-walled rectangular pipes and tubes from Singapore are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry. The petition also alleged that the subject merchandise is being sold at prices below the cost of production in the home market.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate antidumping duty investigations. We initiated the investigations on December 3, 1985 (50 FR 50853), and notified the ITC of our actions.

On December 30, 1985, the ITC found that there is a reasonable indication that imports of small diameter and LWR pipes and tubes from Singapore are materially injuring a U.S. industry. It also found that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports from Singapore of heavy-walled rectangular pipes and tubes (U.S. ITC Pub. No. 1798, December 1985).

On January 22, 1986, a questionnaire was presented to Steel Tubes of Singapore (PTE), Ltd. (STS). On April 14, 1986, STS filed a response to our questionnaire.

Scope of Investigations

The products covered by these investigations are small diameter, welded carbon steel pipes and tubes of circular cross-section, 0.375 inch or more but not over 16 inches in outside diameter currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.3231 and 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258 and 610.4925. These products are commonly referred to in the industry as small diameter pipes or tubes produced to various ASTM specifications, most notably A-120, A-53 or A-135.

The light-walled rectangular pipes and tubes are mechanical pipes and tubes or welded carbon steel pipes and tubes of rectangular (including square) cross-section having a wall thickness of less than 0.156 inch as provided for in item 610.4928 of the TSUSA.

Fair Value Comparison

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772(b) of the Act, we used the purchase price of the subject merchandise to represent the United States price because the merchandise was sold prior to the date of importation to unrelated purchasers in the United States. We calculated the purchase price based on the delivered price to unrelated purchasers in the United States. We made deductions for foreign inland freight and port charges, ocean freight, insurance, U.S. import duty and port charges, as applicable.

Because of irregularities in STS's computer generated sales data, we encountered difficulties in using that data for sales comparisons. We were able to modify the data on sales of small diameter pipes and tubes and to compare all of those sales. However, we were unable to process the data on sales of LWR by computer. Therefpre, we sampled the LWR sales and are basing the preliminary determination with respect to those sales on approximately 30 percent, by quantity, of the sales of LWR. Given the deficient conditions of the data files submitted and the statutory time constraints for this determination, we considered this the best information available for this preliminary determination. We are requesting that STS revise its computer generated sales response in order to enable us to use it for the final determination.

Foreign Market Value

Petitioners alleged that sales in the home market were made at prices which were below the cost of production over an extended period of time and were at prices which did not permit recovery of all costs within a reasonable period of time in the normal course of trade. Therefore, we compared home market prices to the cost of production of the merchandise.

After a review of the response, we concluded that cost data in the response were inadequately explained and insufficiently labeled. Therefore, the Department added all cost items which appeared to be part of the costs of production reported in the response. The costs of production determined by this method exceeded the total costs of production presented in the response. In addition, the appropriateness of the respondent's overhead allocation method was questionable. However, we used the respondent's reported overhead costs because the overhead data, as presented, did not allow re-allocation of overhead costs for the preliminary determination. The Department will carefully examine the allocation methodology, as well as actual overhead costs, during the verification in order to assure that all overhead costs are properly attributed to the product.

In accordance with section 773(e) of the Act, we calculated foreign market value based on constructed value because there were not sufficient home market sales of such or similar merchandise above the cost of production. Because the general expenses reported were above the statutory minimum of 10 percent of the sum of material and production costs, we used the actual general expenses. As we have been unable to determine from the response what the profit is for the same general class or kind of merchandise, for purpose of this preliminary determination we are using the statutory minimum of eight percent.

We made currency conversions in accordance with § 353.56(a)(1) of the Commerce Regulations, using certified exchange rates as furnished by the Federal Reserve Bank of New York.

Verification

As provided in section 776(a) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 744(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of small diameter and LWR pipes and tubes from Singapore that are entered, or withdrawn from warehouse, for consumption on or after date of publication of this notice in the Federal Register. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer producer/exporter	Weighted-average margin percentage
Steel Tubes of Singapore (PTE), Ltd:	
Small diameter pipe and tubes	25.47
Light-walled rectangular pipes and tubes	38.08
All others:	
Small diameter pipes and tubes	25.47
Light-walled rectangular pipes and tubes	38.08

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determinations. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to these investigations. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determinations or 45 days after we make our final affirmative determinations.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on these preliminary determinations at 10:00 a.m. on May 27, 1986 at the United States Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 20, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

April 22, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

64K Dynamic Random Access Memory Components (64K DRAM's) From Japan: Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration/Import Administration/ Commerce.

ACTION: Notice.

SUMMARY: We have determined that 64K DRAMs from Japan are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to continue to suspend the liquidation of all entries of 64K DRAMs from Japan that are entered, or withdrawn from warehouse, for consumption, on or after December 11, 1985 and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: April 29, 1986.

FOR FURTHER INFORMATION CONTACT: John Brinkmann, Karen Sackett, or Paul Thran, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230; telephone: (202) 377-3965, 377-5050, or 377-3963.

Final Determination

We have determined that 64K DRAMs from Japan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673(a)) (the Act). We made fair value comparisons on almost all sales of the class or kind of merchandise to the United States by the respondents during the period of investigation. We excluded from our fair value comparisons U.S. sales of certain 64K DRAMs sold in insignificant quantities. The weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

On June 24, 1985, we received a petition from Micron Technology, Inc. on behalf of the domestic merchant manufacturers of 64k DRAMs. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of 64k DRAMs from Japan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or are threatening material injury to a United States industry. The petition also alleged that sales of the subject merchandise were being made in the home market at less than the cost of production. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We notified the ITC of our action and initiated such an investigation on July 15, 1985 (50 FE 29458). On August 8, 1985, the ITC determined that there is a reasonable indication that imports of 64k DRAMs from Japan are materially injuring, or are threatening material injury to, a U.S. industry (50 FR 32778).

On August 19, we presented antidumping duty questionnaries to NEC Corporation (NEC), Hitachi Ltd. (Hitachi), Oki Electric Industry Co. Ltd. (Oki) and Mitsubishi Electric Corporation (Mitsubishi). Respondents were requested to answer the questionnaire in 30 days. However, at the requests of the companies and the Japanese Ministry of International Trade and Industry, we granted two extensions of time for response submissions of two weeks and one week respectively. We received incomplete responses from the companies on October 10-11, 1985. In letters dated November 6, 12, and 13, the Department requested supplemental information

BEST COPY AVAILABLE

VOL 51 ISS 82 AP 29 1986 UMI

from each of the respondents. Additional information was submitted by the respondents on November 21, 1985.

On December 11, 1985, we published a preliminary determination that 64K DRAMs from Japan were being sold at less than fair value in the United States (50 FR 50649).

After the preliminary determination, all of the respondents in this investigation requested an extension of the final determination date until not later than April 23, 1986. The respondents were qualified to make such a request since they accounted for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation properly request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the request. Accordingly, we granted the request and postponed our final determination on January 3, 1986 (51 FR 234).

Between January 10 and March 22, 1986, we verified the information provided by respondents at their facilities in Japan and the United States. On March 10, 1986, we held a hearing to provide all interested parties with an opportunity to comment on the investigation.

Products Under Investigation

The products covered by this investigation are all 64K dynamic random access memory components of the N-channel metal oxide semiconductor type (64K DRAMs) from Japan. This merchandise is currently provided for in item 687.7441 of the *Tariff Schedules of the United States Annotated*. We investigated sales of 64K DRAMs during the period January 1 through June 30, 1985.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price to the foreign market value for all companies. We used data provided in their responses, as explained in the "Foreign Market Value" section of this notice, except where otherwise noted.

We used date of shipment as the date of sale as that was the first date on which a binding commitment to sell the subject merchandise can be said to have occurred, as explained more fully in the comment section of this notice. All companies provided shipment dates for U.S. sales. Hitachi, Mitsubishi, and Oki provided shipment dates for home market sales as well. NEC provided only order dates for its home market sales. However, examination of individual NEC home market sales showed that the average length of time between order and shipment in the home market was substantially less than 30 days. Therefore, we determined that NEC's home market order date was a reasonable indication of shipment date, and we used that as best information available.

United States Price

For certain Hitachi sales we used the purchase price of the subject merchandise to represent United States price, as provided in section 772(b) of the Act, since the merchandise was sold to unrelated purchasers prior to its importation into the United States. For other Hitachi sales and sales by all other respondents, we used exporter's sales price (ESP) to represent United States price, in accordance with section 772(c) of the Act, as the merchandise was sold after the time of importation.

We calculated purchase price and ESP based on the packed, duty paid, C.I.F. prices to unrelated purchasers in the United States.

For purchase price, we made deductions for foreign inland freight and insurance, air freight, marine insurance, brokerage charges in Japan and the United States, and U.S. duty. For ESP, where appropriate, we made deductions for brokerage charges in Japan and the United States, foreign inland freight and insurance, air freight and insurance, U.S. duty, U.S. freight and insurance, commissions to unrelated parties, U.S. selling expenses incurred in the U.S. and Japan, credit expenses, warranties, advertising, royalties, and post-shipment price adjustments in the U.S. market. As Oki had no U.S. short-term borrowing, we used the U.S. prime rate for the first and second quarter of 1985 as the best information available in calculating Oki's U.S. credit expense.

Foreign Market Value

The petitioner alleged that sales in the home market by all the respondents were at prices below the cost of producing the merchandise.

In accordance with section 773(a) of the Act, for all companies, we calculated foreign market value based on home market prices where there were sufficient home market sales at or above the cost of production to determine foreign market value. We used constructed value as the basis for calculation foreign market value where there were no sales of such or similar merchandise in the home market or where there were insufficient sales above the cost of production, as defined in section 773(b) of the Act.

Where foreign market value was based on home market prices, we calculated a foreign market value for each product group for each month of the period of investigation, due to sharp declines in monthly prices. Where foreign market value was based on constructed value, we used a quarterly constructed value for each product group.

Since the production of 64K DRAMs was not at the developmental stage but rather at a mature stage of production, the Department used quarterly costs as the basis for the constructed value. The Department considered the significant changes in cost from quarter to quarter, the length of time for production, and the average inventory level of 64K DRAMs in order to appropriately match the sales data to the cost data. We concluded that the average costs of manufacturing incurred in the quarter proceding the sale most accurately reflected the costs of the product sold. Accordingly, the Department based its cost of production on the average manufacturing cost for the prior quarter and general expenses for the quarter in which the sale took place.

Cost of Production

In determining the cost of production for the respondents, the Department relied on the submissions, when verified and appropriately valued, and adjusted such data when certain costs necessary for the production of 64K DRAMs were not verified, not included, or not appropriately quantified or valued.

The Department analyzed industry practices of accounting for the equipment used to produce 64K DRAMs and concluded that the accelerated method of depreciation based on a five-year useful life was appropriate. In reaching this conclusion, the Department considered the characteristics of the industry which show rapid changes in manufacturing technology and a relatively brief market life for the 64K DRAM integrated circuits.

The Department included, as part of the depreciation expense, additional depreciation which was expensed when a company utilized the equipment in excess of normal production hours and when such expense was reflected on its records.

The Department's method of accounting for research and development (R&D) expenses encompassed the historic R&D for 64K DRAMs allocated over the market life of the product, which was considered part of the cost of manufacturing, and a proportional share of the current product line R&D and general R&D, which were considered to be part of the general expenses.

NEC

The following adjustments were made to the cost of production information presented in NEC's response:

For the cost of manufacturing:

1. An amount, based on "best information available" for product-specific research and development was included because the submitted costs of manufacturing did not include product-specific research and development.
2. Special depreciation which was reported in the respondent's financial statements, but omitted from their response, was added to the cost of manufacture.
3. Certain manufacturing costs which were double-counted for one product were revised.

For the general expenses:

1. General and administrative expenses were revised because the response did not fully allocate general expenses incurred by the respondent's subsidiaries to the 64K DRAMs.
2. Interest expenses were revised because the submitted expenses did not include an appropriate allocation of credit expenses attributable to sales of 64K DRAMs.
3. Indirect selling expenses related to the sales subsidiaries were included instead of the amount in the submission.
4. Financial expenses were recalculated to exclude investment income and to include credit expenses attributable to sales of 64K DRAMs.
5. Rebate expenses were excluded.

Mitsubishi

The following adjustments were made to the cost of production information presented in Mitsubishi's response:

For the cost of manufacturing:

1. The costs of certain subcontractors were adjusted to reflect the costs shown on the respondent's records.
2. Royalty payments on patents related to the production of 64K DRAMs were reclassified from general expenses to cost of manufacturing.
3. Depreciation expense was readjusted to reflect the respondent's method used in the ordinary course of business, and which the Department accepted as the method to be used for calculating the cost of production instead of the adjusted method used for the preparation of the response.

For the general expenses:

1. A proportional share of the corporate interest expense and the credit expenses attributable to sales of 64K DRAMs were included.
2. Corporate advertising which was included in the company records but not included in the submission was included.
3. Home market selling expenses were used instead of the amount in the submission.

Oki

The following adjustments were made to the cost of production information presented in Oki's response:

For the cost of manufacturing:

1. Depreciation expense was readjusted to reflect the respondent's method used in the ordinary course of business, which the Department accepted as the method to be used for calculating the cost of production, instead of the adjusted method used for the preparation of the response.
2. The difference resulting from correctly calculating the material variance by using materials consumed, not materials purchased, was included.
3. The miscalculation of the material variance was corrected and the results were included.
4. A six-month favorable labor variance was proportionately reallocated to the relevant quarters.
5. The yield variance was restated because the Department did not accept the credit adjustment made by the company to its March yield variance for reentering retest devices into production.
6. Royalty expense was added.
7. Historic product-specific R&D was included, because the respondent had not included this cost in its calculations. This R&D amount for the period of investigation was divided between the 64K DRAM sales and royalty income. The amount applicable to 64K DRAMs was included.

For the general expenses:

1. Home market selling expenses were used instead of the allocated selling expenses included in the submission.
2. General and administrative expenses were revised to reflect an allocation based on cost of sales rather than sales revenues.
3. Interest expense was revised to reflect an allocation based on cost of sales rather than sales revenues and to include an appropriate allocation of credit expenses attributable to sales of 64K DRAMs.
4. Royalty income was not used to offset interest expense.
5. "Best information available" was developed for product-line R&D because such amount had not been included in the submission.

Price to Price Comparisons

For each company examined, we found sufficient sales above the cost of production for certain product groups to allow use of home market prices to determine foreign market value in accordance with section 773(a)(1)(A) of the Act. We used home market prices for identical merchandise sold in the United States as the basis for foreign market value. We calculated the home market price on the basis of the F.O.B. price to unrelated purchasers. When we compared purchase price to foreign market value, we made deductions, where appropriate, for foreign inland freight and insurance, discounts and rebates. We also made adjustments, where appropriate, for differences in circumstances of sale for credit terms, in accordance with § 353.15 of our regulations. On purchase price sales by Hitachi, we offset commissions paid on U.S. sales with indirect selling expenses in the home market, in accordance with § 353.15(c) of our regulations.

When we compared ESP with foreign market value, we made deductions, where appropriate, for foreign inland freight and insurance, advertising, credit expenses, direct selling expenses, discounts, rebates, and commissions. We also used indirect selling expenses in the home market to offset United States selling expenses, in accordance with § 353.15(c) of our regulations.

VOL 51 ISS 82 AP 29 1986 UMI

For both purchase price and ESP, in order to adjust for differences in packing between the two markets, we deducted home market packing costs and added U.S. packing costs to the home market prices.

We disallowed deductions for inland freight between Hitachi and its subsidiaries, because we considered this expense an intra-company transfer and included it in the cost of production. We also disallowed technical servicing expenses incurred by Hitachi since these could not be tied to particular sales during the period of investigation.

Constructed Value

In accordance with section 773(e) of the Act, we calculated foreign market value based on constructed value when there were not sufficient home market sales above the cost of production of such or similar merchandise for the purpose of comparison. For constructed value, the Department used the cost of all materials, fabrication, general expenses, and profit based on the respondents submissions, revised, as detailed under the "Cost of Production" section of this notice. Actual general expenses were used, since in all cases, such expenses exceeded the statutory minimum of 10 percent of materials and fabrication. Only one respondent provided verifiable profit data. This figure exceeded the eight percent statutory minimum for profit. Since the other respondents were unable to provide verifiable profit data, we used the best information available for them, which was the verified profit of the one firm which provided an adequate profit submission. We made adjustments under § 353.15 of the regulations for differences in credit and royalties between the two markets.

Where there were commissions in one market and not in the other, we offset the commissions with indirect selling expenses in the other market. We also used indirect selling expenses in the home market to offset United States selling expenses, in accordance with § 353.15(c) of our regulations.

Currency Conversion

In calculating foreign market value, we made currency conversions from Japanese yen to U.S. dollars in accordance with § 353.56(a) of our regulations, using the certified daily exchange rates for comparisons involving purchase price. For ESP comparisons, we used the official exchange rate for the date of sale, which we determined was the date of shipment, since the use of that exchange rate is consistent with section 615 of the Trade and Tariff Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a)(2) of our regulations because the later law supersedes that section of the regulations.

Verification

We verified the information used in making our final determination in accordance with section 776(a) of the Act. We used standard verification procedures, including examination of relevant sales and financial records of each company.

Respondents' Comments

Hatachi Comment 1: Hitachi claims that the constructed value used by the Department for its preliminary determination included adjustments which were not appropriate and which should not be used for the final determination. These adjustments included: (1) Changing Hitachi's depreciation expense; (2) erroneously including product-specific R&D; and (3) revising Hitachi's reported general expenses which encompassed the general R&D, interest expense, and selling, general and administrative expenses (SG&A).

DOD Response: The Department reviewed the respondent's submission. For the preliminary determination, in those areas where costs did not appear to be appropriately stated, the Department adjusted these costs by using "best information available." The adjustments were described in the Department's preliminary determination notice. For the final determination, the Department used the respondent's information when such data was verified, appropriately quantified and valued, as noted in the "Cost of Production" section of this notice.

Hitachi Comment 2: Hitachi states that since the allocation method used to calculate product-specific R&D was verified, the Department should accept its submitted amount for R&D.

DOD Response: The Department accepted the methodology used by Hitachi for calculating product-specific R&D costs. However, the company's method of calculating product-line R&D for the product was unacceptable, and "best information available" was used for this amount.

Hitachi Comment 3: Hitachi states that it was justified in not providing five-year yield experience.

DOC Response: The information requested by the verifier should have been provided. The Department requested the five-year yield experience to allow it to review more fully the current yield and historic R&D information.

Hitachi Comment 4: Hitachi claims that its right to a hearing was compromised by the Department's failure to provide a timely constructed value verification report.

DOC Response: The Department afforded adequate time for all parties to comment on the constructed value verification report prior to the final determination.

Hitachi Comment 5: Hitachi argues that Motorola's cost model for 64K DRAMs is based on fundamentally fallacious assumptions and should not be considered by the Department in reviewing Hitachi's actual costs.

DOC Response: The Department considers and analyzes all information presented by the petitioners, respondents, and interested parties. The Department notes that the underlying assumptions of the cost model presented by Motorola were reviewed by the Department specifically when analyzing the relevance of the individual cost elements of the model.

Hitachi Comment 6: Hitachi points out that the petitioner's suggestion to "lag" production costs to sales prices is not valid, because there is no statutory basis for doing so and there is no justification for artificially fixing costs at the initial stage of the production process.

DOC Response: The Department concluded that a quarterly lag between sales and cost of manufacturing was appropriate. By establishing this lag, the Department is not artificially fixing costs at the initial stage of production process but rather matching the cost incurred to the sales. Such an approach is justified by section 773(e)(1) of the Act, which provides that constructed value should be based on costs "at a time preceding the date of exportation of the merchandise under consideration which would ordinarily permit the production of that particular merchandise in the ordinary course of business."

Hitachi Comment 7: Hitachi argues that it used the appropriate sale dates in both markets when it reported a) the date of shipment as date of sale for U.S. sales and b) the date that purchase orders were entered into Hitachi's central computer as the date of sale for home market sales. With respect to the U.S. date of sale, Hitachi argues that, under U.S. law, a mere offer to purchase is not a contract;

a contract requires an acceptance as well. Therefore, it is not until a legally recognized acceptance is given that a price is "confirmed" between parties to a contract. Acceptances can come in several different forms, including actual performance in accordance with the terms of the offer, e.g., by shipment of goods in the case of a sales contract. Since Hitachi does not normally acknowledge purchase orders, its normal acceptance of an order occurs when the order is actually shipped. Thus, date of shipment appropriately defines Hitachi's date of sale for purposes of sales in the United States.

By contrast, Hitachi argues that, in Japan, in certain situations, an offer is automatically deemed accepted if it is not promptly rejected. Hitachi cited Article 509 of Japanese Commercial law on this point. Thus, Hitachi argues that it is appropriate to report Japanese sales by reference to the date the order was entered into the company's central computer, which is normally soon after the order is received, since this is a rational basis for determining when a particular price has been "confirmed."

DOC Response: In general, the contract type of analysis set forth by Hitachi would be relevant in determining when a "sale" occurs for purposes of the antidumping laws. Here, however, the Department has determined that, in this particular industry, and during the time period investigated, neither party to a purchase order intended it to be a "binding agreement" or treated it as such. This was true for both the U.S. and home-market transactions. The Department reached this conclusion based on the fact that during the time-period investigated, there were significant cancellations of 64K DRAMs orders by both parties, without any sanctions or penalties whatsoever, and frequent price revisions to reflect rapidly declining market prices. Such cancellations and revisions occurred even *after* shipment of the goods in question. Thus, the Department used date of shipment for home-market sales since that was the earliest point in the transaction at which any sort of binding commitment may be inferred. The Department determined that it would be inappropriate, in these circumstances, to use the last pre-shipment change entered into the computer as the basis for the date of sale since, as counsel for Mitsubishi notes, it is only with the benefit of hindsight that one could say that a particular pre-shipment computer entry bears any relationship to the transaction that the parties ultimately agree to. Similarly, the Department also used the date of shipment for U.S. sales. The basis for this determination is outlined in the DOC Response to Domestic Parties' Comment 13.

Hitachi Comment 8: Hitachi contends that Motorola's challenges to Hitachi's reported capital costs are misdirected because Hitachi's depreciation expenses were not understated, as Motorola suggested.

DOC Response: The Department agrees. However, since Hitachi's restatement of depreciation from a three- to five-year useful life was not correctly calculated, the Department used the "best information available." Hitachi restated depreciation by using only the remaining undepreciated assets and extending this balance, instead of recalculating the depreciation from the original date of purchase and using the full purchase price as of that date.

Hitachi Comment 9: Hitachi points out that Motorola's allegation that product-specific R&D was understated from "early write-offs" of general expenses is not true because Hitachi included historic product-specific R&D.

DOC Response: The Department agrees. The Department's methodology includes capturing historic R&D for the product under investigation and allocating such R&D to all 64K DRAMs sold.

Hitachi Comment 10: Hitachi claims that its method of allocation of certain general expenses on a sales revenue basis should not be changed because this is a long-standing practice of the Department. The Department should not use a corporate average based on the consolidated financial statements, as suggested by Motorola, to allocate these general expenses.

DOC Response: The Department used the basic methodology used by Hitachi, which included various allocation methods for different expenses and which generally followed its internal budgeting procedures for allocating general expenses. The Department adjusted general expense by including for the final determination certain amounts for general corporate expense which were excluded by Hitachi in its calculations.

Hitachi Comment 11: Hitachi's variable manufacturing costs were not understated.

DOC Response: We adjusted Hitachi's variable manufacturing costs to include certain costs, such as retirement pension expense, which were excluded by Hitachi in its submission.

Hitachi Comment 12: Hitachi claims that the Department's verification report, which states that the company did not provide historic production data for all three micron family products and for 64K DRAMs, or another allocation basis for product-line R&D, is correct. However, the Department's request for this information at the verification was untimely. Additionally, Hitachi argues that the Department should use as its basis the ratio of 64K DRAMs wafers used in the pilot run stage of development compared to total wafers expended for all products at that stage.

DOC Response: Hitachi's computation of product-line R&D did not present the information requested by the Department in its questionnaire and did not present data necessary for use in the Department's methodology. The data referred to in the verification report was requested during the initial stage of verification.

Hitachi Comment 13: Hitachi claims that the expenses deducted from its SG&A included business tax and an "extraordinary expense."

DOC Response: The Department considered the business tax similar to an income tax and therefore did not include this amount in SG&A. The Department reviewed the nature of the "extraordinary expense" and did not concur with the respondent's characterization and, therefore, included this amount in its SG&A calculations.

Hitachi Comment 14: The Department's verification report noted a difference between the amount of business tax reflected in the MOF report compared to the amount deducted from general expense in the response. Hitachi claims that this difference represents expenses involved in offshore consumer product manufacturing operations.

DOC Response: The Department was not provided with an explanation for this difference during verification. Therefore, the Department did not have a verified basis to account for this difference when making its final determination.

Mitsubishi Comment 1: The Department inappropriately relied on petitioner's data in assessing a "best information available" rate against Mitsubishi in the preliminary determination.

DOC Response: We disagree. In assessing a "best information available" rate against Mitsubishi at the preliminary determination, the Department acted in accordance with its regulations, 19 C.F.R. § 353.51(b).

Mitsubishi Comment 2: The Department erred in requiring Mitsubishi to include sales of model ANP–20 in its home market sales response because they were not made "in the usual wholesale quantities and in the ordinary course of trade for home consumption."

DOC Response: In the case of the Mitsubishi ANP–20, we found the product to be sold in the home market through the same channels of trade as other Mitsubishi 64K DRAM products

subject to the investigation and in the usual wholesale quantities. Since the ANP-20 is "such or similar" merchandise to that sold in the United States, we have included ANP-20 home market sales in our calculation of foreign market value.

Mitsubishi Comment 3: Where, as here, the purchase price of the commodity subject to an investigation is regularly subject to adjustment in light of market conditions, the Department should, as a general principle, determine the date of sale in light of the circumstances in the relevant market. While Mitsubishi argues that date of shipment is the appropriate date of sale in the U.S. market, it asserts that date of shipment may not be the appropriate basis in the Japanese context. Instead, it suggests that date of sale in the homemarket should be based on the order/confirmation date.

DOC Response: The Department has used date of shipment as the date of sale for both U.S. and Japanese sales. See DOC Responses to Hitachi's Comment 7, and Domestic Parties' Comment 13.

Mitsubishi Comment 4: All home market advertising expenses claimed by Mitsubishi qualify as direct selling expenses for which allowance should be made as a difference in circumstances of sale.

DOC Response: We agree. The Department verified the adjustment claimed by Mitsubishi for home market advertising expenses and found that the adjustment qualified as a direct selling expense since the advertising was aimed at end-users of 64K DRAM products sold by Mitsubishi.

Mitsubishi Comment 5: While the declining balance method of depreciation is used by Mitsubishi for its normal financial accounting, for purposes of this investigation, they claim that they should be allowed to use a straight-line method with a five-year estimated useful life. Mitsubishi argues that the declining balance method does not appropriately reflect the cost of the product under investigation.

DOC Response: We disagree. See the "Cost of Production" section of this notice for a description of the Department's methodology for determining depreciation.

Mitsubishi Comment 6: Mitsubishi's allocation of factory overhead on the basis of floor space utilization should be accepted, since it is the method used for its internal cost accounting.

DOC Response: The Department reviewed the charges included in the plant overhead. These charges included such items as the depreciation of the plant, maintenance, heating and lighting. The Department agrees that allocation by floor space of such charges, in this case, was a reasonable basis on which to attribute these costs to the products manufactured in the plant.

Mitsubishi Comment 7: Mitsubishi contends that while direct material costs and subcontractor costs are not associated with individual departmental cost centers, reconciliation of these costs was accomplished at verification through examination of detailed subledger accounts organized by vendor.

DOC Response: The Department performed alternative verification procedures which indicated that the costs reported in the response were reasonably stated for material costs, but that the subcontractor costs in the response did not reflect the company's records. The Department used the costs as reflected on Mitsubishi's records for the subcontractor cost.

Mitsubishi Comment 8: Mitsubishi argues that any attempt to recapture historic R&D is both impractical and in contravention of generally accepted accounting principles. They also note, however, that the use of current semiconductor related R&D would overstate R&D inasmuch as most of the R&D during the period of investigation was devoted to the development of one and four megabit DRAMs.

DOC Response: The Department's position is in accord with International Generally Accepted Accounting Standard #9 which provides that R&D associated with specific marketable products and production processes shall be capitalized and amortized over a reasonable basis.

The Department cannot attribute cost incurred for another product to the one under investigation and, additionally, must capture all costs necessary for the manufacturing of the product under investigation in its cost of production calculation.

Mitsubishi Comment 9: Mitsubishi argues that a royalty payment for technology acquired for the production of 64K DRAMs should be considered a "selling" expense, not a "cost of production" expense, since such costs are accrued on sales rather than on production quantities.

DOC Position: Since the technology acquired was necessary for production of 64K DRAMs, the Department included such costs in manufacturing. The method used for determining the amount paid under the contract is not the relevant consideration for determining its classification in the cost of production calculation.

NEC Comment 1: In objecting to the Department's use of constructed value, NEC aruges that the petition did not provide reliable data on Japanese pricing and production costs to justify the initiation of an investigation of cost of production and further, that the preliminary determination did not contain an indication that the Department had independently developed pricing and cost data to justify a cost of production investigation.

NEC notes that both the courts and the Department have repeatedly affirmed the principle that the antidumping law embodies a strong preference for use of actual home market sales data rather than constructed value and that the Department's regulations call for the use of actual sales data from third countries prior to the use of constructed value.

NEC argues that absent a finding that the conditions set forth in 19 CFR 353.7(a) were considered and satisfied with respect to NEC, the Department has no legal basis to use information other than actual home market sales data in its analysis.

DOC Response: Not only did the petition allege below-cost sales in the home market and provide substantial support for this allegation, but the Department's review, based on verified submissions of the respondents, has concluded that the petition was correct in its assertions. While the antidumping law does embody a strong preference for the use of actual home market sales data, it also directs that home market sales that are below cost of production may not be used to establish foreign market value where they: (1) Have been made over an extended period which permit recovery of all costs within a reasonable period of time in the normal course of trade. Section 773(b), and 19 CFR 353.7.

Consistent with our standard practice, we disregarded below-cost sales where they constituted more than 10 percent of total home market sales of such or similar merchandise over the six month period of investigation. We used above-cost home market sales for purposes of making our fair value comparisons, where they accounted for more than 10 percent of home market sales. Where less than 10 percent of the home market sales were above cost, we determined that such sales were insufficient to form an adequate basis for determination of foreign market value. In such situations, the Department used constructed value to determine foreign market value, in accordance with the Act, the regulations, and the legislative history (Section 773(b), 19 CFR 353.7 and S. Rep. No. 96-249, 96th Cong. 1st Sess. 95-96 (1979)).

NEC's Comment 2: NEC argues that the constructed value used by the Department for its preliminary determination included adjustments which were not appropriate and which should not be used for the final determination. These adjustments included, among others, the double counting of die costs and the use of general corporate averages for the interest and the general expenses.

DOC Position: For the preliminary determination, as explained in the Notice, the Department adjusted cost elements when it appeared such costs may not have been appropriately stated. For example, the Department notes that the total cost of manufacturing presented in the response did not appear to include the total cost of fabrication. The Department reasoned that if the fabrication were included, the cost of assembly would have been only 30 percent of the total costs. In view of the Department's knowledge of the production process, other facts presented in the response, and lacking an explanation in the response, the manufacturing costs presented did not appear to be reasonable. Accordingly, the Department adjusted the total per unit costs by the amount of the die. For other adjustments made by the Department, similar inconsistencies were present. For the final determination, the adjustments made by the Department are described under the "Cost of Production" section of this notice.

NEC Comment: Respondent argues that the Department erred in adjusting NEC's manufacturing costs by making additions for product-specific R&D because these R&D costs were included in the manufacturing costs submitted in the supplemental response. Further, they argue that the adjustment: (1) Ignored NEC's statement that no product-specific R&D costs were incurred during the period; and (2) is inconsistent with the Department's past approach of considering such expenses a part of the manufacturing costs only where R&D expenses can be "identified directly with the product under investigation or to the area in which the product is manufactured." (*Cell Site Transceivers from Japan* (Final), 49 FR 43080, 43083, Oct. 26, 1984).

DOC Response: The Department's questionnaire requested information on historic product-specific R&D. Neither NEC's original response, nor its supplemental response, provided verifiable information on this point. The Department's treatment of historic R&D in this case is consistent with prior determinations.

NEC Comment 4: NEC claims that interest expenses attributable to sales of 64K DRAMs were correctly reported.

DOC Response: Submitted interest expenses did not include an appropriate allocation of credit expenses attributable to the product under investigation. The Department added credit expenses related to the home market sales. The Department decreased the amount of corporate interest expenses attributed to the product to account for the proportional share related to the accounts receivable, so that the interest related to the home market credit expense was not double-counted.

Oki Comment 1: Oki claims that the depreciation reflected in its financial statements was a result of tax laws and should not be used for the Department's final determination.

DOC Response: The Department reviewed Oki's methods of accounting for depreciation used in the ordinary course of business. Like other companies, Oki's method reflected ordinary industry practices and followed the Department's methodology for determining depreciation. Therefore, the Department used this amount. See the "Cost of Production" section of this notice.

Oki Comment 2: Oki contends that the cost of production resulting from one of its plants which was recently put into operation should be adjusted for the costs related to start-up.

DOC Response: We agree. The Department adjusted the cost of production for only those costs presented by Oki which were directly related to the start-up operations of that plant.

Oki Comment 3: Oki argues that a credit for royalty income from licensing of 64K DRAM technology must be allowed against the cost of production.

DOC Response: The royalty income from the licensing of 64K DRAM technology was a result of the expenditures for the 64K DRAM research and development. The royalty income was not directly related to the production of 64K DRAMs during the period of investigation. Therefore, the Department allocated the product-specific research and development expenses for the period of investigation between the 64 K DRAMs produced by Oki and the royalty income.

Oki Comment 4: Oki states that historic semiconductor R&D cannot reasonably be allocated to specific products and should not be included in Oki's 64K DRAM cost of production.

DOC Response: The allocation of historic R&D that the Department requires is product-specific R&D for 64K DRAMs. The Department does not require allocation of historic product-line R&D for its calculation. It does, however, require an allocation of those product-line R&D expenses which are current. The Department included historic R&D for 64K DRAMs, based on the "best information available".

Oki Comment 5: Oki claims that the R&D expenses for 64K DRAMs were expensed when the company was selling 64K DRAMs at a profit between 1982–1984 and therefore should not be allocated to the period of investigation.

DOC Position: Historic costs necessary to manufacture the product under investigation cannot be disproportionately shifted and attributed to a period when the company was selling the product at a profit.

Oki Comment 6: Oki states that the percentage the Department included as "best information available" in the constructed value calculation for R&D in the preliminary determination is higher than the actual R&D costs under any reasonable method of computation.

DOC Response: Although the Department, in its questionnaire, requested the respondents to include both historic product-specific R&D and current product-line R&D in their calculations, Oki did not include such amounts. Therefore, the Department used "best information available" for its preliminary determination, and for this final determination. For the product-line R&D, the Department used data based on the experience of the Japanese semiconductor industry, which was obtained from public sources.

Oki Comment 7: The Department should not accept the domestic industry's argument that Oki's SG&A costs should be discarded because they are below the corporate average and claims the Department should not use this "average" as it did in its preliminary determination.

DOC Response: The Department reviewed Oki's general and administrative expenses as reported in their submission and used this amount, adjusted to a cost of sales allocation basis, for its final determination.

Oki Comment 8: Oki alleges that the domestic industry's proposals regarding the calculation of fixed costs (i.e., attributing a pro rata share of capital and R&D to 64K DRAMs on the basis of average industry expenditures during a given period) are: (1) Largely confused and (2) illegal, to the extent that they are clear.

DOC Response: The Department used the respondents' actual costs, when

VOL 51 ISS 82 AP 29 1986 UMI

verified and appropriately quantified and valued. It did not base its calculation for the respondent's cost of production on industry-wide statistics, except when such data may have been used as "best information available."

Oki Comment 9: Oki contends that the Department did not have a valid basis for questioning its claims for adjusting the yield variance which resulted when Oki reentered previously "rejected" devices into the production process during the month of March. Oki notes that the company did not maintain records which traced the retested devices back to "failure" at the initial test.

DOC Response: The Department questioned this claim because the amount of these reentered devices was a disproportionately large percentage of the total production during the relevant quarter. The Department notes that, accepting the fact these devices were reentered, it does not agree with Oki that the positive effects of the yield variance should have been recognized by the company during the month of March, since these devices were still incomplete and were still in the production process.

Oki Comment 10: Oki claims that the quantity of production differences cited by the Department at various points in the verification report are almost entirely the creation of the Department's inconsistent manner of handling the production quantity.

DOC Response: The Department's verification report notes various discrepancies in quantity throughout Oki's verification documents, submissions, and accounting records. For example, while the response listed untested devices and "stacked" devices as two die, a verification exhibit which summarized the response correctly did not include untested devices and counted "stacked" devices as two, but the original company records counted "stacked" devices as one die. The company did not explain its reason for the inconsistent manner in which it treated the production quantity throughout the investigation.

Oki Comment 11: Oki alleges, contrary to the verification report, that the verification exhibits related to the quantity of retest items of finished 64K DRAMs reconcile with one another. The company states that the difference between the retest items on these two exhibits could be reconciled by accounting for quantity of retest items of two unrelated products and the unfinished 64K DRAMs devices.

DOC Response: The Department, when attempting to reconcile the retest exhibits considered only 64K DRAMs quantities on these exhibits. One exhibit apparently includes unfinished pieces; however, the incomplete units were not specifically identified. Therefore, the Department's position remains unchanged regarding the reconciliation of these retest items.

Oki Comment 12: Oki claims, contrary to the verification report, that the production account, which measures quantity, and the production account which measures costs, include the same period of time.

DOC Response: When this question arose during verification, the verifiers requested and received documentation from the company officials concerning this difference in time period. From this documentation we were able to reconcile the period for the production quantities with the period for the cost. However, the results of this reconciliation had a *de minimis* impact on the per unit cost. Therefore, no adjustment was made to the cost.

Oki Comment 13: Oki points out that the verification report notes that material purchases were used instead of material consumed for a material variance and states that the difference resulting from this methodology is insignificant.

DOC Response: The Department used the results of this variance calculated with the materials consumed, not with the materials purchased.

Oki Comment 14: Oki objects to the Department raising its concern for an unresolved verification issue regarding Oki's determination that a variance was considered a favorable, not an unfavorable variance, when the actual labor hours exceeded standard hours during the period of investigation..

DOC Response: The Department raised its concern so that, prior to final determination, the respondent and petitioner could provide additional comments on this issue. Oki provided an explanation in its comments to the verification.

Oki Comment 15: Oki states that the verification report is "almost" correct regarding depreciation when it states that a "double-declining balance" method was used by the company.

DOC Response: In its verification report, the Department stated that Oki used the double-declining balance method for depreciation. This method would have resulted in an effective rate which is within one percent of the rate of depreciation actually used by the company in determining costs for its financial statement..

Oki Comment 16: Oki claims that there is an error in the Department's verification report concerning two semiconductor equipment studies provided by the company. Oki states that, contrary to the Department's characterization, one of the studies reflects a four-year average life of the assets in service, not the average useful life.

DOC Response: The company provided the studies during verification. However, one study was not fully translated. Therefore, in the Department's report it notes that apparently the one study represents a four-year useful life, but is not conclusive as to this fact.

Oki Comment 17: Oki points out that the verification report notes that R&D and SG&A was allocated based on sales and this is true. However, Oki claims that the sale basis can easily be converted to the cost of sales basis, if the Department does not accept the sales basis.

DOC Response: The Department converted the G&A expenses to a cost of sales basis.

Oki Comment 18: Oki concludes that the verification report is almost correct in stating all non-operating expenses and income were included in Oki's submission, and that the Department's major concern appears to be combining these amounts, not the individual items included in the amounts.

DOC Response: The Department was concerned with the individual items included in non-operating income, e.g., dividend income and royalty income, to determine if these items were related to the production of 64K DRAMs and whether they should be taken as an offset to the cost of production of 64K DRAMs. We concluded that such income as the dividend income and royalty income were not related to the production of 64K DRAMs and, therefore, these offsets were not reflected in the cost of production used for the final determination.

Oki Comment 19: Oki claims that the difference cited in the verification report concerning the material variances is in error because it did not consider the material specification change variance. Oki describes the material variance as composed of two parts: (1) Standard to actual cost variance; and (2) the original standard cost to the revised standard cost because of material specification change variance.

DOC Response: The Department recomputed the standard cost to actual cost variance which did not reconcile to Oki's standard cost to actual cost variance. The Department was not commenting on the material specific change variance, which has no bearing on the variance under review by the Department.

Oki Comment 20: Oki claims that its basis for allocation of indirect department expenses to 64K DRAMs is reasonable and its amortization of six-month variance to the months within that six months is also reasonable.

DOC Response: The Department, after review of the company's methods, determined that these allocations adequately reflected the cost which should be attributed to the 64K DRAMs.

Oki Comment 21: Oki argues that the Department incorrectly disregarded certain below cost home market sales, as they did not meet the requirement of being in substantial quantities over an extended period of time and not at prices permitting recovery of all costs in a reasonable time in the normal course of business.

DOC Response: See DOC response to NEC Comment 1.

Oki Comment 22: Oki argues that 200NS home market sales below the cost of production should not be excluded from price to price comparisons since they were "seconds" and obsolete and were sold at whatever price the market would bear. The fair value of such devices is the price at which they were sold in the home market. Respondent cites the *Southwest Florida Winter Vegetable Growers Association* v. *United States* 584 F. Supp. 10, 16 (CIT 1984) on this point.

DOC Response: Winter Vegetables is inapposite because it applied to sales of vegetables that had to be sold within a short period of time because they were perishable. 64K DRAMs are not perishable. There were substantial sales of 200NS DRAMs in both markets during the period at a wide range of prices. The Department sees no reason to depart in this instance from its normal methodology in treating sales alleged to be made at less than the cost of production. (See DOC Response to NEC Comment 1.)

Fujitsu Comment 1: Fujitsu, a manufacturer of 64K DRAMs in Japan which was not required to respond to the antidumping duty questionnaire, opposes the method the Department used in its preliminary determination to calculate the estimated dumping margin for "all other manufacturers" in this investigation. In the preliminary determination, the Department included in its weighted-average calculation, the dumping margin for Mitsubishi which was based on the petitioner's data as the "best information available." Fujitsu argues that section 776(b) of the Act restricts the use of "best information available" to a party which "refuses or is unable to produce information requested in a timely manner and in the form required, or otherwise significantly impedes an investigation" (*Atlantic Sugar, Ltd.* v. *United States*, 744 F. 2d 1556 (Fed. Cir. 1984)). Companies in the "all other manufacturer" category do not fall into this category since they were not asked by the Department to complete questionnaire responses. Second, Fujitsu argues that estimated margins must be based on the best and most accurate information available to the Department. The data contained in Micron Technology's petition is not an accurate estimate as demonstrated by the fact that the preliminary margins for the companies which responded to the questionnaire showed the petition data to be substantially excessive. Third, Fujitsu argues that where there is adequate actual data on which to compute weighted-average margins, the Department should not include "punitive" rates in its calculation.

DOC Response: It has consistently been the practice of the Department that in an affirmative determination, producers/exporters for whom a separate weighted-average dumping margin has not been calculated will fall within the "all other manufacturers" category. The "all other manufacturers" dumping margin is the weighted-average margin of the companies investigated for whom margins were found to exist.

Although at the preliminary determination, a company investigated did not provide an adequate response to our questionnaire, section 776(b) of the Act provides a basis for making a sales at less than fair value determination through the use of the best information available. Therefore, that result, together with the other margins of fair value determined in accordance with the Act's procedures, was appropriately included in the calculation of the overall weighted-average margin for purposes of establishing the "all other" rate.

We note, however, that since we have not used a "best information available" rate for any of the respondents for the purposes of the final determination, the weighted-average margin does not include such a rate.

Fujitsu Comment 2: There is no statutory basis for the Department to use the "fabricated data" proposed by the domestic parties in place of documented and verified data submitted by respondents in response to Department questionnaires.

DOC Response: The Department uses data supplied by a company unless it cannot verify such data or it appears that such information is not appropriately quantified or valued. Only then does the Department resort to "best information available" which may include such things as published sources.

Fujitsu Comment 3: There is no statutory authority in support of petitioners' contention that R&D and capital expenses incurred by respondents prior to the period of investigation must be included as costs of production during the period of investigation.

DOC Response: We disagree. The Department notes that the constructed value provisions of the Act (section 773(e)) specify that the costs shall be those incurred "in producing such or similar merchandise, at a time preceding the date of exportation." This definition does not preclude the inclusion of costs, like those for equipment and R&D, which were incurred prior to exportation, but which are allocated to and are necessary for the manufacture of the product under investigation.

Domestic Parties' Comments

The comments addressed in the following section include not only those of the petitioner, Micron Technology Inc., but also other domestic interested parties to this investigation, namely Motorola, Inc. and Intel Corporation.

Domestic Parties' Comments 1: The Department must avoid distortions in price due to related company transactions.

DOC Response: In accordance with 19 CFR 353.22, the Department disregarded home market sales to related parties.

Domestic Parties' Comment 2: Domestic Parties express concern that respondents have distorted their data by switching to straight-line methods of varying periods for reporting expenses such as depreciation instead of methods they normally used for financial reporting.

DOC Response: We agree and have used the method of depreciation as described under the "Cost of Production" section of this notice.

Domestic Parties' Comment 3: Domestic Parties claim that the R&D methodologies and allocation methods utilized by respondents distort their costs.

DOC Response: The Department reviewed the respondents' R&D methodologies and allocation methods. When these methods and allocation bases did not properly attribute the appropriate amount of R&D to the product, the Department made appropriate adjustments. See the "Cost of Production" section of this notice.

Domestic Parties' Comment 4: Domestic Parties assert that, because production costs were rapidly decreasing and inventories were being built-up, production costs should be lagged to ensure that sale prices for 64K

VOL 51 ISS 82 AP 29 1986 UMI

DRAMs are compared with the appropriate costs for producing the units sold. Domestic Parties also argue that because wafer sort generally occurs at least two months prior to sale, there should be at least a two-month lag when comparing constructed value with the sale price. If inventory levels have increased over the period of investigation, the lag between wafer sort and actual sale will be longer.

DOC Response: The Department agrees that there should be a lag time between sales data and cost data. For a description of the Department's method used to match sales and costs, see the "Cost of Production" section of this notice. See also DOC Response to Hitachi's Comment 6.

Domestic Parties' Comment 5: Domestic Parties' claim that in a number of specific cases, SG&A was understated as a result of respondents' allocation methodology.

DOC Response: The Department used verified home market selling expenses. When it appeared SG&A was not properly stated, the Department made appropriate adjustments. See the "Cost of Production" section of this notice.

Domestic Parties' Comment 6: Domestic Parties' state that the department's verification findings call into doubt the respondents' reported yield data.

DOC Response: The Department disagrees. The Department considers the submitted yield adequately tested.

Domestic Parties' Comment 7: Domestic parties argue that, since Japanese dumping increased in severity toward the end of the period of investigation and thereafter, the dumping margins for the second and third quarters of 1985 would be a more appropriate indicator of the extent to which sales at less than fair value have been and are likely to be taking place. Thus, they argue the Department should exclude the first quarter of 1985 from its investigation period and either restrict its investigation to the second quarter of 1985, or include U.S. sales from July to September 1985 to calculate dumpings margins.

DOC Response: The petition in this investigation was filed on June 24, 1985. In accordance with 19 CFR 353.38(a), the Department instituted a period of investigation extending from 150 days prior to, and 30 days after, the first day of the month during which the petition was received—that is, January 1 through June 30, 1985. If the petitioner or other interested parties objected to the period chosen, they should have registered that objection at the commencement of the investigation, not at its conclusion.

Domestic Parties' Comment 8: Motorola claims that its cost model based on published data reflects the cost of 64k DRAMs during the period of investigation and that the low costs reported by the respondents are a result of inappropriate allocation methods, excluded costs, and other accounting practice maneuvers.

DOC Response: The Department based its final determination on the verified actual cost of each respondent as reflected on its records when such information included all necessary costs, appropriately quantified and valued. When such information was not available or not appropriately valued, the Department used "best information available," which could include industry statistics.

Domestic Parties' Comment 9: Domestic Parties point out that R&D expenditures reported by the respondents are far below the levels reported by MITI to be consistent R&D spending levels for intergrated circuits. They also note that the R&D reported is less than the R&D reported for the Japanese semiconductor industry as set forth in Published sources. Thus, they argue that the Department should substitute the levels reported in such published sources for respondents' costs.

DOC Response: The Department reviewed the respondents' R&D calculation. When such data could not be verified, was incomplete, not appropriately allocated, or could not be properly identified with the 64K DRAMs, the Department used as best information available MITI figures on R&D for Japanese semiconductor manufacturers for the first six months of 1984 (13 percent of sales), as reported by Hambrecht & Quest Incorporated.

Domestic Parties' Comment 10: Domestic Parties argue that since the respondents' capital costs in their submissions are lower than the consistent historic costs for IC's of Japanese producers, as established in published sources, the Department should use the historic costs obtained from published sources. Domestic Parties further contend that the reason the reported capital and R&D costs were substantially lower than the amounts published was because such costs were expensed by various accounting principles, to the period of time prior to the investigation.

DOC Response: The Department used the respondents's reported depreciation expenses except as noted in the "Cost of Production" section of this notice. The Department's methodology for attributing R&D costs and capital to the products sold during the period of investigation did not disproportionally allocate R&D and capital costs to the period prior to the investigation. For R&D costs, the Department has captured a proportional share of historic costs per unit.

Depreciation expense is based on equipment which is continually being modernized and replaced. At any one time the depreciation expense will reflect average depreciation for a pool of equipment purchased at various times.

Domestic Parties' Comment 11: Domestic Parties allege that because of lower production of 64K DRAMs, the variable costs should have remained the same in 1984 even if yields increased.

DOC Response: Production volume would not have a significant effect on variable costs. Such costs are more directly influenced by such factors as yields and price of inputs. See the "Cost of Production" section of this notice for details as to how we treated respondents' costs.

Domestic Parties' Comment 12: Domestic Parties allege that the general and administrative expenses reported by the companies are understated because of the diversion of certain costs to other products and the allocation of the remaining costs over the total sales of the company.

DOC Response: The Department reviewed each respondent's methodology and analyzed the costs included. When general expenses did not include some appropriate costs, adjustments were made. See the "Cost of Production" section of this notice.

Domestic Parties' Comment 13: Domestic Parties argue that the Department should use the sales agreement date as the date of sale for U.S. sales, and should not include in the period residual shipments from sales agreements made earlier. In the case of original equipment manufacturers (OEM) contracts, the date of the sale should be the date that the basic sales agreement was made with the OEM. While a subsequent price adjustment for sales to an OEM or distributor certainly affects the net sales price, it does not move the sales date to that date.

In the case of distributor sales, Motorola notes that the question as to what is the appropriate date of sale is somewhat more complex. Where the price is to be determined only after the units arrive, the date at which the price is initially set would probably be the appropriate date of sale. Thus, where the contract states that the price will be the lowest price while the units are in distributor inventory, the initial price for each of those units is established when they first enter inventory, i.e., on the date of shipment.

The use of shipment date rather than order date removes from this investigation many low priced "sales" at the end of the period of investigation (POI) and brings into the period higher priced pre-POI "sales."

DOC Response: Department practice is to recognize a sale only when all key elements (i.e., binding commmitment, irrevocable price, quantities to be purchased) are firm. As will be shown, in this case, during the time period investigated, there is no alternative but to recognize the shipment date as the date of sale.

As noted, 64K DRAMs are sold to two basic types of customers—distributors and OEMs. Sales to distributors constitute approximately fifteen to thirty percent of the U.S. sales. As Domestic Parties note, the standard U.S. distribution agreement contains some sort of "price protection" provision. Under such a provision, if the "book" price for any product decreases, the distributor will be charged the reduced price on any products shipped thereafter. In addition, the distributor may apply for credit for the reduction in price on such products previously purchased by the distributor, and either in transit or part of the distributor's inventory.

Most distributor agreements also include a "ship and debit" clause, also known as a "ship out of stock and debit" (SOSAD) clause. This provides that a producer may reduce the price of products sold to a distributor where the distributor has negotiated a price with its customer which does not allow the distributor to meet a guaranteed margin on the resale. SOSAD authorizes the distributor to obtain a debit from the producer for the difference.

Under these distributor agreements, the earliest date on which a price can be determined is the date of shipment; thus, this is the date we have chosen as the date of "sale."

We have reached a similar conclusion with respect to the OEM contracts. We agree, in principle, with Domestic Parties' general assertion that where purchase orders are issued pursuant to a binding long-term contract, the date of sale should be the date of the long-term contract, rather than the date of the purchase orders. Here, however, it did not appear that purchase orders were issued in accordance with the terms of any long-term contract. Indeed, even where a producer had a long-term contract on the books with a particular customer, it appeared that those purchase orders that were issued during the period of investigation were not issued in conformance with the terms of the long-term contract, but rather reflected new pricing arrangements.

Thus, the only question before us was whether it would be appropriate to use the purchase order date as the date of sale. There are at least two bases for concluding that, given the characteristics of this particular industry and the market conditions as they existed during the period of investigation, that it would not.

First, many of the purchase orders expressly provide, in essence, that acceptance of the order could be made either by means of express acknowledgment or by shipment of conforming goods. Since written acknowledgments or other confirmations of purchase orders were generally not received, the date of shipment constituted acceptance of the conforming goods. See UCC 2–206.

Second, it appears that neither party to a purchase order treated that purchase order as a binding agreement. During the time period investigated, there were significant cancellations of 64K DRAM orders by both parties, without any sanctions or penalties whatsoever, and frequent price revisions to reflect rapidly declining prices. Under these conditions, neither price nor quantity were firm until the order was shipped and, in fact, post-shipment price revisions were not uncommon. Thus, the date of shipment is the earliest point in the transaction at which any sort of binding commitment may be inferred.

Contrary to the Domestic Parties' assertions, the potential for post-shipment cancelations or price adjustments does not make this situation analogous to one where rebates are granted after a sale. While rebates may not be "earned" until after a sale has occurred, the conditions and amounts of rebates are established at the time of sale. (See Department's definition of "rebates" provided in its questionnaire in this investigation.) Here, however, these post-shipment adjustments are not based on any specified conditions or formulae; they are simply renegotiations of price and quantity. Thus, the Department's use of date of shipment as date of sale in this case is distinguishable from its usual methodology of using date of contract as date of sale where rebates are involved.

It should also be noted, that the Department has taken the position here that there can be no new dates of sale after shipment and any subsequent price modifications must be reported as one of the following, as appropriate: (1) Rebates; (2) discounts; (3) price protection adjustments; or (4) ship and debit adjustments. By taking this position the Department has ensured that respondents may not be in a position to move their sales outside of the period of investigation by the simple expedient of granting a further price adjustment.

Finally, the Department notes that Motorola's argument that the Department's decision on the "sale" date will remove certain low priced "sales" from the end of the period of investigation and add certain higher priced "sales" at the beginning of the investigation is misplaced. The Act directs the Department to look at U.S. sales by reference to "agreements" to purchase or sell, regardless of the impact on the investigation. (Section 772 (b) and (c).)

Domestic Parties' Comment 14: In considering price adjustments, the Department should pay particular attention to ensure that all relevant price adjustments were reported, especially price adjustments occurring subsequent to the period of investigation, and that these adjustments were properly allocated to the sales to which they apply.

DOC Response: In order to ensure the completeness and accuracy of post-shipment price adjustments, the Department checked price issued well after the period of investigation for each of the companies. In the event the Department found credits outside the period which were not reported, these credits were quantified and allocated to particular sales by the Department for our final determination. The Department found that the allocation methods used by NEC AND Oki reasonably tied credits to specific sales. Mitsubishi's methodology of allocating the adjustments over all units sold, instead of attributing them to particular sales, was not accepted. In the case of Mitsubishi, the Department developed alternative methods for allocating price protection and ship and debit adjustments to specific sales. Hitachi allocated ship and debit credits attributed to each distributor. Because Hitachi had only a small amount of ship and debit credits, we accepted Hitachi's allocation method as "best information available" in this instance.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, we are directing the United States Customs Service to continue to

VOL 51 ISS 82 AP 29 1986

suspend liquidation of all entries of 64K DRAMs from Japan that are entered, or withdrawn from warehouse, for consumption, on or after December 11, 1985. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Margin percentage
NEC Corporation	22.76
Hitachi Ltd.	11.87
Oki Electric Industry Co. Ltd.	35.34
Mitsubishi Electric Corporation	13.43
All other manufacturers/producers/exporters	20.75

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information either publicly or under an administrative protective order without the consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 45 days after we make our final determination. If the ITC determines that material injury or threat of material injury does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, we will issue an antidumping duty order on 64K DRAMs from Japan entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

April 23, 1986.

Paul Freedenberg,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-DS-M

[C-489-601]

Initiation of Countervailing Duty Investigation: Mirrors in Stock Sheet and Lehr End Sizes From Turkey

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the United States Department of Commerce, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters of mirrors in stock sheet and lehr end sizes (mirrors) from Turkey as described in the "Scope of Investigation" section of this notice, receive benefits which constitute subsidies within the meaning of the countervailing duty law. We are notifying the United States International Trade Commission (ITC) of this action, so that it may determine whether imports of the subject merchandise from Turkey materially injure, or threaten material injury to, a United States industry. The ITC will make its preliminary determination on or before May 16, 1986. If our investigation proceeds normally, we will make our preliminary determination on or before June 25, 1986.

EFFECTIVE DATE: April 29, 1986

FOR FURTHER INFORMATION CONTACT: Mary Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2830.

SUPPLEMENTARY INFORMATION:

The Petition

On April 1, 1986, we received a petition in proper form filed by the National Association of Mirror Manufacturers. The petition was filed on behalf of the United States industry producing mirrors. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleges that manufacturers, producers, or exporters in Turkey of the subject merchandise receive subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act).

Since Turkey is a "country under the Agreement" within the meaning of section 701(b) of the Act, Title VII of the Act applies to this investigation and the ITC is required to determine whether imports of the subject merchandise from Turkey materially injure, or threaten material injury to, a U.S. industry.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of a countervailing duty investigation, and, further, whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on mirrors from Turkey and have found that it meets the requirements of section 702(b) of the Act. Therefore, in accordance with section 702(b) of the Act we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Turkey of mirrors receive benefits which constitute subsidies. If our investigation proceeds normally, we will make our preliminary determination on or before June 25, 1986.

Scope of Investigation

The products covered by this investigation are unfinished glass mirrors 15 square feet or more in reflecting area, which have not been subjected to any finishing operation such as beveling, etching, edging, or framing, classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA) under item 544.5400, and made of any of the glass described in TSUS items 544.11 through 544.41.

Allegations of Subsidies

The petition alleges that manufacturers, producers, or exporters in Turkey of mirrors receive benefits under the following programs which constitute subsidies. We are initiating an investigation on the following allegations:

- Export Tax Rebate and Supplemental Tax Rebate
- Resource Utilization Support Fund (RUSF)
- Export Revenue Tax Deduction
- Foreign Exchange Allocation and/or Duty Free Imports
- General Incentives Program (GIP)
  - —Interest Rebates
  - —Income and Corporation Tax Allowances
  - —Customs Duty Exemption on Imports of Capital Equipment

Notification ITC

Section 702(d) of the Act requires us to notify the ITC of this action and to provide it with the information we used to arrive at this determination. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential

information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determination by ITC

The ITC will determine by May 16, 1986, whether there is a reasonable indication that imports of mirrors from Turkey materially injure, or threaten material injury to, a United States industry. If its determination is negative, this investigation will terminate; otherwise it will proceed according to the statutory procedures.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 21, 1986.

[FR Doc. 86-9506 Filed 4-28-86; 8:45 am]

BILLING CODE 3510-DS-M

[Case No. OEE-1-86]

Order Temporarily Denying Export Privileges

In the matter of: La Physique Applique Industrie, 5 Rue de Pacalaire, 38170 Seyssinet-Pariset, France, and Les Accessoires Scientifiques, Varigney, 70800 Conflans-Sur-Lanterne, France, Respondents.

The Office of Export Enforcement, International Trade Administration, United States Department of Commerce (Department), pursuant to the provisions of § 388.19 of the Export Administration Regulations, 15 CFR Parts 368-399 (1985) (the Regulations),[1] issued pursuant to the Export Administration Act of 1979, 50 U.S.C. app. §§ 2401-2420 (1982), as amended by the Export Administration Amendments Act of 1985, Pub. L. 99-64, 99 Stat. 120 (July 12, 1985) (the Act), has asked the Deputy Assistant Secretary for Export Enforcement to issue an order temporarily denying all United States export privileges to La Physique Applique Industrie of Seyssinet-Pariset, France, and Les Accessoires Scientifiques of Conflans-Sur-Lanterne, France (hereinafter collectively referred to as respondents).

The Department states that, as a result of an ongoing investigation, it has reason to believe that respondents have (1) conspired and acted in concert to violate the Act and the Regulations; (2) indirectly caused the filing of false and misleading information with the Department for the purpose of effecting exports from the United States to France; and (3) attempted to reexport U.S.-origin equipment, including U.S.-origin semiconductor manufacturing equipment, from France to the Union of Soviet Socialist Republics (U.S.S.R.) without authorization from the Department. The Department further states that it has reason to believe that respondents are continuing in their efforts to obtain U.S.-origin goods. If the respondents are successful in their efforts, the Department states that there is reason to believe respondents would attempt to reexport the U.S.-origin goods to the U.S.S.R. The Department states that its investigation gives it reason to believe that the violations under investigation were deliberate, covert and likely to occur again. The Department submits that a temporary denial order naming respondents is necessary in order to give notice to companies in the United States and abroad to cease dealing with respondents in goods and technical data subject to the Act and the Regulations in order to reduce the likelihood that respondents will continue to engage in activities which are in violation of the Act and the Regulations.

Based upon the showing made by the Department, I find that an order temporarily denying all United States export privileges to respondents is necessary in the public interest to prevent an imminent violation of the Act and the Regulations. This order is issued on an *ex parte* basis without a hearing based on the Department's showing that expedited action is required.

Accordingly, it is hereby

Ordered

I. All outstanding validated export licenses in which any respondent appears or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation.

II. The respondents, their successors or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported or be exported from the United States in whole or in part, or that are otherwise subject to the Regulations. Without limiting the generality of the foregoing, participation, either in the United States or abroad, shall include participation, directly or indirectly, in any manner or capacity: (a) As a party or as a representative of a party to any export license application submitted to the Department, (b) in preparing or filing with the Department any export license application or reexport authorization, or any document to be submitted therewith, (c) in obtaining or using any validated or general export license or other export control document, (d) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported, and (e) in financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial may be made applicable to any person, firm, corporation, or business organization with which any respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Licensing shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any respondent or any related party, or whereby any respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any respondent or any related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. In accordance with the provisions of Section 388.19(e) of the Regulations,

[1] Parts 387 and 388 of the Regulations were recently amended and republished. *See* 50 FR 53130 (December 30, 1985).

VOL 51 ISS 82 AP 29 1986 UMI

any respondent may, at any time, appeal this temporary denial order by filing with the Office of Administrative Law Judges, U.S. Department of Commerce, Room H-6716, 14th Street and Constitution Avenue NW., Washington, D.C. 20230, a full written statement in support of the appeal.

VI. This order is effective immediately and shall remain in effect for 60 days.

VII. In accordance with the provisions of 388.16(d) of the Regulations, the Department may seek renewal of this temporary denial order by filing a written request not later than 20 days before the expiration date. Any respondent may oppose any request to renew this temporary denial order by filing a written submission with the Deputy Assistant Secretary for Export Enforcement, which must be received not later than seven days before the expiration date of this order.

A copy of this order and of Parts 387 and 388 of the Regulations shall be served upon the respondents.

Dated: April 23, 1986.

Theodore W. Wu,

Deputy Assistant Secretary for Export Enforcement.

[FR Doc. 86-9525 Filed 4-28-86; 8:45 am]

BILLING CODE 3510-25-M

Computer Systems Technical Advisory Committee; Partially Closed Meeting

A meeting of the Computer Systems Technical Advisory Committee will be held May 21 and 22, 1986, 9:30 a.m. to 5:00 p.m. in the Herbert C. Hoover Building, 14th Street and Constitution Avenue, NW., Washington, D.C. The meeting on May 21 will be held in Room 3407, and in Room 6029 on May 22. The Committee advises the Office of Technology and Policy Analysis with respect to technical questions that affect the level of export controls applicable to computer systems or technology.

Agenda:

Open Session:

1. Opening Remarks by the Chairman.
2. Presentation of papers or comments by the public on proposed equipment decontrol and discussions on problems experienced in obtaining export licenses.
3. Reinstatement of Licensing Procedures and Regulations, Hardware, and Software Subcommittees.

Executive Session:

4. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic critera related thereto.

The General Session of the meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1986, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Telephone: 202/377-4217. For further information or copies of the minutes, contact Margaret A. Cornejo, 202/377-5535.

Dated: April 24, 1986.

Margaret Cornejo,

Acting Director, Technical Support Staff, Office of Technology & Policy Analysis.

COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

Conflict of Interests

AGENCY: Commission on the Bicentennial of the United States Constitution.

ACTION: Notice of rule adoption.

SUMMARY: This Notice announces the applicability of regulations under Part 735, 5 CFR, Employee Responsibilities and Conduct, to the employees and special Government employees of the Commission on the Bicentennial of the United States Constitution. Because of its small size and temporary nature, the Commission obtained approval for this adoption of existing regulations from the OPM and from its Office of Government Ethics, in accordance with Sec. 735.104 (d) and (f), 5 CFR.

Subject

Adoption of Part 735, 5 CFR.

The Commission on the Bicentennial of the United States Constitution does hereby adopt for its employees and special Government employees Part 735 of the regulations of the Office of Personnel Management, published at Title 5, CFR, Administrative Personnel, Revised as of January 1, 1984. Part 735, 5 CFR, covers Employee Responsibilities and Conduct. Adoption of these regulations is done in accordance with authority granted to the Commission under Pub. L. 98-101, 97 Stat. 719, and Sec. 735.104 (d) and (f), 5 CFR, effective upon publication of this Notice.

Dated: April 24, 1986.

Mark W. Cannon,

Staff Director.

BILLING CODE 6340-01-M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Federal Acquisition Regulation (FAR); Information Collection Activities Under OMB Review

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve a new collection.

ADDRESS: Send comments to Franklin S. Reeder, FAR Desk Officer, Room 3235, NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Greene, Defense, Acquisition Regulatory Council (202-697-7268) or Mr. Frank Van Lierde, Civilian Agency Acquisition Council (202-523-3781).

SUPPLEMENTARY INFORMATION:

a. *Purpose:*

1. This request covers the collection of information to be used in the certification of commercial pricing. The proposal requires potential contractors under certain Federal contracts to certify that the prices offered for items of supply sold to the public are no higher than the lowest agreed to sales price with any other customer, or justify charging the Government more than the lowest price charged other customers for the same items of supply. This information is required by Sec. 204 of Pu L. 98-577 "Small Business and Federal Procurement Competition Enhancement Act of 1984", and Sec. 1216 of Pu L. 98-525 "Defense Procurement Reform Act of 1984."

Annual reporting burden: This is estimated as follows: Respondents, 6,000; responses 60,000; and reporting and recordkeeping hours, 1,200,000.

c. *Additional data:* An approval request for this information collection was submitted to OMB on June 25, 1985, and on November 8, 1985. Neither submission was approved. A third request for approval was submitted on April 16, 1986.

Obtaining Copy of Proposal

Requesters may obtain a copy of the latest proposal from the FAR Secretariat (VRS), Room 4041, GS Building, Washington, DC 20405.

Dated: April 24, 1986.

Margaret A. Willis,

FAR Secretariat.

Army Department

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the committee: Army Science Board (ASB).

Dates of meeting: Thursday & Friday, 15-16 May 1986.

Times of meeting: 0830-1600 hours.

Places: US Army Air Defense Artillery Center, Ft. Bliss, TX.

Agenda: The Army Science Board AHSG on MICOM Lab Effectiveness Review will visit the US Army Air Defense Artillery Center for the purpose of interacting with representatives of the TRADOC schools to informally discuss their working relationship with the MICOM Research, Development and Engineering Center. The panel will also devote a significant amount of time in executive session drafting portions of the report of the effectiveness review. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039 or 695-7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Proposed Subsequent Arrangement; EURATOM

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above-mentioned agreement involves approval for the return of four kilograms of irradiated research reactor fuel of United States origin from the FRG reactor in Geesthacht, the Federal Republic of Germany for reprocessing and storage in Department of Energy facilities. The return of highly enriched uranium to the United States is consistent with United States nonproliferation policy in that it serves to reduce the amount of highly enriched uranium abroad.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: April 24, 1986.

George J. Bradley, Jr.,

Acting Assistant Secretary for International Affairs and Energy Emergencies

[FR Doc. 86-9575 Filed 4-28-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, Economic and Environmental Impacts Task Group; Meeting

Notice is hereby given that the Economic and Environmental Impacts Task Group will meet in May 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Economic and Environmental Impacts Task Group will evaluate the impact of the 1970's energy crises on the U.S. economics—economic growth, employment, inflation, oil and gas industry cash flow, capital investment, international trade, the financial markets (U.S. and international), real interest rates, etc. This Task Group will also analyze the potential future economic impact of the factors on issues identified by the other Task Groups.

The Economic and Environmental Impacts Task Group will hold its first meeting on Tuesday, May 13, 1986, starting at 9:00 a.m., in the Main Conference Room of the Conoco Headquarters, 600 North Dairy Ashford Road, Houston, Texas.

The tentative agenda for the Economic and Environmental Impacts Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss the scope of the overall study.
3. Discuss the study assignment of the Task Group.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Economic and Environmental Impacts Task Group is empowered to conduct the meeting in a fashion that will, in his judgment,

VOL 51 ISS 82 AP 29 1986 UMI

facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Economic and Environmental Impacts Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 23, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

National Petroleum Council, Worldwide Refining Trends Task Group; Meeting

Notice is hereby given that the Worldwide Refining Trends Task Group will meet in May 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Worldwide Refining Trends Task Group will be evaluating trends of the refining industry worldwide. Its analysis and findings will be based on information and data to be gathered by the various task groups.

The Worldwide Refining Trends Task Group will hold its eighth meeting on Thursday, May 8, 1986, starting at 9:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street NW., Washington, DC.

The tentative agenda for the Worldwide Refining Trends Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review and discuss the draft report of the Worldwide Refining Trends Task Group.
3. Review and discuss the priliminary conclusions of the Data Integration Working Group.
4. Discussion any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Worldwide Refining Trends Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Worldwide Refining Trends Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 23, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-9514 Filed 4-28-86; 8:45 am]

BILLING CODE 6450-01-M

Office of Assistant Secretary for International Affairs and Energy Emergencies

Atomic Energy Agreements; Proposed Subsequent Arrangements Between Japan and the European Atomic Energy Community

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of proposed "subsequent arrangements" under the Agreement for Cooperation between the Government of the United States of America and the Government of Japan concerning Civil Uses of Atomic Energy, as amended, and the Additional Agreement for Cooperation between the Government of the United States of America and the European Atomic Energy Community (EURATOM) concerning Peaceful Uses of Atomic Energy, as amended.

These subsequent arrangements would give approval, which must be obtained under the above-mentioned agreements, for the transfer of special nuclear material of United States origin from Japan to France or to the United Kingdom for the purpose of reprocessing.

The proposed transfers are as follows:

(1) 672 irradiated fuel bundles containing 122,430 kilograms of uranium, enriched to 1.05 percent in U-235, and 686 kilograms of plutonium from the Fukushima Units 1 and 2 of the Tokyo Electric Power Co., Inc., to France;

(2) 72 irradiated fuel assemblies containing 28,087 kilograms of uranium, enriched to 1.30 percent in U-235, and 284 kilograms of plutonium from Genkai Units 1 and 2 of the Kyushu Electric Power Co., Inc., to France;

(3) 170 irradiated fuel bundles containing 34,000 kilograms of uranium, enriched to 1.18 percent in U-235, and 300 kilograms of plutonium from Tokai No. 2 Power Station of the Japan Atomic Power Co., to France;

(4) 68 irradiated fuel assemblies containing 12,145 kilograms of uranium, enriched to 0.98 percent in U-235, and 106 kilograms of plutonium from the Shimane Power Station of the Chugoku Electric Power Co., Inc., to France;

(5) 210 irradiated fuel bundles containing 38,577 kilograms of uranium, enriched to 1.47 percent in U-235, and 357 kilograms of plutonium from the Hamaoka Power Station of the Chubu Electric Power Co,, Inc., to the United Kingdom;

(6) 84 irradiated fuel assemblies containing 15,628 kilograms of uranium, enriched to 0.99 percent in U-235, and 126 kilograms of plutonium from the Shimane Unit 1 of the Chugoku Electric Power Co., Inc., to the United Kingdom; and

(7) 210 irradiated fuel assemblies containing 93,100 kilograms of uranium, enriched to 1.16 percent in U-235, and 780 kilograms of plutonium from the Mihama Units 1, 2, and 3, Takahama Units 1 and 2, and Ohi Units 1 and 2 of the Kansai Electric Power Co., Inc., to the United Kingdom.

The foregoing proposed transfers are designated as RTD/EU(JA)-84, 85, 86, 87, 88, 89, and 90 respectively.

The Department of Energy has received a letter of assurance from the Government of Japan that the recovered uranium and plutonium will not be transferred from the reprocessing sites, nor put to any use, without the prior approval of the United States Government.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the approval of these subsequent arrangements will not be inimical to the common defense and security.

These subsequent arrangements will take effect no sooner than fifteen (15) days after the date of publication of this notice, and after fifteen (15) days of continuous session of the Congress, beginning the day after the date on which the reports required by section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) are submitted to the Committee on Foreign Relations of the House of Representatives and the Committee on Foreign Relations of the Senate. The two time periods referred to above shall run concurrently.

For the Department of Energy.

Dated: April 23, 1986.

George J. Bradley, Jr.,

Acting Assistant Secretary for International Affairs and Energy Emergencies.

[FR Doc. 86-9515 Filed 4-28-86; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

Final Consent Order With Crown Central Petroleum Corp.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Final Action on Proposed Consent Order.

SUMMARY: The Administrator of the Economic Regulatory Administration (ERA) has determined that a proposed consent order between the Department of Energy (DOE) and Crown Central Petroleum Corporation (Crown) shall be made final as proposed. The consent order resolves, with certain exceptions, matters relating to Crown's compliance with the federal price and allocation regulations for the period January 1, 1973 to January 28, 1981. Crown will pay to the DOE $8.3 million, plus interest from the date the proposed consent order was executed by DOE. Persons claiming to have been harmed by Crown's alleged overcharges will be able to present their claims for refunds in an administrative claims proceeding before the Office of Hearings and Appeals (OHA). The decision to make the Crown consent order final was made after a full review of written comments from the public.

FOR FURTHER INFORMATION CONTACT: Emily E. Sommers, Economic Regulatory Administration, 1000 Independence Avenue, SW., Washington, DC 20585. (202) 252-6727.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Comments Received
III. Analysis of Comments
IV. Decision

I. Introduction

On March 12, 1986, ERA issued a notice announcing a proposed consent order between DOE and Crown which, with certain exceptions, would resolve matters relating to Crown's compliance with federal petroleum price and allocation regulations for the period January 1, 1973 to January 28, 1981. (51 FR 8532, March 12, 1986). The proposed order, which requires Crown to pay $8.3 million,[1] is for the settlement of Crown's potential liability for $10.6 million in alleged overcharges plus attributable interest. The March 12 notice provided in detail the basis for ERA's preliminary view that the settlement was favorable to the government and in the public interest. The notice solicited written comments from the public relating to the adequacy of the terms and conditions of the settlement and whether the settlement should be made final. The notice also announced a public hearing for the purpose of receiving oral presentations on the settlement. That hearing was held on April 16, 1986.

II. Comments Received

ERA received four written comments. One request to make an oral presentation was received but was withdrawn on April 17. The April 16, 1986 hearing was convened but no oral presentations were made. All written comments were considered in making the decision as to whether or not the proposed consent order should be made final.

The written comments can be divided into two subject categories. One category consists of two comments that solely addressed the Office of Hearings and Appeals' disposition of the Crown settlement funds. The second category includes two comments which addressed the use of OHA Subpart V procedures to distribute the settlement monies, along with comments suggesting specific dispositions of the consent order monies.

Comments were received from the following two groups which expressed their views on OHA's disposition of the funds that Crown is to pay pursuant to the settlement:

State of Florida, Governor's Energy Office, Commonwealth of Pennsylvania

Comments addressing the use of OHA Subpart V procedures for distribution of the settlement fund and the disposition of those monies were submitted by the following two groups:

Controller of California
Attorneys General of the States of Arkansas, Delaware, Iowa, Louisiana, North Dakota, Rhode Island, Utah and West Virginia

The comments submitted by these parties did not question the basis of the settlement or adequacy of the settlement amount, but only offered OHA proposals for the distribution of the settlement funds or offered suggestions that were different from the consent order provisions requiring disbursement through OHA administrative claims proceedings.

III. Analysis of Comments

The March 12 notice solicited written comments and provided for a public hearing to enable the ERA to receive information from the public relevant to the decision whether the proposed consent order should be finalized as proposed, modified or rejected. To ensure greater public understanding of the basis for the proposed settlement, the March 12 notice provided detailed information regarding Crown's overcharge liability and the considerations that went into the government's preliminary agreement with the proposed terms. This expanded settlement information enabled the public to address more specifically the areas in which questions or concerns may have existed.

The State of Florida and the Commonwealth of Pennsylvania's comments relating to OHA's distribution of the funds if the Crown consent order is finalized were not germane to the basis or adequacy of the settlement. The distribution of the settlement funds will be the subject of a separate administrative proceeding conducted by the Office of Hearings and Appeals, to be initiated shortly after publication of this notice. Comments on the actual disbursement of the monies by OHA will not be addressed here, but will be referred to OHA for consideration in the Crown consent order claims proceeding.

The two other groups, along with expressing their views on the distribution of the funds (which DOE will refer to OHA), objected to the provision in the consent order that requires the DOE's Office of Special Counsel (OSC) to petition the OHA to implement special refund procedures under Subpart V (10 CFR Part 205) to distribute the settlement fund. One of these commentors expressed the view that use of the Subpart V procedures was unnecessary and that the consent order itself should direct refunds to the states when it is impossible to identify the victims of overcharges. The ERA believes as a general policy that the Subpart V procedures are best suited for cases such as Crown, where ERA could not readily identify the injured parties or their relative amount of economic harm. This commenter may most appropriately

[1] The $8.3 million, plus interest accrued from the date the proposed consent order was executed by DOE, will be disbursed to DOE within 30 days of publication of this Notice.

VOL 51 ISS 82 AP 29 1986 UMI

present its claim for monies from the consent order fund in that forum.

The other commenter in this group, the Controller of California, while not objecting to the disbursement of settlement funds attributable to refined products through OHA's Subpart V procedures, objected to referral of the crude oil portion of the consent order fund to OHA, rather than directing it to the states, if OHA considers itself bound by the DOE Statement of Restitutionary Policy issued on June 21, 1985 [50 FR 27400, July 2, 1985] (Policy Statement). The Policy Statement was based upon the findings of fact contained in the June 19, 1985, report of the Office of Hearings and Appeals to the Kansas district court in *In re: the Department of Energy Stripper Well Exemption Litigation*, MDL No. 378, in which OHA found that it was impossible to trace specific crude oil overcharges through an individual refiner's marketing system to the ultimate consumer. In the Policy Statement, DOE announced that crude oil overcharge funds that had been spread through the entitlements program would be placed in an escrow account to allow Congress to decide upon an appropriate form of indirect restitution. The Policy Statement also provides that if, by the close of the current session Congress does not act, the DOE intends to deposit the money into the general fund of the U.S. Treasury for the benefit of the American public. At the same time that DOE issued the Policy Statement, OHA announced that it planned to apply that policy to Subpart V proceedings involving such crude oil overcharge funds (50 FR 27402, July 2, 1985).

The DOE believes that referral of the entire Crown settlement fund to OHA is entirely appropriate. While it would be possible for ERA to apply the Policy Statement directly, holding in escrow the funds attributable to the crude oil portion of the Crown consent order, ERA believes that filing a Subpart V petition with respect to the entire Crown settlement will avoid needless duplication and allow the OHA, the part of the Department with the broadest experience in administering overcharge and settlement funds, to do so in this case.

In the March 12 **Federal Register** notice, ERA sought to provide the maximum amount of information possible and to address Crown's actual financial liability resolved by the proposed consent order. No commenter in any way addressed or objected to the adequacy of the settlement amount, and ERA's review and analysis of all the written comments did not provide any information or basis to support the modification or rejection of the proposed consent order with Crown. Accordingly, ERA concludes that the consent order is in the public interest and should be made final.

IV. Decision

By this notice, and pursuant to 10 CFR 205.199J, the proposed consent order between Crown and DOE executed on March 4, 1986 is made a final order of the Department of Energy, effective the date of publication of this notice in the **Federal Register**.

Issued in Washington, DC, on April 23, 1986.

Milton C. Lorenz,

Special Counsel, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 86-29-NG]

Northwest Marketing Co.; Application to Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Application for Blanket Authorization to Import Natural Gas from Canada.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 15, 1986, of an application from Northwest Marketing Company (Northwest Marketing), a wholly-owned subsidiary of Northwest Energy Company, one of The Williams Companies, for blanket authorization to import Canadian natural gas for short-term sales in the domestic spot market. Authorization is requested to import up to 150 MMcf of Canadian natural gas per day during a two-year term beginning on the date of first delivery of the import. Northwest Marketing intends to import individual volumes of natural gas purchased from various Canadian suppliers and, also, to import natural gas as an agent for other parties which desire either to sell or purchase Canadian natural gas under short-term or spot-market sales arrangements. Since Northwest Marketing intends to utilize existing pipeline facilities for the transportation of the volumes imported, the proposal does not contemplate the construction of any new domestic facilities.

The applicant proposes to submit quarterly reports giving details of individual transactions in the month following each calendar quarter.

The application was filed with the ERA pursuant to Section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than May 29, 1986.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-076, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-8162

Diane Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All Protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076-A, RG-23, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585. They must be filed no later than 4:30 p.m. e.d.t., May 29, 1986.

The Administrator intends to develop a decisional record on the application through responses to the notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based upon the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Northwest marketing's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076-A, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC., April 23, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-85-04; OFP Case No. 66017-9266-01-23]

Extension of Decision Period on Petition for Exemption by Power Developers, Inc.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of extension of decision period on Petition for exemption by Power Developers, Inc., for a proposed facility near Scottsdale, Arizona.

The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby extends by thirty (30) days to the Decision Period within which to either grant or deny the request for a permanent exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) (FUA or the Act) filed by Power Developers, Inc. for its proposed electric power production facility to be located near and east of Scottsdale, Arizona.

Section 501.68(a)(2) of 10 CFR Part 501—Administrative Procedures and Sanctions, Subpart F—allows for the extension of the decision period on an exemption petition to a specified date by publishing such notice in the **Federal Register** and stating the reasons for such extension.

This extension by ERA of the decision period to grant or deny the petition is necessary to properly consider issues associated with this case.

Issued in Washington, D.C., on April 22, 1986.

Barton R. House,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01

ENVIRONMENTAL PROTECTION AGENCY

California State Motor Vehicle Pollution Control Standards: Amendments Within the Scope of Previous Waivers of Federal Preemption; Summary of Determination

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of scope of waiver of Federal preemption.

SUMMARY: The California Air Resources Board (CARB) has notified EPA that it adopted amendments to its Emissions Warranty Regulations. The amendments (1) add specific diesel particulate control components to CARB's Emission Warranty Parts List, (2) clarify the applicable useful life definition for diesel particulate controls on vehicles certified to California's optional standards, and (3) clarify the applicability of California's two year/24,000 mile warranty to miscellaneous parts used in conjunction with fuel metering and ignition system components.

I find these amendments to be within the scope of previous waivers of Federal preemption granted to California for its warranty regulations. Since these amendments are within the scope of these waivers, a public hearing to consider them is not necessary. However, if any party asserts an objection to these findings within 30 days of the date of publication of this notice, EPA will consider holding a public hearing to provide an opportunity to present testimony and evidence to show that there are issues to be addressed through a section 209(b) waiver determination and that I should reconsider my findings. Otherwise, these findings will become final at the expiration of this 30-day period.

DATES: Any objections to the findings in this notice must be filed within 30 days of the date of this notice; otherwise, at the expiration of this 30-day period these findings will become final. Upon receipt of any timely objection, EPA will consider scheduling a public hearing in a subsequent **Federal Register** notice.

ADDRESSES: Any objection to the findings in this notice should be filed with Mr. Charles N. Freed, Director, Manufacturers Operations Division (EN-340-F), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Copies of the California amendments at issue in this notice and a decision document containing an explanation of my determination, are available for public inspection during normal working hours (8:00 a.m. to 4:00 p.m.) at the Environmental Protection Agency, Central Docket Section, Gallery I, 401 M Street SW., Washington, D.C. 20460 (Docket EN-85-06). Copies of the decision document can be obtained from EPA's Manufacturers Operations Division by contacting Mr. Spiegel as noted below.

FOR FURTHER INFORMATION CONTACT: Steven M. Spiegel, Attorney/Advisor, Manufacturers Operations Division (EN-340-F), U.S. Environmental Protection Agency, Washington, D.C. 20460, (202) 382-2526.

SUPPLEMENTARY INFORMATION: I have determined that CARB's amendments are within the scope of waivers of Federal preemption previously granted

VOL 51 ISS 82 AP 29 1986 UMI

pursuant to section 206(b) of the Clean Air Act, as amended (Act).[1] Specifically, the changes add specific diesel particulate control components such as trap oxidizers, to California's Emissions Warranty Parts List; establish the useful life period as 5 years, 50,000 miles for diesel particulate controls on light-duty and medium-duty vehicles certified to California's optional 100,000 mile standards; and clarify the applicability of California's 2 year, 24,000 mile warranty to miscellaneous parts used on ignition system and fuel metering components.

These amendments do not undermine California's determination that its standards are, in the aggregation, at least as protective as Federal standards, raise no new issues regarding previous waivers of Federal preemption and are not inconsistent with Section 202(a) of the Act. A full explanation of my determination is contained in a decision document, which may be obtained from EPA as noted above.

Since these amendments are included within the scope of previously granted waivers of Federal preemption, a public hearing to consider them is not necessary. The public has not had an opportunity to comment in advance of this determination. Therefore, my determination on these amendments will become final at the expiration of 30 days following publication of this notice, unless an objection is filed and a public hearing is scheduled.

My decision will affect not only persons in California but also the manufacturers located outside the State who must comply with California's requirements in order to produce motor vehicles for sale in California. For this reason, I hereby determine and find that this decision is of nationwide scope and effect. Accordingly, judicial review of this action is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit within 60 days of publication. Under section 307(b)(2) of the Act, the requirements which are the subject of today's notice may not be challenged later in judicial proceedings brought by EPA to enforce these requirements.

This action is not a rule as defined by section 1(a) of Executive Order 12291, 46 FR 13193 (February 19, 1981), because it does not "implement, interpret, or prescribe law or policy." Therefore, it is exempt from review by the Office of Management and Budget as required for rules and regulations by Executive Order 12291. Additionally, a Regulatory Impact Analysis is not being prepared under Executive Order 12291, for this "within the scope" determination since it is not a rule.

This action also is not a rule as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2), because the action is not required to undergo prior "notice and comment" under section 553(b) of the Administrative Procedure Act, or any other law. Therefore, EPA has not prepared a supporting regulatory flexibility analysis addressing the impact of this action on small entities.

Dated: April 22, 1986.

J. Craig Potter,

Assistant Administrator for Air and Radiation.

In the third column, first paragraph, second line, "in" should read "is".

BILLING CODE 1505-01-M

Health Resources and Services Administration

Indian Health Service; Designation of Contract Proposal Declination Appeals Board

The Indian Self-Determination Act (Pub. L. 93-638) requires the Secretary of Health and Human Services to provide the opportunity to an Indian tribe for a hearing if he/she declines a request for a self-determination contract (Sec. 103(b)(3)). The regulations at 42 CFR 36.214(e) provides that the director of the Indian Health Service (IHS) shall appoint a five-member "Contract Proposal Declination Appeals Board". The purpose of this notice is to notify the public of the current membership of the Contract Proposal Declination Appeals Board.

On March 28, 1986, the Director, IHS, appointed the following individuals to the Contract Proposal Declination Appeals Board:

Mr. James C. Meredith, Director, Nashville Program Office, IHS, Chairman;

Ms. Luana Reyes, Acting Associate Director, Office of Planning, Evaluation and Legislation, IHS, Member;

Mr. Charles J. Erickson, Acting Director, Division of Health Systems Development, IHS, Member;

Dr. Stephen Fermison, Director, Patient Care Policy Analysis Program, Member;

Ms. Ramona C. Ornelas, Program Analyst, Member;

Mr. Doug Black, Program Analyst, First Alternate Member;

Mr. Jim Mitchell, Acting Director, Division of Health Support Activities, Chief, Contract Health Service Branch, IHS, Second Alternate Member;

Mr. Alan Allery, Director, Bemidji Program Office, IHS, Third Alternate Member; and

Mr. Mike Lincoln, Director, Navajo Area, IHS, Fourth Alternate Member.

Dated: April 22, 1986.

BILLING CODE 1505-01-M

Public Health Service

National Center for Health Services Research and Health Care Technology Assessment; Reassessment of Medical Technology; Transurethral Ureteroscopic Lithotripsy (TUUL) Procedures for Treatment of Kidney Stones

The Public Health Service (PHS), through the Office of Health Technology Assessment (OHTA), announces that it is coordinating a reassessment of what is known of the safety, clinical effectiveness, and use (indications) of transurethral ureteroscopic lithotripsy (TUUL) procedures for the treatment of kidney stones.

Transurethral ureteroscopic lithotripsy (TUUL) represents a group of procedures whereby a cystoscope is inserted through the urethra into the bladder and descending ureters under direct visualization and either an ultrasonic or shockwave probe or a mechanical stone crushing device is inserted through the cystoscope for the purpose of ultrasonically, electrohydraulically or mechanically disrupting the stone, respectively.

When the procedure is limited to disrupting stones within the urinary bladder, it constitutes a lower urinary tract procedure. This procedure, known as transurethral lithotripsy (TUL) is an established medical procedure. The cystoscope can then be advanced through the uretero-vesicular valve into the descending ureter. This procedure is considered a transurethral ureteroscopic lithotripsy (TUUL) and involves the upper urinary tract. In the first instance, where the procedure is limited to the bladder, it is covered under Medicare and is designated transurethral cystoscopic lithotripsy. Where it involves the ureter, renal pelvis, or kidney, it is designated transurethral ureteroscopic lithotripsy. The latter is not a presently covered procedure.

This technology was previously assessed by the Public Health Service (Federal Register 1984; 49(25):4438). At that time data were lacking by which to determine the status of TUUL for purposes of advising Medicare regarding coverage. In distinguishing TUUL from the other forms of lithotripsy, this reassessment seeks to determine whether ultrasonic, electrohydraulic or mechanical ureteroscopic lithotripsy has been demonstrated to be safe or clinically effective or has achieved widespread acceptance within the practicing community. Specifically, we are interested in knowing whether TUUL procedures for treatment of kidney stones in use in the United States today have significant clinical advantages when compared to other surgical methods of treatment. If they prove to be safe and clinically effective, what are the specific indications and when is their use considered reasonable and necessary? Not included in this assessment are the medical treatments of kidney stones, such as diet and/or medication which may be used alone, in combination or in conjunction with surgical procedures.

PHS assessments consist of a synthesis of information obtained from appropriate organizations in the private sector and from PHS and other agencies in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. The information being sought is a review and assessment of past, current, and planned research related to this technology, a bibliography of published, controlled clinical trials and other well-designed clinical studies. Information related to the characterization of the patient population most likely to benefit from it, as well as on clinical acceptability and the effectiveness of this technology and extent of use is also being sought. Proprietary information is not being sought. Any person or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than July 22, 1986 or within 90 days from the date of publication of this notice.

Written material should be submitted to: Morgan N. Jackson, M.D., M.P.H., Office of Health Technology Assessment, NCHSR&HCTA, Park Building, Room 3-10, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-4090.

Dated: April 22, 1986.

Morgan N. Jackson,

Acting Director, Office of Health Technology Assessment, National Center for Health Services Research and Health Care Technology Assessment.

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-8662-A]

Alaska Native Claims Selection; Choggiung Ltd.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of sec. 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1611, and 1613, will be issued to Choggiung Limited for approximately six acres. The lands involved are in the vicinity of Ekuk, Alaska.

Seward Meridian, Alaska

T. 16 S., R. 58 W. [Surveyed]
Sec. 12, those lands within Sec. 3(e) application AA-12838 excluded from Interim Conveyance No. 230, dated September 17, 1979.

A notice of the decision will be published once a week for four (4) consecutive weeks in the ANCHORAGE TIMES. Copies of the decision may be contained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision shall have until May 29, 1986 to file a appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labey,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Closure of Public Lands; Idaho

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Closure of Public Lands.

SUMMARY: Notice is hereby given that effective immediately all public lands located in the North Grazing Allotment,

BEST COPY AVAILABLE

VOL 51 ISS 82 AP 29 1986 UMI

Shoshone District are closed to horse grazing.

ADDRESS: Bureau of Land Management, Shoshone District Office, 400 West F Street, Shoshone, Idaho 83352.

FOR FURTHER INFORMATION CONTACT: Jon Idso, District Manager, Shoshone District Office, P.O. Box 2B, Shoshone, Idaho 83352. Telephone (208) 886–2206 or FTS 554–6578.

SUPPLEMENTARY INFORMATION: The lands affected by this closure are described as:

Boise Meridian

T. 8 S., R. 18 E.,
- Sec. 1, That portion southeast of the livestock pasture division fence constructed on a line running diagonally through the section from the corner common to Sections 1, 2, 11, and 12 to the corner common to sections 31, 36, 1, and 6 at the intersection of Tps. 7 and 8 S., R. 18 E., and Tps. 7 and 8 S., R. 19 E.;
- Sec. 10 to 15, inclusive;
- Sec. 21 and 22, parts in each section lying north and east of the Twin Falls North Main Canal;
- Sec. 23 and 24;
- Sec. 25 to 27, inclusive, parts in each section lying north and east of the Twin Falls North Main Canal.

T. 8 S., R. 19 E.,
- Sec. 2 to 5, inclusive, parts in each section lying south of the Gooding-Milner Canal;
- Sec. 6 to 8, inclusive;
- Sec. 9, part lying south of the Gooding-Milner Canal;
- Sec. 10;
- Sec. 11, W½;
- Sec. 14, Lot 3, NW¼NE¼, N½NW¼, SW¼NW¼;
- Sec. 15, N½NE¼, N½SE¼NE¼, W½;
- Sec. 16 to 21, inclusive;
- Sec. 22, W½, SE¼;
- Sec. 26, W½W½NE¼NE¼, NW¼NE¼, N½N½SW¼NE¼, NW¼NW¼ SE¼NE¼, N½NW¼, N½S½NW¼, N½S½S½NW¼;
- Sec. 29 and 30;
- Sec. 31, Lot 1, NE¼, NE¼NW¼.

All described lands are located in Jerome County, Idaho, in the designated North Milner Grazing Allotment.

The purpose of this closure is to protect the livestock and/or wildlife forage resources in the allotment. The need for the closure is based on the record of recurring unauthorized horse grazing.

Authorized grazing uses within the North Milner Allotment shall be exempt from this closure instruction.

Any person who fails to comply with this closure may be subject to punishment by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months pursuant to 43 CFR 8360.0–7 dated October 1, 1985.

The authority for this closure is 43 CFR 8364.1. The closure will remain in effect until cancelled by the Authorized Officer of the Bureau of Land Management.

Jon H. Idso,

District Manager.

Coal Exploration License Application; North Dakota

Members of the public are hereby invited to participate with Basin Cooperative Services in a program for the exploration of coal deposits owned by the United States of America in the following described lands located in Oliver County, North Dakota:

T. 143 N., R. 83 W., 5th P.M.,
- Sec. 30, lots 1,2,3, NE¼SW¼.

T. 143 N., R. 84 W., 5th P.M.,
- Sec. 24, S½;
- Sec. 26, All.

1,120.94 acres.

Any party electing to participate in this exploration program shall notify, *in writing*, both the State Director, Bureau of Land Management, P.O. Box 36800, Billings, Montana 59107; and Basin Cooperative Services, 1717 East Interstate Avenue, Bismarck, North Dakota 58501–6990. Such written notice must refer to serial number M 70658(ND) and be received no later than 30 calendar days after publication of this Notice in the **Federal Register** or 10 calendar days after the last publication of the Notice in the The Center Republican, whichever is later. This Notice will be published for two consecutive weeks.

This proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the Bureau of Land Management, Montana State Office, Granite Tower Building, 222 North 32nd Street, Billings, Montana. The exploration plan is available for public inspection at this address.

Dated: April 22, 1986.

Medford District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Bureau of Land Management, Medford District Advisory Council will be held May 29, 1986.

On May 29, the meeting will begin at 9:00 a.m.; in the Cafeteria of the Bureau of Land Management Office at 3040 Biddle Road, Medford, Oregon. The agenda for the meeting will include:

A review of the Public Involvement Policy and Guidebook presented to the Medford District by its Public Involvement Team on February 18, 1986; a presentation updating the Medford District's Draft Public Involvement Guidebook; a discussion by staff members of the District's timber sale program discussion of the District's plans to implement a River Ranger program; and reorganization of the district under provisions of the Gramm-Rudman-Hollings Act.

The meeting of the advisory council is open to the public. Interested persons may make oral statements to the board following conclusion of its other agenda items on May 29, or file written statements for the board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, 3040 Biddle Road, Medford, Oregon 97504, by May 28, 1986. Depending on the number of persons wishing to make oral statements, a per-person time limit may be established by the District Manager.

Summary minutes of the board meeting will be maintained in the District Office and be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Date signed: April 21, 1986.

James P. Clason,

District Manager.

Montrose District Advisory Council; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given in accordance with 43 CFR Subpart 1784, that a meeting of the Montrose District Advisory Council will be held June 4, 1986 in Montrose, Colorado.

DATE: Requests to present oral comments must be received by May 28, 1986. A meeting is scheduled June 4, 1986.

ADDRESS: District Manager, Bureau of Land Management, Montrose District Office, 2465 South Townsend, Montrose, Colorado 81401.

SUPPLEMENTARY INFORMATION: The District Advisory Council meeting will convene at 9:00 a.m. in the Montrose District conference room. The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager by May 28, 1986.

The agenda will include:
1. Election of officers.
2. Update on Resource Area programs and issues.
3. Exchange pooling update.
4. Discussion of riparian issues.
5. Discussion of the preferred alternative for the Uncompahgre Basin Resource Management Plan.

Dated: April 18, 1986.

Paul W. Arresmith,

District Manager.

BILLING CODE 4310–JB–M

Suspension of Production Requirements for Stripper Oil Wells on Federal and Indian Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of suspension of production requirements.

SUMMARY: On April 17, 1986, the Secretary of the Interior announced the adoption of a policy which would suspend production requirements for "stripper" oil wells on Federal and Indian Lands. The effect of the suspension of production, granted under the authority of section 17(f) of the Mineral Leasing Act of 1920 (30 U.S.C. 226(f)), is to continue the lease for the period of the suspension, subject to the payment of minimum royalty of $1 per acre or fraction thereof per year. This policy provides an alternative to premature abandonment of low production capacity wells. Abandonment of such wells has become more prevalent as a result of the recent sharp decline in oil prices. The policy is applicable to those wells that produce 10 or less barrels of oil per day. Under the policy, a leaseholder may apply to the Bureau of Land Management for a suspension of the production requirements for a particular lease. This policy is designed to prevent the premature abandonment of these stripper wells. Anyone with royalty payment responsibilities for leases on which a suspension of production has been granted shall continue to submit form MMS–2014 each month coded to indicate "No Sales" for the reporting period.

A lessee should contact the District Manager of the Bureau of Land Management District which has jurisdiction of the lands covered by the lease for additional information concerning this policy.

EFFECTIVE DATE: April 17, 1986.

ADDRESS: Any questions or inquiries should be sent to:

Director (630), Bureau of Land Management, Room 5640, Main Interior Bldg., 1800 C Street, NW., Washington, DC 20240

or

Minerals Management Service, Royalty Management Program, Bldg 85, Denver Federal Center, Denver, Colorado 80225, (800) 525–0306.

FOR FURTHER INFORMATION CONTACT: George F. Brown, (202) 343–4437.

Robert F. Burford,

Director.

BILLING CODE 9310–84–M

[W–82637]

Wyoming; Exchange of Public Lands in Sweetwater County for Private Lands in Teton County and Private Interests in Sweetwater County; Transfer of Administrative Jurisdiction

1. Notice is hereby given that, pursuant to section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716 (1982), the following public lands, including all minerals excepting oil and gas, have been conveyed to Teton Valley Ranch, Kelly, Wyoming, by Patent Number 49–86–0007 dated April 1, 1986:

Sixth Principal Meridian, Wyoming

T. 20 N., R. 101 W.,
- Sec. 6, lots 1–6, E½SW¼, SE¼;
- Sec. 8, E½, N½NW¼, SE¼NW¼;
- Sec. 22, NW¼NW¼, S½N½, S½;
- Sec. 26, N½NW¼, SW¼,NW¼.

T. 21 N., R. 101 W.,
- Sec. 32, NE¼;
- Sec. 34, SW¼.

The areas described aggregate 1837.96 acres.

The United States reserved a 3.18 percent royalty interest in all coal in the above lands which may be mined or produced.

2. In exchange, the United States, Department of the Interior, acquired the following lands from Teton Valley Ranch:

Sixth Principal Meridian, Teton County, Wyoming

T. 42 N., R. 115 W.,

Those parts of Sections Ten (10), Eleven (11), Fourteen (14), and Fifteen (15) described as follows: Lots One (1) through Seventeen (17), both inclusive, of Teton Valley Ranch Subdivision, Unit I, according to that plat recorded November 9, 1976, as Plat No. 293, Teton County, Wyoming; Lot Eighteen (18) and lots Twenty-one (21) through Thirty-seven (37), both inclusive of Teton Valley Ranch Subdivision, Unit II, according to that plat recorded May 20, 1977, as Plat No. 309, Teton County, Wyoming; Lots Thirty-eight (38) through Forty-nine (49), both inclusive, of Teton Valley Ranch Subdivision, Unit III, according to that plat recorded May 20, 1977, as Plat No. 310, Teton County, Wyoming; and Lots One (1) through Twenty-six (26), both inclusive, of Sheep Mountain Commercial Area, according to that plat recorded May 20, 1980, as Plat No. 408, Teton County, Wyoming.

The above described tract of land contains 354.27 acres, more or less.

3. Additionally, the United States acquired 3.18 percent royalty interest in coal mined from the following described lands from Rock Springs Royalty Company:

Sixth Principal Meridian, Sweetwater County, Wyoming

T. 20 N., R. 101 W.,
- Sec. 5, lots 1–4, S½;
- Sec. 7, N½NE¼;
- Sec. 9, S½;
- Sec. 15, S½SW¼;
- Sec. 17, E½NE¼;
- Sec. 21, NE¼, N½SE¼;
- Sec. 23, NW¼SW¼, W½SW¼;
- Sec. 27, E½NE¼, NW¼NE¼.

T. 20 N., R. 102 W.,
- Sec. 1, lots 1–3, N½SE¼.

T. 21 N., R. 101 W.,
- Sec. 33, All.

The above-described land contains approximately 2318.35 acres.

4. The lands described in Paragraph 2 are located within the National Elk Refuge established by Executive Order No. 2177 of April 21, 1915, and were acquired by the Department of the Interior, Bureau of Land Management, on behalf of the U.S. Fish and Wildlife Service. Pursuant to section 206(c) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716, and in accordance with Executive Order No. 7680 of July 30, 1937, the lands described in Paragraph 2 were transferred to the U.S. Fish and Wildlife Service on April 1, 1986, upon acceptance of title thereto by the United States, for administration as part of the National Elk Refuge in accordance with the laws, rules, and regulations applicable to National

VOL 51 ISS 82 AP 29 1986 UMI

Wildlife Refuge System lands and the National Elk Refuge.

Realty Action; Exchange of Public and Private Lands in Nevada County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of issuance of land exchange conveyance document.

SUMMARY: The purpose of this exchange was to bring back into Federal ownership that portion of the South Yuba campground and its improvements which were inadvertently constructed on private property. The non-Federal land acquired in this exchange enlarges the South Yuba Recreation Area, a long-term management area of significant public value. The public interest was well served through completion of this exchange.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, California State Office, (916) 978-4815.

The United States issued an exchange conveyance document of Gerald E. and Shirley A. Hodnefield on February 19, 1986, under the provisions of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2758, 43 U.S.C. 1716, for the following described land:

Mount Diablo Meridian, California

T. 6 N., R. 14 E.,
Sec. 29, Lots 2 and 6.
Containing 79.95 acres of public land.

In exchange for these lands, the United States acquired the following described land from Mr. and Mrs. Hodnefield:

Mount Diablo Meridian, California

T. 17 N., R. 9 E.,
Portions of Sec. 16 (described by metes and bounds).
Containing 58.17 acres of non-Federal land.

The values of the public land and the non-Federal land in the exchange were appraised at $96,250 and $75,000, respectively. An equalization payment in the amount of $20,250 was paid to the United States by Mr. and Mrs. Hodnefield.

A complete description of the above described non-Federal land is available for inspection at the State Office, Bureau of Land Management, 2800 Cottage Way, Sacramento, California 95825.

Dated: April 21, 1986.

Sharon N. Janis,
Chief, Branch of Lands & Minerals Operations.

[FR Doc. 86-9484 Filed 4-28-86; 8:45 am]
BILLING CODE 4310-40-M

Bureau of Reclamation

Quarterly Status Tabulation of Water Service and Repayment Contract Negotiations; Proposed Contractual Actions Pending Through June 1986

Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273), and to § 426.20 of the rules and regulations published in the Federal Register December 6, 1983, Vol. 48, page 54785, the Bureau of Reclamation will publish notice of proposed or amendatory repayment contract actions or any contract for the delivery of irrigation water in newspapers of general circulation in the affected area at least 60 days prior to contract execution. The Bureau of Reclamation announcements of irrigation contract actions will be published in newspapers of general circulation in the areas determined by the Bureau of Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation requirements do not apply to proposed contracts for the sale of surplus or interim irrigation water for a term of 1 year or less. The Secretary or the district may invite the public to observe any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act if the Bureau determines that the contract action may or will have "significant" environmental effects.

Pursuant to the "Final Revised Public Participation Procedures" for water service and repayment contract negotiations, published in the Federal Register February 22, 1982, Vol. 47, page 7763, a tabulation is provided below of all proposed contractual actions in each of the six Reclamation regions. Each proposed action listed is, or is expected to be, in some stage of the contract negotiation process during April, May, or June of 1986. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary, or pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the Regional Directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved. The identity of the approving officer and other information pertaining to a specific contract proposal may be obtained by calling or writing the appropriate regional office at the addresses and telephone numbers given for each region.

This notice is one of a variety of means being used to inform the public about proposed contractual actions. Individual notice of intent to negotiate, and other appropriate announcements, are made in the Federal Register for those actions found to have widespread public interest. When this is the case, the date of publication is given.

Pacific Northwest Region: Bureau of Reclamation, 550 West Fort Street, Box 043, Boise, ID 83724, telephone (208) 334-1961

1. Boise Cascade Corporation, Columbia Basin Project, Washington: Industrial water service contract; 250 acre-feet; FR notice published April 7, 1980, Vol. 45, page 23631.

2. Five ID's, Boise Project, Idaho-Oregon: Irrigation repayment contract; 22,660 acre-feet of stored water in Arrowrock Reservoir.

3. Brewster Flat ID, Chief Joseph Dam Project, Washington: Amendatory repayment contract; land reclassification of approximately 360 acres to irrigable; Repayment obligation to increase by $189,600.

4. Individual irrigators, M&I, and miscellaneous water users, Pacific Northwest Region, Idaho, Oregon and Washington: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

5. Rogue River Basin water users, Rogue River Basin Project, Oregon: Water service contracts; $5 per acre-foot or $20 minimum per annum, not to exceed 320 acres or 1,000 acre-feet of water per contractor for terms up to 40 years.

6. Willamette Basin water users, Willamette Basin Project, Oregon: Water service contracts; $1.50 per acre-foot or $20 minimum per annum, not to exceed 320 acres or 1,000 acre-feet of water annually per contractor for terms up to 40 years.

7. Fifty-three Palisades Reservoir Spaceholders, Minidoka Project, Idaho-Wyoming: Contract amendments to extend term for which contract water may be subleased to other parties.

8. Cascade Reservoir water users, Boise Project, Idaho: Repayment contracts for irrigation and M&I water; 59,721 acre-feet of stored water in Cascade Reservoir.

9. Boise Water Corporation, Boise Project, Idaho: M&I water service contract; up to 1,000 acre-feet annually from stored water in Anderson Ranch Reservoir for a term of up to 40 years.

10. ID's and similar water user entities: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (Pub. L. 97-293).

11. Columbia Basin Project Water Users, Columbia Basin Project, Washington: Water service contracts for approximately 6,000 acre-feet of irrigation water provided from Banks Lake with terms up to 40 years; prior to contract execution, water users will have to come under provisions of the Reclamation Reform Act of 1982 (P.L. 97-293).

12. South Columbia Basin ID, Columbia Basin Project, Washington: Supplemental repayment contract for Irrigation Block 24; 1,892 irrigable acres. Proposed contract is subject to RRA.

13. City of Boise, Boise Project, Idaho: M&I water service contract, 340 acre-feet annually from stored water in Anderson Ranch Reservoir for a term of up to 40 years.

4. Douglas County, Galesville Project, Oregon: SRPA cost escalation loan repayment contract; $1,000,000 proposed obligation.

15. Sidney Irrigation Cooperative, Willamette Basin Project, Oregon: Irrigation water service contract for approximately 1,300 acre-feet for a term of 40 years.

Mid-Pacific Region: Bureau of Reclamation (Federal Office Building), 2800 Cottage Way, Sacramento, CA 95825, telephone (916) 978-5030

1. 2047 Drain Water Users Association, CVP, California: Water right settlement contract; FR notice published July 25, 1979, Vol. 44, Page 43535.

2. Tuolumne Regional Water District, CVP, California: Water service contract; 3,200 acre-feet from New Melones Reservoir.

3. Calaveras County Water District, CVP, California: Water service contract; 400 acre-feet from New Melones Reservoir; FR notice published February 5, 1982, Vol. 47, page 5473.

4. Individual irrigators, M&I, and miscellaneous water users, Mid-Pacific Region, California, Oregon, and Nevada: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; temporary Warren Act contracts to wheel nonproject water through project facilities for terms up to 1 year; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

5. El Dorado ID, Sly Park Unit, CVP, California: D&MC contract to allow the District to accomplish the construction work with the remaining funds from the distribution system contract, and amend the Unit 4 portion of its existing repayment contract to pay interest on actual M&I use.

6. South San Joaquin ID and Oakdale ID, CVP, California: Operation agreement for conjunctive operation of New Melones Dam and Reservoir on the Stanislaus River; FR notice published June 6, 1979, Vol. 44, page 32483.

7. San Luis Water District, CVP, California: Amendatory water service contract providing for a change in point of delivery from Delta-Mendota Canal to the San Luis Canal.

8. Mid-Valley Water Authority, CVP, California: Temporary water supplies up to 100,000 acre-feet.

9. City of Avenal, CVP, California: Amendment of existing water service contract to provide for furnishing project power to city canalside relift facilities and change the point of diversion.

10. ID's and similar water user entities: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (P.L. 97-293).

11. United Water Conservation District, SRPA, California: Loan repayment contract, $16,730,000 proposed obligation.

12. State of Hawaii, Molokai Project, SRPA: Contract amendment to provide for use of facilities for M&I purposes.

13. State of California, CVP, California: Contract(s) for, (1) sale of interim water to the Department of Water Resources for use by the State Water Project Contractors, and (2) acquisition of conveyance capacity in the California Aqueduct for use by the CVP, as contemplated in the current draft of the Coordinated Operations Agreement.

14. Pixley, ID, SRPA, California: Loan repayment contract, $12,300,000 proposed obligation.

15. Kaiser Development Company, CVP, California: Sacramento River water right contract; suspension of agricultural contract and execution of M&I contract.

16. Madera ID, Madera Canal, CVP, California: Warren Act contract to convey and/or store nonproject Soquel water through project facilities.

17. Hills Valley ID, CVP, California: Amendatory water service contract, to provide an additional 400 acre-feet and reallocate 800 acre-feet of water from the Ducor ID for a total increase of 1,200 acre-feet.

18. Tri-Valley Water District, CVP, California: Amendatory water service contract, to provide an additional 160 acre-feet.

19. County of Tulare, CVP, California: Amendatory water service contract, to provide an additional 1,908 acre-feet and reallocate 400 acre-feet of water from the Ducor ID for a total increase of 2,308 acre-feet.

20. U.S. Fish and Wildlife, CVP, California: Temporary water service contract; 15,000 acre-feet for Kern National Wildlife Refuge.

21. Truckee-Carson ID, Newlands Project, Nevada: Warren Act contract to wheel 9,500 acre-feet of nonproject water through project facilities.

22. Panoche Water District, CVP, California: Amendatory water service contract providing for change in point of delivery from Delta-Mendota Canal to the San Luis Canal.

23. Solano ID, Solano Project, California: Amendatory loan repayment contract providing for reconveyance and M&I water supply delivery.

24. Orland Unit Water Association, Orland Project, California: Emergency loan contract; contract will assure repayment of funds to be provided by the United States for the emergency repair due to flood-related damage to North Diversion Dam. Proposed contract is subject to RRA.

VOL 51 ISS 82 AP 29 1986 UMI

Upper Colorado Region: Bureau of Reclamation, P.O. Box 11568 (125 South State Street), Salt Lake City, UT 84147, telephone (801) 524-5495

1. Individual irrigators, M&I, and miscellaneous water users, Utah, Wyoming, Colorado, and New Mexico: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. Weber Basin Water Conservancy District, Weber Basin Project, Utah: Operation agreement to restore Arthur V. Watkins Dam to original elevation.

3. Animas-La Plata Conservancy District, Animas-La Plata Project, Colorado: Repayment contract; 9,200 acre-feet per year for M&I use; 72,200 acre-feet per year for irrigation. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

4. La Plata Conservancy District, Animas-La Plata Project, New Mexico: Repayment contract; 16,600 acre-feet per year for irrigation. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

5. City of Farmington, Animas-La Plata Project, New Mexico: M&I repayment contract; 10,700 acre-feet per year. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

6. City of Aztec, Animas-La Plata Project, New Mexico: M&I repayment contract; 5,800 acre-feet per year. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

7. City of Bloomfield, Animas-La Plata Project, New Mexico: M&I repayment contract; 5,300 acre-feet per year. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

8. Central Utah Project, Bonneville Unit, Utah: Supplemental M&I repayment contract for 94,100 acre-feet per year; FR notice published August 22, 1980, Vol. 45, No. 165, page 56198. Special election on contract passed November 19, 1985, and contract executed on November 26, 1985. Congressional review of 100 days completed on March 21, 1986.

9. Southern Ute Indian Tribe, Animas-La Project, Colorado: Repayment contract for 20,500 acre-feet per year for M&I use and 3,300 acre-feet per year for irrigation use. Contract terms dependent upon final non-Federal up-front cost sharing agreement.

10. Grand Valley Project, Colorado: Contract to continue operation and maintenance of Grand Valley powerplant.

11. State of Wyoming, Seedskadee Project, Wyoming: One contract for repayment of reimbursable cost associated with the modification of Fontenelle Dam pursuant to the Reclamation Safety of Dams Amendments of 1984 (P.L. 98-404); one amendatory repayment contract to increase existing repayment contract ceiling.

12. Miscellaneous water users, Upper Colorado Region, Blue Mesa Reservoir, Colorado River Storage Project Colorado: M&I uses, 20 acre-feet and less for 20-40 years.

13. ID's and similar water user entities: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (P.L. 97-293).

14. Bonneville Unit, Central Utah Project, Utah: Two repayment contracts for repayment of Jordan Aqueduct with Salt Lake County Water Conservancy District and the Metropolitan Water District. Contracts expected to be executed during May 1986.

15. Upper Yampa Water Conservancy District Colorado: Repayment contract to repay a loan of $4,478,000 for the construction of Stagecoach Dam and Reservoir pursuant to the SRPA of 1956, P.L. 84-984, as amended.

16. Ute Mountain Ute Tribe, Animas-La Plata Project, Colorado and New Mexico: Repayment contract; 6,000 acre-feet per year for M&I use in Colorado; 25,800 acre-feet per year for irrigation use in Colorado; 800 acre-feet per year for irrigation use in New Mexico.

17. Navajo Indian Tribe, New Mexico: Repayment contract for 7,000 acre-feet per year for M&I use.

18. Ute Mountain Ute Indian Tribe, Dolores Project, Colorado: Repayment contract for 1,000 acre-feet per year for M&I use and 22,900 acre-feet per year for irrigation.

19. Weber River Water Users, Weber River Project, Utah: Emergency contract to replace needle valves.

Lower Colorado Region: Bureau of Reclamation, P.O. Box 427 (Nevada Highway and Park Street), Boulder City, NV 89005, telephone (702) 293-8536

1. Salt River Project, and cities of Chandler, Glendale, Mesa, Phoenix, Scottsdale, and Tempe—Plan 6, CAP, Arizona: contract for purchase by the above cities of the entire yield from additional conservation storage capacity of Cliff Dam and modified Roosevelt Dam and establishment of operating criteria for those facilities.

2. Agricultural and M&I water users, CAP, Arizona: Water service subcontracts: a certain percent of available supply for irrigation entities and up to 640,000 acre-feet per year for M&I use.

3. Southern Arizona Water Rights Settlement Act: Sale of up to 28,200 acre-feet per year of municipal effluent to the city of Tucson, Arizona.

4. Contracts with five agricultural entities located near the Colorado River in Arizona, Boulder Canyon Project: Water service contracts for up to 1,920 acre-feet per year total.

5. Gila River Indian Community, CAP, Arizona: Water service contract; contract for delivery of up to 173,100 acre-feet per year.

6. Sunset Mobile Home Park, Boulder Canyon Project, Arizona: M&I water service contract for delivery of 30 acre-feet of water per year pursuant to recommendation of Arizona Department of Water Resources.

7. ID's and similar water user entities: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (P.L. 97-293).

8. Eastern Municipal Water District, Hemet, California: Repayment contract for $8.3 million SRPA escalation loan.

9. Indian and non-Indian agricultural and M&I water users, CAP, Arizona: Contracts for repayment of Federal expenditures for construction of distribution systems.

10. Gila River Indian Community, Arizona: Contract for the repayment of a $6,574,000 SRPA loan.

11. Water delivery contracts with the State of Arizona, the Bureau of Land Management, and several private entities which are in the process of being organized for a yet undermined amount of Colorado River water for M&I use. The purpose of these contracts is to afford legal status to various noncontractural water users within the State of Arizona.

12. Contract with the State of Arizona for a yet undermined amount of Colorado River water for agricultural use and related purposes on State-owned land.

13. Contract with 16 individual holders of miscellaneous present perfected rights to Colorado River water totaling 66 acre-feet, pursuant to the January 9, 1979, Supplemental Decree of the United States Supreme Court (439 U.S. 419) in *Arizona* v. *California*.

14. County of San Bernardino, San Bernardino, California: Repayment contract for $13.4 million SRPA loan.

Southwest Region: Bureau of Reclamation, Commerce Building, Suite 201, 714 South Tyler Amarillo, TX 79101, telephone (806) 378-5430

1. Fort Cobb Reservoir Master Conservancy District, Washita Basin Project, Oklahoma: Amendatory repayment contract to convert 4,700 acre-feet of irrigation water to M&I use.

2. Foss Reservoir Master Conservancy District, Washita Basin Project, Oklahoma: Amendatory repayment contract for remedial work.

3. Vermejo Conservancy District, Vermejo Project, New Mexico: Amendatory contract to relieve the district of further repayment obligation, presently exceeding $2 million, pursuant to Public Law 96-550.

4. Hidalgo County Irrigation District No. 1, Lower Rio Grande Valley, Texas: Supplemental SRPA loan contract for approximately $13,205,000. The contracting process is dependent upon final approval of the supplemental loan report.

5. ID's and similar water user entities; Amendatory repayment and water service contracts; Purpose is to conform with the Reclamation Reform Act of 1982 (P.L. 97-293).

6. Tom Green Water Improvement District, San Angelo Project, Texas: Amendatory contract to defer payment of construction charges associated with the 1985 crop year due to the nonavailability of irrigation water for use by the District's water users.

7. Rio Grande Water Conservation District, Alamosa, Colorado: Contract for the district to be the vender of the Closed Basin Division, San Luis Valley Project, surplus water if available.

Missouri Basin Region: Bureau of Reclamation, P.O. Box 2553, Federal Building, 316 North 26th Street, Billings, Montana 59103, Telephone (406) 657-6413

1. Individual irrigators, M&I, and miscellaneous water users, Missoui Basin Region, Montana, Wyoming, North Dakota, South Dakota, Colorado, Kansas, and Nebraska: Temporary (interim) water service contracts for surplus project water for irrigation or M&I use to provide up to 10,000 acre-feet of water annually for terms up to 5 years; long-term contracts for similar service for up to 1,000 acre-feet of water annually.

2. Nokota Company, Lake Sakakawea, P-SMBP, North Dakota: Industrial water service contract; up to 16,800 acre-feet of water annually; FR notice published May 5, 1982, Vol. 47, Page 19472.

3. Fort Shaw ID, Sun River Project, Montana: R&B loan repayment contract; up to $1.5 million.

4. ID's and similar water user entities: Amendatory repayment and water service contracts; purpose is to conform to the Reclamation Reform Act of 1982 (P.L. 97-293).

5. Oahe Unit, P-SMBP, South Dakota: Cancellation of master contract and participating and security contracts in accordance with P.L. 97-273 with South Dakota Board of Water and Natural Resources and Spink County and West Brown Irrigation Districts.

6. Owl Creek ID, Owl Creek Unit, P-SMBP, Wyoming: Amendatory water service contract to reflect water supply benefits being received from Anchor Reservoir.

7. Almena ID No. 5, Almena Unit, P-SMBP, Kansas: Deferment of repayment obligation for 1985.

8. Purgatoire River Water Conservancy District, Trindad Project, Colorado: Amendatory repayment contract for extension of the development period and revision of the repayment determination methodology.

9. Corn Creek ID and Earl Michael, Glendo Unit, P-SMBP, Wyoming, and Nebraska: Irrigation contracts.

10. Webster ID No. 4, Webster Unit, P-SMBP, Kansas: Irrigation water service and repayment contract amendment to adjust payment due to reduced water supply, $870,616 outstanding.

11. Green Mountain Reservoir, Colorado-Big Thompson Project: Proposed contract negotiations for sale of water from the marketable yield to water users within the Colorado River drainage of western Colorado.

12. Ruedi Reservoir, Fryingpan-Arkansas Project, Colorado: Second round of proposed contract negotiations for sale of water from the regulatory capacity of Ruedi Reservoir.

13. Lower South Platte Water Conservancy District, Central Colorado Water Conservancy District, and the Colorado Water Resources and Power Development Authority, P-SMBP, Narrows Unit, Colorado: Water service contracts for repayment of costs and cost sharing agreement.

14. Kirwin ID No. 1, Kirwin Unit, P-SMBP, Kansas: Deferment of repayment obligation for 1986.

15. Kirwin ID No. 1, Kirwin Unit, P-SMBP, Kansas: Irrigation water service and repayment contract and Emergency Drought Act loan contract amendment to adjustment payments due to reduced water supply, $866,231 outstanding.

16. Cedar Bluff ID No. 6, Cedar Bluff Unit, P-SMBP, Kansas: Deferment of repayment obligation for 1985 and 1986.

17. Webster ID No. 4, Webster Unit, P-SMBP, Kansas: Deferment of repayment obligation for 1986.

18. Fryingpan-Arkansas Project, Colorado: East Slope Storage system consisting of Pueblo, Twin Lakes, and Turquoise Reservoir; Contract negotiations for long-term storage contracts.

19. Twin Loups Reclamation District, P-SMBP: D&MC contract for correction of initial construction deficiencies and monitoring during initial filling, priming and puddling activities of the project. Proposed contract is to be $500,000.

20. Farwell Irrigation District, Nebraska: D&MC contract for the correction of drainage and seep area on the project.

21. Colorado-Big Thompson Project, Colorado: Contract amendment and supplement to transfer certain joint use facilities to the Northern Colorado Water Conservancy District for operation and maintenance.

22. Almena Irrigation District No. 5, Almena Unit, Pick-Sloan Missouri Basin Program, Kansas: Irrigation water service and repayment contract amendment to adjust payment due to reduced water supply, $576,090 outstanding.

23. Cedar Bluff Irrigation District No. 6, Cedar Bluff Unit, Pick-Sloan Missouri Basin Program, Kansas: Irrigation water service and repayment contract amendment to adjust payments due to reduced water supply, $621,078 outstanding.

24. Twin Loups Irrigation District, Pick-Sloan Missouri Basin Program: Amend repayment contract to include increased project construction cost and adjust payments to full current payment capacity.

Opportunity for public participation and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

(1) Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

(2) Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or project office of the Bureau of Reclamation.

(3) All written correspondence regarding proposed contracts will be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

(4) Written comments on a proposed contract or contract action must be submitted to the appropriate Bureau of

VOL 51 ISS 82 AP 29 1986

Reclamation officials at locations and within time limits set forth in the advance public notices.

(5) All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority

(6) Copies of specific proposed contracts may be obtained from the appropriate Regional Director or his designated public contact as they become available for review and comment.

(7) In the event modifications are made in the form of proposed contract, the appropriate Regional Director shall determine whether republication of the notice and/or extension of the 60-day comment period is necessary.

Factors which shall be considered in making such a determination shall include, but are not limited to: (i) The significance of the impact(s) of the modification and (ii) the public interest which has been expressed over the course of the negotiations. At a minimum, the Regional Director shall furnish revised contracts to all parties who requested the contract in response to the initial public notice.

Dated: April 23, 1986.

C. Dale Duvall,

Commissioner of Reclamation.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB-105 (Sub.-No. 8)]

Western Pacific Railroad Co., Findings on Abandonment and Discontinuance of Service in San Francisco County, CA

The Commission has found that the public convenience and necessity permit the Western Pacific Railroad Company: (1) To abandon its 4.60-mile line of railroad from milepost 0.23 to the end of the line at milepost 0.92 and from milepost 1.26 to the end of the line at milepost 2.24; from E.S. 0+00 at approximately Illinois and 25th Streets along Army Street to Loomis Street to the end of the line past Helena Street at E.S. 108+83.1 and from E.S. 0+00 at Loomis Street near Marin Street to the end of the line at E.S. 35+58.8 at Missouri Street and from E.S. 0+00 at Barneveld Avenue to the end of the line at E.S. 10+35.8 between Upland and Toland Streets on McKinnon Avenue; and (2) to discontinue service over trackage (a) of the Atchison, Topeka, and Santa Fe Railway Company (ATSF) between E.S. 11+65± at approximately 25th and Minnesota Streets and E.S. 61+90.2 at approximately Pennsylvania and Mariposa Streets (approximately 0.95 miles); and (b) jointly owned ATSF/ and the Southern Pacific Transportation Company track between E.S. 61+90.2 at approximately Pennsylvania and Mariposa Streets and E.S. 93+20± at approximately 16th and Rhode Island Streets (approximately 0.59 miles).

A certificate will be issued authorizing this abandonment and discontinuance of service unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and the applicant no later than 10 days from publication of this Notice. The following notation must be typed in bold face on the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; Atlas Chain Co., et al.

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 9, 1986.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 9, 1986.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, DC 20213.

Signed at Washington, DC, this 21st day of April 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance

[TA-W-16,494]

Publix Shirt Corp., Myerstown, PA; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on March 14, 1986, applicable to all workers of Publix Shirt Corporation, Myerstwon, Pennsylvania. The Notice of Certification was published in the Federal Register on March 25, 1986 (51 FR 10285).

On the basis of additional information, the Office of Trade Adjustment Assistance, reviewed the certification. The additional information from the company revealed that several layoffs occurred after the termination date set in the Department's certification and are still continuing. These workers were involved in winding down the operations and closing the Myerstown plant.

UMI

VOL 51 ISS 82 AP 29 1986 UMI

The intent of the certification is to cover all workers at the Myerstown, Pennsylvania plant of the Publix Shirt Corporation who were affected by the decline in the sales or production of men's woven and knit sport shirts related to import competition. The notice, therefore, is amended by providing a new termination date of July 1, 1986.

The amended notice applicable to TA-W-16,494 is hereby issued as follows:

All workers of Publix Shirt Corporation, Myerstown, Pennsylvania who became totally or partially separated from employment on or after September 16, 1984 and before July 1, 1986 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC, this 17th day of April 1986.

James D. Van Erden,
Acting Deputy Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

Notice of Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period April 14, 1986–April 18, 1986.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-16,534; ITW Paktron, Lynchburg, VA

TA-W-16,625; Pettibone Tiffin Corp., Tiffin, OH

TA-W-16,581; Homestead Woolen Mills, Inc., West Swanzey, NH

TA-W-16,552; Connor Forest Industries, Inc., Laona, WI

TA-W-16,553; Driver-Harris Co., Harrison, NJ

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-16,608; Valley Mould Division of Microdot, Cleveland, OH

Aggregate U.S. imports of ingot moulds are negligible.

TA-W-16,603; Keebler Co., Philadelphia, PA

Separations from the subject firm resulted from a transfer of production to other domestic facilities.

TA-W-16,635; General Electric Co., Mentor, OH

Produces components and parts used by other GE plants producing lamps. None of these other production facilities are under current certification, therefore, they do not independently meet the statutory criteria for certification.

Affirmative Determinations

TA-W-16,586; Dresser Industries, Inc., Marion Power Shovel Division, Marion, OH, Foundry

A certification was issued covering all workers of the Marion Power Shovel Division, Marion, OH, Foundry separated on or after September 20, 1984.

TA-W-16,556A; Dresser Industries, Marion Power Shovel Division, Marion, OH, Manufacturing Segment

A certification was issued covering all workers of the Marion Power Shovel Division, Marion, OH, Manufacturing Segment separated on or after September 20, 1984.

TA-W-16,466; The Crosby Group, Inc., Laughlin Plant, Portland, ME

A certification was issued covering all workers of the firm separated on or after September 12, 1984.

TA-W-16,543; Reynolds Metals Co., San Patricio Plant, Corpus Christi, TX

A certification was issued covering all workers of the firm separated on or after October 4, 1984.

TA-W-16,651; American Mfg. Co., Inc., Honesdale, PA

A certification was issued covering all workers of the firm separated on or after November 12, 1984.

TA-W-16,653; E.W. Ferry Screw Products, Inc., Brook Park, OH

A certification was issued covering all workers of the firm separated on or after November 14, 1984.

TA-W-16,643; Armstrong Rubber Co., Natchez, MS

A certification was issued covering all workers of the firm separated on or after November 4, 1984.

TA-W-16,598; Weyerhaeuser Co., Shakemill Div., Longview, WA

A certification was issued covering all workers of the firm separated on or after September 24, 1984.

TA-W-16,582; Insley Manufacturing Corp., Indianapolis, IN

A certification was issued covering all workers of the firm separated on or after July 1, 1985 and before March 31, 1986.

TA-W-16,590; LTV Steel Co., South Chicago Works, Chicago, IL

A certification was issued covering all workers of the firm separated on or after October 1, 1984.

TA-W-16,565; Terry Footwear, Paterson, NJ

A certification was issued covering all workers of the firm separated on or after October 10, 1984.

TA-W-16,661; A.C. Lawrence Leather Co., Inc., South Paris, ME

A certification was issued covering all workers of the firm separated on or after November 6, 1984.

TA-W-16,602; Globe Metallurgical, Inc., Beverly, OH

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA-W-16,570; H. Margolin Co., Inc., Fitchburg, MA

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA-W-16,691; Misty Mfg. Co., Baltimore, MD

A certification was issued covering all workers of the firm separated on or after October 15, 1984 and before December 27, 1985.

TA-W-16,520; Centralab, Inc., Fort Dodge, IA

A certification was issued covering all workers related to the production of potentiometers separated on or after September 27, 1984.

TA-W-16,544; Powell Enterprises, Inc., McCleary, WA

A certification was issued covering all workers of the firm separated on or after September 24, 1984 and before September 30, 1985.

I hereby certify that the aforementioned determinations were issued during the period April 14, 1986—April 18, 1986. Copies of these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Street, NW. Washington, DC during normal business hours or will be mailed to persons who write to the above address.

Dated: April 22, 1986.

Marvin M. Fooks,
Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

State Plans; Wyoming State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State Plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On May 3, 1974, notice was published in the Federal Register (39 FR 15394) of the approval of the Wyoming Plan and adoption of Subpart BB to Part 1952 containing the decision.

The Plan provides for the adoption of Federal Standards as State Standards by:

1. Advisory Committee coordination.
2. Publication in newspapers of general/major circulation throughout the state, with a 45-day waiting period for public comment and hearings. This is pursuant to the Wyoming Administrative Procedures Act 1977, Section 16-3-103(a)(1).
3. Adoption by the Wyoming Health and Safety Commission.
4. Reveiw and approval by the Governor.
5. Filing with Secretary of State and designation of an effective date.

OSHA regulations (29 CFR 1953.22 and .23) require that States respond to the adoption of new or revised permanent Federal standards by State promulgation of comparable standards within six months of OSHA publication in the Federal Register, and within 30 days for emergency temporary standards. Although adopted State standards or revisions to standards must be submitted for OSHA review and approval under procedures set forth in Part 1953, they are enforceable by the state prior to federal review and approval. By letter dated November 13, 1985, from Donald D. Owsley, Administrator, Wyoming Occupational Health and Safety Division, to Byron R. Chadwick, OSHA Regional Administrator, the State submitted rules and regulations in response to Federal OSHA's General Industry Standards (29 CFR 1910.20: Access to Employee Exposure and Medical Records, 45 FR 35212, Friday, May 23, 1980).

The above adoptions of Federal standards have been incorporated in the State Plan, and are contained in the Wyoming Occupational Health and Safety Rules and Regulations for General Industry, as required by Wyoming Statute 1977, Section 27-11-105(a)(viii).

State standards for 29 CFR Part 1910: Access to Employee Exposure and Medical Records were adopted by the Health and Safety Commission of Wyoming on November 9, 1984 (effective January 3, 1985) pursuant to Woming statute 1977, Section 27-11-105. The State standards on Access to Employee Exposure and Medical Records are substantially identical to the Federal 29 CFR 1910.20 except for the following minor differences: (a) Paragraph numbering; (b) use of specific dates rather than "latest printed edition" when referring to publication dates; (c) information necessary in letter for authorizing release of information is placed in the "Definitions" Section of their standard rather than in an appendix; (d) access to employee medical records are provided in Wyoming without restrictions placed due to physical or mental condition of the employee.

2. Decision

The above State Standards have been reviewed and compared with the relevant Federal Standards. OSHA has determined that the State Standards are at least as effective as the comparable Federal Standards, as required by Section 18(c)(2) of the Act. OSHA has also determined that the differences between the State and Federal Standards are minimal and that the Standards are thus substantially identical. OSHA therefore approves these standards; however, the right to reconsider this approval is reserved should substantial objections be submitted to the Assistant Secretary.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Room 1576, Federal Office Building, 1961 Stout Street, Denver, Colorado 80294; the Occupational Health and Safety Department, 604 East 25th Street, Cheyenne, Wyoming 82002; and the Office of State Programs, Room N-3700, 200 Constitution Avenue, NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplements to the Wyoming State Plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reason(s):

The standards were adopted in accordance with the procedural requirements of State law which included public comment and further public participation would be repetitious. This decision is effective April 29, 1986.

(Sec. 18, Pub. L. 596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Denver, Colorado, this 10th day of March, 1986.

Byron R. Chadwick,
Regional Administrator.

BILLING CODE 4510-26-M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 86-52; Exemption Application No. D-6351 et al.]

Grant of Individual Exemptions; Johnson & Swanson Cash or Deferred Profit Sharing Plan et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

VOL 51 ISS 82 AP 29 1986 UMI

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the Federal Register of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Johnson & Swanson Cash or Deferred Profit Sharing Plan (the Plan) Located in Dallas, Texas

[Prohibited Transaction Exemption 86–52; Exemption Application No. D–6351]

Exemption

The restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the purchases, from time to time during a five-year period, for participant-directed accounts (the Directed Accounts) under the Plan from such participants (the Requesting Individuals) of notes or undivided interests in notes (collectively, the Notes) evidencing loans made by the Requesting Individuals to Johnson & Swanson, in which the Requesting Individuals are either general partners or officers and employees, provided the purchase price is not more than the fair market value of the Notes on the date of each purchase; and (2) the continued holding for the Directed Accounts of such Notes until they are fully paid, provided the terms of such transactions are at least as favorable to the Directed Accounts as the terms the Directed Accounts could obtain in similar transactions with an unrelated party.

Temporary Nature of Exemption

This exemption is temporary and will expire five years after the date of grant with respect to the purchase of any Note. Notes purchased during said five-year period may be held for the Directed Accounts until such Notes are fully paid. Should the applicants wish to continue the purchase transactions after the five-year period has expired, they may submit another application for exemption.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 14, 1986 at 50 FR 6912.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

John R. Johnson, P.C. Cash or Deferred Profit Sharing Plan (the Plan) Located in Dallas, Texas

[Prohibited Transaction Exemption 86–53; Exemption Application No. D–6361]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the purchases, from time to time during a five-year period, by the Plan from John R. Johnson, P.C. (the Employer) of notes or undivided interests in notes (collectively, the Notes) evidencing loans made by the Employer to Johnson & Swanson, in which the Employer is general partner, provided the purchase price is not more than the fair market value of Notes on the date of each purchase; and (2) the continued holding by the Plan of such Notes until they are fully paid, provided the terms of such transactions are at least as favorable to the Plan as the terms it could obtain in similar transactions with an unrelated party.

Because Mr. John R. Johnson is the sole owner of the Employer and the sole participant in the Plan, the Plan is subject to Title II of the Act only, and is not subject to Title I (see 29 CFR § 2510.3–3 (b) and (c)).

Temporary Nature of Exemption

This exemption is temporary and will expire five years after the date of grant with respect to the purchase of any Note. Notes purchased during said five-year period may be held by the Plan until such Notes are fully paid. Should the applicant wish to continue the purchase transactions after the five-year period has expired, he may submit another application for exemption.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 14, 1986 at 50 FR 6914.

For Further Information Contact: Mrs. Miriam Freund, of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

Ernest E. Figari, Jr., P.C. Cash or Deferred Profit Sharing Plan (the Plan) Located in Dallas, Texas

[Prohibited Transaction Exemption 86–54; Exemption Application No. D–6362]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975 (c)(1) (A) through (E) of the Code, shall not apply to: (1) the purchases, from time to time during a five-year period, by the Plan from Ernest E. Figari, Jr., P.C. (the Employer) of notes or undivided interests in notes (collectively, the Notes) evidencing loans made by the Employer to Johnson & Swanson, in which the Employer is a general partner, provided the purchase price is not more than the fair market value of the Notes on the date of each purchase; and (2) the continued holding by the Plan of such Notes until they are fully paid, provided the terms of such transactions are at least as favorable to the Plan as the terms it could obtain in similar transactions with an unrelated party.

Because Mr. Ernest E. Figari, Jr. is the sole owner of the Employer and the sole participant in the Plan, the Plan is subject to Title II of the Act only, and is not subject to Title I (see 29 CFR § 2510.3–3 (b) and (c)).

Temporary Nature of Exemption

This exemption is temporary and will expire five years after the date of grant with respect to the purchase of any Note. Notes purchased during said five-year period may be held by the Plan until such Notes are fully paid. Should the applicant wish to continue the purchase transactions after the five-year period has expired, he may submit another application for exemption.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 14, 1986 at 50 FR 6916.

For Further Information Contact: Mrs. Miriam Freund of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 22nd day of April, 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 86-9480 Filed 4-28-86; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D–6251 et al.]

Proposed Exemptions; Martin, Ryan & Andrada Employee Profit Sharing Plan and Trust et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N–5669, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW, Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Martin, Ryan & Andrada Employee Profit Sharing Plan and Trust (the Plan) Located in Oakland, California

[Application No. D–6251]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to: (1) The proposed loan by the Plan of $54,000 to Martin, Ryan & Andrada, P.C., the Plan sponsor, under the terms and conditions described in this notice of proposed exemption, provided that such terms and conditions are not less favorable to the Plan than those obtainable by the Plan in an arm's-length transaction with an unrelated

VOL 51 ISS 82 AP 29 1986 UMI

party; and (2) the continuing personal guarantee of the Loan by Joseph D. Ryan, Jr., Gerald P. Martin, Jr., and J. Randal Andrada, parties in interest with respect to the Plan.

Summary of Facts and Representations

1. Martin, Ryan & Andrada, P.C., the Plan sponsor (the Plan Sponsor), is a law firm located in Oakland, California, consisting of eight attorneys.

2. The Plan had approximately $230,000 in assets as of February, 1985, and had 10 participants as of July 10, 1985. The trustees of the Plan are Gerald P. Martin, Jr. and Joseph D. Ryan, Jr.

3. The Plan proposes to lend $54,000 (the Loan) to the Plan Sponsor to finance office renovation. The Loan amount is approximately 23.5% of the Plan's assets.

4. The proposed Loan will be repaid in equal monthly installments of interest and principal over a period of sixty (60) months and will accrue interest at a rate of two percent (2%) over the prime rate set by the Bank of America on the date of the Loan. The Loan will be collateralized by a promissory note and security agreement duly effected in accordance with California law. Financing statements will be filed in appropriate state and county offices as required by the Uniform Commercial Code as adopted in California. The Loan will be secured by a first security interest in the accounts receivable of the Plan Sponsor. The applicant represents that the accounts receivable will be maintained at no less than 200% of the outstanding balance of the Loan at all times and will not be otherwise encumbered. The accounts receivable are not conditioned upon future performance by the Plan Sponsor, but are due and payable upon receipt by the Plan Sponsor's clients. The applicant further represents that the financial statements of the Plan Sponsor for the past two years illustrate the ability of the Plan Sponsor to generate the income with which to repay the Loan to the Plan. Finally, the applicant represents that the Loan will be further secured by the personal continuing guarantees of Joseph D. Ryan, Jr., Gerald P. Martin, Jr., and J. Randall Andrada, whose combined net worth exceeds $700,000.

5. George A. Malloch, Esq. (Mr. Malloch), of the San Francisco Law firm of Kaplan, Russin, Vecchi, Eytan & Collins, has agreed to serve as the independent fiduciary for the Plan with respect to the Loan. Mr. Malloch represents that he is qualified to serve in this capacity by virtue of his experience as an attorney with practice in business and tax law, and is aware of the duties, responsibilities and liabilities entailed in acting as independent fiduciary with respect to the Loan. Mr. Malloch further represents that he is not in any way related to the Plan Sponsor, the Plan or any of the principals thereof.

Mr. Malloch states that the proposed transaction is in the best interest of the Plan and its participants and beneficiaries since, in his opinion, the rate of return to the Plan would be in excess of that available to the Plan under other investments and would be one of the better performing assets in the Plan's portfolio. Mr. Malloch further states that the proposed Loan would be adequately secured by the accounts receivable of the Plan Sponsor and by the continuing personal guarantees of Messrs. Ryan, Martin, and Andrada.

Mr. Malloch represents that he reached this opinion after reviewing the Plan's most recent financial statements and the Plan's overall investment portfolio in terms of the Plan's liquidity requirements and the general diversification requirements of Plan assets,

In his capacity as independent fiduciary, Mr. Malloch will receive all Loan payments for the Plan, and will have the authority and responsibility of enforcing the terms of the Loan and accompanying security agreements, including making demand for timely payment, bringing suit or other timely process against the Plan Sponsor in the event of default, and monitoring the performance of the Loan, specifically including, but not limited to, ensuring that the value of the collateral securing the proposed Loan remains at no less than 200% of the outstanding balance of the Loan.

6. In summary, the applicant represents that the proposed transaction meets the statutory criteria under section 408(a) of the Act because: (a) The Loan will be approved, monitored, and enforced by an independent fiduciary; (b) the Loan will be secured by the value of the accounts receivable of the Plan Sponsor, which will at all times be no less than 200% of the outstanding balance of the Loan, and by the continuing personal guarantees of Messrs. Martin, Ryan, and Andrada; (c) the Loan will be for no more than 25% of the Plan's assets; and (d) the Plan's independent fiduciary has determined that the Loan is prudent and in the best interest of the participants and beneficiaries of the Plan.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

Profit Sharing Plan and Trust Agreement of Oregon Orthopedic Clinic, P.C. (the Plan) Located in Portland, Oregon

[Application No. D-6388]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and (b)(2) and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply, effective August 1, 1985, to the past and proposed lease of certain real property by the Plan to the Oregon Orthopedic Clinic, P.C. (the Employer), the sponsor of the Plan, provided that such lease has been and will be on terms at least as favorable to the Plan as the Plan could obtain in an arm's-length transaction with an unrelated party.

Effective Date: This exemption, if granted, shall be effective as of August 1, 1985.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with thirteen participants and total assets of $1,415,975.11 as of December 31, 1985. The Employer is an Oregon professional corporation engaged in the practice of orthopedic medicine. The trustees of the Plan are Raymond A. Case, M.D. and Michael S. Baskin, M.D. (the Trustees), each of whom is an employee and shareholder of the Employer. Among the assets of the Plan is a parcel of real property (the Property) located at 2565 Lovejoy Street in Portland, Oregon. The Plan acquired the Property of December 21, 1973 from a partnership (the Partnership) consisting of the Trustees and Calvin Kiest, M.D., who is also an employee and shareholder of the Employer. The Partnership transferred to the Plan only the land constituting the Property, specifically reserving ownership of the improvements which were on the Property (the Improvements). The Improvements, which are still owned by the Partnership, are leased to the Employer and constitute the Employer's principal place of business. The Partnership commenced leasing the Property back from the Plan on June 1, 1973 under a ten-year lease (the Initial Lease). The Initial Lease pre-dates the Plan's recorded acquisition of title in the Property because the Partnership and the Plan had contracted in early 1973 for

the Plan to acquire the Property from the Partnership, although the deed transferring title was not recorded until December 21, 1973. The Initial Lease was a lease of the land only and specified that the lessee would retain title to all improvements on the land. Commensurate with the Initial Lease, the Partnership commenced to sublease the Property to the Employer. On July 1, 1981, the Employer began making rental payments directly to the Plan and continued for the duration of the Initial Lease to discharge the Partnership's obligations and act in the place of the Partnership as lessee under the Initial Lease. The Initial Lease expired on June 30, 1983 and was renewed between the Plan and the Employer to remain effective through June 30, 1984. The Employer represents that the lease of the Property by the Plan to the Partnership and the Employer continuously since June 1, 1973 satisfied the requirements of section 414(c)(2) of the Act and, therefore, was exempt until June 30, 1984 from the prohibitions of sections 406 and 407 of the Act by virtue of section 414(c)(2) of the Act.[1] In recognition of the expiration on June 30, 1984 of the statutory exemption of section 414(c)(2) of the Act, the Employer and the Plan entered into a new lease (the New Lease) effective July 1, 1984 which amended the terms of the Initial Lease in certain respects intended to facilitate an administrative exemption for the continued lease arrangement past June 30, 1984. The Employer is requesting and exemption for the Plan's lease of the Property to the Employer past June 30, 1984 under the New Lease. For reasons discussed below, the exemption, if granted, will be effective as of August 1, 1985.

2. The New Lease is a triple net lease with an initial term of three years. The interests of the Plan for all purposes under the New Lease are represented by an independent fiduciary, Pacific Western Bank (the Fiduciary) in Portland, Oregon, which represents that it is independent of and unrelated to the Employer and that it has substantial fiduciary experience under the Act. Rental under the New Lease is to be paid monthly. The New Lease is renewable upon approval of the Fiduciary for successive three-year terms. Rental for any renewal periods under the New Lease will be determined at the outset of such renewal period in an amount no less than the Property's fair market rental value according to an independent, professional real estate appraiser selected by the Fiduciary, but in no event will the rental be decreased from the rental rate for the immediately preceding term. Under the New Lease the Employer pays all costs of maintenance and repairs, utilities and taxes related to the Property and agrees to indemnify and hold the Plan harmless against all claims which might arise from the Employer's use of the Property. The New Lease requires the Employer to maintain personal and property liability insurance acceptable to the Fiduciary.

3. The Fiduciary obtained an appraisal of the Property from Kirk W. Shaeffer, MAI, SRPA (Shaeffer), an independent professional real estate appraiser with the firm of Real Estate Analysis Northwest in Portland, Oregon. Shaeffer determined that as of August 20, 1985, the Property, exclusive of the Improvements, had a fair market value of $206,000 to $232,000, depending on whether the land would be sold for cash or on a contract. Shaeffer, also determined that as of that date the Property had a fair market value of ten percent per annum, on a triple net basis, of its fair market value. Accordingly, the initial rental under the New Lease is set at $1,934 per month, which represents ten percent per annum of Shaeffer's higher valuation of the Property at $232,000. As of June 30, 1984, the Plan was receiving rental of $1,300 per month. The plan began receiving rental under the New Lease in the amount of $1,934 per month on August 1, 1985. The Employer and the Fiduciary agree that the rental rate according to Shaeffer's appraisal must be applicable retroactively from July 1, 1984 and the Employer has paid the Plan in an amount sufficient to compensate the Plan at the rate of Shaeffer's appraisal retroactively from July 1, 1984 through August 1, 1985. Additionally, with respect to these additional rental amounts, the Employer has paid the Plan interest at a rate determined by the Fiduciary to be appropriate to compensate the Plan for lost interest on such amounts. The Department is not proposing exemptive relief for any period prior to August 1, 1985 because that is the first date subsequent to June 30, 1984 that the Plan began to receive rental under the Lease in an amount no less than the appraised fair market rental value of the Property and was represented by the Fiduciary. The Employer recognizes that the lease of the Property from the Plan for the period commencing June 30, 1984 through August 1, 1985 constituted a prohibited transaction under the Act and the Code for which no exemptive relief is proposed herein. Accordingly, the Employer represents that it will pay any excise taxes which are applicable under section 4975(a) of the Code by reason of such lease of the Property within 60 days of the publication in the Federal Register of a notice granting the exemption proposed herein.

4. On behalf of the Plan the Fiduciary will monitor the performance of the Employer under the New Lease and represent the Plan in enforcement of its terms and conditions. The New Lease is expressly made subject to the condition that, on behalf of the Plan, an independent fiduciary should determine that the terms of the New Lease are fair to the Plan and that ownership of the Property is a good investment for the Plan. The Fiduciary represents that it has reviewed and evaluated the Plan's lease of the Property to the Employer under the New Lease. Based on such review, the Fiduciary represents that the subject arrangement constitutes a good investment with adequate independent safeguards for the Plan's participants and beneficiaries. The Fiduciary has determined that the terms of the New Lease are equal to, if not better than, terms which the Plan could obtain in an arm's-length transaction with an unrelated party, noting that most triple net leases require the lessor to be responsible for certain elemental maintenance, such as roof and exterior walls, which the New Lease places upon the lessee. The Fiduciary finds that the Property, constituting less than 20 percent of the assets of the Plan, does not represent a diversification problem in view of the Plan's overall investment portfolio. The Fiduciary cites the short duration of the New Lease's initial term and any renewal terms as an additional safeguard for the Plan, assuring the Fiduciary of ongoing opportunities to reassess the New Lease in the context of changing market conditions. The Fiduciary concludes that the Employer's lease of the Property from the Plan under the New Lease is in the best interests of the participants and beneficiaries of the Plan.

5. The Fiduciary has obtained an opinion of counsel on the issue of whether the Plan acquired title to the Improvements on the Property by virtue of the expirations on June 30, 1984 of the Initial Lease and the statutory exemption at section 414(c)(2) of the Act. The Fiduciary represents that according to such opinion of counsel, under prevailing state law applicable to the facts and circumstances of this exemption application, ownership of the Improvements is not deemed to have passed from the Partnership or the

[1] The Department expresses no opinion as to whether the lease of the Property by the Plan to the Partnership and the Employer satisfied the requirements of section 414(c)(2) of the Act.

VOL 51 ISS 82 AP 29 1986 UMI

Employer to the Plan upon the June 30, 1984 expirations of the Initial Lease and the statutory exemption at section 414(c)(2) of the Act.

6. In summary, the applicant represents that the criteria of section 408(a) of the Act have been and will be satisfied in the subject transaction for the following reasons: (1) The interests of the Plan under the New Lease have been and will remain represented by an independent fiduciary which has determined that the subject arrangement is in the best interests and protective of the Plan and on terms which are equal to, if not better than, those which the Plan could obtain in an arm's-length transaction with an unrelated party; (2) The New Lease is a triple net lease of short duration requiring the Fiduciary's approval for renewal; (3) The Plan has been paid the appraised fair market rental value of the Property in back rentals retroactively from July 1, 1984, with interest, and the New Lease ensures the continued payment of the Property's fair market rental value in future rentals; and (4) The Fiduciary will monitor the Employer's performance under the New Lease and will represent the Plan in enforcement of its terms and conditions.

For Further Information Contact: Ronald Willett of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Gene Fryar, D.D.S., Inc. Employees Assumed Target Benefit Pension Plan (the Plan) Located in Michigan City, Indiana

[Application No. D-6402]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a) and 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the purchase on behalf of the individual account in the Plan of Gene Fryar, D.D.S. (Fryar) from Fryar of up to 5,270 shares of common stock of the LaPorte Bancorp., provided (1) the Plan will pay no more than fair market value for the stock at the time of purchase and (2) at the time of purchase the stock will not represent more than 25 percent of the assets of Fryar's individual account in the Plan.

Summary of Facts and Representations

1. The Plan is a target benefit defined contribution plan with six participants and total assets of $360,984 as of September 30, 1985. The Valley American Bank and Trust Co. of South Bend, Indiana, is the trustee (the Trustee) for the Plan. The Trustee maintains individual accounts for each Plan participant and provides that a participant may direct the investments of his or her account. The Trustee is unrelated to the LaPorte Bancorp. (LaPorte Bancorp.), a bank holding company, and its wholly-owned subsidiary, LaPorte Bank and Trust Company.

2. Fryar is a participant in the Plan as well as the sole shareholder of Gene Fryar, D.D.S., Inc., the sponsor of the Plan. The total assets in Fryar's account on September 30, 1985, equaled $305,928. Fryar owns 5,270 shares of common stock of LaPorte Bancorp., which represent approximately two percent of the issued and outstanding common stock of LaPorte Bancorp. As of December 31, 1984, LaPorte Bancorp. had total assets of $7,735,440 and total liabilities of $3,210,786.

3. Upon request of the applicant, the First of Michigan Corporation (First of Michigan), a broker-dealer located in Valparaiso, Indiana, issued a statement concerning the common stock of the LaPorte Bancorp. on December 9, 1985. The applicant represents that First of Michigan is independent of Fryar and the other parties to the proposed transaction. According to First of Michigan, no market exists for the LaPorte Bancorp. common stock and the most recent quarterly book value per share would represent the fair market value of the stock. The book value of the stock as of June 30, 1985, was $13.87. per share.

4. At the direction of Fryar, the Trustee proposes to purchase for Fryar's account in the Plan the 5,270 shares of the common stock of LaPorte Bancorp. owned by Fryar. The transaction should account for approximately 23.9 percent of the assets in Fryar's account, based on the most recent available data. The Plan will pay no more than fair market value for the stock at the time of purchase, based on the then most recent quarterly book value of the stock. However, if at the time of purchase the fair market value of the 5,270 shares of the stock exceeds 25 percent of the assets of the individual account of Fryar in the Plan, Fryar's account will purchase proportionately fewer shares. The purchase will be entirely for cash and no fees or commissions will be paid by the Plan in connection with the transaction. Fryar believes the purchase will be a prudent investment for the account because he anticipates that the stock will appreciate in value, due, in part, to the current diminishing of restrictions on multi-county and multi-state bank holding companies.

5. In summary, the applicant represents that the proposed transaction will satisfy the statutory criteria of section 408(a) of the Act because: (1) The purchase of the stock will be completely for cash and will involve no fees or commissions; (2) the Plan will pay no more than fair market value for the stock at the time of purchase, based on the most recent quarterly book value of the stock; (3) the transaction will involve only Fryar's individual account in the Plan and will represent no more than 25 percent of the assets in that account; and (4) the applicant believes that the stock should appreciate in value, resulting in further growth of the account.

Watson Clinic Employees Profit Sharing Plan and Watson Clinic Partners Profit Sharing Plan (the Plans) Located in Lakeland, Florida

[Application Nos. D-6422 and D-6423]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to loans of money (the 1986 Loans) from the Plans to Watson Clinic (the Employer), the sponsor of the Plans.

Summary of Facts and Representations

1. The Employer is a general partnership which is engagd in the practice of medicine. The Watson Clinic Employees Profit Sharing Plan (the Employees Plan) is a defined contribution plan with approximately 339 participants and net assets of $14,811,740 as of January 31, 1985. The Watson Clinic Partners Profit Sharing Plan (the Partners Plan) is a defined contribution plan with approximately 44 participants and net assets of $2,863,235 on January 31, 1985.

The United Missouri Bank of Kansas City, N.A. serves as the trustee (the Trustee) for the Plans. The Trustee provides no other banking services to the Employer. The Plans are administered by an advisory committee of five persons (three partners in the Employer and two employees of the Employer) appointed by the Employer. The advisory committee has the duty to direct the Trustee, or may appoint an investment counselor to do so, in regard to the investment of Plan assets. The Trustee, however, may decline to follow investment directions of the advisory committee when it believes such directions are not in the best interests of the Plans.

2. The Department granted a previous exemption (Prohibited Transaction Exemption (PTE) 81-65, 46 FR 39246) on July 31, 1981, to permit a loan of money (the 1981 Loan) by the Employees Plan to the Employer. The loan of $3,000,000 was used for an expansion of a clinic owned by the Employer. The extension of credit was made for a period of 15 years, with equal payments of principal and interest to be made monthly. The 1981 Loan has an interest rate of ¾ percent above the prime rate set by the Peoples Bank of Lakeland, Florida, but is not to fall below 10 percent per annum. The 1981 Loan is secured by the accounts receivable of the Employer, with those receivables having at all times during the term of the loan a value in excess of 175 percent of the understanding balance of the loan. As of November 15, 1985, the balance of the 1981 Loan was $2,807,474.

3. The Employer now proposes to borrow from both Plans an additional amount of money (the 1986 Loans) not to exceed 25 percent of the assets of each Plan. The exact amount of each 1986 Loan will be based on a current valuation of Plan assets prepared by the Trustee at the time the requested exemption is granted. With respect to a 1986 Loan from the Employees Plan, the 25 percent amount will be reduced by the then outstanding balance due on the 1981 Loan obtained under PTE 81-65. The 1986 Loans from each Plan will be used for further expansion of facilities and acquisition of equipment for the Employer's clinic. The loans will be repaid in equal monthly payments of principal and interest over a term of 15 years and will bear an interest rate of ¾ percent above the prime rate as determined by the Chase Manhattan Bank. However, in no instance will the interest rate be allowed to go below 10 percent per annum.

4. The Employer will issue promissory notes to the Plans in return for the 1986 Loans. The loans will be secured by a first security interest in the accounts receivable of the Employer in an amount equal to at least 200 percent of the outstanding loan balances throughout the term of the loans. The receivables represent amounts due to the Employer from its customers for medical services. Security agreements will be signed by the Employer and the Trustee under which the Employer grants to the Trustee on behalf of the Plans a security interest in the accounts receivable of the Employer. The Employer has currently and expects to continue to have sufficient accounts receivable to serve as collateral for the 1981 and 1986 Loans to the extent required under the relevant exemptions. As of August 1, 1985, accounts receivable of the Employer totaled $9,439,828. Recent data indicate that over 50 percent of the receivables generally are collected within 60 days. If the proposed exemption is approved, and because the applicant agreed in its security agreement for the 1981 Loan not to grant a security interest which may conflict with the security interest granted for that loan, the security agreement entered into under PTE 81-65 will be amended to permit the granting of the security interest in the 1986 Loans as described above. To the extent accounts receivable are required to be used as security for the 1986 Loans, no other security interests will be granted in the accounts receivable of the Employer.

5. The partners of the Employer will personally guarantee the payment of the promissory notes as to both principal and interest. The individual liability of each partner under the guarantee will be limited to his or her pro rata interest in the Employer.

6. The Employer represents that, with respect to these transactions, the Trustee will serve as independent fiduciary and will operate with complete discretion. The Employer represents that the Trustee is independent of the Employer and of any partner of the Employer. The trust department of the Trustee has custodial responsibility for over $19 billion in assets and is one of the 100 largest departments in the United States in terms of both assets and revenues. The Trustee certifies that the 1986 Loans are an appropriate investment for the Plans and are in the best interests of the Plan participants and that the terms of the loans are commercially reasonable. The Trustee states also that it would be willing, in its separate commercial lending capacity, to lend to the Employer the same amount of money and on the same terms as those set forth in the application. The Trustee will monitor the level of the collateral used in securing the 1986 Loans and will ensure that the collateral is maintained at no less than 200 percent of the outstanding balance of the loans plus interest due throughout the term of the loans, based on quarterly reports of the Employer. The Trustee certifies that the accounts receivable of the Employer are of high quality and are adequate to provide sufficient security for the 1986 Loans. In the event of any default, the Trustee will have the right to enforce full collection of the loans. The Trustee states that all payments of principal and interest on the 1981 Loan entered into under PTE 81-65 have been received timely and in full and all other terms of the exemption have been complied with.

7. In summary, the applicant represents that the proposed transactions will satisfy the statutory criteria of section 408(a) of the Act because: (1) The Trustee, an independent bank fiduciary, certifies that the transactions are in the best interests of the participants of the Plans and that the terms of the loans are commercially reasonable; (2) the 1986 Loans will be secured by a first security interest in accounts receivable of the Employer; (3) the accounts receivable of the Employer will at all times be maintained at no less than 200 percent of the balance of the 1986 Loans; (4) the partners of the Employer will personally guarantee the payment of the promissory notes as to both principal and interest; (5) all payments under the 1981 Loan from the Employees Plan to the Employer made pursuant to PTE 81-65 have been received timely and in full; (6) in the event of any default, the Trustee will have the right to enforce full collection of the 1986 Loans; (7) the independent bank fiduciary certifies that the accounts receivable of the Employer are adequate to provide sufficient security for the 1986 Loans, and will monitor the level of the collateral on a quarterly basis throughout the term of the loans as well as all terms of the 1986 Loans on behalf of the Plans; and (8) the Trustee represents that it would make the same loans as the 1986 Loans to the Employer on the same terms and conditions.

For Further Information Contact: Paul Kelty of the Department, telephone (202) 523-8882. (This is not a toll-free number.)

VOL 51 ISS 82 AP 29 1986 UMI

McInerney & Dillion, Professional Corporation, Profit Sharing Plan and Trust (the Plan) Located in Oakland, California

[Application No. D-6427]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed loan by the Plan of $175,000 to McInerney & Dillion, P.C., the Plan sponsor, under the terms and conditions described in this notice of proposed exemption, provided that such terms and conditions are not less favorable to the Plan than those obtainable by the Plan in an arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. McInerney & Dillion, P.C. the Plan sponsor (the Plan Sponsor), is a law firm located in Oakland, California, consisting of fourteen attorneys.

2. The Plan had approximately $730,000 in assets as of June, 1985, and had 18 participants as of August 9, 1985. The trustees of the Plan are William H. McInerney and Haradon M. Dillion.

3. The Plan proposes to lend $175,000 (the Loan) to the Plan Sponsor to finance office renovation. The Loan amount is under 25% of the Plan's assets.

4. The proposed Loan will be repaid in equal monthly installments of interest and principal over a period of sixty (60) months, will accure interest at a rate of one and one-half percent (1½%) over the prime rate set by the Bank of America on the date of the Loan and will be adjusted quarterly thereafter. The Loan will be collateralized by a promissory note and security agreement duly effected in accordance with California law. Financing statements will be filed in appropriate state and county offices as required by the Uniform Commercial Code as adopted in California. The Loan will be secured by a first security interest in the accounts receivable of the Plan Sponsor. The applicant represents that the accounts receivable will be maintained at no less than 200% of the outstanding balance of the Loan at all times and will not be otherwise encumbered. The accounts receivable are not conditioned upon future performance by the Plan Sponsor, but are due and payable upon receipt by the Plan Sponsor's clients. Finally, the applicant represents that the financial statements of the Plan Sponsor for the past two years illustrate the ability of the Plan Sponsor to generate the income with which to repay the Loan to the Plan.

5. George A Malloch, Esq. [Mr. Malloch), of the San Francisco Law firm of Kaplan, Russin, Vecchi, Eytan & Collins, has agreed to serve as the independent fiduciary for the Plan with respect to the Loan. Mr. Malloch represents that he is qualified to serve in this capacity by virtue of his experience as an attorney with practice in business and tax law, and is aware of the duties, responsibilities and liabilities entailed in acting as independent fiduciary with repect to the Loan. Mr. Malloch further represents that he is not in any way related to the Plan Sponsor, the Plan or any of the principals thereof.

Mr. Malloch states that the proposed transaction is in the best interest of the Plan and its participants and beneficiaries since, in his opinion, the rate of return to the Plan would be in excess of that available to the Plan under other investments and would be one of the better performing assets in the Plan's portfolio. Mr. Malloch further states that the proposed Loan would be adequately secured by the accounts receivable of the Plan Sponsor.

Mr. Malloch represents that he reached this opinion after reviewing the Plan's most recent financial statements and the Plan's overall investment portfolio in terms of the Plan's liquidity requirements and the general diversification requirements of Plan assets.

In his capacity as independent fiduciary, Mr. Malloch will receive all Loan payments for the Plan, and will have the authority and responsibility of enforcing the terms of the Loan and accompanying security agreements, including making demand for timely payment, bringing suit or other timely process against the Plan Sponsor in the event of default, and monitoring the performance of the Loan, specifically including, but not limited to, insuring that the valueof the collateral securing the proposed Loan remains at no less than 200% of the outstanding balance of the Loan.

6. In summary, the applicant represents that the proposed transaction meets the statutory criteria under section 408(a) of the Act because: a) the Loan will be approved, monitored, and enforced by an independent fiduciary; b) the Loan will be secured by the value of the accounts receivable of the Plan Sponsor, which will at all times be no less than 200% of the outstanding balance of the Loan; c) the Loan will be for no more than 25% of the Plan's assets; and d) the Plan's independent fiduciary has determined that the Loan is prudent and in the best interest of the participants and beneficiaries of the Plan.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523-8194. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its particpants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 23 day of April, 1986.

Robert J. Doyle,

Deputy Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510-29-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[86-32]

NASA Advisory Council, Space Systems and Technology Advisory Committee (SSTAC); Open Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Task Force on Automation and Robotics.

DATE AND TIME: May 14, 1986, 8 a.m. to 4:30 p.m.

ADDRESS: National Aeronautics and Space Administration, Jet Propulsion Laboratory, 4800 Oak Grove Drive, Pasadena, CA 91109.

FOR FURTHER INFORMATION CONTACT: Dr. Melvin Montemerlo, Code R, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-2743).

SUPPLEMENTARY INFORMATION: The Space Systems and Technology Advisory Committee (SSTAC) was established to provide technology activities in the Office of Aeronautics and Space Technology (OAST). The Informal Task Force on Automation and Robotics, chaired by Dr. Stanley Weiss, is comprised of seven members and was formed to provide a review of OAST's automation and robotics program.

The purpose of the meeting is to provide the Task Force with in-depth briefings on the Telerobotics and the Systems Autonomy elements of the OAST Automation and Robotics program. The meeting will be opened to the public up to the seating capacity of the room (approximately 30 persons including the Task Force members and other participants).

Type of Meeting: Open.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

April 22, 1986.

BILLING CODE 7510-01-M

NATIONAL COMMUNICATIONS SYSTEM

National Security Telecommunications Advisory Committee; Closed Meeting

A meeting of the National Security Telecommunications Advisory Committee (NSTAC) will be held on May 22, 1986. The meeting will be held at United States Readiness Command (US REDCOM) in Tampa, MacDill, AFB, Florida.

May 22, 1986

—Call to Order
—Welcome Remarks
—Remarks by President's representative
—Opening Remarks
—Government response to NSTAC V Recommendations
—Review of ongoing NSTAC activities
—Information briefings
—Closing Remarks
—Adjournment

Due to the requirement to discuss classified information in conjunction with the issues listed above, the meeting will be closed to the public in the interest of National Defense. Any person desiring information about the meeting may telephone (202-692-9274) or write the Manager, National Communications System, Washington, DC 20305-2010.

Charles F. Noll,

Captain, USN, Assistant Manager, NCS Joint Secretariat.

NATIONAL FOUNDATION ON ARTS AND HUMANITIES

Music Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Solo Recitalists Fellowships Section) to the National Council on the Arts will be held on May 14-15, 1986 from 9:00 a.m. to 5:30 p.m., Room 730 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC 20506.

A portion of this meeting will be open to the public on May 15, 1986 from 11:30 a.m. to 1:30 p.m. to discuss Policy and guidelines.

The remaining sessions of this meeting on May 14, 1986 from 9:00 a.m. to 5:30 p.m., May 15, 1986 from 9:00 a.m. to 11:30 a.m., and May 15, 1986 from 1:30 p.m. to 5:30 p.m. are for the purpose of Panel review discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsection (c)(4), (6) and 9(B) of section 552b of Title 5, United States Code.

If you need accommodations due to a disability, please contact the Office for Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW, Washington DC 20506, 202/682-5532, TTY 202/682-5496 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call 202/682-5433.

April 22, 1986.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-390 and 50-391]

Tennessee Valley Authority Watts Bar Nuclear Plant, Units 1 and 2; Order Extending Construction Completion Dates

Tennessee Valley Authority is the current holder of Construction Permit Nos. CPPR-91 and CPPR-92, issued by the Atomic Energy Commission [1] on January 23, 1973, for construction of the Watts Bar Nuclear Plant, Units 1 and 2. These facilities are presently under construction at the applicant's site on the west branch of the Tennessee River

[1] Effective January 19, 1975, the Atomic Energy Commission became the Nuclear Regulatory Commission and permits in effect on that day were continued under the authority of the Nuclear Regulatory Commission.

VOL 51 ISS 82 AP 29 1986 UMI

approximately 50 miles northeast of Chattanooga, Tennessee.

On November 19, 1984, the Tennessee Valley Authority (the applicant) filed a request for an extension of the completion dates. This request was amended by letters dated September 3, 1985, and January 31, 1986. The extension has been requested because construction has been delayed by the following events:

1. Delays in completion of piping analysis, hanger design, and installation.
2. Delays in completion of work in support of the preoperational test program, including resolution of deficiencies identified during testing.
3. Delays in the completion of instrument sensing lines installation.
4. Modifications resulting from 10 CFR 50, Appendix R, fire protection requirements.
5. Delays resulting from analysis and modifications required to resolve concerns raised in TVA's Employee Concern Program.
6. Delays resulting from resolution of environmental qualification of electrical equipment documentation problems.
7. Selection of a site director.
8. Delays resulting from resolution of welding problems.

This action involves no significant hazards consideration; good cause has been shown for the delays; and the extension is for a reasonable period, the basis for which are set forth in the staff's evaluation of the request for extension dated November 19, 1984, as amended by letters dated September 3, 1985 and January 31, 1986.

Pursuant to 10 CFR 51.32, the Commission has determined that extending the construction completion dates will have no significant impact on the environment (51 FR 12662).
